Article: Oamaru's "Heritage Radio 88.4 FM"

Compiled by Peter Grenfell Oamaru

Tucked away in Harbour Street in the historic precinct of Oamaru is a little known Radio Station. Heritage Radio 88.4FM made its first broadcast 20 April 2001 from The Electricity Museum 4B Harbour Street, Oamaru, New Zealand.

The station is run by volunteers and caters for all interests. It plays a good selection of music from old time country through to early NZ, nostalgia, classic, and music from the shows. At present the coverage is limited to the southern part of Oamaru on a frequency of 88.4FM with a transmission power of 0.1 Watts. Volunteers staff the station from 10am to

Charlie (Manager) and Eunice (Announcer) Frazer of Heritage Radio 88.4FM

Contribution deadline for next issue is Wed 6th Nov 2002. PO Box 3011, Auckland

4pm each day. Heritage Radio then plays continuous music without announcements for the next 18 hours. The North Otago Branch of the N. Z. Radio D.X. League helped in its initial establishment by providing the small FM transmitter.

With the help of all volunteers and the North Otago community the station is developing into a valuable resource by providing training in announcing skills.

Alongside the Radio Station is a static display of early electrical equipment showing the history of electricity in this area. For added interest is a display of early radio equipment and radios. Also housed in the Museum is a small theatre. Early films are available for viewing during the museum's opening hours. Once a month movie buffs can view early full-length films.

It is amazing that even though the station has been on air since April 2001 only one DX'er has logged and obtained a QSL from Heritage Radio 88.4 FM.

Happy 80th Birthday 4XD. On October 4, the last remaining B station of early New Zealand broadcasting celebrated its 80th year of continuous transmission since 1922. This makes the station the oldest in the Southern Hemisphere according to station announcements.

Photo. (c) Eric Shackle Collection, NZRDXL Archives

Originally, they used the callsign 4ZB.

4XD Dunedin currently broadcasts on 1305 AM with an Easy Listening music format and keeps links with the Otago Radio Association who started the station so many years ago.

Meanwhile, back in 1920, the **ARRL** (American Radio Relay League) began producing its *Radio Amateur Callbook* to help those interested in the new world of radio. In 1997, publishing of the telephone size directory was ended, and a CD version introduced. Now, the CD version is ending in 2003, as the publishers say *due to accessibility to the FCC database via the Internet, sales have declined to levels that make it unprofitable to publish future editions.*

In my opinion, the *World Radio TV Handbook* is probably headed the same way. It's like a maze to find anything any more, and often the information is out of date. This despite the best efforts of DXers worldwide to keep the content correct, along with help from some international broadcasters. For radio listeners without internet access, it still performs a useful purpose, but I wonder for how much longer.

Jack Fox, Mosgiel says the recent sabotage of the 4BH Brisbane tower system isn't an isolated case. He writes that **Radio Susy 531 AM** which serves Sussex and Surrey in England also had its tower cut by vandals and the station was forced to close down on August 31. Whilst in Brisbane recently, I noted 4BH is still using the 1kW emergency transmitter as their signal is very weak in surrounding areas.

Ray Crawford, Forestdale, QLD notes that a good website for radio history is www.qsl.net/vk2dym/index.htm and also hosted us on part of our recent visit across the Tasman. Ray has a wonderful collection of radio archival material, amongst which I found several gems, including an original 3EX Melbourne QSL from the 1930's.

In the November 20 1931 **Radio Log** magazine of the NZ DX Club, there are details of the following **three shortwave stations on air in New Zealand in 1931**. These were during the days when private radio still flourished in New Zealand and two of the stations carried their own separate SW programs.

In **Wellington**, **2ZX** broadcast with 180w on 6060kc from the (still standing) Hope Gibbons Building on Dixon Street; in **Christchurch**, **3ZC** broadcast from 230 Tuam Street with

50w on 6000kc, and in **Dunedin, 4ZO** broadcast from The Octagon on 6100kc with 30w simulcasting the AM station. These were very early SW broadcasts, and thanks to Ray, we now know a little more about them.

Original Radio Art isn't often seen these days, but on a recent visit to Nambucca in NSW, I came across a great example at the new studios of 2NVR-FM 105.9. The studios were opened on August 18, and the front window has a painting of an enthusiastic DJ at work. If you come across other examples, send them in and we'll include them in the column if we can.

Incidentally, 2NVR-FM takes some programs from the NIRS, or **National Indigenous Radio Service**, and they've got a useful website at www.nirs.org.au which also includes a full list of all stations, including callsigns, frequencies and often phone numbers and email addresses, which carry aboriginal broadcasts. The list is far longer than I imagined possible.

Sometimes, this hobby needs much patience. Some 32 years ago, I used to hear ZNS Bahamas 1540 regularly, but could never QSL them. In 1989, whilst on vacation on Harbor Island, I logged the 3 AM and 1 FM ZNS outlets and have been trying for some 13 years to secure a QSL.

I recently found an email address for the GM of ZNS which sounded more promising than others. Imagine my surprise to get an almost immediate reply, and now I have four Bahamas QSLs, a new country verified and some more enthusiasm for sending reports. Those follow ups can sometimes score a bullseye, so dig out the old reports and get them away again. And, never give up on a station.

Think of **HCJB** and you may also think of **bananas**, as a large proportion of New Zealand's imports of the fruit come from Ecuador. Well, here's another HCJB-banana story.

SW readers will know that HCJB is building a new transmitter complex at **Kununurra**, **Western Australia**. It's due to begin on December 22, 2002 with an Asian Service, South Pacific Service and an Ethiopian Service. The site is near the Ord River and is located on a farm. The farm is planted in crops of sugar, **bananas**, mangoes, and

news.)

of sugar, **bananas**, mangoes, and **stage 1 from Kununurra**:
pawpaw and income from the sale of these crops helps the HCJB project. (**Ralph Sutton**, **Wellington** kindly sent *Many Hands* the HCJB New Zealand publication which includes this

Allen Graham, HCJB DX Partyline, Quito meanwhile writes to say: You have a fine publication. Thank you for all the NZRDXL does to promote international radio. We appreciate you.

Graham Kemp, Brisbane, QLD recently hosted us on a tour of the **TAB Radio Network** studios. Interesting to see how they use a three announcer line-up at a very long console, one with current results and continuity, one scooping along behind with past dividends or inquiry results, and the third scouting ahead with news of upcoming races and watching when live commentaries are scheduled.

The ID Radio TAB is used for all the stations in the network, which covers Queensland, Northern Territory and South Australia, and the same ads are used in all markets. Graham also edits QNEWS with WIA for hams in Queensland and recently included the RAAF Radio — The Voice of the Islands item from the Radio Heritage Collection © to coincide with Remembrance Day Weekend. Graham says several old diggers called to tell how much they enjoyed the story.

Other publications we've seen recently include **Southland DX Digest** from Invercargill (**Paul Aronsen** reports that just 16 SW QSLs were tabled in competitions for the past year and some local members have been listening on old receivers such as an Atwater Kent and an Ecko PB199 with good results.) which has begun its 66th year of issue; and **Dial News** from Oamaru (where **Basil Jamieson** notes good sunrise DX, high solar activity affecting higher frequencies, and the Vernal Equinox starting, which often brings good reception through to the end of October.).

Some good websites for propagation news include www.oulu.fi; www.arrl.org; www.arrl.org; www.wm7d.net; www.wm7

Violet Harrison, Nelson was winner of our 2nd subscriber contest. Violet says: *What a lovely surprise. Delighted to receive this superb book and will certainly enjoy reading it. Not sure when I'll be qualified to contribute anything of interest, I'm just in the learning process and don't have an exterior antenna.*

Have just started listing foreign language broadcasts heard between 1800-2300 and it's great fun learning to recognise languages even though I can't understand the content.

It seems the **African Contest** run recently proved very popular with members. African stations reported to the magazine **increased an amazing 150%** compared to the same two months in 2001. From 53 to 132 loggings, which helped keep overall SW loggings at the same level as 2001.

Well done and **Congratulations** to **Paul Bailey, Hobart, Tasmania** for winning the SW Under 9 section, and **Gunther Jacob, Passau, Germany** for winning the SW Over 9 section. Your T-shirts from China Radio International have been sent already. A special thanks to Paul Ormandy and Ian Cattermole for contributing their own listing of African SW signals heard in New Zealand. We'll give some thought to a new competition now.

The Radio Heritage Collection © at www.radiodx.com continues to attract a lot of interest from visitors all over the world, many of whom are sharing their own stories.

Recent visitors include **Lou Sander, Pittsburgh PA (W3BOA)** who writes: *I saw WXLJ, a radio station at Cold Bay, Alaska mentioned at your website. Allen Greer, my father-in-law, was involved with WXLJ. I have several photos of him in Cold Bay, one of which shows the front door of the station. The WXLJ call letters are on the door.* (The photos from Lou will eventually appear on the website to illustrate the WXLJ story. The AFRS was born in Alaska).

Ernie L Gunerius starts his story with the following: In the early evening, after a hot muggy day, at about 7pm, a group of my fellow soldiers and I were listening to a music program broadcast from the AFRS station WVTR Tokyo. (What follows is a firsthand report of the famous Tokyo Bay Sea Monster which 'attacked' Tokyo that night, causing mayhem in what was a repeat of the 'War of the Worlds' style broadcast. Ernie has kindly let us include his story in the Radio Heritage Collection © and it's a wonderful read right now at www.radiodx.com.

Bob Stanley (email <u>JQcat@aol.com</u>) writes I served with the staff at WVTP Seoul, Korea in 1945-46. I would very much like a roster of our staff back then. We served under Lt. David Greenspan and I remember the names of a few guys, but I would like to know again the names of the rest. Any information would be much appreciated.

Owen Raiford Jr (email raiford@comcast.net) has a story for our Utilities DXers: A brief story about a morse intercept I made whilst stationed at Misawa AFB, Japan during October 1962 on the midnite shift. Working our 'search' section, I picked up traffic that Russian Migs had scrambled on one of our U2 flights.

I didn't know it then, but our U2 had lost electronics and strayed into forbidden airspace, thus the Russian scramble. It was very sensitive for a while and there were all available brass looking over my shoulder, watching the traffic. Everything turned out OK, the Migs were called off and the U2 eventually retained his electronics and got back into safe airspace.

Over the past 18 months, we've gradually added more information about Canton Island, but we never expected to get this message in late August from Edwin E Calhoun, Arlington TX who wrote: I was a USCG Radio Operator at a LORAN station on Canton Island from 3 December 1945 to June 1946. Our official naval callsign was NSN. I operated a 5 watt radio station with the callsign WXLF and played music and news at night while on duty. You could hear the station throughout the small compound of six Quonset huts in about a 1000 square foot area.

Thanks to Ed, you can now read the full WXLF story at www.radiodx.com and fill in some of the gaps about this early AFRS station on Canton Island. By the way, Ed just happened to keep an old photo of the WXLF studio hut, which we're proud to share here in Talkback.

WXLF Studio Hut
Photo Edwin E Calhoun, Radio Heritage Collection (c)

Eric Hitchcock, England wrote at about the same time: The Forces Radio in the Pacific and Asia listing as at May 1 1946 was of particular interest, as I arrived in Colombo, Ceylon a few weeks before that. I was one of a party of twelve Royal Signals army radio mechanics who had additional experience at the BBC, and were flown out to operate the Marconi 100kW SW transmitter of Radio SEAC. The station had been on the air for about a year using an RCA 7.5kW set

Eric has written a history of Radio SEAC using his own knowledge, and considerable research which he has kindly offered to share with us once it's completed and we're glad the Radio Heritage Collection © has helped tidy up some queries Eric had, and particularly, the knowledge of **Dr Adrian Peterson** who spent some years at AWR Sri Lanka.

During research at Ray's place, I also came across mention of **The Pineapple Network** of WVTZ Hawaii on 1300kc and approximately 1260kc on Oahu. This is mentioned in the Jan/Feb 1948 issue of the ADXRC *Skyrider* magazine. If anyone knows anything more about this network, please let us know. The WVT call sequence shows it was an AFRS station of which there were several on the island.

New Articles added to the Radio Heritage Collection © recently include: Radio brings information to Bamiyan (Martin Hadlow's latest report from Afghanistan); WVTR and the Japanese Sea Monster; WXLF Canton Island; St Pierre et Miquelon On the Air; Aloha Shortwave (Hawaii); VK2ME and VK3ME (Sydney/Melbourne); Ship Broadcasting from New Zealand Waters; The Wandering Apache (WVLC reprise); The Mystery of Irish Radio History; KHJ Pago Pago (American Samoa); Calypso Radio (Jamaica); AWR in the Exotic South Pacific; First Music Broadcasting from a Ship (1906); World War II California on Shortwave; When Cricket Fever Hit New Zealand; America's First Floating Broadcaster; Formation of the ABC (Australia) and AWR in Southern Asia.

Whilst in Sydney, I also met with **John Wright** and **Tony Magon** (many older members will remember Tony from his NZ days) who are actively involved in a project to put all the ADXN magazines onto CD roms so they can be preserved and easily accessed. John is also well known as official QSL Manager for Rete Italia and other AM stations.

From November, extracts from *Talkback* are scheduled to begin appearing in the ADXN so Australian DXers can also share some of our news, and I'll be including some Australian items from across the Tasman.

In the meantime, **you can win The Rough Guide to Internet Radio** simply by subscribing to the electronic version of the DXT between September 1 and November 30 2002. You'll go in the draw by subscribing at www.radiodx.com during this period. This 400 page book pulls no punches on the best software to listen to internet radio, and has a great guide to great programs you can hear on SW, AM and FM and which are streamed over the web. Sign up today, for over 500 pages of DX news every year with a real Pacific flavor.

Wherever your world of radio takes you this month, have fun and enjoy yourself and drop us a line to let us know what you've been up to and where in the world you've been. Just email: talkback@radiodx.com or write Talkback, NZ DX Times, PO Box 3011, Auckland, New Zealand.

We end this month with the *Talkback* takeover of Radio Hope Island at Sanctuary Cove, Queensland!. A very laid back sound, visit them at www.radiohopeisland.com

bandwatch.under9@radiodx.com Compiled by Ken Baird, Christchurch

Please note that all frequencies should be in Kilohertz and, $\underline{\text{time in UTC}}$ (= GMT = UT), # indicates reception out of NZ, initials in **Bold** indicates report sent. For reasons of accuracy some positive ID from the station heard is desirable, otherwise the ID of the station heard should be shown as tentative. Similarly for languages - either IDed, Presumed or Unid. Also, would you please add the date of logging to your information.

LOGGING OF THE MONTH

Goes to **Paul Ormandy** for R Imperio, PERU on 4389.9 at 250 Watts non directional. My thanks to all the contributors, with a good variety of loggings, particularly from Sth America. Re Cliff's logging on 5085, I checked 5085 at 0510 in the Radio Listeners' Database. Given as WWRB, Tennessee. Checked WWRB on the Internet and 5085 is WWRB on USB in EE, with WWFV the backup station at Mc Caysville, Georgia, USA on the same frequency, but AM. Both stations are owned and operated by World Wide Religious Broadcasters. 73's. Ken Baird

CONTRIBUTORS FOR THIS MONTH

AJS — Andrew Sunde, Ohai, ICF 2001, 5MHz dipole :CC - Cliff Couch, Paraparaumu, ATS 803A, 60m horizontal loop, 2x30m wires N/S & E/W : DN — David Norrie, Auckland, AOR 7030 : IC — Ian Cattermole, Blenheim, JRC NRD 535, T2FD and Alpha Delta antennas: JB — Jerry Berg, Lexington, MA, USA, R8, 165ft longwire : KAB - Ken Baird, Christchurch, R5000, Drake SW2, 15m wire, SW Eavesdropper: KVB — Kelvin Brayshaw, Levin, FRG-7, ICF-2001, 64m horizontal Loop : PWO — Paul Ormandy, Waianakarua, SPR4, Numerous Beveridges : RAD — Richard D'Angelo Wyomissing USA, R8B, Lowe HF 150, Alpha Delta sloper, RF Systems mini windom, Datong FL3, JPS ANC4.

Compiled by Andy McQueen, Trentham, Upper Hutt

Hello and goodbye from Trentham!! Yes this will be my last column from the North Island as from the end of this month my family and I are moving back to Brightwater which is just out of Nelson. I have enjoyed the fellowship with Wellington members but I am looking forward to going home to the Mianland and hope to catch up with other members in the Top of the South and below.

Please note that although we are in Daylight Saving Time all times given are UTC.

KHZ	TIME	COUNTRY STATION & PGM DETAILS INITIALS

AUSTRALIA:

HCJB Australia

Is about three months away from the start of broadcasting. The site in Australia will have a 100-kW shortwave transmitter, which is in the process of being shipped down in a container from Indiana to Australia. There will be three antennas. They are aiming for a target date of December 22, 2002. This is the culmination of a

project that has been in the planning stages for a decade. The location in northwest Australia is good for easily reaching Indonesia, Singapore, Malaysia, Asia in general and the South Pacific; there should be a reach of some 8,000 kilometers. This has the potential to reach 60% of the world's people. They hope to eventually build their own hydro-power plant if the funds become available. Two Australian engineers have been trained at HCJB's engineering center in Elkhart, IN. for the last month to become acquainted with the workings of the transmitter. Also, HCJB engineer Don Hastings will go to Australia around October 1st to help with construction of transmission lines, antennas and towers. Another engineer will go there in November, when the transmitter is supposed to arrive, and he will help with its installation. The first week of December, another engineer will oversee the final testing of the transmitter. After the New Year, a retired HCJB engineer will go to Australia, as will John Stanley.

HCJB is looking for volunteers with radio engineering backgrounds who would be willing to help get things started during 2003, and who can spend from two weeks to two months in Australia. HCJB Australia will broadcast in English only at first for ten hours each day, with five hours for the South Pacific and five hours for Asia. They plan to add other languages as soon as it is practical to do so; if it is possible to introduce a second transmitter by the end of 2003, that will make this possible, as well as additional English broadcasts.

There will be an ISDN line to carry programming from the studios in Melbourne to the transmitter site; later, as more transmitters are added, it will be more cost-effective to replace that with satellite feeds. The HFCC recently granted frequencies for HCJB Australia, and that will include the frequencies that HCJB has already been using to reach the South Pacific. Once the Australian site goes on-line, HCJB will no longer broadcast to the South Pacific directly from Ecuador. For India, they will start on 15130, and then change later in the day to 15135. They will probably QSL from the studios in Melbourne, although the details have yet to be worked out since there is so much else to be done; more will be announced. The ID that will be used on the air will not be "The Voice of the Andes;" the words "HCJB Australia" will be part of it, but the final form of the ID is to be announced later. For more information, one can go to the website at http://hcjb.org. Also, one may send an e-mail to HCJB Australia at office@hcjb.org.au (Lamb via Cumbre)

FIII:

International Broadcasting from Fiji!

Unfortunately it's not available on shortwave, but Fiji now has a de facto international broadcasting service on the Internet.

Namaste Fiji, a weekly programme for expatriate Fijians, has launched on Fijivillage.com, part of the Communications Fiji Limited group, which also includes radio stations Navtarang, FM96, Viti FM, and Legend. It's the only subscription-based website operating

NEW ZEALAND DX TIMES OCTOBER 2002 PAGE 18

out of Fiji. Access currently costs US\$35 per year. Namaste Fiji is presented by broadcasters from Radio Navtarang. The station's Programme Director Anirudh Diwakar said: "What's special about this show is that it caters specifically for an international audience. People living overseas will be able to interact or get involved with Namaste Fiji, by sending dedications, birthday calls and other thoughts via the net, so it's really an international radio from Fiji crossing national boundaries." Radio Netherlands Media Network.

Enquiries reveal that while there are no immediate plans for SW broadcasts there is a lobby pushing for such broadcasts to cater for the large number of expats living in mainly Australia, NZ and Canada and remains a possibility. (ED)

REST OF WORLD Kyrgyzstan:

A brief English News Bulletin can be heard from "Radio Kyrgyzstan, Biskek" from 2325 to 2330 UTC. The frequencies are 4010 kHz and 4795 kHz.

This bulletin in preceded by a bulletin in "Kyrghyz" followed by "Russian".

(GRDXC) Unfortunately time frame rules out reception at this time here in NZ. But they do have EE scheduled 4010 0915 and German at 1015. (ED.)

MALTA:

Here is the schedule for Voice Of Mediterranean as received from VOM.

Monday-Saturday. 0530-0600 Arabic. 6110. 1700-1730 Italian. 1730-1800.

English. 9605. 1900-2000. English 2000-2100. Arabic. 12060.

Sundays. 0500-0600. Japanese 17570. 0700-0800 Italian. 0800-0900 English.

0900-1000 Maltese. 1000-1100 French. 1100-1200 German. All on 9605.

1900-2000 English. 2000-2030 French. 2230-2300 German. 12060.

Transmitting sites = 9605khz. ROME. 12060khz. MOSCOW. 17570khz. KOMSOMOLSKI. VOM Radiol

SOUTH KOREA:

The B-02 schedule for Radio Korea International shows several new channels, with up to six 250 kW transmitters listed for simultaneous use from the Kimjae site. This reflects the upgrading of capacity there, and a new service directed to Australia and New Zealand is scheduled on 15225, from 0500-1100.

Other new channels listed include:

11945 0600-0900 to North America. 15155 2000-0100 to China

 15205 1200-1400 to Europe.
 15265 0600-0800 to South America

 15335 1000-1300 to South America.
 17750 2300-0100 to North America

 17755 1100-1500 to Asia.
 17780 2100-0000 to North America

17825 0900-1200 to Europe. 17860 0300-0400 to Asia

17870 2200-0000 to Hawaii. (CUMBRE DX)

YUGOSLAVIA:

Radio Yugoslavia Resumes Shortwave Broadcasts

Radio Yugoslavia has resumed its shortwave broadcasts after a long suspension during which its programmes were only available on the Internet. Following an agreement be-

tween the Federal Republic of Yugoslavia and the Ministerial Council of Bosnia-Herzegovina, the Central Regulatory Agency for Communications (CRA) has issued a long-term permit to Radio Yugoslavia to broadcast its programmes again via its shortwave transmitter site in Bijeljina, Bosnia-Herzegovina. Broadcasts resumed on Friday 20 September.

© Radio Netherlands Media Network

LATIN CORNER. EL SALVADOR:

17833.3v YSDA R Imperial, Sonsonati, 2200-2350 Sept 19th. Carrier on at 2200. Under modulated signal required near full quieting before audio was present. Adjacent channel QRM fromstation on 17835 gone after 2330. Near perfect greyline path between El Salvador and here in TNaround 2345. Signal strength peaked both vesterday and today to nice level at 2345. Caught two clear stationIDs given by male announcer at 2347, 17833.19. Radio Imperial, 20 Sep, 0043-0105, upbeat pop and campo vocals some with religious themes. 0045 Ad for religious school, 0054 canned ID "...Radio Imperial, ocho cientos diez A-M", followed by live announcer with talk. Faded out by 0105 and apparently signed off sometime after that. Fair signal with occasional good peaks (S-7) and deep fades. Het from above (17835.0?). Also low arowl on the signal from another apparent very close carrier. After 0105 only a single carrier was heard, minus the arowl so I assumed they signed off then. Thanks to tips from George Maroti and David Hodgson (Mark Mohrmann, Coventry VT, NRD 535D, DX LISTENING DIGEST) Additionally to the fine info on Radio Imperial, 17833v, this website http:// www.gospelcom.net/lpea/spanish/radio/elsalvador.html which indicates also that this is a normal shortwave transmission. Rather than a harmonic. E-mail address given as AELP@palau.ora (ED) (Worth watching out for here in NZ)

GUATEMALA:

Cultural Coat·n back on 4780 Radio Cultural Coat·n, Guatemala, reactivated on 4780 kHz, and heard 2 September 2002 at 1045-1115. Before the hour, noted religious music and comments in Spanish by a man. On the hour canned ID as, "... Radio Cultural Coat·n, 4780 kHz onda corta, banda 60 metros, ... San Sebasti·n Coat·n, Republica de Guatemala, Centroamerica". After the hour only music. Signal improved with time from poor to good. According to Hackmore's SW Archive not reported during the last two years. Chuck Bolland, USA, DXLD, (HCDX)

PARAGIIAY:

Radiodifusion America: Greetings from Paraguay! To advise that our test transmissions on 7300 KHZ are now directed toward 40 and 220 degrees, from Magnetic North. The frequencies 7737 and 15185 KHZ have been discontinued, for the moment.

We hope to begin testing, shortly, on 120 and on 31 Metres. Transmissions also continue on 1610 KHZ, using our 125 Metre tall tower, and beamed towards 184 degrees, from Magnetic North. Tests are on-air, the 24 hours, daily. Your reception reports will be most welcome! With best regards. Ad·n Mur, Technical Advisor, Radiodifusion America, Asuncion, Paraguay ramerica@rieder.net.py (via CUMBRE)

1955-2030

2030-2200

Compiled by Adam Claydon, Te Kuiti

Hi all! Not long now till summer time. Hopefully we'll get some good DX. On to this month's news:

Auckland FM update 106.4 "Hope City Radio, 106.4FM" noted strongly in vicinity of Auckland Airport and as far as the city centre. Gospel music format. 106.8 "Unforgettable Music 107 FM" has a West Auckland outlet on this frequency running // to 107.0. 107.0 "Hindi FM" with strong signal near Auckland Airport blocking TLC and Unforgettable Music quardbanders. (Bryan Clark)

Coast Radio gets bigger Coastal FM in the northwest of Tasmania in Wynyard (located on 106.1 MHz) has installed two new repeaters (translator stations) on 104.7 MHz in Devonport and Smithton on 88.9 MHz, The 106.1 MHz outlet covers the Burnie/Wynyard area with a population of 26,000 people. These new translators take its audience up to some 87,000 people. (Here in Launceston the 106.1 MHz and 104.7 MHz stations can be heard, but with the present radio and antenna up it is very weak most of the time.) The 88.9 MHz is impossible to hear, due to video buzz from ABC TV's ABNT3. (Martin Greer)

TNT9 — The birthday station News about local Launceston TV station TNT9 (Southern Cross TV) celebrated 40 years of commencement of transmission on Sunday the 26th May 2002. (I can barely remember the opening day, although I was only about 2 years old back in 1962 — Martin Greer)

More: potential FM station for Launceston A group of local ethnic people of non English speaking backgrounds, have come together, to form an association in Launceston to play music exclusively from other countries, other than English. Australia, New Zealand, UK, and North American music in English is usually heard on local radio. This group will have to put up their hands for any new licenses here in Launceston (Martin Greer)

A new Hobart station starts with a midnight shadow At 12:01am (local time) on 23rd August 2002 a new station came on air on FM from the Hobart campus of the University of Tasmania going under the name of Edge FM on 99.3 MHz. The station has a temporary onemonth license (the idea of this station was first mooted back in 1999). They hope to play 50% Australian music and possibly 25% Tasmanian of this. Other programming will include documentaries, news and current affairs. The station is competing against local Hobart community station "Cadence" for a permanent license. The Cadence station was also on 99.3 MHz according to recent Hobart Mercury newspaper's daily lists. Incidentally the 99.3 MHz frequency in Launceston occupied by a local tourist information station has been off air for months. (Martin Greer)

AM in Hobart goes FM in Launceston I recently spoke by phone to a spokesperson a Mr Phillip French at 7RPH on 864 kHz in Hobart, about the stations sojourn into the north of the state. 7RPH is to have an outlet here on 106.9 MHz. The transmitter is to be located at Juliana Street, West Launceston (just a stones throw from myself). The antenna will be omnidirectional with a power of 300 watts — could be on air in about 3 months. The 7RPH people hope to do the same thing down the northwest coast of Tasmania, but at the time I spoke to the man, he could not confirm any further details. (7RPH on 864 kHz in Hobart is to remain as is — Martin Greer).

Southern Cross TV and WIN-TV go at it together SCN-TV and WIN-TV (Tasmania) are to form a new company called TAS-TV to gain a new statewide digital TV licence. Everything is hoped to be up and running in about 18 months. This new outlet will broadcasts mostly Network TEN Australia programmes. The current broadcast act allows both SCN-TV and WIN-TV to apply together for this licence, and is probably the same in similar situations here in Australia. The irony of the use of TAS-TV as new company name will not be lost on TV DXers as back in the 1980s SCN-TV TNT9 in Launceston and WIN-TV TVT6 in Hobart were once owned by the same company, which at the time called itself TAS-TV (so some things never change much — Martin Greer).

Some news of Sporadic E DX from Queensland On 26th June 2002 UTC RTQ0 Toowoomba, Darling Downs, Queensland was received from 0551 UTC until 0751 UTC. Also received at 0548 UTC until 0751 UTC was ABC-TV ABG2 Brisbane, Queensland. Another station received on FM was 4JJJ on 104.1 MHz in Toowoomba, Darling Downs, Queensland was received briefly from 0638 UTC until 0642 UTC.

Newspaper articles

Thanks to Martin Greer of Tasmania for the newspaper articles from the Launceston Examiner and the Hobart Mercury, and to Winston Lashley of Auckland for the newspaper article about Niu FM from The Islander newspaper.

Upper Hutt: New Station on 88.4. Promoting itself in the Upper Leader (newspaper) as "The New Locally Owned Independent radio station in Upper Hutt KC FM". Only in Upper Hutt, Free Community Announcements, Cheap Radio Advertising, Local News and Views. Lists phone numbers as 04 586 8788 Fax 04 586 8789 Email sales@kcfm.co.nz. (Claims in the newspaper that 'Only in Upper Hutt' but I think this is part of KC FM (Kapiti Coast) Network. Mark Nicholls)

PAGE

utilities@radiodx.com Compiled by Evan Murray, Auckland

On 28 September John Charlton, Oamaru, logged 8 light aircraft departing Norfolk Island with an ETA of Keri Keri after touring Australia. After flying under 17,000 km in one month Tom Williams and his wife, of Greymouth touched down on the West coast town last week. Mr Williams, who owns a Cessna 177 last month left Greymouth in his single engine plane headed for Australia. The trip saw him travel from Greymouth to Blenheim, Keri Keri and Norfolk Island before landing at Sydney. A total of 19 aircraft made the journey from NZ becoming known as Ithose crazy kiwisÓ to Australian flight oficials, as they made their way down the Gold Coast and across to the outback. While there were no close calls there was plenty of awe inspiring scenery to keep them entertained. For much of the time in the outback they were able to cruise at heights as low as 250 metres, allowing them a close inspection of the scenery.

With all the planes flying in a buddy system, and carrying 2 GPS units there was no chance of getting lost. The group had expected air currents to be a factor but in the end it was rogue camels which were more of a threat. All aircraft had to be fenced off when parked overnight as bull camels had been known to attack planes. (Greymouth Evening Star)

NM - Neville McKenty, Napier - NRD 545. Icopm R70 with various antennas

PP - Phil van de Paverd, Auckland - Icom R71E with 30 m wire

MJ - Mike Jackson, Fielding - Kenwood TS 440 S with balanced 13 mhz dipole

EM - Evan Murray, Auckland - Kenwood 5000 with T2FD

APOLOGY FOR LATE DX TIMES

My apologies for the later than normal delivery of this months DX Times. I was involved with a project that took up more of my time than expected.

Please note that because the November issue closes on Wednesday 6th November (almost one week into November) it may appear that the November issue is late.

The December DX Times closing date is Wednesday 4th December - We (the sub-editors and myself) will try to get the magazine out promptly to miss the Christmas mail rush and then shutdown of mail deliveries over Christmas. (Mark Nicholls - Chief Ed)

adcom.news@radiodx.com

ANNUAL GENERAL MEETING — FINAL REMINDER Our Patron and foundation member JACK FOX will be the special guest speaker at the 54th annual meeting of the NZ Radio DX League, to be held at 1400 hrs NZLT on Sunday 27 October at the Western Suburbs Radio Club premises, 3000 New North Road in Avondale, Auckland. Refreshments will follow the business meeting. Please contact National Secretary EVAN MURRAY if you plan to attend — see back page of the magazine for contact details.

<u>WITH REGRET</u> we report the passing of member SIR JOHN DALHOFF of Christchurch. John's widow Joy writes that her husband had subscribed to, and enjoyed, this publication for 20 years. A message of sympathy has been forwarded to the Dalhoff family on behalf of all members.

<u>THANK YOU</u> to member **PETER GRENFELL** for his recent donation to League funds.

EARLY RENEWAL PRIZE DRAW Congratulations to **JOHN RICHARDS** of Dunedin, winner of the radio book voucher from Burnet Pollard Books.

HISTORY ON VIEW The open day at the BCL Transmitting Station at Henderson Auckland last month provided a great historical view of broadcasting in our country with transmitters and related paraphernalia on display dating back to the 1930's. Thanks to **YURI MUZYKA**, one particular item that caught my eye was the station logbook, including this handwritten extract dated Thursday 11 December 1941—"6.30. Instructions received from Control Officer Whenuapai Air Base that (antenna) mast lights will not be required in future. Should any instruction be received from elsewhere regarding lights, it must be referred to Control Officer Whenuapai before being acted upon. This includes any instructions from Hobsonville or Mechanics Bay. 6.45. Above instructions confirmed by 'ring-back'." This of course is a few days after the Japanese attack on Pearl Harbour which brought the United States into World War 2. Watch the DX Times for more reports on the open day.

PACIFIC ASIAN LOG In Seattle Washington USA, BRUCE PORTZER has recently updated the Pacific Asian Log (PAL) and posted it on his web site. PAL is a comprehensive listing of medium wave stations in Asia and the Pacific basin. It lists over 3600 stations in 59 countries, covering an area as far west as Afghanistan and as far to the east as Alaska. It's over 100 pages long and can be downloaded from http://www.qsl.net/n7ec; The website also includes audio files and logs of Trans-Pacific DX heard in the northwestern U.S. This log is mainly an update to the January 2002 edition, with many changes and additions. As with previous editions, the log is available sorted by country or by frequency. Bruce thanks everyone who has commented on previous editions and says contributions are always welcome and appreciated. (IRCA via Glenn Hauser's DXLD)

CUMBRE DX After 415 editions, the weekly email adjunct to the "DXing with Cumbre"

programme aired by World Harvest Radio has come to an end. It has been replaced by a mailing list (list serve) which means messages are received instantly or in a daily digest. To stay eligible to receive Cumbre DX messages, one must contribute at least once a month. If you wish to subscribe to the list serve, go to† http://cs2.ralabs.com/mailman/listinfo/cumbredx We recommend you give it a try. Or, you can tune in to the weekly radio programme via World Harvest Radio — best times in the South Pacific (though these will possibly change late October) are via KWHR in Hawaii: Saturdays 0500 or 0600 UTC on 17780, 1000 on 11565 and Sunday 0430 on 17780kHz. Our thanks to HANS JOHNSON and ULIS FLEMING for the great work they do coordinating Cumbre DX!

DONT THROW THOSE OLD QSLs AWAY! While the DX League has built up an impressive historical archive of QSL's and related radio memorabilia at the Hocken Library in Dunedin, we note growing interest in these items by individual collectors. Recently a 1923-vintage radio amateur QSL issued by 1AW, Hiram P. Maxim, co-founder and first president of the American Radio Relay League sold for US\$2125 on the eBay Internet auction site. Until the 1AW card sale, the highest known price paid for a single QSL card was more than \$1100 for an AC4YN QSL from the Tibet DXpedition of Sir Evan Nepean, G5YN, who died last March at age 92. (Mike Terry via Glenn Hauser's DXLD)

unofficial.radio@radiodx.com Compiled by Paul Ormandy, Oamaru

Hi all, Well, as predicted last month the pirates have returned to the dials particularly on the lower frequencies. The best signal of late has been Tower Radio from The Netherlands every Sunday around 0630 past 0700 on 7485 with a surprisingly good signal.

Andrew Sunde from Ohai in North-Western Southland checks in with his first contribution to this column. Andrew is just 13 years old and is showing great promise! Welcome Andrew, and feel free to contribute often.

Trail Contributors: **AJS** — Andrew Sunde. **D'Angelo** — Richard D'Angelo in Wyomissing, PA.. **PWO** — ye ed.

PA PW	∪ — ye e	2 0.
5.5	1907	CLANDESTINE Unid with mentions of 'democratici Kurdestan' in ID, good
		with talk in Kurdish 25/9. AJS
4085	1905	CLANDESTINE Voice of Iraqi Kurdistan, good with talk and music in
		Kurdish 25/9. AJS
9.9	0345	PIRATE (Euro) Laser Hot Hits (tentative), 0345-0410 Sep 21, rock music
		with a man announcer speaking between selections. Mention "Laser" at
		0347 and a phone number at 0400. Mainly in the mud - poor.(D'Angelo-PA)
6240.2	0642	UNID Euro-pirate with pops, no annc and hvy static. PWO
6265.9	0645	UNID Euro-pirate with mood music, annc in Dutch or German, too weak
		to id. PWO
6.6	0320	PIRATE (No. Am.) WHYP (presumed), 0320-0340* Sep 21, host Regis

Brownyard hosting "Who Wants to be a Pirate Radio Operator?" parody

		quiz show with made up contestants. Contestant BJ apparently had his
		friend George Zeller in the audience. Good signal and off without an ID.
		(D'Angelo-PA)
6925	0154	PIRATE (USA) WMFQ, 0154-0159* on Sep 5, Stevie Wonder spoof tune
		followed by ID and request for letters just before carrier was cut. Good.
		Again, 0231-0235* Sep 7, with frequent IDs and rock music until carrier cut.
		Good signal. (D'Angelo-PA)
6952	0316	WHYP, 0316-0322 Aug 16, parody ads, IDs mentioning the "pirate shortwave
		band." Fair reception. (D'Angelo-PA)
6952.6	5 0422	UNID, 0422-0426* Aug 25, parody clips of Bozo and Straka, rock music.
		Man with mention of "closed, everything now is off the record." Carrier
		cut. Fr to gd reception. (D'Angelo-PA)
6955	0233	PIRATE (No. Am) WMFQ, 0233-0240* Aug 14, "Midnight at the Oasis" followed
		by ID and "Lucy in the Sky with Diamonds." Tuned away briefly and they
	1000	were gone so presumed sign-off. Fair to good signal. (D'Angelo-PA)
8.8	1900	IRAN?? Unid with mentions of Iran and Islam, gives internet address like
		www.iran???.org and has long list of frequencies. Sign-off around 2000.
7405	0400	Severely jammed 29/9. Noticed they had moved to 7055.5 on 30/9. AJS
7485	0630	NETHERLANDS Tower R, fr sig with anc in EE and Dutch, playing EE and
15705	0707	Dutch pops. Heard two Sundays in a row. PWO

		off. Also audible this night was Borderhunter 15795 LSB and Alfa Lima
		15069.7. PWO

And thanks to Nick Grace and the good guys at Clandestine.radio.com, this month we're featuring clandestine broadcasting to/from the Koreas.

Here is the activity aimed from the South to the North:

ECHO OF HOPE

Organization: Korean Living Abroad (Agency for National Security Planning). **Broadcasts from:** Kyonggi-do, South Korea. **Languages:** Korean **Identification:** (Korean) Shimang e mei ari pangsong imnida **Active Since:** June 1973 as Voice of Reunification **Contact Address:** Unknown **Related Websites:** Asian Broadcasting Institute **Monitored:** Noticed most recently on 3985 & 6348.3 kHz 0900 — 2100z

VOICE OF THE PEOPLE

Organization: Korean Workers' Union (reported to be, in fact, the Korean Armed Forces) **Broadcasts from:** Kyonggi-do, South Korea **Languages:** Korean **Identification:** (Korean) Yoginun Pyongyang-eso ponadurinun imninuisoribang-imnida. (English) This is the Voice of the People coming to you from Pyongyang. **Active Since:** June 25, 1985 **Contact Address:** Unknown **Related Websites:** Asian Broadcasting Institute **Monitored:** Jan 01: 1557+ 3912 kHz (Bucknall-UK CRW 61)

And from North to South...

VOICE OF NATIONAL SALVATION

Organization: National Democratic Front of South Korea (NDFSK), which is run by North Korean intelligence. NDFSK seeks a "national independent government after abolishing U.S. colonial rule in south Korea... NDFSK wages concurrently the struggles for democracy and national reunification under the slogan of anti-U.S. independence... Its guiding ideology is the immortal Juche idea." Juche idea refers to the "teachings" of Kim Il-Sung. **Broadcasts from:** Pyongyang, Haeju & Wonsan, North Korea 4120 kHz is shared with 9665 kHz Korean Central Broadcasting Station from Pyongyang. 6010 kHz is shared with 6250 kHz Pyongyang Broadcasting Station from Pyongyang. 4400 kHz is shared with 3560 kHz Radio Pyongyang's feeder from Pyongyang. 1053 and 4557 kHz from Haeju, 4450 kHz from Pyongyang, 3480 kHz from Wonsan. **Languages:** Korean, English **Identification:** (Korean) Kobugei Sori Pangsong imnida

Active Since: Aug 9, 1985 June 15, 1970 - August 8, 1985 as Voice of the Revolutionary Party for Reunification March 15, 1967 - June 14, 1970 as Radio Station of the South Korean Democratic National League for Liberation **Contact Address:** Grenier Osawa 107, 40 Nandocho, Shinjuku-ku, Tokyo, Japan

e-mail: ndfsk@campus.ne.jp Kankoku Minzoku Minshu Tenzen, Amatsu Bld, 2-1 Hirakawa 1-chome, Chiyoda-ku, Tokyo, Japan **e-mail:** kuguk@alles.or.jp **Related Websites:** Asian Broadcasting Institute

Monitored: Apr 01: 1505+ 3480 kHz (Fathi-Germany CRW 67)

And a couple of extra snippets (Chief Ed)

VANUATU

Adrian Sainsbury, RNZI's Technical Manager has just returned from installing a new SW receiver and aerial for Radiio Vanuatu. He tells me Radio Vanuatu no longer have QSL cards so recommends that DXers send PPCs. (Paul Ormandy)

AFGHANISTAN

This from NZRDXL member Martin Hadlow, who is working in Afghanistan for the UN.

"In passing, I have just come back to Kabul from Bamiyan in the north of Afghanistan. A radio station is now on the air there. Radio Bamiyan broadcasts with 400 watts on 1500 kHz. What a catch that would be! " (Paul Ormandy)

HONG KONG

Yacht Race Weather Forecast via Hong Kong Thursday, October 10 2002

Radio Television Hong Kong, which will broadcast special weather forecasts for boats in the Hainan Race on 3940 kHz. These forecasts are provided by Hong Kong Observatory,. They will also give detailed weather information

They will also give detailed wediner information

The special RTHK weather forecasts will also be broadcast daily at 0533 from 20 October to 24 October (inclusive) on 3940 for return journeys.

More on the Regatta and Hainan Race at

http://www.rhkyc.org.hk/chinacoastraceweek.htm (lan Cattermole)

30

Compiled by Tony King, Greytown

NZDT has arrived so the Yanks are appearing just that little bit later with the openings now appearing from around 7.p.m. — about half an hour after sunset.

FROM THE MAILBAG

Paul Ormandy, Oamaru has gathered in QSL's from XEDTL 660 (after follow ups to a 1966 report finally go an e-mail VL); KWRU 940 with a T-shirt, cap, key ring and baggage tag), KION Salinas CA 1460 — very detailed verie-letter emailed "a beaut QSL letter that will strand out in your collection."; 2YC Radio 2 Sydney 1611; WCNZ 1660 email VL with coverage map; Radio Sport Hamilton 792 and Blenheim 1539; 4DB Dalby 1629, 2NTC 1611 1629 1710, 2YA Radio 2.

Ray Crawford chimes in from Forestdale Queensland with a log of 4TAB 1611 and QSL's in from Southern Star 882, KDNZ 1650 and WJNZ 1680.

Stu Forsyth, Wellington has veries in from 5DN 1323, 4HI 1143, 4GM 1566, Radio Sport 729, 774, 792, 1062, 1089, 1125, 1350, 1494, 1503 (Chch), R.Rhema, 594, 855, 1251, 1404, Southern Star 576, 657, 981, 1026, 2AD 1134.

David Ricquish Wellington has been at it too! Reports out (all via email) to 2ML 720, 4GY 558 and follow up email to ZNS1 1540, ZNS2 1240 and ZNS3 810. More reports to be sent after recent visit to Sydney and southern Queensland. And old reports are being dusted off for email follow ups.

QSLs in via email from 2ML 720, ZNS1 1540 (20kW), ZNS2 1240 and ZNS3 810 for Country #66 and a major boost for continuing to send reports and follow ups. The Bahamas QSLs were for a 1989 report, after numerous failed follow-ups and after 32 years since first hearing ZNS1.

Hopefully, have more to report next month. Bless the Internet and email!

Martin Greer, West Launceston, Tasmania reports loggings of CNR2 Taiwan 684, Southern Star 657, 5CS 1044, 6WF 720, and CNR Taiwan 909.

BROADCAST NEWS

SAMOA

WDJD 580 Pago is shortly changing call to KJAL according to Vickie Haleck, Station Manager. She adds they've had DX reports from Japan and Italy. (Personally, I doubt the latter very much and have told her so). (**David Ricquish**.)

USA

DX TESTS: Note: next day NZT - but calculate the times. KY appears to change in November back to EST.

Monday, October 21, 2002 - WLCR-1470, Louisville, KY - 3:00-4:00am EDT. (IRCA)E-MAIL: heuser@iglou.comWEB: http://www.wlcr.net

Saturday, October 26, 2002 - KNOM-780, Nome, AK - 12:00-1:00am Alaska Local time (4-5am EDT).E-MAIL: rfn@nook.net WEB: http://www.knom.org Saturday, October 26, 2002 - KNOM-780, Nome, AK will conduct a DX test from 12:00am-1:00am Alaska Local Time (e.g. 4-5 am EDT). From Les Brown, who arranged the test: "We are currently planning to go from nighttime power (14 kW) up to 25 kW within a minute or two after midnight on 10/26, a Saturday. As I won't be here, I'll set it up with a regular operator to make the change as soon as the station goes into AP network news. The news ends at 12:05 and is followed by lengthy weather forecasts for various Alaska regions, typically ending around 12:09. Programming will be Polish polkas from then until the next newscast at 1 AM with a clear ID between every programming item. We'll run our normal public service stuff (we are non-commercial) along with time and temperature checks. Morse ID's will be frequent." Also - Les

mentions that the station will stay at 25 kW until 6 am Alaska Time. Reception reports (with return postage) may be sent to:

Les Brown KNOM-AM EMAIL: rfn@nook.net P.O. Box 988 Nome, AK 99762

Saturday, November 2, 2002 - WDFB-1170, Danville, KY (COL Junction City, KY) will conduct a DX test from 12:00am-?? EST. The station's regular format is Christian; they go by "WDFB Christian Radio". Songs such as "Amazing Grace" "Sweet Beulah Land" and "My Country, My Flag (by the Hoppers)" will be played, along with voice and/or Morse code IDs.

Reception reports (with return postage) may be sent to:

WDFB Christian Radio P.O. Box 106 Danville, KY 40423-0106

EMAIL: <u>music@searnet.com_</u>WEB: <u>http://www.wdfb.com</u> ICQ# 38796683

branch.news@radiodx.com Compiled by Chief Editor, Wellington

SOUTHLAND BRANCH

Not a great deal happening this way as the first meeting since the AGM was held at Lindsay Robinson's instead of Tiwai due to a bad weather forecast for the day which in the end did not come to what was predicted. Six members attended and we had a nice informal meeting and Lindsay showed us some of his Qsl's he keeps in folders.

The October Meeting will be held on Tuesday 22nd at Don Collies, 16 Iona Court Ingill.

AUCKLAND BRANCH

Sunday September 22nd was a BCL Open Day at the Henderson transmitter site which turned out an excellent fine day. Lots of Auckland Branch members caught up with each other as well as members of the public. Barry Hartley was on duty the whole day and answered lots of questions. Most of the 11 transmitters' cabinets were opened up for all to study and tables were neatly laid out with vintage radio gear, accessories and test equipment. A rather tidy and professional display.

The Sunday 29 September meeting apparently had another interesting talk by our Patron, Jack Fox.

There was a DXpedition to Waipu Cove on the weekend of Fri-Sun 4th-6th October which saw lots of interesting radios and computer hardware. David Crozier and Malcolm Holmes contributed an impressive display of valve receivers, Paul Gibson and Yuri Muzyka had computers with WiNRADiO receivers. Jim Pope, John West and Phil van de Paverd brought along their quality solid state receivers. Dave serviced his Collins (Motorola) early digital receiver and Paul tested lots of longwire antennae as well as a compact plane antenna (log

periodic yagi). Paul demonstrated his ACARS and airnay monitoring software.

All in all it was a very relaxing weekend mostly in social mode!

The October meeting will be the League's national AGM at the Clubrooms, 3000 Great North Road, New Lynn, just past Whau Creek, on the 27th at 2 pm.

The November meeting is tentatively at the Clubrooms on the 24th at 2 PM.

Meetings are on the last Sunday of the month except December.

NORTH OTAGO BRANCH

Arthur Finch was the host for our Meeting held on Thursday 10 October. Eight Dxers were present.

Peter Grenfell reported on his visit to the local Heritage Radio which broadcasts 24 hours each day from the Electrical Museum in the Historic Precinct, Harbour Street, Oamaru on 88.4 FM.

Our Branch has a particular interest in this small station as we donated the transmitter. Heritage Radio's operated by volunteers. At present it has a very limited coverage but there are plans to improve this in the near future. If you are travelling through Oamaru tune in, make a visit to the station and send them a reception report.

We were all interested in Steven Greenyer's demonstration of his new Palstar radio. This small radio performed well at Arthur's place where noise levels are usually high. On medium wave many US medium wave stations were there at quite good strength.

Steven, who lives in Timaru, is a regular attender at our meetings. The November Branch Meeting is to be held at his place.

marketsquare - members free advertisements

FOR SALE

Kenwood R5000 receiver 10kcs to 30 mHz; 108 - 174 Mhz plus VHF Converter fitted. (ex estate) One owner, with orig. carton, manual and circuit. \$800. Elva Housell phone 06 3438104 email: t-ehounsell@clear.net.nz

Don Beswick ZL2BL has several Eddystone receivers for disposal and I thought that they might be of interest to our members. The prices are negotiable and the best approach would be for anyone interested to contact Don on 04-383 6723 in Wellington (evenings or weekends are best)

Note: These are older valve type communications receivers and some may require minor technical adjustments. These sets are quite heavy and freight costs are extra.

recrimed dajosiments. These sels are quite heavy and height costs are extra.							
Eddystone 680X general coverage receiv	500 kHz-30MHz	\$160					
Eddystone 770R Mk 1	22MHz-160MHz	\$170					
Eddystone 770R Mk 2 (mint condition) cr	22MHz-160MHz	\$240					
Eddystone 840C (converted to 230V)		500KHz-30MHz	\$170				
Eddystone 870 B/C 230/110V AC/DC	LongWave	500KHz-27MHz	\$110				
Eddystone EC10 general coverage transis	-	\$130					

Don also has AR77 Rack mounted/AR88 and other receivers - some are just chassis, he also has plenty of valves and has offered to test valves for any League member.

Article: Station Email Addresses

Compiled by Ian Cattermole Blenheim

Over the past couple of years I have been compiling a file of e-mail addesses, mainly those that do not appear in publications such as WRTV and PWBR. Of course a few do now appear in the latest issues of the above. I send most of my reports by e-mail these days and enjoy a reasonable return. Of course I do have those that "Bounce" sometimes even using e-mail addresses obtained from a station's website. In those instances I print the report and simply post it off with a short covering note explaining that their e-mail address" bounces back"

Hopefully some of these will be of use to members and while many of the above broadcasters have other addresses listed in various publications I have found that these seem to be the most favoured in many instances. If anyone requires info re e-mail addresses I am only too happy to assist if I can.

You can email lan at iancattermole@xtra.co.nz or via P.O.Box 3011, Auckland (Chief Ed)

Member Profile

Andrew Sunde lives in Ohai and is currently the Leagues youngest member.

I began listening to HCJB in 1998 on an older model transistor radio. This was the only station I listened to, until I started to look around other parts of the shortwave band. I was surprised at all the stations I could hear. Via HCJB, I got in touch with some other DXers, including Mr. Jamieson. They got me started with my interest in DXing. I continued to use the same radio until last year, when, with Mr. Jamieson's help, I was able to purchase a Sony ICF-2001. The antenna I have erected here in Ohai is a 5 MHz dipole with a balun given to me by Mr Ormandy. This aerial has performed very well. My other interests include model shipbuilding, radio-controlled boats, and astronomy. I have made several scale models of ships from the InterIsland Line. I have also built a radio-controlled boat using parts from a toy radio-controlled car. We use a 4-inch telescope for astronomy. There are excellent astronomy conditions in Ohai.

Article:

Auckland Branch Members Visit to BCL Open Day at Henderson

Compiled by Yuri Muzyka Auckland

Sunday 22 September was a start of spring sunny day at the Henderson, Auckland AM transmitter site with a fairly good turnout of the public including a number of familiar radio enthusiasts.

The site is located on Selwood Road, off the northern extreme of Lincoln Road next to the Auckland Kumeu Motorway. The main building sits in behind a nice display of trees and across the road are a couple of large boat design/construction companies (one of which is Sensation Yachts).

Barry Hartley was on duty the whole day and enjoyed answering lots of questions inside the main building with all the equipment on display gladly pointing out the various items. Assistants opened up cabinets to reveal all their glory as well as bringing out other equipment to display. Apparently there are 11 transmitters in all covering the medium wave broadcast band all nicely housed in stylish space abundant cabinets revealing what would be the pride of any vintage radio collector (large valves, inductors and switch gear built for high robust use all in well kept working order).

Mike Butler introduced me to an impressive large modulator valve in one of the cabinets which has a plate voltage of 9 kv! A lot of test equipment and radio accessories were neatly laid out on a number of tables. A bedroom-sized room is equipped as a fully functional broadcasting studio. It's an appealing 12-foot ceiling stud bungalo style room decorated with old period thick wallpaper. It features a traditional black desk covered in all the practical ammenities - a control panel and boom microphone, 2 traditional stylus record players and a Rola Professional MK III reel-to-reel machine. Running along two walls to about 8 feet height are rack mount cabinets full of control room broadcasting equipment and instrumentation - banks of reel-to-reel recorders, circuit link socket arrays, dials, switches and meters, even an old NZPO telephone; all visible in the general forward direction. Along another wall is a small library of books containing archived radio material and general knowledge books like encyclopedia. The equipment has presumably come from the old BCNZ studios which used to be in Wyndham Street down in central Auckland city. A display card shows the layout of the transmitters in the main room went through 7 different stages as items were added (for the years 1940, 1943, 1950, 1959, 1960, 1975 and 1984).

Good current-day technical reference documents listing the transmitter details can be found on the internet at http://www.med.govt.nz/rrf/amf.html for the AM frequencies and http://www.med.govt.nz/rrf/fmf.html for the FM frequencies. The information is extracted from the New Zealand Register of Radio Frequencies spanning 521-1612 kHz in the AM b.c. band and 88.8-106.63 MHz FM b.c. The information is nicely tabulated with Freq in MHz, License Holder, Max dBW power, Site Name, Map Reference, Antenna Height, Polarity, Registration Date, Expiry Date and License Number. Both lists cover all sites through the country. All the MW AM transmitter licenses list as vertical polarisation.

On Medium Wave there are 9 licences using 4 different transmitter towersof 153, 122, 93 and 45 metres of height, as at 29 July 2002, at the Henderson site. On FM b.c. there are

no licenses listed for transmitters at Henderson. This information was obtained from the two internet document files

All in all it was a very special day. It was my first ever visit to this site and I also enjoyed the tour of the Musick Point site a few years ago.

Special thanks to Bob Kay for the internet website URLs and various other background information (maybe for a future article).

Article: Japanese Occupation Radio in South East Asia

Compiled by Adrian Peterson Wavescan AWR

This article by Dr Adrian Peterson, DX Editor of Adventist World Radio's 'Wavescan' DX programme, is now part of the Pacific Radio Heritage Collection which can be found on the League's website www.radiodx.com If any members can provide more historical information on the stations mentioned in these articles, please contact Paul Ormandy - paulorm@paradise.net.nz or snail mail — 33 Greta Street, Oamaru.

Back in the European era of exploration and the colonial era of expansion, England and Holland divided the Malay countries into two major segments. England assumed control over the northern areas and Holland over the southern. These days these two areas are designated as Malaysia and Indonesia, with Singapore sandwiched in between and independent in its own right. During the Pacific War, Japanese forces moved progressively through the countries in South East Asia, and they added Thailand, Burma and Malaysia into their growing Empire. What then, is the story of the international shortwave stations in these three countries during these dramatic years? Let's look at these stations, country by country:

MALAYA

In pre-war days, the Malay peninsula and Singapore were administered by the British as the Straits Settlements. On Singapore island, 4 small radio transmitters were installed, 2 on medium wave and 2 on shortwave, under the call signs ZHL & ZHI. These 2 transmitters were rated at around half a kilowatt, and they issued a colourful QSL card depicting the Singapore skyline. In the year 1940, with stormy war clouds beginning to loom over Asia and the Pacific, the BBC in London announced plans to buy BMBC, the radio station in Singapore, and to install a 100 kW shortwave transmitter. The electronic equipment was sent out by boat from England, but most of it was lost when the ship carrying the transmitter was torpedoed and sunk. The Singapore government began work at Jurong on a new transmitter base and they began to install two shortwave transmitters at 10 kW with the callsigns ZHP & ZHN. In 1942, the Japanese completed the construction work at Jurong and they installed two additional transmitters at 7.5 kW, one of which was transferred from the radio station on Penang Island. During the war, Singapore was on the air as Shonan Radio and it carried many broadcasts of interest to listeners in Australia and New Zealand, including prisonerof-war news. Radio Tokio announced on March 28, 1942 that Radio Shonan was back on the air. However, because of the low power of the two shortwave transmitters, this station was not noted until mid year by the DX community in Australia, and it was November before the official government Listening Post near Melbourne heard this station. Shonan Radio from Singapore was on the air for 3 years and the last broadcast with the Japanese identification was noted on February 3, 1945. However, this station was not re-activated under the British for another 6 months. The first re-activated units were on medium wave for the benefit of the local population, and the shortwave units were re-activated early in the New Year of 1946. The shortwave station on the island of Penang was inaugurated in 1934 with a single low power unit on shortwave. The 10 kW unit was installed just before the war and it was removed by the Japanese and taken to Singapore, leaving just the lower powered unit on shortwave in Penang. Arthur Cushen in New Zealand occasionally listened to this station on 6097 kHz for POW information, but the signal was seldom heard well. There was also a low power shortwave unit at Kuala Lumpur, though this played no major role during the Pacific War.

THAILAND

When it became apparent that a major conflict was brewing in Asia and the Pacific, many of the international shortwave stations suddenly began to upgrade their equipment and to issue attractive QSL cards. This also happened in Thailand, which was then known as Siam. Although the original shortwave transmitters near Bangkok were quite low powered, just 2.5 kW, a new international shortwave service in English was launched on October 20, 1938. This new programming from HSP5 & HS6PJ was beamed towards the United States, though there is no evidence that it was ever heard on the American mainland. Work began on the construction of a 100 kW shortwave station at a new location, Nonthaburi, in 1941 and test broadcasts were noted early in the following year. Soon afterwards, the Japanese took over the operation of Radio Siam and a very strong signal was noted in Australia. However it would seem that usage of the 100 kW unit ended quite soon and the Japanese were then on the air from the two lower powered units. On one occasion Radio Bangkok was noted calling Osaka in Japan and Berlin in Germany with a programming relay. They were heard quite frequently in both Australia & New Zealand. This station was re-activated under Thai control at the end of 1945 with two new callsigns, HSP2 & HS8PD.

BURMA

The original radio station in the city of Rangoon was allocated the un-likely callsign XYZ. It was a low powered shortwave unit. In 1941, an additional shortwave transmitter at 1.2 kW was installed, and during the war, this was in use with Japanese programming beamed to Australia and New Zealand on 11875 kHz.

The Japanese occupation forces were on the air from the shortwave stations in Malaya, Thailand and Burma for a period of approximately 3 years, running from 1942 into 1945. Although they were heard often in Australia, New Zealand and the United States, yet again, there is no record of any QSLs from these operations.

Welcome to October! Spring seems to have sprung in the Capital with one or two balmy, and dare I say it, windless days of recent times.

A particularly warm welcome to Andrew Sunde, our new contributor in the Junior Shortwave section. It's wonderful to have you with us, Andrew - keep up the good work.

Remember, Ladders close for the half year at the beginning of December. Let me have your totals early in the month and let's see who the winners are.
73s to all, Stu
