FRONT COVER

A Pulse HF Radar System is being erected on the historic Awarua radio site and will be operated by the La Trobe University in Victoria, Australia.

It is designed to look at the Southern Aurora, the lonosphere and Sunspot activity using HF Radar pulses in the 8-20 MHz range.

The Awarua site is located very near to the Southland Branch Listening Post at Tiwai and whether it causes any interference will be of interest to those who listen from the Tiwai site and possibly also for other SW/MW Listeners around New Zealand

More information page 23.

Coming up in next Month's Magazine (April)

Remember to update your **Ladder** totals. Stuggt Forsyth

Compiled by Andy McQueen, Brightwater

Hello from Brightwater where the Wine festival is over for another year. The helicopters are now in the air the guns are going off. No it's not Vietnam just the Police on the annual marijuana hunt and the vineyards scaring off all birds. My condolences to those in the Lower North Island and Picton so badly affected by flooding, but please watchout for the river of tears flowing out of Auckland now that their Blues have been beaten in three of their four Super 12 games Daylight Savings Time has now finished so all times shown are UTC 12 hours behind NZ Standard Time.

KHZ	TIME	COUNTRY STATION & PGM DETAILS INITIAL
9290	1746	LATVIA Ulbroka R Marabu heard on 9/2.Also at 1600 R.Geronimo on 22/2.
		1545 European Music R. on 3/02. 1646 R Mi Amigo tests on 1/3. all heard at
		fair to good level 22/2 JD

Thanks very much to all contributors for this month. Stations reported are indicated by the contributors initials underlined in Bold eg: **AMQ** The use of the # symbol is to indicate station reported outside of New Zealand. Please note that I have changed the location of this symbol to beside the frequency.

Have you got any QSL's from REE Spain lately?. Well our N/Am member Jerry Berg reports a full data QSL from the makers of pgm"Espanoles en la Mar' at Apartado 1233, 38080 Santa Cruz de Tenerife, Canary Islands.

This months winning logging

is shared between **John Durham** 9290Khz Latvia R Mariubu and **R Davey** with 9760 Lithuania R Vilnus

<u>Your contributions</u> are most welcome either to the email address above or Postal via PO Box 3011 Auckland or direct to me at 85 Waimea West Road Brightwater Nelson.

ALBANIA:

Radio Tirana English schedule as follows:

0145-0200utc. And 0230-0300utc To North America 6115 and 7160.

1915-1930utc. To Europe on 7180 and 9510. Also 2130-2200 on 7160 and 9635. (RN News)

BHUTAN:

SCHEDULE CHANGE.

Monitoring by Alok Dasgupta has established that BBS Bhutan now broadcasts in English daily at 1400-1425 UT on 6035 kHz, but has dropped the weekend broadcasts in English that were scheduled at 1000-1100 (DX Asia via DXLD)

CONGO:

RTVC, 5985, 0430-0450+, abrupt sign-on with local African music. 0431 opening French announcements, with ID, and talk. Fair level but mixing with WYFR (Brian Alexander, DXLD.) Radio Brazzaville is heard occasionally with programming in the French language on the new frequency of 6115 kHz at 1700 UT. The program format at this time consists of African music and spoken features. However, Radio Brazzaville is also noted on 9610 kHz at the same time with a much better reception level. The programming from the Congo at this time is targeted to a local audience but it is well received throughout central Africa.(AWR Wavescan DXLD)

CUBA:

Radio Habana Cuba.

We are now testing FOUR new 100 kW transmitters that you can pick up during our morning local time 1100 to 1500 UTC Spanish language program . "Despertar con Cuba"" 9550 kHz to the Caribbean 11760 kHz North, Central and South America . 11800 kHz South America, 12000 kHz Eastern North America . (RHC via DXLD)

DENMARK:

It's about a year since WMR, World Music Radio began work on re-launching the old station. Unfortunately several things have been delayed over and over again. However Northland Radio in Canada – which is delivering the transmitters to WMR – has promised that the transmitters will be shipped from Canada to Denmark this week. At the same time WMR is considering various alternative transmitter sites (including a site in the South Western part of Denmark and another one on the island of Zealand) and a final decision is hopefully going to be taken later this week. The new WMR studio and a 512 kb Internet- connection have been completed with only a few things still remaining to be taken care of. For instance The Orban Optimod compressor has not arrived yet. Despite all the delays and the things still needing a completion Stn. Mgr. Stig Hartvig Nielsen is still aiming at an On Air date late February. WMR will be broadcasting on 5815 (10 kW Collins) and 15810 (1 kW CCA) – as well as streaming via the Internet. (World Music Radio, Feb 09 via DXLD)

ERITREA [non]:

ERITREAN OPPOSITION PARTY TO LAUNCH RADIO STATION ON 22 FEBRUARY.

[The] EPLF-DP [opposition Eritrean People's Liberation Front-Democratic Party, a splinter group of the ruling People's Front For Democracy and Justice, PFDJ] announces the birth of "Voice of Liberty".

To coincide with its founding congress [due to be held in Frankfurt, Germany], Voice of Liberty will be launched on 22 February 2004 in the following frequency: 15675 kHz, which is in the 19 meter band. The frequency corresponds to 19.14 meter [band].

The programme will be transmitted at 0400-0500 UTC on Sundays, which corresponds to 7 to 8 a.m. local time in Eritrea. During the first and second quarter, transmissions will be made in Tigrinya. Work for the Arabic programme is already under way.

We invite you to take part in this historic event by sending us your views and comments at the following address: <u>VoL-Comments@eritrea.com</u>

Source: Eritreal.org web site in English 7 Feb 04 (via BBCM via DXLD)

ETHIOPIA [non]:

Radio Mustagbal.

The shortwave transmissions of the "Radio Mustaqbal" radio service for Somali refugees in Ethiopia, organised by EDC - Education Development Center, Inc (USA), started on 19 January 2004 and are due to end with the school year in Ethiopia in July 2004. The programmes are produced locally in Ethiopia, more details about this project can be found at: http://ies.edc.org/projects/ethiopia.htm . The organizers are interested in reception reports, especially though from the target zone. Contact: Abdoulkader Houssein Ahoussein@edc.org (project assistant). (CUMBRE)

Currently scheduled via Meyerton on 17565khz. 1202-1232utc on Monday, Tuesday and Thursday but heavy QRM from Asian here. (ED)

EDC have just advised me of a second transmission on 17565khz 0630-0700utc on Monday, Tuesday and Thursdays but this one via Dhabayya. This transmission is audible here but with heavy co-channel interference from CNR, who incidently ID in English each half hour (ED)

INDIA:

A.I.R.

According to information from All India Radio HQ, they are currently

interested in receiving Reception Reports on their External Services targetted towards UK & Western Europe, SE Asia, China and Middle East.

The reports may be sent to: spectrum-manager@air.org.in

The Postal Address is: Director (Spectrum Management & Synergy),

All India Radio, Room No.204, Akashvani Bhawan, New Delhi-110001 (India).

QSL Cards will be issued for all correct reception reports.

The External Service schedule is available at: http://allindiaradio.org/schedule/fqsch.html and also in www.geocities.com/bcdxnet

So, those dxers who had difficulties in getting QSL cards from AIR External Services in the past may make use of this opportunity now. (HCDX)

ALL INDIA RADIO READY TO LAUNCH 24-HOUR RADIO NEWS CHANNEL

National public service broadcaster All India Radio (AIR) is awaiting government permission to launch a 24-hour bilingual English/Hindi news and current affairs channel on 2 April, the New Delhi newspaper The Pioneer reported on 24 February. Initially the service will only be available on shortwave, attaining nationwide coverage by using three powerful transmitters formerly used for AIR's external service broadcasts. Although there are concerns at All India Radio about the audio quality of daytime shortwave transmissions, the Ministry of Information and Broadcasting has the view that using shortwave is the most cost- effective method of transmission in the current political circumstances (where government spending on pre-election projects is under public scrutiny). (DXLD)

IRELAND:

OZONE TO TEST ON 9212 KHZ

I have heard on the grapevine that Radio Ozone is to be testing 9212 kHz in the near future. And that Ozone will be back on Sundays in March on and around 7.4 MHz or so. The 9212 tests will apparently be and are most likely to be nighttime tests. So it may be worth keeping an ear out here to see what can be heard. Mr Ozone, it has been said has tested 9 MHz at an ungiven time before midnight recently and the results were very good (Steven Overall via DXLD)

PAPUA NEW GUINEA:

Wantok Radio Light is the name of the new tropical band SW station scheduled to start in about May 2004. The broadcasts will mainly be a relay of the existing FM station of the same name in Port Moresby. During January, HCJB engineering staff helped relocate the studios of the station to a high rise office tower in downtown Port Moresby and brought the new FM transmitter site on air. Life Radio Ministries (PO Box 2020, Griffin, GA 30224) operate Wantok Radio Light in partnership with others including HCJB and have licences to operate 30 FM repeaters across Papua New Guinea. The new SW facilities are supposed to be built during April/May 2004 and discussions are still ongoing with the bureaucracy about the SW frequency and technical facilities. (David Ricquish)

SIERRA LEONE:

Radio UNAMSIL is the voice of the United Nations Mission in Sierra Leone. It is a Unit of the Public Information Section of the UN. The station is known as the Voice of Peace and broadcasts from Freetown, the country's capital city, on 103 FM and on shortwave using a nominal frequency 6,140 kHz although most reports have had them somewhat lower than that.

Radio UNAMSIL utilizes a 1,000-watt Harris made transmitter, which has given it a sporadic worldwide reach. Its goal is to promote awareness, understanding, and tolerance among the peoples of Sierra Leone and help the people understand the implementation of the LomÈ Peace Agreement.

The station appears that it will be a good verifier of listener reception reports, however, hearing them could be a serious hurdle these days. I have not seen any recent logs for this station. A postal report may take some time but will be answered with a full data letter from Sheila Dallas, Station Manager and Executive Producer of Radio UNAMSIL. Written reception reports with return postage can be sent to: Radio UNAMSIL, Mammy Yoko, P. O. Box 5, Freetown, Sierra Leone. (DXLD)

YEMEN:

Republic Of Yemen Radio. 9780.

Has Interval signal from 1758-1800, then starting 1 hour EE broadcast. Sign-on at 1800 with national anthem and ID. Various news, music and Yemeni current event programmes. EE transmission ending at 1900 with short news segment and ID, then into AA. (HCDX log)

ZIMBABWE:

The ZBC has reactivated the use of 3306, an old frequency of theirs but not one that I think they have used for several (perhaps many) years. It is being used in the early morning and during the evening. During the daytime they are still on 6045. These SW frequencies are relaying the "Radio Zimbabwe" (formerly Radio 2) service in Shona and Ndebele. Regards, (Chris Greenway, (currently in Lusaka, Zambia), via DXLD)

RECENT CHANGES. Monitored by OBSERVER-BUL

LATIN CORNER: GUATEMALA:

4052, R. Verdad.

According to station managers' daughter (who is a secretary at the station), they have recently increased their power to 800 watts (Dave Valko, via DXLD)

NICARAGUA:

According to a personal letter dated January 19, 2004, from Sr. Evaristo Mercado P., Director Radio Miskut, their shortwave transmitter [5770] has been out of service since August 2003, damaged by fluctuating power supply. Dr. Freeman will visit the station in March in order to bring the transmitter back to US for repair. He will also help them to increase power of a small FM transmitter (Tetsuya Hirahara, via DXLD)

BOLIVIA:

New broadcaster. Radio TelevisiÛn Chicha new on 4763.3 kHz

Radio & Television Chicha, Tocla, Nor-Chichas province, Potosi Department, Bolivia. 4763.3 kHz.

Heard 22 February 2004. In Spanish. Second day on air!

They like reception reports and promise a souvenir for all listeners who send reports.

I head this new station with my dear friend and DXer Marcelo Cornachioni, in a DX Camp in Chascomus, 124 kms. to south of Buenos Aires city. Programming was music (bolivian folk). IDs as Radio y Television Chicha, 4760 banda 60 metros. Etc.

Schedule is> 1030-1700 and 2100-2400. (HCDX) 1030 opening could well be a possibility here. (ED)

FEATURED FREQUENCY this month is 9770KHZ.

Tiger (continued from Front Page/Page 2)

The Tasman International Geospace Environment Radar (Radar) is a dual HF radar system with overlapping foot-prints designed to map ionospheric motions by detecting ionospheric scatter. The first radar was set up on Bruny Island, Tasmania at the end of 1999 and development of the second radar to be placed near Invercargill, NZ, has begun. TIGER is part of the Super Dual Auroral Radar Network (SuperDARN) which currently consists of 15 radars deployed in the northern and southern hemispheres.

It is hoped the radar could be installed between April and June with the aim to have it operational by spring.

	TIGER RADAR SPECIFICATIONS
Frequency Band:	8 – 20 MHz
Antenna Arrays:	Tx/Rx Array: 16 horizontally polarised log-periodics 2nd Rx Array: 4 horizontally polarised log-periodics
Beam Widths:	Horizontal: 4" at 10 MHz, 3" at 14 MHz, 2" at 18 MHz Vertical; 50"
Lobe Levels:	< -14 dB for both back and side lobes
Transmitters:	16 x 600 W (one per antenna in Tx/Rx array)
Total Peak Power:	9.6 kW
Mean Power:	200 W
Radiated Power:	12.5 W in main beam direction
Tx signals:	Pulse pattern repetition rate: 50 or 100 ms
	Pulse width: 300 µ s
	Bandwidth: 10 kHz at -20 dB
	Duty cycle: 2.1%
	Carrier frequency stability better that 10 ⁻⁸ per day

utilities@radiodx.com Compiled by Evan Murray, Auckland

Some news items — St Helena Island, in mid Atlantic, some hundreds of miles West of Africa is bidding to have an airfield on its 410 sq km. Napoleon Bonoparte was imprisoned here by the British. Imagine an airlink with Namibia.

A helicopter from HMS Endurance, the British Antarctic patrol ship crashed in Antarctica in February — none of the crew of five suffered injuries. The crash happened on the West coast of the Weddell Sea.

A Swiss ATC controller was stabbed to death in April by a 55 year old man. The man's family died in an air to air accident which had been, at the time, controlled by the sole Swiss controller on duty.

Maori Television Launches 28 March 2004

Maori Television will officially launch on Sunday 28 March 2004. The day will be marked with a karakia and powhiri, both of which will be broadcast live. We'll also feature a range of programmes made exclusively for Maori Television including a documentary on the history of Maori Television and an introduction to its present staff. Our regular schedule of programmes begins on Monday 29 March 2004.

Viewers can tune-in to Maori Television in four ways:

Via the UHF frequency - In many cases if you receive Prime TV now you should be able to tune-in to Maori Television. To receive Maori Television via the UHF frequency viewers need to have a UHF aerial and be within the coverage area. Viewers can tune-in to Maori Television via the UHF frequency from 1 March 2004. Our coverage maps are published on our website and our tune-in helpline, 0800 MA TATOU (0800 62 82868) is also active.

Via Satellite - If viewers are not within our UHF coverage area, they can access Maori Television via Satellite by purchasing a Satellite Dish and Receiver from their local Television Aerial Installation service.

As a SKY Digital subscriber - SKY Digital subscribers will find Maori Television on Channel 33 of their SKY remotes. They can tune-in to Channel 33 now to catch highlights of programmes soon to be shown on Maori Television.

As a SKY UHF subscriber - SKY UHF subscribers will find Maori Television on button 6 of their SKY remotes.

For More Information check our website <u>www.maoritelevision.com</u> or for guidance on how to tune-in call 0800 MA TATOU (0800 62 82868) *(Maori Television e-newsletter)*

Maori TV have started showing promos on Ch#46 in Christchurch in preparation for the on air date at the end of the month *(Chris Wright)*

Christchurch Chinese Broadcasting

broadcasts on 88.5 and 106.5 FM. Address: Level 2, 127 Armagh Street, Christchurch. T/F: 03 961 2885. Mobile: 021 045 5693. Email: ccb885@hotmail.com (David Ricquish)

Auckland FM update

Over the past week Classic Hits FM 97.4 has been relayed on 105.4. Not sure whether this is a precursor to yet another commercial FMer in Auckland.

On the guardbands there's still plenty of variety around.

Noted Hope City FM back with its gospel music format, this time on 106.7. Strong signal between Blockhouse Bay and Royal Oak and I think transmitter is in Mount Roskill area. Red-FM 95.4 is also being heard again running parallel on the guardband frequency of 106.7.

The hip-hop station on 107.5 that dominates the central city has yet to give an identification announcement. (Bryan Clark)

Guardbanders' Gear Seized

Radio Spectrum Management issued 11 infringement notices to guardband users in the Auckland region recently, policing new rules under the General Radio User Licence.

The rules allow for just two transmitters in a 25km area now, aiming to prevent low-power broadcasters from 'hogging' use of the band or achieving full-power-like coverage of an area through the use of multiple repeaters.

After the issuing of the notices, six transmitters ceased operating immediately, says a report in the latest RSM newsletter *Wavelength*. Second notices were served on the owners of properties on which the other five transmitters were operating. And finally search warrants were issued for two properties, from which transmission equipment was seized.

According to the report, "this type of compliance monitoring and intervention by RSM is a good example of the strong stance we are now taking against illegally operating broadcasters." (Median Strip March 10)

Posted submissions

I also received some submissions via post this month. These will be in the next DX Times issues — Adam.

Compiled by Tony King, Greytown

From the look of the mail the New Year's got off to a good startÖmust be all the groundwater exciting those earth wires! Try in vain as many of us did for Waihi 1107 (35 watts) it was a great gesture from Peter Anderson, and thanks to David Ricquish for setting the special up. David reports that the transmission on 29 Feb went out well!

Into the MAILBAG:

SUTTON BURTENSHAW, Hamilton reports logs as 2XS 828 and Access Triple Nine 999. Veries have arrived from -R Sport 1062 & 1350, 2XS 828, 1ZO 1413, Lakes 1548, and Access Triple Nine 999 all ppc. E-mail verie from KQXX 1700.

KQXX; At a suggestion from David R, I sent an e-mail report to the new owners via Danny Fletcher and my reply came back from <u>JohnMunoz@clearchannel.com</u> who also said a QSL card and station sticker was available for correct reports to KQXX-AM, 901 E. Pike Blvd, Weslaco, TX 78596 USA. . All the best with your building!

RAY CRAWFORD, Forestdale Queensland has recently gained his Ham licence and switched to talking and has worked 42 countries in 7 weeks. QSL's however in from WWRU 1660 and KQXX 1700. Enjoy your holiday Ray!

DAVID RICQUISH, Wellington reports that the Waihi 1107 test went well on 29/2, closing down at 0718. Also ran all day on 28/2. Those on greyline/mwoz lists would also have had details of the repeat on March 7, this time from 0600 onwards to try and use skywave to get the audio out. Transmitter was just 35 watts into a temporary aerial and just hearing the carrier alone was good DX.

Logs: Radio Puketapu 954, Waihi 1107 DX test 29/2, Classic Hits 1215, Goldrush 1440, Radio Samoa 1593, 2CR 549, 4JK 567, 3WV 594, 4CH 603, 2NU 648, 2BY 657, 2CN 666, 2CO 675, 2BL 702, 2NR 738, 4QS 747, 2GL 819, 3GI 828, 4RK 837, 4CC 927, 2EA 1107, 4FC 1161. Follow ups out to 5CK 639, 3CR 855, 2NB 999, 5MV 1062, 3WM 1089, 3SH 1332, Rete Italia 3RF 1593, 2KM 1620, Rete Italia 4RF 1629, 2AP 747, La Voz de Cuba CMW 590/CMKV 600, KSTP 1500.

QSLs: Radio Ngati Porou 585, Radio Puketapu 954, Waihi 1107 DX test (from station operator), Radio Waitomo 1ZW 1170 (letter from Adam Claydon), 2CR 549, 4JK 567, 3WV 594, 4CH 603, 2NU 648, 2BY 657, 2CN 666, 2CO 675, 2BL 702, 2NR 738, 4QS 747, 2GL 819, 3GI 828, 4RK 837, 2EA 1107, KSTP 1500 (for 1996 report and state #32). All via email unless stated.

QSL total is now 26% of current Australian BCB and 57% of on-air NZ, which means there's a lot more to hear and QSL yet. Keep at it! Wanna another Superadio II?

PAUL ORMANDY, Oamaru has also put down his mike for a moment to open a QSL A QSL, yes, a QSL... and a beaut... Radio Baha'i, Caracollo, Bolivia 1000kHz 10kW. Via e-mail from the director of the station at the time of my reception. He remembers replying to my original report (or one of thefollow-ups) but alas, it never made it back to Oamaru. Bolivian

DAVID NORRIE, Auckland reports "Got a lovely QSL from KBIV confirming report and telling me they run 850W at the time I was listening.V/signer was jim lotspeich <u>lotspeich@entravision.com</u> He sent me a picture of the transmitter to boot and asked whether I was using a matching device."

GORDON MATHESON, Paeroa has logs as Radio Sport Whangarei 729 and Coast 1530AM Hawkes Bay. QSL in from Radio Rhema Whangarei 621.

BROADCAST NEWS

HAWAIIAN UPDATE

690 KORL	Honolulu is new call with JJ, contemporary jazz and multi-cultural time brokered programs previously broadcast over KJPN 1370 as 'K-Japan'. Ex-Radio Disney format. No connection with previous KORL 650.
880 KAIM	Honolulu requests move here ex 870, with 10kW D/N share tower with 960/1600
960 KHCM	Waipahu requests move here ex 940 with 10kW D/N share tower with 880/ 1600
1130 KRUD	Honolulu holds CP for 10/5kW, now requests power decrease to 750w D/N to reduce possible interference to nearby FCC AM monitoring station.
1170 KJPN	Honolulu is new call, ex KENT (see 1180 also) Currently silent
1180 KENT	Honolulu requests move here ex 1170 with 6kW/4.490kW. Would move here as new call KJPN.
1230 KZOO	Honolulu requests move here ex 1210 with 1kW D/N
1370 KENT	Pearl City is new call, ex KJPN. Was KMDR before switch to KJPN. Currently silent.

Maldives

Voice of the Maldives from Male is now reported to broadcast 24 hours. It uses 10kW on 1449 AM and programs are mainly in the local Dhivehi language apart from some English in the early afternoon local time. With these extended hours, VOM now becomes a DX possibility in Australia (especially WA) and NZ where the best time for reception is 1400-1800 UTC. The

(NRC's DX News) David Ricquish.

Maldives are a string of islands southwest of India and Sri Lanka.

(Jose Jacobs, Southern Asia DX Report Feb. 2004 via AWR Wavescan 478 and David Ricquish)

Kwaialein

AFN Kwajalein is the new name for the former Central Pacific Network, which in turn replaced the last remaining active WWII Jungle Network callsign WXLG some years ago. As 1220, WXLG was frequently heard in NZ during the 1950's and even conducted a special DX program for their Kiwi listeners and were swamped with reports.

These days, AFN Kwajalein operates on 1224 with 1kW, a channel covered in both Australia and NZ, but a long shot possibility for those able to null the locals involved. The program format is easy to recognize, being a 24 hour relay of *National Public Radio* sent via satellite from Huntsville, AL. Local ID's are inserted during program breaks, but the only local programs on the atoll now come over the 101.1 FM outlet during mornings and afternoon. Rest of the time, the 3 FM relays all carry AFRTS music channels from Huntsville. Well worth having a crack at this one around 1100-1500 UTC, even earlier in winter. *David Ricquish*.

AUSTRALIA

1215 Bowral, NSW **on-air** 24/2 as Southern Country with C/W music format. Short term only to fulfill licence requirements. Using 1kW xmitter presumably powered down to .350w allowed for this location. Operated by Cameron Broadcasters, Locked Bag 3010, Nowra, NSW 2541. T: 02 4423 0055. Email: jsummerton@powerfm.com.au

(Credit: Dave Onley via greylinedx)

(Credit: Dave Onley via greylinedx and David Ricquish)

1692 UnID heard 23/2 with uninterrupted classical music. Presumed either Emu Plains (Penrith) or Nerang (Gold Coast).

1701 UnID carrier heard 23/2. Presumed either Silverwater (Sydney) or Richmond (Melbourne). (Credit: Dave Onley via greylinedx and David Ricquish)
1611-1701

Holders of licences in the 1611-1701 band must *use it or lose it* within the next six months hence expect growing number of tests to comply with the new legislation, as well as more roll-outs from Radio 2 (nearly 20 still to come on air) and relays of NTC Radio. Sales activity and rationalization now gearing up also, with 6AY 1611 having 3 AM's on the market, Margaret River 1611 (WA) still on the market after 18 months, and the Magic 87.8 network (Perth x 4 FMs plus 2 AM's), plus Gawler 1674 (SA) all currently for sale.

The 1593 SAGA - Radio station 1593 in Melbourne continues to frustrate the narrowcasters with its poor transmission quality and overmodulation on 1593 AM. Rete Italia in Melbourne causes interference to everything +/- 27 away, in the northern suburbs of Melbourne, with casualties including 3XX (1611), Radio 2 (1629) and more. There have been formal complaints registered with the ACA however all seems to get worse. The 1593 technical transmission standard is so bad that it is almost impossible to hear it on its own frequency. A spokesman for Rete was not willing to comment and believed the issue was an over reaction. More to follow soon. (David Onley, MWOZ)

If you haven't had a nice drive past Cambellfield during January, you don't know what you've been missing out on. And all you had to do was tune your radio to either 1593 or higher. Not only was the audio on Rete Italia not sounding as clear as it should, their transmitter was splattering their signal over to 1611, 1620 and even up to 1629. But thankfully, that has been changed, with the ACA stepping in, at long last. This means, for those in the Northern Suburbs, there will be no more splattering from Rete Italia (1593) This means, you can now listen to 1611 (Double X), 1620 (Hillside Radio), and 1629 (Radio 2) without this consistent hiss over the top (http://www.surfnetvic.cjb.net/ via David Onley, MWOZ)

WEATHER and AUSSIES

David Ricquish has been relating weather to reception. ":Have been experimenting with DX by the SKY News Australian weather maps. If there is a high sitting over parts of Australia, signals from those regions are generally dominant, meaning one night far west NSW/Q can dominate, the next just coastal Q, the next northern Victoria and so on. Very helpful to avoid wasting time trying to hear stuff that's not going to be there. The SKY weather map is pretty much the reality at the time, and gives a broad overview to help plan DX."

USA

Radio UNICA

From the IRCA DX Monitor:

Radio Formula Takes Over Former Radio Unica AMs. Radio Unica's last day of live Spanish News/Talk programming was Jan. 30, and the 24/7 network went to best-of shows before shutting down for good at midnight on Feb.

At least eight of the former Radio Unica O&Os that have been sold to Multicultural Radio Broadcasting have picked up Radio Formula's 24-hour Spanish News/Talk programming, Radio Formula President/GM Elias Chavando tells R&R, thanks to an agreement between Radio Formula and Multicultural. Among the stations new Radio Formula affiliates:

KAHZ/Dallas, KWRU/Fresno, KXYZ/Houston, WJDM & WWRU/New York, KIDR/Phoenix, KIQI/San Francisco and KQTL/Tucson. WNTD/Chicago and KBLA/Los Angeles will air Radio Formula programming until the debut of Air America Network; WNTD has already been named Air America's flagship, and it is believed the forthcoming "Progressive Talk" network will add KBLA as its first West Coast affiliate. (RW-CA)

TIMING IT RIGHT

Have just been typing out reports for 1700 KQXX Brownsville TX & 1690 KFSG Sacramento CA. While trying to work out local times I came across this good USA site.

http://www.timetemperature.com

Handy little DX tool. (David Onley MWDX)

<u>WELCOME TO NEW MEMBER</u> G.W. (BILL) STEWART, Flat 3, 1 Wakelin Street, Carterton 5951. Bill found out about the DX League from the annual club listing in the World Radio TV Handbook. Good to have you in our membership Bill.

PUBLICISING RADIO MONITORING

Our Patron and Life Member **JACK FOX** advises that his experiences with the Prisoner of War Monitoring Service will be aired in a Radio New Zealand 'Spectrum' documentary to be aired on National Radio (and possibly on shortwave via Radio NZ International) on Anzac Day 2004, that is **Sunday 25 April** at **12.33 pm (0033 UTC)**. A repeat broadcast should be aired on **Thursday 29 April** at **8.06pm (0806 UTC)**. Mark your diaries now to tune in!

Jack's reminiscences and those of fellow member **FRANK GLEN** that have previously featured in the 'NZ DX Times' are now also being published in "The Informer", newsletter of a group made up of former members of the New Zealand Intelligence Corps.

Celebrating 55 years of Radio NZ's Shortwave Mailbox

Just in from **DAVID RICQUISH** comes news of another 'Spectrum' documentary — celebrating 55 years of Radio NZ's shortwave 'Mailbox' programme. This will be aired on <u>Sunday 21 March</u> at 12.33pm NZT (0033 UTC) and again at 8.06pm (0806 UTC) on <u>Thursday 25 March</u>. The programme will include reminiscences of Ulrich Williams (the original RNZ station manager in 1948), Christine Cole-Catley (original host of Mailbox) and a number of other shortwave station technical and production personalities of the time. Rare recordings of original program themes and the RNZ interval signal with the tui make this a fascinating visit down memory lane for listeners worldwide. Watch out also for a supporting feature article in 'The Listener' magazine.

MORSE CODE UPDATE It may be considered old hat by some, but the International Telecommunication Union has decided to keep the 160-year-old Morse Code in line with current trends. It now has a new character to denote the @ symbol used in Email addresses. The new symbol, which will be known as a "commat," consists of "A" (dot-dash) and "C" (dash-dot-dash-dot), with no space between them. The new symbol will allow amateur radio operators to exchange Email addresses. That is because - in an irony of the digital age - they often use Morse to initiate contacts over the Internet. Nobody can remember when a new symbol was last added to the Morse Code. "It's a pretty big deal," said Paul Rinaldo, chief technical officer for the American Radio Relay League, the US national association for amateur

radio operators. "There certainly hasn't been any change since before World War II." (via Radio Netherlands Media Network 2/04)

HAPPY 40TH BIRTHDAY IRCA! Celebrating its 40th anniversary this year is the International Radio Club of America, one of 2 active medium wave DX clubs in the United States. IRCA offers an emailed 'DX Monitor' bulletin 35 times a year for US\$10.00 to any part of the world. Check out their website at http://www.ircaonline.org for more details. They also have a number of interesting publications that can be purchased by non-members. The 'DXers Technical Guide' runs to almost 200 pages and costs US\$17.50.

The IRCA Mexican Log is an indispensable reference for anyone who hears Mexican radio stations. It lists all AM stations in Mexico by frequency, including call letters, state, city, day/night power, slogans, schedule in UTC, formats, networks and notes. Airmailed cost to Australasia is US\$13.00.

IRCA's "Sunrise/Sunset Maps" consists of 12 maps showing 15 minute sunset and sunrise times for the US and 12 maps showing hourly sunset and sunrise times for the World. Explanation includes use of the maps and examples of DX made possible by knowledge of Sunrise/Sunset Times. Airmailed price to Australasia is US\$4.50. All publications can be ordered from IRCA Bookstore, 9705 Mary NW, Seattle WA 98117-2334, USA.

WORLD RADIO TV HANDBOOK UPDATE Members using this invaluable annual reference to international and domestic broadcasting can now obtain a 13 page update covering the B03 season from the WRTH website at: http://www.wrth.com/wrthupdatesmarch04.pdf It includes station information and schedule changes received by WRTH up to 1 March 2004. For those without Internet access who wish to receive a copy, please send a self addressed A4 size envelope to NZRDXL Adcom at Box 3011, Auckland with \$2.50 in mint stamps to cover costs and postage. Deadline for orders is 31 March.

Full copies of the complete WRTH 2004 are still available from Michael Pollard at Burnet Pollard Books, P.O. Box 6343, Upper Riccarton, Christchurch or send Michael an email at radiobooks@xtra.co.nz

Remember to ask about the discount available to members of the NZ Radio DX League

SHORTWAVE GUIDE The publishers of the Shortwave Guide (who also publish the WRTH) advise that they will not be publishing the Shortwave Guide in the future due lack of orders.

A few Collectors copies (no futher copies being published) of the Shortwave Guide are still available from Michael Pollard at

Burnet Pollard Books, P.O. Box 6343, Upper Riccarton, Christchurch for only \$30 (including Courier Delivery within NZ)

Cheques only please - no credit cards at this knockdown price

AUCKLAND

The **29** February meeting was a BBQ held at Malcolm & Christine Holmes place in Waikowhai attended by around 20 people! It went on till 10 PM with plenty of talking, a couple of movies watched in the auditorium and even some people around a table completely solving about a 1,000 piece jigsaw puzzle.

The **next DXpedition will be at Sunset Beach on Fri 26th - Sun 28th March**. Directions to get there... Turn right after crossing the famous old Pukekohe bridge (with the arches) and head out to **Port Waikato**; then on to **Sunset Beach** (a righthand turn which is a small bridge over a small stream). Drive all the way down to the beach carpark and look for the bach on top of the hill overlooking and directly opposite the beach shop. If you're not sure ask at the shop for **"The Philips Batch"**. Drive up the long windy driveway which begins to the right of a power pole to get up to the bach.

Please phone Malcolm on (09) 627-6399 or Yuri on (09) 360-3491 for further details.

The **March meeting** will be at the Clubrooms, 3000 Great North Road, New Lynn, just past Whau Creek, on **Sunday, March 28th at 2 PM**.

The **April meeting** will tentatively be at the Clubrooms on Sunday, **April 25th at 2 PM**. Meetings are held on the last Sunday of the month except December.

SOUTHLAND

Our February Meeting was to be held at Tiwai, however due to adverse weather conditons on the day, it was decided to hold the meeting in town at Eddie MacAskills. Several interesting topics not related to Dxing in particular were discussed during the meeting. The March meeting is to be held at Tiwai on Sunday the 21st of March.

WELLINGTON AREA

The next get-together is planned for **Sunday, March 28 at 1.45pm**, again at Mark Nicholls place, 4 Parera Grove, Heretaunga, Upper Hutt. T: 04 972 2606.

Branch inquiries to Ted: T: 04 586 2486 email: eddyhopy@hyper.net.nz

All members in Wellington-Kapiti-Wairarapa always welcome to attend. A special May meeting in Wellington City is planned. Watch for details.

Request from Len Martinson ZL1BYA - Monitoring Service Coordinator.

The NZART Monitoring Service needs hams **and Shortwave Listeners** to assist with the monitoring of our ham bands. The ham bands are under serious attack from Asian Cber's and Fishing boats, just listen at the bottom end of the 40m band and the 20m band. If you are interested and would like to join this service please e-mail to ms@nzart.org.nz or lenart@clear.net.nz or phone 09 235 7712.

50th ANNIVERSARY OF THE AUCKLAND BRANCH

We invite branch members, Auckland League members and visitors to join us on Sunday 25 th April, to celebrate the Auckland Branch's 50th Anniversary. There will be a display of vintage DX receivers, old QSLs and other DX memorabilia. There will be a brief talk on the history of the Auckland Branch and members are invites to bring anything of interest along and talk about it. A better that usual afternoon tea will be supplied.

2 pm at the Western Suburbs Radio Clubrooms, 3000 Great North Road, New Lynn, (next to the Whau Creek bridge).

For further information ring Barry Williams 09 6279 070

1954 - 2004 50 YEARS

A Long-Term New Zealand Shortwave Propagation Survey

Compiled by Mike Butler

When do we know that conditions are favourable on shortwave? Of course, you'll say - when we receive a strong signal! And the stronger the signal the better must be the conditions. So, if we choose to record *only* on the occasions when we receive the STRONGEST signals, surely we have the means of charting the best times and frequencies to listen to listen to any particular part of the world.

So that's what I've done since 1961 when I wrote on Shortwave Reception in the then Electrical Trades magazine, *The Radio and Electrical Review'*. But along with the time, frequency and location of the signal source I was aware that the number of sunspots - the previously accepted measure of the Sun's radiation - had a dramatic effect on shortwave performance.

Therefore Sunspot Numbers were recorded too. Luckily there is a direct correlation between Sunspot Numbers and the Solar Flux Index that has replaced them. And so all my readings were converted to the Flux Index.

Over the years, I found that there are rapid changes in reception when the Index drops below 95 and again, below 76 - where it typically stays for about two years in each Solar Cycle. On the upper side, when the Index reaches 150, reception becomes available on the upper shortwave bands that cannot be enjoyed under the other Flux conditions. Therefore the charts that will follow this article show the shortwave bands that can be expected to give us good reception in NZ when the Solar Flux Index falls between 95 and 149, plus an asterisk (*) indication of reception occurring only when the Solar Flux Index is 150 or greater.

Recently I've spent much time searching the 'NZ DX Times' from December 1997, extracting items from the 'Bandwatch Under 9MHz and Over 9MHz' sections which seemed to qualify for inclusion in the Survey. Only a 'good' or better signal report was suitable. It was also essential to have the date of reception so that the relevant Solar Flux level could be confirmed. Unfortunately, a mountain of useful data has been lost because of the absence of one or both of these essentials in Bandwatch contributions.

So for everyone's benefit, please check that dates of reception are always included in your reports to the Bandwatch columns of the 'NZ DX Times' each month. I will continue to scan those pages to improve our propagation knowledge.

As a result of this work, 652 magazine items have been used as Reception Indicators to add to the 5586 items from my own monitoring already in the upper Flux chart. Your good efforts have thus contributed 10.5% of that chart. The star contributors so far have been: Ian Catermole (Blenheim) 117 items, Cliff Couch (Paraparaumu) 86 items and Kevin Brayshaw

(Levin) with 59. And there are 30 others whose reports have also qualified. Thanks to you all.

Let's now look at uses for such a Shortwave Survey:

(1) AS A MONTHLY 'READY RECKONER'

Users of the Survey can see at a glance - what times and frequencies should be available for the best reception from the various world areas during normal NZ waking hours in respect of the month concerned. 'Am I likely to get a reasonable signal from this *DX Times* listing?'

- (2) TO SHOW HOW RECEPTION OF A REGION OR AREA VARIES DURING THE DAY
 Users of the Survey can see the specifics of how, for example, reception may fade from a particular area as we approach midday hours in New Zealand.
- (3) AS A BASIS FOR UNDERSTANDING RADIO PROPOGATION

 Examples could include differences in reception between the North and South
 Islands of NZ, or differences in reception from overseas e.g. between North & South
 Africa as a basis for further study of reception patterns.

(4) TO FORM THE BASIS OF A COMPETITION

Encouraging users to identify additional good reception examples not currently noted in the survey.

(5) A BASIS FOR FURTHER RESEARCH

Encouraging hobbyists to produce articles dealing with particular areas of shortwave propagation.

NOTF:

At its 2003 Annual General Meeting, the DX League acknowledged Mike's 40+ years of collating this information as a basis for predicting the best frequencies for reception during each month of the year. We wish to share Mike's research with all members through a series of articles in the *NZ DX Times*, starting this month. Mike welcomes feedback from members that will help improve the usefulness of the survey. Please write to Mike Butler c/o NZ Radio DX League, P.O. Box 3011, Auckland. **Bryan Clark**

How to Determine the Solar Flux

Compiled by Bryan Clark

Every hour of the day at 45 minutes past the hour, Standard Time and Frequency radio stations WWV (Boulder, Colorado, USA) and WWVH (Kauai, Hawaii) broadcast a brief report on solar terrestrial conditions including the Solar Flux reading. WWVH provides the best reception in NZ and depending on the time of day at least one frequency is generally audible. During our local daytime, try 15,000kHz, changing to 10,000kHz or 5,000kHz after dark.

In the airtime between 45 minutes and 46 minutes past the hour, the following solar data readings are broadcast over WWVH — the Solar Flux, the Boulder A Index, and the Boulder K Index. Then Solar Terrestrial Conditions — the extent of solar sunspot activity and geomagnetic disturbance level for both the past day and a forecast for the next day are given. The details are given quickly so it may pay to tape it and replay for clarity. With practice you will quickly note the key information to assist your radio monitoring.

To assist your usage of Mike Butler's survey data, it's helpful to know the solar index reading when you are monitoring the shortwave bands. Mike provides frequency recommendations for a solar flux reading below 95, and another set of recommendations for occasions when the reading exceeds 95. He usually listens to WWVH in the late afternoon to get the latest flux reading.

The solar flux reading can range from a peak of 200+ at the top of the sunspot cycle (eg 1989-90) down to the mid-60s during a minimum eg 1996-97). As a general rule, the higher the solar flux number, the better reception should be. However the geomagnetic levels (the A and K Index readings) must also be low for optimal reception conditions.

WWV and WWVH issue QSL cards for reception reports

APRIL SHORTWAVE PROPAGATION SURVEY WITH MIKE BUTLER

Based on Mike's monitoring over many years, the Shortwave Bands listed below have given good daytime and evening reception in New Zealand during the month of April, when the Solar Flux Index has been in the current range 87 to 122. January 2004's average was 114 and February's was 107 so the trend is downward. An asterisk indicates good reception was only had when the Flux was above 95. Choose the area that you want to hear, then select the time of day.

NOTE THE GAPS! CAN YOU FIND GOOD (\$7+) SIGNALS TO FILL THEM?

The Hydro Dam DXer Dr Gervan McMillan (Kurow)

Compiled by Jack Fox ZL4ND Patron NZ Radio DX League

A most interesting collection of DX verifications has been offered to the New Zealand Radio DX League for its collection in the University of Otago Hocken Library, Dunedin. It is from the family of the late Dr D G McMillan who DXed at Kurow in the early 1930s.

Dr Gervan McMillan had his medical practise at Kurow, North Otago, connected with the Waitaki Hydro Medical Association during the construction of the new Waitaki power hydro dam. He was a member of the New Zealand DX Club and had the number DX 15 OC (Otago). The C is thought to represent Canterbury, it was OT for Otago in 1939. He became associated with the Labour Party and in 1935 he stood for Labour and won the Dunedin West seat. Three years later he was appointed Minister of Marine but ill health precluded him from further politics. Later he was elected to the Dunedin City Council and Otago Hospital Board. He died on February 20 1951, age 46.

As a result Gervan McMillan's collection is not large but what is there is most interesting, especially 70 years later. The card section is nicely held in a photograph album. It would appear his first report was sent February 16 1931 to WMAQ the Chicago Daily News owned station. KFRC San Francisco verified his March 4, 1931 report but, because he did not include a 10-cent stamp there was no Ekko stamp. He probably would not know about the stamp. 2FC Sydney appeared thrilled to receive a report of their daylight transmission being heard in New Zealand as were 2UE. The 2UE card is unique in that it is 23 x 19 cm and in the form of a Log Card with AWA radio advertising down the sides and across the top and bottom. In the centre are two columns, one has space for Sydney stations with 2UE printed and alongside under the heading Distant Stations is listed Dr McMillan's report being confirmed. He has two such cards.

Eric Shackle Collection, NZ Radio DX League Archives

Reception from America must have been great in those days as he collected many verifications from the States and KVOO Tulsa, Okalahoma in April 1931 issued the same style of card as did in 1944. It would look as if, during his rounds, he was caught short of writing material for on one occasion the back of a KRLD card had been pressed in to record a patient's medical note! Many stations issued Ekko stamps which today would be valuable.

Eric Shackle Collection, NZ Radio DX League Archives

Just to prove long distance stations could be heard in those early days he has letter verifications from Radio Journal, in Bratislava, Czechslovakia a "branch establishment" of Prague. The Post and Telegraph Department in Bangkok confirmed HSP1 on 350 metres with 2.5 kW. They were also testing a shortwave station HSP2 on 41 metres with the same amount of power. The Indian State Broadcasting Service confirmed a report to VUB on 357 mtres.

In the last five pages are verifications of the New Zealand stations including many B class ones, but it is one from the Radio Broadcasting Company of New Zealand in Christchurch the wording made me have a grin, but that was the way it was done in those days. "Your letter of the 14^{th} instant is before us for attention." They confirmed he had heard 1YA 2YA 3YA and 4YA.

Today, even with so many radio stations on the air, the privately owned AM stations in New Zealand which carried out pioneering broadcasting, hold interest to DX listeners. Stations like 2ZE in Eketahuna, "The Golden Voice of Gisborne, NZ" was the slogan of 20 watt 2ZJ which was on the air every day for periods except the authorised silent day on Thursday.

Eric Shackle Collection, NZ Radio DX League Archives

(Many of the private B class stations had silent days when they did not transmit. I cannot confirm whether this was voluntary or a Post and Telegraph Department requirement.) This station was finally sold to the NZBS in the 1950s. The well known Parsons Radio Supplies station 4ZP stated their power ranged from 50 to 100 watts, while Frank Barnett who owned Barnett's Radio Supplies in Dunedin operated 4ZO on 1080. It is interesting that a son is still in radio at Wanaka and was largely responsible for Central Otago listeners being able to hear Radio New Zealand National Programme when he developed a special antenna.

Eric Shackle Collection, NZ Radio DX League Archives

Across the Tasman the Australian stations are of interest, including one from 2UE Sydney with a photograph of a "millions" of people listening to a broadcast of a test match in 1930. An interesting one is the AWA VK2ME "The Largest Broadcasting Station in the Southern Hemisphere" located at Pennant Hills, Sydney, with 20 kilowatts. It was used for wireless telephone service to England and 22 European countries as well as overseas broadcasting. Australia's population was then 6,3 million.

Three former NZ DX Club members recall a meeting of the newly reformed Otago branch in 1941 when Dr McMillan attended and displayed his QSLs. Two League members, Murray Lamont and Jack Fox, and the then president, Ron Williams ZL1RAW can still recall that meeting and listening to his DX experience of 10 years earlier. They remember too, cycling in dark wartime blackout streets to the Williams home on that night.

While Gervan was unable to continue the hobby, his collection is a valuable contribution to the history of the DX hobby in New Zealand and preserved for the future of this country's history.

NEW ZEALAND RADIO DX LEAGUE (Inc.)

The New Zealand Radio DX League (Inc.) is a nonprofit organisation founded in 1948 with the main aim of promoting the hobby of Radio DXing. The NZRDXL is administered from Auckland by:

NZRDXL AdCom, PO Box 3011, Auckland

Patron - Jack Fox iackfox@clear.net.nz president@radiodx.com - David Norrie National Secretary - Evan Murray (Tel. 09 483 9543) varrisian@paradise.net.nz vice.president@radiodx.com - Bryan Clark Treasurer - Phil van de Paverd paverdp@xtra.co.nz
