

Welcome

Welcome to the November DX Times. As advertised last month this edition is later because it contains the news from the Annual General Meeting, held on Sunday 6th November. You will find all the news in the Adcom column on page XXX.

Happy 50th Birthday

Radio Hauraki - the home of the young New Zealanders

Turn to page 7 for more on Hauraki's 50th Anniversary.

MAILBAG

Editor
Theo Donnelly

email mailbag@radiodx.com
Burnaby, BC, Canada

Welcome to 'The Home of the Olde...' As you've already read, Stu has reminded us about 'The Home of the Young New Zealanders'. A fair number of us will be muttering, "I remember when 50 years ago!" It's hard to believe so much time has passed since the shenanigans at the Western Viaduct in Auckland over Labour Weekend in 1966, the difficulties a month later, and eventual 'official' success in December. That weekend was busy, not the least because several of us – Bryan Clark, Dene Lynneberg, Andy McQueen, the late Jim Benzoni and myself were on a DXpedition near Raglan. I wonder if Bryan is still able to climb gum trees half a century on?

Bryan Clark, Andy McQueen, Jim Benzoni, Dene Lynneberg (front). Theo Donnelly photographer. Off to the pub for Sunday lunch. (Underage but never mind). Bryan Clark up a gum tree!

David Ricquish, Wellington has sent along a personal update through the good graces of **Chris Mackerell**. "Still here still but in a wheelchair due to the high danger of falling. It will be a while yet before I can do much again. Looking forward to the summer months and spending time outside in the backyard. Feeling very frustrated and it is very tiring for Jo without whom I'd be lost. I wish everyone a successful AGM and Jo & I send our best wishes to everyone." *(And the wishes work both ways, to Jo and yourself from all of us, David. Chris also added that he's doing maintenance on the Radio Heritage Foundation website and radio guides – so thanks to him too.)*

Ian Cattermole, Blenheim delivers this latest list to keep his records up to date. "Here are my SW veries for October. Once again as expected not too much to offer this time around: Radio Sedaye Bahar, Grigoriopol 7495; VOIRI 11925 & 12025; Radio Habana Cuba 11670; CRI 7420; NHK, Santa Maria di Galeria 9710; and WHRI 9505 kHz." *(Playing both sides against each other, I see: Sedaye Bahar and VOIRI...)*

Jonathan Wood, Mosgiel has gone looking for another hotspot, after the changes reported last month at Long Beach.. “Hello Theo; On 1 October I took a trip into unknown territory - Cook's Head, which lies on Chrystalls Beach just north of Tokomairiro Mouth. It provided a bit of excitement getting the station wagon up a bumpy track, but there is lots of space for antennae without being a nuisance to anyone. I tested a 100m BOG versus the 46m dipole; generally, the dipole was slightly better but in several instances results were identical. Finding a workable earth for the BOG has been difficult in the past - and so far I haven't found a better solution than the car chassis via the cigarette lighter. One surprise was E07, a Russian numbers station, which was booming in so loud I wondered if NZ had started its own numbers station! Then, last week, we had a sharp lightning crack which directly hit the main building of a nearby rest home, taking out electric and electronic circuitry. It also disabled the Lowe at my place, 800m away, which has had to be sent away for (hopeful) repair. In the meantime, the FRG-7 has come out of hiding. I've ordered an Elad FDM DUOr from RF Solutions in Australia. While the cost was a bit of a minus for me it looks like the nearest thing I can find to a more multi-talented version of the Lowe: small, light, portable, 6 buttons and 3 knobs versus the Lowe's 3 buttons and 2 knobs; and, if I get round to installing windows on my mac, it's SDR functional. (Apologies to those who see Windows on a mac as, well, un-PC! I agree, but one can't have everything!) The DUOr is the receive-only version of the DUO. I have been finding DX-ing unrewarding at home, hence all the trips, and perhaps this might make some difference!” *(Ouch! I snuck a look at the price. You're going to have to replace flat whites with instant for a while. That's a similar concept to the CR-1A from CommRadio in the US, which I know one reader of the 'Times' uses. I was tempted when I first read about it, but decided the lack of DX of personal interest couldn't justify the cost. And oh, you're wearing out the Otago coast pages of my road atlas...)*

Ian Wells, Mosgiel comes up with a familiar visitor to the Times' BCB listings. “I have received an email from KXEL, Waterloo IA (Jack Taddeo, General Manager <jtaddeo@nrgmedia.com>) confirming my report submitted to the “Contact Station Management” page on the KXEL website. Surprisingly, the response was received within 12 hours of submitting the report, so I was impressed. I have not been as lucky with a number of others in recent times.” *(Good to hear staff like these are still around. Weeding through the junk that 'open' addresses probably receive must be a tedious task.)*

Bryan Clark, Mangawhai reports doing MW bandscans in Hong Kong, Beijing, Shanghai and Singapore while touring in October. "Singapore rates as the best DX site I've tried in Asia because there are no local MW stations, but with our son now relocated to Hong Kong with its crammed MW dial of local and mainland Chinese stations, future holiday DXing will be much more challenging. It was interesting seeing how the Chinese censor the BBC World TV channel when 'unsuitable' stories are aired. I noticed this in both Beijing and Shanghai. The headline item for a story about dissension in the Hong Kong Legislative Council was followed by a blank screen until another story was aired. I also watched CNN while in China but their limited coverage of Asian stories meant I never saw any evidence of censorship. At our Shanghai hotel (we were located on the 80th floor of the 4th highest building in the world) I had a choice of 12 CCTV channels (including the EE language channel seen in NZ) and another 9 Chinese regional TV channels. The CCTV building in Beijing is architecturally impressive. Flying Cathay Pacific's new Airbus A350 from Hong Kong to Singapore, I was able to watch BBC, CNN or Euronews live via satellite, a new airborne experience for me.” *(Singapore might not have locals, but what about the noise level?)*

Stu Forsyth in Cyberjaya, Malaysia has his own view of DX not too far away. “I have sneaked time to do some listening. Loggings are: R. Sedaye Bahar 7495, RFA 9355, V. of Mongolia 12035, RTM Asyik FM 6050, RNZI 7425 (great signal) and 6170 (not so great), V. of Vietnam 1242, Myanmar Radio 5915, CRI 1080, Cambodia 918, KCBS Pyongyang 3250 and 3320, AIR Kolkata 567, AIR Jeypore 5040, Bhopal 4810, Hyderabad 4800, Chennai 4920,

RTI iLove Music 1557 (Taiwan), Radyo Pilipinas 12010, 15640, 17820, VoA Botswana 4930, R Puntland 1 Somalia 13800. Veries are in from R Sedaye Bahar 7495, Romania 11825, RFA 9355 (the mysterious signal mention in DX Dialog), RNZI 7425, Horizont Bulgaria 576 for country no. 70, R. Pilipinas 12010, 15640, 17820 - email verie within an hour of the report being sent with promise of a QSL card to come. I am not holding my breath. However, the important bit is that the email addresses in the WRTH (or at least my version from last year) are incorrect. Send reports to <dzrp.radyopilipinas@gmail.com>. I also sent a report via their Facebook page. The answer came from my email. Have been trying to log VoA Sao Tome on 1530, which is audible here from 1700 (1am here) onwards, when the Chinese go off air. 1530 is pretty much a clear channel. I have heard lots of noise and bits of music. This has been done via the timer on the AOR and a very good battery in my recorder. I have now tried listening in person from 1700 UTC (0100 local), but conditions have been poor - will keep trying!! I heard what sounded very much like talk that you hear on Sth American stations (i.e. Portuguese), so it was possibly them, but it was far too noisy to get anything out of it. My other target is Christmas Island 1422 relaying 6RN in Perth. I should be able to hear them too - again, listening in person may help." And then a day later, "To my earlier entry, add that I have logged DZME 1530 in Manilla. Really pleased to hear that one - didn't think we could hear Filipinos. Obviously I have been listening at the wrong time of day!! Still can't hear São Tome, but I will one day." (*Lots of intriguing stuff there – you've been sneaking more than a few minutes.*) (*When the wife's away the DXer will play!* - Chief Ed)

Günter Jacob from Passau, Germany delivers a first in my tenure at 'Mailbag', an apology for having nothing! "Much to my regret, I have no contribution/s this time. Let's hope we will all have a good start for the B-16 transmission period." (*There's always next month.*)

And I'll look forward to whatever everyone has for me in December – I like Christmas presents! I was looking at Radio Spectrum Management's data again the other day; I notice they corrected the 1377 listing so that the location now agrees with 621 at Three Mile Hill, but the three Auckland stations on 1251, 1386, and 1593 are still shown as from the phantom mast long dismantled... ah, officialdom.
73, Theo

Postscript - an interesting item from DXDialog

Dene Lynneberg writes....

Recently I have been in contact with the Danish dx'er Stig Hartvig Nielsen and today I received from Stig a QSL for his station World Music Radio which broadcast on 6290 kHz via Meyerton away back in 1997. Success after 19 years. In one of Stig's email's he mentioned that he may not have replied to two New Zealand dx'ers.

I quote from Stig's email::

"I was surprised that you haven't received a QSL, because I believe that all – or almost all - correct reception reports received by mail - for our South Africa broadcasts in 1997 - were QSL'ed. Looking through my files – I found the reason. Your report was never received – or (more likely) misplaced by me. At least it is not under NEW ZEALAND. And you sent a follow-up? I got quite many reports from NZ – incl. one from Alastair MacArthur and one from Ian L. Cattermole; these two report may not have been QSL'ed. Do you happen to know them?"

Until this QSL for WMR 6290 kHz my longest wait without a follow up report being sent was Scandinavian Weekend Radio 11720 kHz, which replied after 5 and half years.

I have heard from Ian and he did not receive a verification, so he wants one too! (Chief Ed)

Labour Weekend 50 years ago - Tiri's great escape!

As mentioned on the front page, it is now 50 years ago that **Radio Hauraki - 'the home of the young New Zealanders'**, broke the shackles of state broadcasting in New Zealand forever.

Broadcasting from the MV Tiri, moored in international waters in the Hauraki Gulf, Radio Hauraki beamed its signal at New Zealand on a frequency of 1480, and sometimes 1485 kilocycles.

The Hauraki political saga came to a head over that long weekend. The group were out of money, and neither Minister of Broadcasting and Marine Jack Scott (what a coincidence of joint portfolios) nor the NZBC's Director-General Gilbert Stringer had been helpful in exercising the Corporation's power to licence competition. The decision was made for the Tiri to make a run for it, but unfortunately the Auckland Star's Saturday evening sports edition blabbed about a possible 11.30 pm sailing. Police descended on the scene, the Minister attended for talks that apparently held out the prospect of leased time on 1YD, though the NZBC wasn't keen on losing the commercial breakfast monopoly held by Merv Smith on 1ZB and its advertising revenue.

On the Sunday evening, a large crowd had gathered down at the Western Viaduct. Circumstances included the Tiri getting stuck on the basin's bottom as the tide was going out, as well as an attempt to close the drawbridge, though David Gapes, Peter Telling, and Brian Strong moved under the mechanism which the harbour board's operator finally halted. Eventually the ship made it through the gap of the partially-lowered bridge, with some in the crowd helping to pull the transmitting mast clear. However, police who had been caught on board later arrested the crew out on the Waitemata off Devonport after finally figuring out how to cut the fuel line and stop the ship's progress. The court hearing that followed eventually threw out charges which had been tied to a detention order for survey/safety reasons while the magistrate considered the actual intention was to prevent the ship's use as a broadcasting entity. That was on Monday 7 November, and the Tiri finally left without fanfare in the dark on Thursday 10 November.

It was ground breaking stuff. Among the original Good Guys were: Chris Parkinson, Paddy O'Donnell, League member Brian Strong, Ian Magan and Peter Telling.

After 1,111 days at sea, various legal wrangles, two serious accidents requiring firstly the replacement of the Tiri with the MV Kapuni (known as Tiri 2) and secondly repairs to that boat as a result of damage sustained during the same storm that wrecked the Wahine, and the loss of a crew member overboard, Tiri 2 sailed into Auckland harbour playing Born Free repeatedly. They were now allowed to broadcast on dry land.

Congratulations to those in charge of the revolution - it changed the face of New Zealand broadcasting forever.

Theo Donnelly picks up the story

Somehow Tony Marr and myself had arranged for a weekend overnight visit to the Clayden Farm (with Lloyd and his Mum) out on the Whangaparaoa Peninsula -- Ray Babbage came up with a more specific name for their location: was it Army Bay? Anyway, Tony's Mum and Dad (Ella and Don) picked me up from the NZR Road Services' bus at Auckland station on the Strand, then delivered us plus Tony's Eddystone 680X and other necessities to the Claydens during the afternoon of Sat 19 November 1966.

See below for part of a report I sent to Hauraki a few days later, outlining what Tony and I had monitored of the pirate's efforts over Saturday afternoon and evening, and Sunday morning, along with noon-ish Sunday at the Marr home in Forrest Hill, Takapuna. You'll note one of the segments lists the frequency as 1485 -- Tony had his signal generator with him. The routine was Ella would never let me go home to Hamilton without being cleaned and fed! Parents supported us.

The Marrs dropped me off at 93-95 Anzac Avenue in the afternoon of Sun 20 Nov, and I played my taped segments to a group of Hauraki types, including David Gapes and Derek Lowe.

Hamilton's 'Waikato Times' of the following day, Mon 21 Nov 1966, carried the news that the test transmissions hadn't been as successful as expected... but look at the details: apparently the signal made it to Christchurch... all of this dating prior to the 'official' inaugural broadcast of 1 December.

NZRDXL member Brian Strong in Riverton, one of the Good Guys, verified my report with the QSL letter (see below) and added a personal note, (again see below). I'm sure he won't object to having his connection publicised.

The General Manager,
Radio Hauraki,
Pacific Radio Advertising Ltd.,
Tyler's Building,
Anzac Ave.,
AUCKLAND.

Dear Sir,

I am pleased to report reception of your station heard operating on 1480/1485 kilocycles at the various times listed in the log below, on Saturday and Sunday, 19th - 20th November, 1966.

Items and announcements heard during these broadcasts are as follows:

THIS SERVES AS CONFIRMATION OF YOUR HEARING MY TALK ON SUNDAY AT 6.40 P.M., AT YOUR RECORDING STUDIO.

SATURDAY, 19TH NOVEMBER, 1966: 6.37 P.M.: 1480 kilocycles.

5.37 p.m. : "Lara's Theme" from Al Corban and his orchestra.
5.38 : Announcer, Bob Leahy: "And that's called Lara's Theme played by Al Corban and his orchestra."
listen to last Train to Clarkesville."
"Last Train to Clarkesville" from the monkeys.
5.41 : "And that's the monkey's and Last Train to Clarkesville. Radio Hauraki, top of the dial. Yes, we're on the air, go tell your friends."
The song "Sonny" was then played.
5.43 : Tom Jones with "I've had too much of this and that".
5.46 : The Supremes with "You can't hurry love".
5.47 : Paddy O'Donnell with a very weak announcement, which he repeated at normal strength:
"This is Radio Hauraki test transmitting from our transmitting base, the M.V. Tiri, in the Hauraki Gulf. Just stay with us, because at seven o'clock we may have some goodies for you. Stay with us for seven o'clock tonight. Our signal is weak, and we realize this, and we're increasing it all the time. This is Radio Hauraki test transmitting."
5.48 : The Supremes with some more of "You can't hurry love".
5.49 : "I'm hungry for those good things, baby".
5.52 : End of Report.

S I R P O
4 5 4 5 4

SATURDAY, 19TH NOVEMBER, 1966: 10.45 P.M.: 1485 kilocycles.

10.45 p.m. : At tuning, your documentary programme, "The Radio Hauraki Story" was being played. The item at this stage was the Radio Hauraki shark patrols.

RADIO HAURAKI

A COMPLETELY NEW CONCEPT IN COMMERCIAL BROADCASTING

November 25th, 1966

Theo Donnelly,
?? Fox Street,
Hamilton.

Dear Theo,

This is to confirm your report of reception of Radio Hauraki heard operating on 1480 kilocycles at various times on Saturday and Sunday, 19th 20th of November, 1966.

At the times of reception we were operating on a maximum power of 200 watt utilising a temporary antenna of approximately 50 feet, from the P.V. Tiri situated in international waters off Great Barrier Island in the Hauraki Gulf.

Since the time of your reception we have gone off the air and at the time of writing are in the process of erecting the permanent antenna, a steel/al mast of 150 feet and have updated our transmitter to 2000 watts. It is hoped that the final output will be somewhere in the region of 2 - 2½ kw.

The transmitter itself is a Westinghouse with considerable modifications.

Your report will be held on file and when verification cards are printed one will be forwarded to you.

Thanking you for your interest,
Yours sincerely,

Brian D Strong,
Program Division.

Brian Strong's official verification

Radio Hauraki will go off air to put up 150ft sending mast

By Murray Nicoll

Radio Hauraki will go off the air for at least a week to erect its permanent 150ft steel transmitting antenna on board the Tiri.

Managing director of Radio Hauraki, Mr David Gapes, told The Times this from Auckland today.

The decision to stop transmitting attempts and erect the permanent antenna follows a disappointing start to their broadcasting during the weekend.

After eight days of setbacks caused by gale-force weather and equipment

troubles, the pirates managed to put out only weak broadcasts at very low power. They shut down their transmitter late last night.

Original intentions were to broadcast from the temporary wire antenna, rigged on the Tiri when she anchored in international waters more than a week ago, for a month or two before erecting the permanent lattice steel antenna.

"But we found that the wire antenna will not take any more power than we were feeding it this weekend," Mr Gapes said.

The pirates took their power up to only 400 watts—less than a quarter of their proposed limit.

"The minute we started feeding more into it the antenna started arcing and burning itself out," said Mr Gapes.

"So we'll scrub the temporary antenna and get the proper steel mast up as soon as possible. Then we can get going at full power.

"This will allow us to do some full-scale testing of the transmitter.

"We would not have had the trouble with our transmitter if we had been able to test it on land before installing it in the boat.

"But the Post Office took away our testing licence, which they granted us early in the piece, and this prevented us from testing at our studio," claimed Mr Gapes.

The pirates will hold a telephone calls from meeting in their studio in Christchurch who picked Auckland today to discuss up their low power broadcasts on ordinary this latest decision.

"We have had offers of help from other radio experts," one of the pirates told The Times.

"Our man Denis O'Callaghan is one of the best there is in radio," said Mr Gapes, "but he is happy to accept any worthwhile ideas or suggestions others might have."

During the weekend the weather was so bad that the pirates had to stop broadcasting.

But Hamilton people, and radio hams, who tried to tune in were disappointed.

A Hamilton ham radio operator told The Times that this was not unusual. Signals could be bounced to Wellington and Christchurch off the atmosphere, but were weakened by other signals.

Waikato Times

Mon 21 Nov 1966

P.O.Box 2964,
Auckland.
Nov.25th.

Dear Theo,

Thanks a lot for the report you sent in,not only did it match our logs - I just about kept getting them confused.

Regarding the signal we put out - ever felt like pulling a sock over your head and hiding somewhere? That's how we felt.

Originally we had scheduled a whole week for testing,but because of the holdups etc,we had to go straight on the air to meet our publicised deadline with devastating results. Half the trouble was the temporary antenna - every time Doc cranked the xmtr power up,the loading ~~coil~~ coil started to melt and he had to drop it back again.

Anyway,at the time of writing they've got half the antenna up and in testing the xmtr we've got a little over 2,000 watts out of it on a dummy load. Our plan at this stage is to go on early next week unpublicised and spent 3 - 4 days testing to iron any further bugs out of the gear.

During the storm we had out there they blew the xmtr up on two occasions and had to do fairly extensive rebuilding throughout.

Thanks for the report anyway.Afraid you missed the first vari, Ray scooped it.They told me about you calling up but the person talking to me couldn't remember your name - but said a report was coming in.When Ray's arrived I thought that it must have been him.

Hope to see you when you call up this way again.
Regards,

Brian Strong

SOMALIA Radio Puntland One has verified Timm Breyel of Kuala Lumpur and has sent the following message: Puntland Radio One is back on air. In the course of correspondence Mr Jamal, Director General of Puntland TV/Radio, Garowe, Puntland, Somalia, informed Timm that their transmitter had been “off and not working” due to “Technical problem” for much of 2015 up until July 2016. He further requested that Timm listens to their transmission on 13.800 kHz. Mr. Jamal stated their transmission time is “from 6:30am to 9:00am East Africa Time (03.30 till 06.00 UTC) and from 1:00PM to 7:00PM East Africa Time (10.00 till 16.00 UTC).”

It should be audible in New Zealand at the later time. (Added by Chief Editor)

MYANMAR

5985 Fair to good signal of Myanmar Radio, Oct.13:till 1530 YAN 025 kW / 176 deg to SEAs
Burmese from 1530 on 5985 YAN 025 kW / 176 deg to SEAs

(via swldxbulgaria.blogspot.bg/2016/10)

7199.999 kHz Myanmar Radio from Yegu Yangoon former capital site,S=9 or -73dBm at 1510 UT Oct 14 here in southern Germany. Female Burmese language presenter, endless speech, but at 1517 UT local South East Asian mx played, TX off suddenly midst on mx at 1520 UT. (via HCDX Wolfgang Bueschel)

SOMALIA (Puntland)

Puntland Radio One is back on air. In a series of emails from Mr. Jamal, Director General of Puntland TV/Radio Garowe Puntland Somalia, I received not only confirmation of their test transmission in April 2015 but for 24 October 2016 as well. In the course of our correspondence he informed me that their transmitter had been "off and not working" due to "Technical problem" for much of 2015 up until July 2016. He further requested I listen to their transmission on 13.800 kHz. Mr. Jamal stated their transmission time is "from 6:30AM to 9:00Am East Africa Time (03.30 till 06.00 UTC) and from 1:00PM to 7:00PM East Africa Time (10.00 till 16.00 UTC)." (via South East Asia DXing, posted by T.L. Breyel)

I reported them on 25 October and sent the email to puntlandradio1@gmail.com. i got an almost immediate reply: My Name is Jamal Arab, I am Director General of Puntland TV/ Radio, truly we appreciated to share with me this report reception and welcome for your communication. Thanks in advance, Jamal

... so it is worth reporting them. Hopefully a verification will happen! (Chief Editor)

BROADCAST NEWS

Editor Bryan Clark email
Mangawhai broadcast.news@radiodx.com

**STEVEN SAMPLES LITTLE PIGEON BAY IN SEARCH OF NEW DX PARADISE
CHINESE & HONG KONG MW UPDATES FROM BRYAN**

ALBANIA TWR Europe will cease medium wave broadcasting via the high-power **1395** transmitter at Filake on 1 January 2017. (Wolfgang Bueschel WWDXC via NRC)

BANGLADESH Bangladesh Betar continues to test a new 100kw transmitter on **819** at the Dhaka D site. First reported in April and noted on 10 October by UK DXer John Faulkner. Thanks to Mauno Ritola for background detail. (via Real DX Yahoo Group)

CANADA

- 540 CBXQ Ucluelet BC off the air soon, if not already, now that CBXZ-1-FM is on the air, leaving CBKO-540 in Coal Harbour, near the North end of Vancouver Island, a possibility on the West Coast and points West. Elsewhere, CBYW in Wells, SE of Prince George, is the only other remaining LPRT on 540 in BC, and worth a try anytime CBK is off the air.
- 610 CKYL Peace River AB has applied to shut down their AM transmitter and increase their current simulcast FM transmitter's power and tower height. This Winters DX Season could be the last chance to hear them on 610.
- 740 CBNZ Nain NL, the last remaining AM station in Labrador, the mainland portion of the Province of Newfoundland, has been granted a move to FM.
- 1210 VOAR Mount Pearl NL has applied to switch the station to FM, with a 6 month simulcast period before shutting down the AM (all above: Jon Pearkins via IRCA)

The new Montreal station on **940** has begun testing. The calls are CFNV. 50kw as before, although many suspect that they are not up to full power yet. The same company was also to bring 600 AM back to the air. Nothing heard yet on that frequency and the deadline to get this station on air is 9 November (21 November for 940). (Canadian DXer "awr" 27/10 via Glenn Hauser's DXLD Yahoo Group)

CHINA English language stations are heard in Beijing on 846, 1008 and 1251kHz. Latter is CRI's EZ-FM. All 3 channels simulcast CRI's EE news at 1400 UTC. (Bryan Clark 10/16) The high-powered MW transmitter at Dongfang, Hainan Island on **684** provides solid signals into Singapore, over 2000km away. Noted with steady clear signals at 2035 local time (1235 UTC) with CRI English. A short 'Lets Learn Chinese' segment is aired daily at 1255 UTC. On past visits to Singapore, there has been a Radio France Internationale relay at 1300 but this is no longer heard. At 1300, the familiar CRI interval signal is followed by identification in Chinese, then suspected Cambodian or Vietnamese. Latter is listed but prgm not same as listed CRI Viet freqs. Closed 1456, when Indian music became clearly audible (suggesting AIR Port Blair is back on air) through the open carrier till 1500 when CRI tuning signal and CC ident related, followed by Thai or Viet sign-on 20/10. (Bryan Clark 10/16)

COLOMBIA 1190 Radio Cordillera on **1189.989** this morning, slightly lower than the listed

offset. (John Faulkner UK 5/10 via MW Offsets Yahoo Group) Andrew Brade notes that Cordillera carries the religious 'La Voz de la Liberación' programme from 0400 UTC. (via Real DX Yahoo Group)

FRANCE Radio Maria France will cease transmissions on **1467** (Monaco) on 1 January 2017. They continue on FM and DAB. (Christian Ghiboudo, mediumwave.info via NRC)

HONG KONG All listed AM stations were confirmed during a visit in early October.

- 567 RTHK3 identifying as "Radio 3" in EE . Transmitter is at Golden Hill Sha Tin. At our Sha Tin hotel there was a bad het on the low side of 567 during the day but this was absent at night.
- 621 RTHK Putonghua Channel from Sha Tin strong. Putonghua is the official language of China, based on the Beijing Mandarin dialect.
- 675 RTHK6 aka BBC World Service relay. Unlike Singapore and Auckland relays, no local identifications are carried. Evening reception at Sha Tin was only fair due co-channel QRM.
- 783 RTHK5 strong in Cantonese & Mandarin.
- 864 AM 8-6-4, vgd w/EE commercial prgms, plus Filipino hrd on Friday night. Hong Kong Commercial Radio.
- 1044 Metro Plus in EE w/ idents as "AM 10-44" and "The Plus". Filipino carried in the afternoon.
- 1584 RTHK3 low-powered relay of 567 barely audible in Hong Kong Central, about 8km from transmitter site. Was inaudible at Sha Tin.

Numerous other daytime Chinese-language stations were audible during the day in Hong Kong - the strongest on 702, 756, 927, 981, 1062 and 1215. Thanks to Alan Davies' excellent Asiawaves website, I have determined that these are from cities in the neighbouring Guangdong Province of China - Shenzhen and Zhuhai are only 17 and 63 km respectively from Hong Kong. (Bryan Clark 10/16)

LIBYA has been heard by Wolfgang Bueschel with strong signals on **677.497** kHz on 22 October. (via WWDXC Top News email)

MEXICO XEVOZ **1590** from Mexico DF now identifies as Arroba 15-90. According to Wikipedia, the "La Mexicana" slogan was dropped in mid-2016. (Fredrik Douren via Real DX Yahoo Group)

NICARAGUA 800 Radio 800, Managua. At 1038 on 3 October, classical instrumental segued to "Creo en Dios" by Tony Croatto, then live male ID, "50,000 watts de potencia... buenos dias, buenos dias, buenos dias." Sounding very much like a sign-on though not listed as so in this hour. Able to hear parallel web stream, the best and safest is: http://es.streema.com/radios/Radio_800_AM_Managua (Terry Krueger FL via DXLD)

VENEZUELA American DXer Bill Whitacre heard Radio San Sebastian on **960** on 14 October. Finnish DXer Timo Klimoff says he has heard Radio San Sebastian 960 with a very nice signal several times this year and suspects they've done something to their transmitter or antenna. (via Real DX Yahoo Group)

USA (info from IRCA's "DX Monitor bulletin")

- 660 KWVE Oildale, CA drops religious teaching format, now ethnic, with slogan "KWVE Radio Punjab".
- 740 KRMG Tulsa, OK slogan: "Tulsa's News, Weather and Traffic Authority".
- 790 KEJY Eureka, CA format now travel information, slogan: "Destination Radio"
- 1040 KURS San Diego, CA now silent.

- 1110 WVJP Caguas, PR new slogan: "Radio Caguas 9/1/16"
- 1340 KYNS San Luis Obispo, CA now modern rock, new slogan: "Alt 93.7"
- 1390 KZZD Salem, OR has change of call to KZGD.
- 1450 KTZR Tucson, AZ was Spanish adult hits, now talk, new slogan "The Talk Of Tucson".
- 1460 KBRZ Missouri City, TX format was ethnic, now Spanish Contemporary Christian, New slogan: "Radio Aleluya"
- 1470 WTOD Toledo, OH has new callsign WLQR.
- 1540 KZMP University Park, TX was Spanish sports, now Mexican, slogan "La Ranchera 106.7"
- 1550 KQNM Albuquerque, NM was silent, now Immaculate Heart religious teaching.
- 1580 KHEP Tempe AZ ex-KMIK noted back on the air 13/10 after being silent for one full year. IDing as "1580 AM KHEP Tempe, Arizona," relig. format. (John Johnson-AZ)
- 1600 KIVA Albuquerque, NM has new slogan: "Fox News ABQ.FM".

USA (information from National Radio Club's "DX News" bulletin)

- 580 WIBW Topeka KS slogan changed to "FM News 104.9."
- 620 WDAE Saint Petersburg FL now carries ESPN and Fox Sports Radio.
- 660 KGSV Oakdale CA w/"Radio Punjab" new format. Call change from KWVE?
- 790 WAXY South Miami FL applies to extend STA, U4 25kw day & night due to Cuban QRM.
- 850 KEYH Houston TX slogan now "La Ranchera 101.7."
- 890 KMJE Olivehurst CA has told the FCC it will go D3 10kw, ie: silent at night, pending CP to move night operations to the day site; not silent days.
- 970 KBUL Billings MT slogan changed to "NewsTalk 95.5."
- 1090 KAAV Little Rock AR continues STA extension w/50kw days, 12.5kw nights U1.
- 1240 WFWN Fort Myers FL call change to WFSX on 17 October.
- 1270 KBZZ Sparks NV applies to extend STA, U1 13kw days, 1.25kw nights.
- 1300 KKOL Seattle WA applies to extend STA, U4 25kw days, 30kw nights.
- 1300 KCMY Carson City NV slogan & Group to // Cowboy Country is Real Country.
- 1330 KMBI Spokane WA changed callsign to KYOZ on 11 October.
- 1340 KWLE Anacortes WA slogan & Group to // The Whale.
- 1340 KYNS San Luis Obispo CA format is now AOR, slogan "Alt 93.7".
- 1350 WZKO Fort Myers FL format now UC:AC, slogan "1350/107.5 Jamz."
- 1470 KUTY Palmdale CA applies to extend STA, U1 1.25kw day & night.
- 1480 KNTB Lakewood WA returned to the air around 10 October.
- 1550 KXEX Fresno CA slogan to "Radio Guadalupe, La Misionera." (Wayne Heinen)
- 1580 KHEP Tempe AZ granted STA with U1 50kw das, 12.5kw nights. (ex KMIK BC)
- 1580 KHEP Tempe AZ silent since 14 Oct. 2014, back on the air 13 Oct. with STA.
- 1590 KTLI Netarts OR slogans now "True Oldies" and "K-Til."
- 1670 KQMS Redding CA legal ident as "KQMS Redding-Shasta Lake City, K289BT Anderson". (John Wilkins CO)

USA KGBT, Harlingen TX heard on **1530** with clear, "Escucha Amor Celestial" identification at 1015 ET. Oddly, not parallel their stream, songs not even matching if taking into account an extreme delay, though same format otherwise. Still Univision owned, but not the Spanish Talk "Univision America" format in the NRC AM Log, instead now "Amor Celestial" with this format. Wonder if they are running their day power and pattern at night? (Terry Krueger FL via DXLD)

US CATHOLIC NETWORKS MERGE The two largest Catholic radio operators in the country are merging. Loomis California-based Immaculate Heart Radio and Green Bay Wisconsin-based Relevant Radio will combine to become Immaculate Heart Media d/b/a

Relevant Radio. Immaculate Heart brings 19 stations across six western states including 930 KHJ Los Angeles and 1260 KSFB San Francisco. Relevant also has 19 stations scattered across ten states including 1430 WNSW New York, 950 WNTB Chicago, 640 WWJZ Philadelphia, and 1330 WLOL Minneapolis. Both groups create programming that is heard on additional Catholic stations nationwide to bring their reach to over 108 stations in 36 states. The two groups have raised \$22 million out of an intended \$30 million over three years to be put towards increasing their programming, outreach, and new media efforts. (Radio Insight via NRC 10/16)

KINGS OF THE KILOHERTZ

IAN WELLS of Mosgiel sends in a listening log for the Broadcast Trail. Reports have gone out to KXEL and KMPC. *[Thanks Ian, good to know you're keeping an ear on the DX. Haven't forgotten I need to photocopy some old WRTH pages for you! BC]*

STEVEN GREENYER of Timaru has tried out a new coastal location for DX possibilities. He writes "With Okain's Bay no longer available for rent and Lake Ellesmere noisy in the Latin aerial direction, I am keen to find another location. On 14 & 15 October I stayed at Little Pigeon Bay on Banks Peninsula. The house is the only one in the Bay and is located about 30 metres from the beach. I arrived on Friday afternoon and erected the 9 metre squid pole. While Friday night was predominantly California and Hawaiians, the strength of the signals and lack of noise was great. Saturday night was not as good but unidentified signals on frequencies that are normally very weak was promising. I have one other place to check out but am keen to return. *[Thanks for the trail Steven. Shows that MW DX is very much alive in NZ, if you just get away from the man-made noise that plagues most residential areas today. BC]*

Check close-up at right of Pigeon Bay house, with Steven's Squid Pole vertical antenna mounted on picnic table.

STUART FORSYTH, 'home alone' in Cyberjaya Malaysia has been trying late night DX in the hope of reduced local noise levels. While conditions have not been good Stuart was able to log Cambodia 918 (new country), CRI 1080 in EE, DZME 1530, RTI iLove Music 1557 from Taiwan and a mystery Indian on 657 – either All India Radio Kolkata running late or AsiaNet Radio Dubai 657. Stu writes that "DZME Manila is the first Philippines station I have heard. The secret is to listen in the morning when the Chinese are off. The bands are still extremely noisy, but it is promising." *[Thanks Stu – the next step is to reduce QRN as much as possible within your own house – the recent discussions on the DX Dialog newsgroup may be helpful. BC]*

BRYAN CLARK Mangawhai has been challenged by very unfamiliar Asian radio dials during visits to Hong Kong, Beijing, Shanghai and Singapore in October. In Shanghai, with a population exceeding 24 million, I could find no English radio on AM (and a lone CC/

EE multilingual FM station), whereas the Chinese capital Beijing had 3 AM frequencies in English operated by CRI. I spent some spare time reviewing Mangawhai DX recordings to produce a few late trail items. Listening in Singapore, I was able to positively identify signals from Vietnam, Cambodia & Thailand during a short DX session with my aging Sony ICF7600D.

BROADCAST TRAIL - September-October

- IW** Ian Wells, Dunedin Sangean ATS909 and 40 inch passive loop antenna.
SG = Steven Greenyer on DXpedition to Little Pigeon Bay, Banks Peninsula
 Palstar receiver & longwire wound on 9 metre vertical.
BCM = Bryan Clark, Mangawhai WinRadio G33DDC & EWEs to Americas.

ADCOM NEWS

Editor Bryan Clark
Mangawhai

email
adcom.news@radiodx.com

2016 AGM The 68th Annual General Meeting of the NZ Radio DX League was held at Mangawhai on Sunday 6 November, with members physically present from Southland, South Canterbury, Waikato, Auckland and Northland. Administration Committee (Adcom) members from Oamaru, Ashburton and Malaysia also participated in the meeting by Skype internet conference call, as allowed under constitutional changes approved last year.

In his address to the meeting, Patron **SUTTON BURTENSHAW** commented on the 'high service' provided to all of us by the various editors of the New Zealand DX Times. He noted that "the information provided is as up to date as possible, much of it from overseas and often supplemented with additions/alterations included in DX Dialog our online service by local contributors as well. Adcom is to be congratulated for their continued support and I consider we are still very active even if fighting a slowing trend."

Presenting his report, League President **BRYAN CLARK** said that it was pleasing that the club continues strongly, with the NZ DX Times providing an excellent read each month, thanks to Chief Editor Stu, his long-serving team of section editors, and our loyal contributing members. "It is true that the DX listening options for members in urban locations are diminishing due to ever increasing local interference levels, as well as the slow decline in international shortwave broadcasting operators. Just this week we learned that Vatican Radio would be stopping shortwave broadcasts. To address the first of these issues, Adcom has committed to establishing a remote listening location in a low-noise location that would be accessible to members through the Internet. At the 2016 DX Convention in North Otago we began fundraising for the initial costs for this installation. Adcom hopes to finalise a location for the remote SDR receiver in the New Year, once a robust Internet connection arrangement has been identified and costed. In the meantime, it is encouraging that longtime member **CHRIS MACKERELL** has installed a Kiwi SDR at his Nelson home and earlier this month made this accessible to League members to trial. And **PETER MOTT** is planning a similar installation in the Bay of Islands. I am hoping that providing access to remote SDRs in NZ locations will go some way to restoring the DX fortunes of our urban members." Bryan acknowledged Paul Ormandy, Paul Aronsen, Steven Greenyer and Arthur de Maine's efforts in organising an excellent gathering at Moeraki in March. The club has its 70th birthday in 2018 and Adcom is already working on a convention to mark that significant anniversary. After the Moeraki convention, Bryan and Life Member **PAUL ARONSEN** visited the new Awarua Communications Museum outside Invercargill. Out of this visit has come a proposal for a joint DX listening display at the museum that would honour Southland's important role in the DX hobby and remember our most famous member Arthur Cushen. "I would encourage more members to join the League's DX Dialog Yahoo Discussion Group on the Internet - where you can get instant access to time-sensitive DX tips, guidance on building antennas and reducing local interference, in fact anything hobby-related that participants care to share. DX Dialog and our radiodx.com website stand alongside the DX Times as key resources for members. Thanks to Paul our webmaster for the radiodx.com website, and to **BILL MARSH** who has been contributing a lot of material to the site on the early days of DX in New Zealand. I'd like to thank my colleagues on Adcom for their support and work for the League, in particular Phil, who is taking a well-earned retirement from the Treasurer role, but will continue to be part of Adcom." Bryan concluded that it was time for a change of President after his 8 years in the role, but he will still be heavily involved in the club.

Outgoing Treasurer **PHIL VAN DE PAVERD** spoke to the annual accounts which show the club in a sound financial position though membership numbers continue their slow decline. The meeting agreed to hold annual subscriptions at the current level.

Chief Editor **STUART FORSYTH** presented his report via Skype. He said that the DX Times is only as good as those who put it together, not just the sub-editors, but also the club members, without whose contribution this publication would certainly be the poorer. When he compares the magazine with others he sees regularly Stuart said he was quietly proud of the quality we produce.

Stu continued "the sub-editors do the nuts and bolts work and to Theo, Kelvin, Yuri, Ken, Ian, Arthur, Bryan, John, Sutton, Adam and Jerry I give my most heartfelt thanks. When one of them decides to leave his post, it will be a difficult one to fill. I have greatly appreciated the prompt turn around with articles generally reaching me by the Monday after closing ensuring that the magazine is in member's inboxes by the Wednesday after closing, at the latest. **TONY KING** must also get a huge wrap. He has looked after the X-Band list, since the band's inception. He does a magnificent job keeping up with all the changes and sending them through on a regular basis. They are our best chance of hearing some Yanks on Mediumwave and it harkens back to the good old days in the 60s and before. The focal point of the magazine is Theo's Mailbag column and it is good to see the months when many contribute. It is always a good read. The saddest piece of news this year has been the misfortune that has befallen former Chief Editor, **DAVID RICQUISH**. He presided over the magazine at a bumper time and did a marvellous job. I have known David for around 40 years. He enjoys a good debate and while I often don't agree with him, he is a good friend. I know his recovery is slow and very frustrating and I sure we all send him our very best wishes for the future. I would like to thank the Administration Committee for its continuing support. The move to high resolution only magazines is a good one and will improve the reading experience of all." Stu closed his report wishing the League well as it enters its 69th year and he looked forward to another 12 months of good DX and the reporting thereof!

Webmaster **PAUL ORMANDY** reported that radiodx.com had received 90,000 visits in the past 2 years. He also thanked Bill Marsh for his efforts with website content. As Public Relations Officer, Paul also expressed appreciation of **ADAM CLAYDON**'s efforts promoting the DX League via Facebook.

In his Competitions Report, **ARTHUR DE MAINE** noted that "the writing reports and receiving verifications part of our hobby has not died, members are now using e-mail to obtain that verification. This shows up when you read the Mailbag section of the DX Times. I would encourage members to include e-mail addresses in their Mailbag contribution if they have received a verification by that means." He also asked that members contributing loggings and QSLs to the Mailbag and other magazine columns include the country name or transmitter site, to assist his judging.

Best Loggings of the year:

Shortwave - Under 9: 4750kHz Bangladesh Betar, Shavar - Ian Wells & Paul Ormandy; 3290kHz Voice of Guyana - Bryan Clark; 3310kHz Radio Mosoj Chaski Bolivia - Stu Forsyth (reception at Lake Ellesmere).

Over 9: 9500kHz TWR Swaziland - Kelvin Brayshaw; 9680kHz Voice of Hope, Zambia - Bryan Clark.

Mediumwave - 800kHz WVAL Minnesota USA - Bryan Clark; 840kHz Radio Nacional Panama - Paul Ormandy.

Best QSLs of the year:

Shortwave - 3310kHz Radio Mosoj Chaski Bolivia - Ian Wells and Stu Forsyth; 6265kHz Summer Meeting Radio Netherlands - John Durham.

Mediumwave - 1660kHz WGIT Faro de Santidad, Canovanas, Puerto Rico - Stu Forsyth (logged at Mangawhai); 800kHz WVAL Minnesota USA - Bryan Clark.

The following officials were elected for the 2016/17 year: Patron **SUTTON BURTENSHAW**, President **ARTHUR DE MAINE**, Vice President **DAVID NORRIE**, Secretary **STEVEN**

GREENYER, Treasurer **BRYAN CLARK**, Chief Editor **STUART FORSYTH**, Public Relations/Publicity Officer **PAUL ORMANDY**, Competitions Secretary **PAUL ARONSEN** (Arthur withdrew his earlier) nomination, Committee Member **PHIL VAN DE PAVERD**.

The meeting closed with Stu thanking Bryan for his years of service to the club. Following refreshments, a visit was made to the Moir Point Christian Camp in Mangawhai Heads which is being considered as a venue for Convention 2018. Everyone agreed that the facilities were excellent and venue most suitable for a gathering of members.

PETITION FOR RADIO NEW ZEALAND After an 8-year funding freeze, New Zealand's most popular radio station and our only public national broadcaster is very much under threat. Things are so bad RNZ is planning to sell its Auckland studios, one of its last remaining assets, just to stay afloat. Last year 70,000 people signed ActionStation's Petition to Save Campbell Live. John Campbell is now with RNZ, and he and his station need our help again. RNZ have made many cutbacks to its programming and assets, closing regional offices, including Tauranga and Palmerston North, and ending shows such as Spectrum after 40 years on-air. Compared to public broadcasters overseas, RNZ is seriously underfunded. A 2007 independent KPMG report recommended immediate increases to the RNZ budget of at least \$6 million. That increase has yet to happen, and the need has only become more urgent over the last 5 years. This announcement of RNZ's plans to sell their studios is the latest sign of the dire situation they are in. The Coalition for Better Broadcasting (CBB) has an online petition running – add your support for RNZ National and RNZ Concert by following the link at <http://betterbroadcasting.co.nz/news/blog/please-sign-our-petition-save-rnz-funding/>

RADIO VOICES A respected voice from the 'glory days' of Radio Canada International's shortwave operation – **IAN McFARLAND** – may be returning to the shortwaves next year. According to a 31 October posting to Glenn Hauser's DXLD Yahoo Group, Colin Newell, who runs www.Dxer.ca is in discussion with Ian about a DX type programme, likely to be aired by WRMI. Meantime, former DX League member **DUDLEY SCANTLEBURY** is retiring next month after 38 years with Radio Rhema and more recently the Star Network, where he is afternoon host. Prior to Rhema Dudley was at RadioNZ, and he won't be completely getting out of radio in December, as he will retain the Sunday morning announcing duties on Star.

BRANCH NEWS

Any information re Branch News - notice of upcoming events
or reports of recent events, please email:
editor@radiodx.com

DUNEDIN BRANCH

The next meeting will be held on **Saturday, 26th November** from 2-4pm
at Ian Wells' home, 16 Fenty Place, Mosgiel.

We're always happy to welcome new members – for further information, contact
David Miller 03 4763224 or Roger Pryde 03 4737805,
and, if possible, let Ian know that you're coming on 021 2987146.

WELLINGTON BRANCH

The next Beach Babble will be on **Wednesday, 30th November**, 12.45pm
Beach Babylon Cafe, Oriental Bay, Wellington

join Dene and others to talk about what's what in the world of DX.

On the **shortwaves.com**

From NZRDXL member Jerry Berg, 38 Eastern Avenue, Lexington, MA 02421, USA
NEW HISTORY MATERIAL AT <http://www.ontheshortwaves.com>

< www.ontheshortwaves.com> Update, October 2, 2016 -- We go to the Pacific. Under "DX History/Stations" you will find a brochure about WWVH. It was published in 1974 or some time thereafter, and provides a brief description of the station's operation until that time. It began transmitting, from Maui, in 1949, and moved to a different island, Kauai, which is its present location, in 1971. We have also posted a file containing several WWVH QSL cards. -- And under "Specialized Resources," Dr. Adrian M. Peterson presents "Outback Radio in Australia-2" (Wavescan N396, September 25, 2016).

< www.ontheshortwaves.com> Update, October 9, 2016 -- As Eddie Startz used to say, "Keep in Touch With the Dutch!" Under "DX History/Stations" we have posted several Radio Nederland items from 1956: the year's calendar, the summer schedule, and the Radio Nederland antenna booklet. -- Under "Specialized Resources/Wavescan" we have two new stories from Adrian Peterson: "The Story of a Megasized Shortwave Station in Alaska [HAARP]," Wavescan N397, October 2, 2016; and "Ancient DX Report: 1911," Wavescan N397, October 2, 2016. -- Also in "Specialized Resources" we have posted new versions of "American States on Shortwave" and "Active-Inactive SWBC Countries." In "American States on Shortwave" we have added Kermit Geary's QSL from New York apex station W2XJL; and in "Active-Inactive SWBC Countries" we have deleted Djibouti from the active list and made a few other notations (see end of list for all the changes).

< www.ontheshortwaves.com> Update, October 16, 2016 -- Chile is off SWBC now, but the stations of yore were usually fairly well heard. Under "DX History/Recordings" we have posted audio clips of 13 Chilean stations. The numbers in brackets are the ID locations on the clips. The stations: (1) R. Agricultura, Santiago, 9630 kHz., 1978 [1:32, 2:01]; (2) R. Calama, 6100, 1981 [:19, 1:01]; (3) R. Colo Colo, Santiago, 14530 (utility station pickup), 1978 [:30, 3:01]; (4) R. Cooperativa de Santiago, 9690, 1977 [:40, :59, 1:24, 1:44, 1:58, 3:04]; (5) R. Esperanza, Temuco, 6089.9, 2002 [:14, :31]; (6) R. Minería, Santiago, 9750, 1977 [1:11, 2:06, 2:14]; (7) R. Nacional del Chile, Santiago, 6195, 1976 [:34]; (8) R. Patagonia Chilena, Coihaique, 6080, 1980 {:38 English, 2:50]; (9) R. Portales, Santiago, 9570, 1977 [:20]; (10) R. Santa María, Coihaique, 6029, 1985 [:31]; (11) R. Universidad, Coincepcion, 6135, 1976 [:10, :56]; (12) Voice of Chile, Santiago, 15130, 1977 [:21 English]; and (13) Voz Cristiana, Santiago, 21550, 1998 [:51 English].

< www.ontheshortwaves.com> Update, October 23, 2016 -- We have posted quite a few items from Radio Canada, and here is another (under "DX History/Stations"): the Radio Canada Shortwave Club Antenna Handbook. -- And under "Specialized Resources/Wavescan" we travel from the Cook Islands to Pittsburgh, with these two new entries from Adrian M. Peterson: "Cook Island Radio Tour: The Island of Beautiful People" (Wavescan N398, October 9, 2016), and "Shortwave KDKA and its Many Callsigns and Transmitters" (Wavescan N399, October 16, 2016).
