

RADIO STATION WPCF
PANAMA CITY, FLORIDA
NOVEMBER 28th, 1958

Dear Listener:

This is to thank you for your letter, and is also verification of your report of the DX program which WPCF broadcast on the morning of October 20th, 1958 from 1:30-3:30AMCST.

WPCF is a fulltime 5,000 watts Mutual affiliate, located in Panama City, Florida. After the magnificent response we have had from that one DX program, we are seriously considering operating 24 hours a day. Keep listening for us.....1430 on your dial.

Thank you again for your kind words, and your cooperation.

Sincerely,

E. L. Dukate
General Manager

Dear Sir,

We were pleased to receive your letter concerning WENG's test broadcast. We found your comments, as to reception conditions in your local area, to be very helpful and greatly appreciated.

Your letter requesting verification of reception of WENG's test broadcast of January 25, 1965, was found to be wholly in agreement with our station logs.

Very truly yours,

Gregory L. Utley, P.D.

MUSIC ON THE RADIO

How Miami's Latin Stations Differ

Each of the Latin stations in Miami has a decidedly different music format. Because of this, a correlation can be drawn between the music and the demographic the station appeals to.

WHTT Radio Hit plays a blend of current and recent adult oriented Latin contemporary music. This includes all types which are researched to be acceptable among the target 18-49 station demographic. This includes "baladas," which are international-sounding romantic, often message-oriented songs, mostly by soloists; "charanga," which is a modernization of traditional Cuban dance-beat music, "salsa," which is a Caribbean modern dance-beat music characterized by a brassy sound; and "bolero," which is the more traditional Latin romantic genre, played in a contemporary manner. On WHTT, the mix of these musical types insures variety, found by research to be the most important factor in reaching the target audience.

WQEA La Cubanisima has only 2 hours of music in the daytime, with another block in the evening hours. The music played tends to be a mix of the more contemporary "balada" and nostalgic music recorded in the fifties by the old-time guitar-strumming trios.

WRHC Cadena Azul plays no music...for it is an all talk, news, commentary, discussion and information station.

WQEA-FM Super Q programs to highly anglicized Latin youth. The principal music forms fit a pattern of 50% English-language disco cuts, 35% dance-oriented "Salsa," and 15% "Charanga" and occasional up-tempo "baladas." The music is almost all very up tempo, varying more in genre than in beat.

WCMQ-AM "CMQ" plays mostly oldies, with its on-air slogan of "pure gold." Some recent music is played, but in a low proportion. The station also plays album cuts of artists who have been popular in the past. The overwhelming bulk of the music fits the "balada" form. A typical day of monitoring might find less than 10 records that did not fit this category being played.

WOCN Ocean Radio, similar to WQEA, runs very little music. In the segments dedicated to music, a mixture of nostalgia and "balada" are played, with the 50's era music predominating. That music consists of the old trios singing romantic songs, and the cha cha cha, rhumba, and pachanga dance music of that decade.

WCMQ-FM FM-92 leaves the oldies to its AM sister station. The FM promotes constantly the fact that they play exclusive new music and play records before anyone else. They also play a significant number of album cuts by artists that are currently programmed on the station. About 90% of the music is the "balada" style, with one or two up tempo songs played each hour, mainly after the newscasts.

Dear Mr. Geary:

Thank you very much for your letter of December 19th.

Your log of our programming is quite accurate. The clarity of your reception of our signal is remarkable, since we operate with 1000 watts of power, and during the pre-sunrise period when you heard us, we are on reduced power of 500 watts. A combination, no doubt, of atmospheric conditions and your elaborate equipment.

Again, thanks for your interest in the station.

Dear Mr. Geary:

We are indeed pleased to receive reports on both times of reception of this station, namely October 9th between 3:55 and 4:00 A. M. and October 18th, 1944.

As for the broadcast of the 9th can say definitely you are correct. But the one of the 18th was cheating on a broadcast on the CBS line which was carrying music from Washington. The numbers are probably correct, however I was not listening since I was VERY BUSY getting the teletype in operation and was not fully awake at that hour.

We had lots of bulletins and/of local and further down the coast to get in order so the general public could prepare for the coming of the blow.

Thanks a lot again and hope hear from you often,

Sincerely yours,

H. E. Ritchey,
Chief Engr.

RADIO HIT -- MEMORANDUM -- WHTT -- 1260 -- MIAMI

FROM: David Gleason
TO: Kermit Geary, Walnutport, PA
DATE: April 24, 1980
RE: DX report

Your reception report dated April 13, 1981 is correct in all respects and is verified as correct for reception of WHTT, Miami, Florida.

WHTT normally operates on a frequency of 1260 kHz with a power of 5,000 watts into a 5-tower in-line end-fired directional array, with separate patterns day and night (DA-2). Both patterns are essentially a single lobe aimed at approximately 70 degrees, from our site 8 miles west of the Miami Airport and 16 miles from downtown Miami.

Since February 9, WHTT has been operating with a special temporary authorization from the FCC (STA) to run with 1,000 watts non directional while our transmitter plant and phasor are being rebuilt. The entire installation was destroyed in an arson-caused fire which took place that day.

Thus, at the time of your reception, WHTT was operating in a non-directional mode, using the easternmost tower of the directional system feed by a new Continental Power Rock transmitter running at 1,000 watts.

WHTT is a 24 hour Spanish language adult contemporary station serving the more than 850,000 Latins in South Florida with music, news and community features.

Some promotional material is enclosed which further details the operation of Radio Hit.

Keep listening!

W J P B RADIO
1220 K. C.
KISSIMMEE FLORIDA

Mr. Hermit Geary.

We are pleased to acknowledge and verify your reception report of 10/31/66 at 2:53 3:30 AM EST o'clock EST. For your information WJPB is owned by the B & M Broadcasting Company, Inc. WJPB's transmitter is located one mile east of Kissimmee Florida at Lat. 28.3 and Long. 82.17 The transmitter site is 57 feet above sea level and our new Rohn Tower is 213 feet high. We transmit with a Gates BC 1J 1 KW Transmitter located in our main studio and transmitter building at the foot of the tower. The transmission line is 56 inches of 5/8 inch copper rod connected directly from the transmitter to the base of the tower so we have little or no transmission line losses. The audio rack equipment is Gates, however, our control room is Collins equipped. WJPB started broadcasting on April 30, 1966 on a daytime basis, programing a good music format with emphasis on local events and news. We are a member of the United Press International and the United Press Audio Network. Kissimmee is the county seat of Osceola County. Kissimmee is the Cow Capitol of Florida and the home of the world famous Silver Spurs Rodeo. Disneyland East which will hold the city of tomorrow and yesterday are located seven miles west of Kissimmee. We are also 40 air miles from the Kennedy Missile Test Center.

Once again we thank you for your report.

Paul Schubert
Chief Engineer

W J P B RADIO
1220. K. C.
KISSIMMEE FLORIDA

Please excuse the delay in our confirmation of your report, the reason is that we might send you a tabulation of the results. First let me also appologize for the fact that our studio clocks were about 90 seconds off. We set our clocks to WDBO Orlando and there had been a local power failure between sign off Sunday and the test, Monday morning and WDBO was off the air.

We received 71 letters, mostly from the midwest, east, and eastern Canada. The farthest reports were from California, however, most reporting stations in California reported fair to bad reception. We received one report from south of our station, Kingston, Jamaica. The strongest signals were in Western New York, Ohio, and St. Louis Mo. Good reports also came from Nebraska, Huston, Texas, Iowa, Michigan and Ontario Canada. Enclosed you will find pamphlets from the C of C of both Kissimmee and St. Cloud which is eight miles east of our transmitter and in our strongest ground wave pattern.

It was a pleasure running the test for the NRA and we look forward to the opportunity again. When you come to Florida you are invited to stop in for a visit at the station, on the shores of beautiful Lake Tohopekaliga.

73's and good DX'ing

Walnutport, Pa. 18088

Dear Kermit,

Thank you for your letter dated February 11, 1992.

This is to confirm your reception of WWBH on 1550 kiloHertz on Monday morning February 10th.

Our night time power is 84 watts.

We are glad that you enjoyed our stations' format. It was the best thing we could have done. The listeners in our small town really like the change from the "oldies" which seem to be popping up on all the FM's around here.

Again, congratulations on finding us, and keep listening!

Sincerely,

Debbie Belz
Operations Manager

As proof that I was tuned to your broadcast, I give the following log of program items to which I listened:

W W B F, 1130 kiloHertz;

Sunday evening, November 19, 1989,

4:56 to 5:04 P.M., Eastern Standard Time:

4:56 to 4:58 $\frac{1}{2}$ P.M., News via satellite. A network advertisement of Spaceport U.S.A. was heard at 4:58 P.M. It was announced that this program is heard "coast to coast in Florida on WJCM, Sebring; WDCF, Dade City; WINK, Ft. Myers; and WSIR in Winter Haven". This segment closed with the announcement:

"We'll be back with more right after the pause for this local break."

4:58 $\frac{1}{2}$ P.M., Advertisement of Tom Collins' Restaurant/Tom's Family Restaurants in Winter Haven and Babson Park. It was stated that "Both can handle banquets, and are famous for their family atmosphere, great food and down-home prices....."

4:59 P.M., Announcement of the Speakers' Bureau of Palmview Hospital in Lakeland:

"If your club or organization is looking for a speaker, call Palmview Hospital at 682-6105. Palmview Hospital in Lakeland has an excellent speakers' bureau, and they can speak on many subjects including Teen Suicide Prevention, Coping with Separation and Divorce, Job Stress, Drug Abuse, and Retirement Counseling. Call 682-6105 and ask to speak with someone from the Speakers' Bureau. Palmview Hospital is ready to help anytime. Call them today, 682-6105."

4:59 $\frac{1}{2}$ P.M., Advertisement of Davis Brothers Motor Lodge and Cafeteria:

"Frank Johnson and the folks at Davis Brothers can handle all of your catering needs, holiday parties and group accomodations. They are an active member of the Bartow Area Chamber of Commerce, and home of the famous Friday night Shrimp Board. Don't forget Monday night football in the lounge at Davis Brothers, located at the North Broadway and 60 Bypass in Bartow. Davis Brothers, the place to stay."

5:00 to 5:03 P.M., Program: "Canada Calling" Radio Network. A network advertisement of Weeki-Wachee Springs was heard at 5:01 $\frac{1}{2}$ P.M., and at 5:02 P.M. there was an announcement of a drawing for 5 winners of the complimentary use of a luxury car in Florida. Send a card with name, address and telephone number to Canada Calling, P.O. Box 345, Millbrook, Ontario, Canada LOA 1Z0. Local break at 5:03 P.M.

5:03 P.M., Advertisement of Central Florida Radio School.

Reception of WWBF-AM, 1130khz, Bartow, Florida confirmed.
Thanks for your letter. Hope you catch us again sometime.
Happy Holidays!

Mr. Kermit Geary
1226 Riverview Dr.
Walnutport, PA 18088

Dear Mr. Geary,

It indeed was a pleasure to have received your letter of November 14, 1989.

This shall confirm your reception report of WGUL/AM on 860 KiloHertz, on Monday morning November 13, 1989 from 4:00 to 5:10 a.m. EST.

WGUL/AM currently is operating NON-DA, with 375 watts into a single 280' tower, while installing a new Night and Day Directional System, whole day power will be 2000 watts, and night at 1500 watts using two DA patterns for three tower switchable.

WGUL is licensed to Dunedin, Florida and our transmitter is located in Safety Harbor, Florida, all of which make up the Tampa, St. Petersburg, Clearwater complex. WGUL/AM is controlled, operated and programmed from its studios in New Port Richey, Florida about 18 miles north.

We installed our new transmitter, a Harris **S**x2.5A last July (all solid state), but are only running-using 375 watts, so we can make day proofs.

I sincerely hope this is the information your desire. Again, thank you for your DX report.

Very truly yours,

Paul Mueller
Engineer

March 10, 1992

Mr. Kermit Geary
1266 Riverview Drive
Walnutport PA 18088

Dear Mr. Geary:

Thank you very much for your letter.

From the information within, it is quite clear that you were listening to WHNZ at the time and date specified (3/2/92, 2:50-3:10 a.m.).

Last December, WHNZ was acquired by Paxson Broadcasting, which prompted the call letter change from WTKN.

Our nighttime power is 10,000 watts under special authorization from the FCC due to Cuban interference. Our primary lobe is 210°, which prompts many reports from Cancun and the Mexican east coast as well as Guatemala. Reports from your part of the world are not as common.

Best of luck and continued success in DXing!

Sincerely,

A handwritten signature in cursive script that reads 'Gordon Byrd'.

Dear Mr. Geary:

Thank you very much for your reception report of February 19, 1952. Your report checks with our log for that date and we are happy to confirm your entire schedual.

Most of the reception reports that we receive have been through the Pennsylvania and New York area. This seems rather odd, however it may be that the listening at that hour is not done in other sections of the country.

You may be interested in knowing that our continuity writer, Mrs. Dottie Smouse, is a native of Williamsport, Pennsylvania.

With good listening in the future, I remain

Yours very truly,

G. Max Kimbrel
General Manager

GMK/bb

6-12-98

Dear Listener,

Our apologies for not responding sooner to the many reception reports that we have received reporting our new operation on the expanded standard broadcast band at 1700 Khz.

Our engineering department has been quite pleased, but overwhelmed by the many DX reports that continue to come in from all over the globe! Our busy schedule has not permitted us to answer so many reports in a timely manner.

This letter is to confirm your reception of WCMQ-AM 1700 on the expanded band. WCMQ operates with 10,000 watts during daylight hours and 1,000 watts at night using a non-directional antenna system located just outside the city of Miami, Florida USA. We are using a new Harris DX-10, 10KW digital AM transmitter and broadcasting in C-Quam AM Stereo. The station operates 24 hours a day in Spanish, serving all of Southeast Florida (ground wave).

Thank you for your reception report and we hope you continue to enjoy listening to our station whenever the atmospheric skywave conditions allow.

Sincerely,

Ralph Chambers
Director of Engineering

WLUS

am 98

Dear DX'er,

This letter is to confirm that you have heard our test broadcast of February 18, 1990 between the hours of 0400 and 0430 EST. Your valuable information helps me continue the learning process that is always ongoing in this art.

WLUS operates as a "daytime" station with 5,000 watts and uses a post-sunset authority power granted by the Federal Communications Commission of 166 watts until 2200 EST. Our transmitter is a MW-5A Harris and the antenna is a folded unipole, 242 feet tall. Our format is Big Band and is non-automated (live people making occasional mistakes and having fun).

My special thanks to Dan Andrews, Hans Borger and James Brown (owner) of WLUS that invested their time and hard work to help me complete this test broadcast.

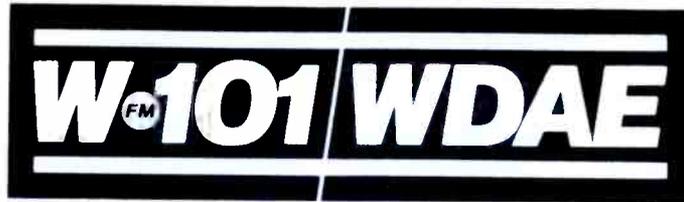

Thanks from WLUS-AM.

TIM MCGUIRE

P.S. MR. HERMIT GERRY,

INCLUDE A STOP IN GAINESVILLE ???

THANKS FOR NICE LETTER

December 12, 1991

Mr. Kermit Geary
1266 Riverview Drive
Walnutport, Pa. 18088

Dear Kermit,

This letter is in response to your recent request for verification of reception of a most unusual circumstance in radio broadcasting.

The signal you received on 1550 KHz in Walnutport, Pennsylvania, is from WAMA-AM Radio. This station has been rebroadcasting our WUSA-FM "W-101" audio feed from just after 10 PM to 6 AM local time for several months with-out our permission!

WDAE-AM 1250 KHz and WUSA-FM "W-101" 100.7 MHz Radio Stations are owned and operated by Gannett Co., Inc. This organization and it's employees (including myself) have no connection to WAMA-AM 1550 Radio in any way.

I have contacted WAMA's Operations Manager, John Rodriguez, and WAMA's Chief Engineer, Arthur Karmgard about this problem on several occasions. They both tell me that they are aware of it and are working on a solution. They tell me that they believe their TFT remote control unit "glitches" and turns their transmitter back on and feeds the W-101 signal to it just after their 10 PM sign-off man switches everything off and goes home.

To conclude, I am confirming your reception of WUSA-FM radio programming as transmitted by WAMA-AM.

Incidentally, Our AM station, WDAE, has no roll in this mess.

Best Regards,

A handwritten signature in black ink that reads "Lloyd Berg".

Lloyd Berg
Chief Engineer WDAE / WUSA  **GANNETT**

Dear Sir:

Thank you very much for the accurate and complete reception report of our Equipment Test of February 27th, 1958 between 4:36 and 5:00 A.M. EST which is hereby verified.

We were very pleased to be able to do this little favor for the NRC and you DX-hounds. ~~Sincerely~~ Glad you were able to get such good reception, and hope you enjoyed the broadcast. If you ever get down in Sunny Florida, stop by and say hello.

Yours truly,

George Strait

Dear DX'ers:

We're overwhelmed! We have received so many DX reports as a result of our November 9, 1964 test broadcast we couldn't begin to answer each one as a personal letter, and therefore please pardon this "form" letter.

Reports have come to us from as far away as California and Colorado, from Canada, from every New England state, from ALL eastern and midwestern states, and most of the south.

Please with this letter consider your DX letter verified. We will try to answer specific requests and questions in the next few weeks.

And thank you for the tremendous response.

Very truly yours,

Jones College Radio

November 8, 1960

Mr. Kermit Geary
R.D. 2, Box 298
Walnutport, Pennsylvania

Dear Mr. Geary:-

Thank you so much for your recent letter advising that you had received our signal way up there in Walnutport, Pa. Even if it is sky wave reception, it makes one feel good that we're so far, and yet so near.

In answering one of your questions, prior to sale this station was WWTB, so your previous logging was correct. We are owned and operated by WPIT, Inc. in Pittsburgh, Pa. The original owners and builders were WEBK, which operated with 1 kw of power.

Today is election day and the decision remains to be seen. Large crowds are turning out to vote all over this state. It's great weather for voting....Sunny, with a low this morning of 48' and a high expected this afternoon of 79'.

Again, thank you for your letter and best wishes for continued success with your radio work. We hope to hear from you again.

Sincerely,

Radio Station WSOL.

January 10, 1978

Mr. Kermit Geary
R.D. 2, Box 298
Walnutport, Pennsylvania 18088

Dear Kermit:

Thank you for your letter of November 27, 1977. It is always encouraging to receive reports of distant reception. Your report is in considerable agreement with our records and there is no doubt that you were in fact tuned to "The New WSNY". We refer to our station in this manner as we just recently changed our call letters from WMBR to WSNY.

WSNY does in fact operate on 600 kilohertz with the full time power of five kilowatts. We use a non-directional antenna during day hours, and a directional antenna, pointing east, is employed at night. This explains your sudden loss of signal at 5:30PM.

I appreciate your mention of the Cuban interference taking over the channel after our pattern change. The signal from this Cuban station is frequently heard in the Jacksonville area even while we are on the air. This is a real problem for us as well as the other stations operating on this channel.

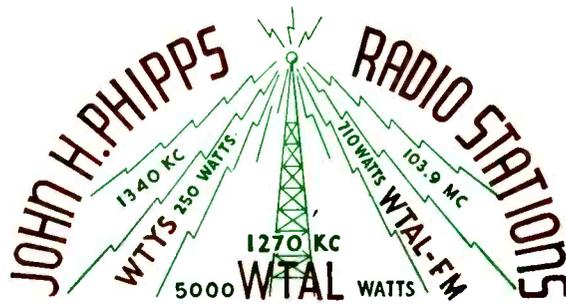

Your extremely detailed report will become a permanent part of our files. If you ever have occasion to be in our fair city, you are cordially invited to visit us.

Yours truly,

Bob Dillehay

Dear Mr. Geary:

This letter is to verify your reception of Station WTWB on February 7 and February 8. Your log of Programs for both days was correct in every detail.

We appreciated hearing from you and are very glad to confirm your reception.

Very truly yours,

Ruth Kostyo
Office Manager &
Women's Editor

Dear Kermit:

Thank you very much for your report of our Station. I appreciate your time and effort, as well as that of other DXers who have sent reports in response to this test.

As you will note on your QSL card enclosed. I was unable to determine from the tone segment of our test as to whether you did actually receive us or not. However the CW ID that you reported at 0729:45 is most correct, so therefore I did verify your report at that noted time.

Having been DXing myself for over 22 years, I realize the problems one encounters on such a quest. I still actively DX when my schedule permits and use a modified FRG-7 w/2.9 kHz collins filter, and a HQ-140-X most frequently, along with a host of other receivers and gadgets. I use two dipoles one for 3 mHz and the other for 12 mHz.

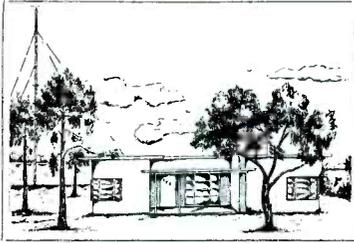

Thank you again for your report and very interesting letter pertaining to your 100 watt reception of WJCM on 1340 kHz.

73's

Jim Kowalski, WJCM

P.S. Don't feel to bad if you missed most of our test. Brother Paul, in Wisconsin who usually does very good on these tests did not receive us this time. propagation wasn't too good I guess!

Kermit Geary

R. D. 2 Box 298

Walnutport, Pennsylvania

Dear Mr. Geary:

Thank you for your letter reporting the reception of test signals from this new radio station. Verification is made herewith, of Frequency Tests conducted by WGNE on 12/20/65 between 1:40 and 2:20 a.m. CST.

WGNE Radio has been on the air since June 25, of this year. We are a 500 watt daytimer, with a top forty format. Presently, we are enjoying a smash success locally, since we filled a gap in radio in this area. Our only complaint has been that we are a daytimer.

Since Panama City Beach, Florida, doesn't enjoy the fame of some Florida resorts, I am enclosing some of our Chamber of Commerce literature. Perhaps it will entice you to accept my personal invitation to visit us at your earliest opportunity.

Very truly yours,

J. L. Bates

Mr. Kermit Geary
1266 Riverview Drive
Walnutport, PA 18088

Dear Mr. Geary:

Thank you for your letter of November 28. Occasionally we do get reception reports from up your way, but they are very rare.

Yes, you were picking up our signal--and apparently loud and clear for part of the time. We are happy to confirm this.

Enclosed is our December program log, which we trust will be of interest to you. Also enclosed is a little leaflet that could just turn out to be the most important thing that you will ever read.

As you are aware, we do have FCC permission to go full time on 1520 kHz. We may not go through with this, however, because of the rather limited coverage. What you were hearing, however, was our 1000-watt, non-directional signal. Prior to a few months ago, we were directional, east and west with 1000 watts, and our signal was limited sharply north and south.

Have a meaningful Christmas, and if you don't know Him, may you come to know the Christ of Christmas.

Cordially yours,

KESWICK RADIO

C. W. Caldwell

P. O. BOX 539

HOLLYWOOD, FLORIDA

TELEPHONE WA 3-3030

December 23, 1957

Gentlemen:

This will verify your report of reception of Radio Station WGMA, 1320 KC, Hollywood, Florida, on Monday morning, December 16, 1957, between the hours of 3:30 to 4:00 A.M. E.S.T.

WGMA is licensed to operate with 1000 Watts of power, however due to technical difficulties beyond our control it was necessary to operate with only 600 Watts of power, during the broadcast.

The announcer conducting the program was the executive Vice President of Home Federal Savings & Loan Association, Mr. Robert Landis, an avid radio fan. Mr. Fred Wheelahan, our program director slept through the program having forgotten to mark his calendar correctly.

We are enclosing a coverage map of WGMA and a WGMA, Home Federal Hurricane Map as a souvenir of the broadcast.

We would like to take this opportunity to thank you for your report of reception of WGMA, and may we wish you the best of DX in the future.

Sincerely,

Charles C. Castle

Dear Mr. Geary,

This letter is to varify your reception report of January 6, 1961 at 4AM EST. There is no doubt that you were describing WGRC Frequency program.

WGRC is on 1580 K.C. with the power of 500 watts. The antenna is a 150 foot vertical, the transmitter is a Gates BC-1-T.

Green Cove Springs is aprox. 20 miles South of Jacksonville and 25 miles from the Eastern Seaboard. The buzz heard was a telephone dial tone to make it easier on the test lab.

We also received a letter from New Zealand, reporting they heard the station the same time as you did.

Best DX

Mr. Kermit Geary,
R.D. 2, Box 298,
Walnutport, Pennsylvania.

Dear Mr. Geary;

This is confirmation of your report on our frequency test on November 6, 1959, for which we thank you very much.

November 6th was a good listening morning in your state as we have received four reports from there on our November test. We have checked with our engineer who made the test and he verifies your report.

Thank you for your kind wishes to WFBS and our personnel. Our staff is small, but very hard working. Mr. Brown owns the station and does almost everything there is to be done, and I help him. We have two full time announcers and a part-time. We are native Tennesseans, but love Florida as our adopted home since 1948, where we were bankers for more than 33 years.

Please consider this as an invitation to come down to the MIRACLE STRIP of Florida where you will find the finest fishing anywhere, and the whitest sand beaches in the World, plus the beautiful Gulf of Mexico.

May the Thanksgiving season be very pleasant for you and yours.

Sincerely,

Kate M. Brown

Walnutport, Pennsylvania.

Dear Mr. Geary:

This is to acknowledge receipt of your letter of February 7th and to ask you to forgive us for not answering sooner. We certainly appreciate your writing to us, and feel quite proud that we were ^{heard} so far away.

Your report is correct, except that there was no woman at the controls; it was yours truly, and I'm no woman, think I have quite a masculine voice, so believe it might have been disturbances in between here and you, to make my voice sound like a woman's. But, that is not important, since the good part is that you heard us, and were kind enough to write.

We are a new station; went on the air June 28, 1956, with 500 Watts; have done well, have lots of listeners, hope to make some money as we go along. This is a fast growing part of Florida, with our two mighty Air Bases, Eglin Air Force Base, and the Home of the Black Knights, Hurlburt, as our close neighbors, this area has great potentialities. With this, this is one of the best fishing ports on the coast of Florida; you should be good to yourself and come down and see our beautiful water and snow white sand beaches sometime.

Thank you again for writing, hope you pick us up again sometime.

Sincerely,

H. French Brown, Sr.

RECEPTION OF W A M R -1320 VENICE, FLORIDA !!!

Dear Kermit,

Thank you for taking part in the I.R.C.A. Florida DX TEST night. The response has been FANTASTIC and I may be months going over reports and writing letters.

I am HAPPY to VERIFY your reception of W A M R - 1320 Venice, Fl on March 25, 1996 at 0404-0429 AM EST.

With a local station on 14 miles away, you should consider your reception as "real" DX. Since we were running pre-recorded tapes for all the tests, I was able to attend some and "log" some others. Was nice to log my own station for a change !.

Your letter means alot, as I know you have heard WAMR in the past. I appreciate you "staying up" for the test. This may have been the last DX test for WAMR as the station is in the process of being sold to JAYCOR Broadcasting (WLW among others) They are not know for running DX tests.

Power for the test was 5,000 watts using a Harris MW-5 transmitter, into a three tower direction array.

This letter may serve as your "QSL" for your reception of W A M R. We will be issuing a "Special IRCA QSL Certificate" in the near future. With as many reports as we got, this may take awhile. I will also be "passing" on all the reports to the individual stations as well for their records.

Again, thank you from WAMR and all the other stations for taking part in the Special DX Test Night.

Best Regards

For WAMR Radio

RECEPTION OF W T M Y -1280 SARASOTA, FLORIDA !!!

Dear Kermit,

Thank you for taking part in the I.R.C.A. Florida DX TEST night. The response has been FANTASTIC and I may be months going over reports and writing letters.

I am HAPPY to VERIFY your reception of W T M Y -1280 Sarasota, Fl on March 25, 1996 at 0153-0203 AM EST.

The WTM Y test did start about 10 minutes late. According to the reports I got, signal strength was "best" during the final 10 minutes. That matches perfectly with your report.

This letter may serve as your "QSL" for your reception of W T M Y. We will be issuing a "Special IRCA QSL Certificate" in the near future. With as many reports as we got, this may take awhile. I will also be "passing" on all the reports to the individual stations as well for their records.

Again, thank you from WTM Y and all the other stations for taking part in the Special DX Test Night.

Best Regards

Dear Sir:

This communication will serve to acknowledge and verify your report of reception of Radio Station WHBO during its equipment test period. Your data corresponds with our log of operations.

In answer to the many inquiries as to the location of Sulphur Springs, it is located due North of and contiguous to the City of Tampa, hence is sometimes regarded as a part of Tampa.

We have received reports from as far North as Toronto, Canada, and as far West as Banning, California.

Our transmitter is a Gates 250C-1 and our antenna, a 225' vertical, series fed Stainless Engineers tower.

Yours for better DX,

SULPHUR SPRINGS BDCSTS.

This communication will serve to acknowledge and verify your report of reception of Radio Station WHBO during its equipment test period. Your data corresponds with our log of operations.

In answer to the many inquiries as to the location of Sulphur Springs, it is located due North of and contiguous to the City of Tampa, hence is sometimes, regarded as a part of Tampa.

We have received reports from as far North as Toronto, Canada, and as far West as Vallego California.

Our transmitter is a Gates 250Ccl and our antenna, a 225" vertical, series fed Stainless Tower.

Yours for better DX?

SULPHUR SPRINGS BDCSTS.

VERIFIED WZOK

W. A. Cooper (By Ed Leundt)
W. A. COOPER
CHIEF ENGINEER

Chief Engineer,
Radio Station W-Z-O-K,
Jacksonville, Florida.

Dear Sir,

I have pleasure in reporting good reception of your Radio Station WZOK during its 24 hours/day "Wonderful World of Music" show. I tuned in at 2:21 A.M., Eastern Standard Time, on this morning, Saturday, April 30, 1960, and continued listening to your program of recorded dance music and commercial announcements until 3:15 A.M., E.S.T. WZOK was transmitting on its assigned frequency of 1320 kilocycles, and put a fine signal up here into the Northeast on this occasion. I am situated in the eastern part of the State of Pennsylvania, 60 miles North of Philadelphia and 90 miles West of New York City.

WZOK's signal in this area was moderately strong, S-8, with an input voltage into my receiver of 6 microvolts as measured on the signal-strength meter. Fading was negligible, and there was no interference from any other station. Static was light and had little effect upon the consistent clarity of my reception. As the result of such favorable conditions, your broadcast was heard with good clarity (Readability-4), affording enjoyable program reception at this distance from Jacksonville. Your carrier was sharp, clean-cut and fully modulated. The tonal quality of both speech and music was excellent. It was a pleasure to hear WZOK reaching up here into Pennsylvania in such fine shape during this all-night broadcast, and I enjoyed the opportunity of listening to and logging your program. Congratulations on the power and efficiency of your transmitting equipment.

I heard WZOK on my National "HRO" 9-tube communications-type superhet, 1935 model. My antenna is a single-wire inverted "L", 125 ft. long and 30 ft. high, extending toward the Northwest, with the lead-in to the receiver coming off the Southeast end. My ground connection is made to an iron water pump in a well 175 ft. deep. The weather here at the time of my reception was overcast, with the temperature at 44 degrees Fahrenheit.

Please confirm my reception of station WZOK, Jacksonville. I shall be very happy to receive your reply, kindly verifying the fact that I heard your broadcast as reported above. Return postage is enclosed for your reply. As proof that I was tuned to WZOK, I give the following log of a number of program items to which I listened:

November 15, 1993

Kermit Geary
1266 Riverview Drive
Walnutport, PA 18088

Dear Mr. Geary:

I was wondering when I'd get a DX report from you on my new AM. It's been almost two years since your last reception of WZNZ in 1991. Things have changed a lot around here since then.

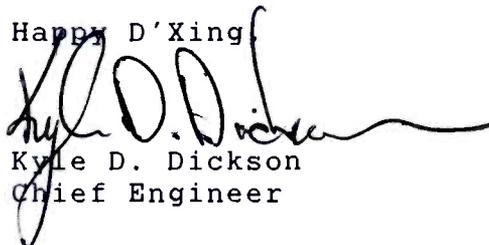

You may be interested to know that WZNZ AM is one of five stations being operated by Paxson Broadcasting and Todd Communications, all housed in one complex. We have three FM's, WROO 107.3 MHZ, WAIA 93.3 MHZ and WSTF 97.9 MHZ and the two AM's that you are familiar with.

Congratulations on your reception of WZNZ AM. I have confirmed the description of your reception on November 5, 1993 at 5:55 to 6:23 P.M. and 6:44 to 6:45 P.M. Eastern Standard Time.

Here is some technical information for you on WZNZ 1460 KHZ. We transmit with an output power of 5 Kilowatts in an omni-directional pattern during the day using a 170 foot tower. At night, we go directional with no reduction in power using three 170 foot towers. We're using a Continental 315R-1 transmitter. We program a news format 24 hours a day with most programming coming from CNN Headline News, and at times we broadcast various ball games.

It was nice hearing from you again and I hope this letter satisfies your request. I hope you'll be able to receive us again or one of our other stations, who knows, maybe I'll get another AM. Enclosed please find a coverage map of WZNZ. Thank you for writing.

Happy D'Xing

Please confirm my reception of Station WYSE, Lakeland. I shall be very happy to receive your reply, kindly verifying the fact that I heard your Frequency and Equipment Test as reported in this letter. A 3¢ stamp is enclosed for return postage. As proof that I was tuned to WYSE, I give the following log of the portion of your broadcast which I heard:

WYSE, 1330 kc.; Thursday morning, November 21, 1957,

4:05 to 4:08 A.M., Eastern Standard Time:

4:05 to 4:07 A.M., Dance Music.

4:07 A.M., Announcement:

"This is WYSE, Lakeland, Florida, on the air for a Frequency Test. WYSE operates on a frequency of 1330 kilocycles with a power of 1000 watts by authority of the Federal Communications Commission. Studios are located in downtown Lakeland, Florida.

"WYSE has been on the air this morning for an Equipment Test and Frequency Test. WYSE is now leaving the air, and will return for our regular scheduled broadcast at 6 A.M."

4:07½ to 4:08 A.M., Concluding portion of the selection of Dance Music.

4:08 A.M., Station WYSE left the air.

Please compare the above data with your Station Log for the morning of Thursday, November 21st, and if you were on the air at the time stated with a Frequency and Equipment Test, kindly send me a verification of my reception of WYSE, Lakeland, on 1330 kc. Your attention to this request will be greatly appreciated.

Best wishes to WYSE and its personnel for continued success in broadcasting. I hope to have the pleasure of hearing you again on future early-morning test transmissions. Looking forward to receiving your reply in confirmation of my reception, for which I thank you, I am,

Very truly yours,

Kermit Geary

January 18, 1966

Dear Kermit,

Thank you for your letter of confirmation of the DX test held here at WYSE Radio on December 13, 1965. Results of this test were both pleasing and interesting. Verifications were received from 19 states, Canada and also Jamaica. The most distant point of reception was Denver, Colorado, which is 1570 air miles from Inverness.

WYSE is a 1 Kw DA-N station. DX tests were conducted with the antenna in the non-directional operating position. Equipment consists of a Gates console and the Gates Vanguard transmitter which is completely solid state except for the output tube. Tape equipment is Ampex and microphones are RCA. We are a good music station with two hours of Country music in the morning and two hours of Rock and Roll in the evening. In addition we have a five hour recorded Grand Ole Opry program on Saturday nights. The transmitter location is about two miles west of Inverness and normal operating hours are from 6 AM to midnight. Frequency measurements are usually made on the second Tuesday of each month at 0215 EST.

Additional information will be sent upon request. Thank you again for your letter of confirmation.

Sincerely

Bill

Dear Mr. Geary:

Thank you very much for the fine reception report dated April 7, 1957. It was very gratifying to know that we reach so far with a clear signal, even if it was around 5:00 a.m.

Your report compares exactly with our program log for April 6, 1957, from 5:02 to 5:25 a.m. I showed the letter to the announcer on duty at that time and he verified the songs you logged in your report. He said he did not know he had such a wide audience at that time of the morning.

Again many thanks for the report, I hope I will hear from you again in the future. Best of luck with the DX'ing up there in the cold country. If you ever get down this way, drop in and say hello.

Sincerely,

31 January 58

Dear Mr. Geary,

I am happy to verify your report of reception of our station on the DX broadcast 16 December 1957. I am awfully sorry for the very long delay but I have been on vacation till now.

I

Your report was without a doubt the best report received and I might add one of the most enjoyable. Not the usual run-of-the-mill reports.

I am doubly happy that you enjoyed the program, and hope that you will be tuned our way again the next time we have another test which I hope to hold soon.

O

Again my apologies for the long delay. If you are ever in Sanford I trust that you'll come and see me. (teach me a few things) You see I'm a rookie in Broadcasting with only two years in the field.

Again I'd like to thank you for your wonderful report, and hope to hear from in the future.

Very truly yours,

Lonnie Padron

Walnutport
Pennsylvania

Dear Kermit:

Thank you for your letter of the 12th. Yours was the second one I've received this week. Both for the day and times on the 11th of February. The other was from Ted Weiser, 19 Fairview Avenue, Schuylkill Haven, Pa.

You may consider this as confirmation that you were receiving our signal. At the time we were transmitting on 5000 watts as we are in the process of checking our field intensity in preparation for going to 5000 watts.

We have just completed building the new rig. Two Blaw Know towers, 300 foot, 600 feet apart with a large lake in between them. Moisture content was just one of the things we were after. This makes the perfect ground signal.

The transmitter and phasing equipment are the latest models built by RCA. In fact all broadcast equipment is RCA.

Thanks again for your letter and the best of luck in logging many more stations.

Sincerely yours,

Herbert E. Buck Jr.
Director of Operations
