Kermit Geary,

This will confirm your reception report of 1/22/80.

According to our records, the reason we faded out at 5:15 that night was that we changed to the night pattern.

Since then, you might be interested, I and an associate bought the station. And, I'm from Williamsport, PA!

Tnx, and 73's

Dear Kermit

Thanks for your letter. You picked up our station during a period in which we were conducting engineering tests.

WHEZ is a daytime-only station, so it was almost pure luck that you happened to pick us up that particular night.

Good luck with your DX'ing.

Sincerely

A handwritten signature in black ink that reads 'Ken Delaney'.

Dear Kermit,

I am only too happy to verify your logging of our special test program of January 20, 1954. This was one of the first live voice and music programs used as a frequency check. Usually our chief engineer sends out a tone as a check to Minneapolis, but that morning I thought it would be interesting to test the response of all you DX listeners. I have received a large number of letters from all parts of the nation. Nice to have heard from you and glad to be of service.

Yours truly,
Dennis Beauchamp

Dear Mr. Geary:

Thank you for your letter of July 18th, reporting reception of WGFG during our test period the morning of July 18th, 1947.

You will probably be interested in the equipment we are using, so I will describe it briefly. At the studio we are using RCA turntables and pickups, and speech equipment. The transmitter is a Raytheon RA-1000, located $3\frac{1}{2}$ miles northeast of Kalamazoo. The antenna phasing equipment is Johnson. We use a directional antenna consisting of four 300-foot Blaw-Knox Guyed Towers. Our directional pattern is such as to protect Green Bay, Wisconsin, Hartford, Connecticut, and Cincinnati, Ohio. However, we were operating non-directional when you picked us up.

We plan to start full program operation August 8th, and will appreciate any report on our signal after that date.

Thank you for your interest in our signal.

Sincerely,

Chas. E. Dewey, Jr.

12-18-90.

Dear Kermit,

How did you learn that I sign verifications?
Just curious.

Currently my receiver is a Sony ICF-2010 and I
use the Sony AN-1 Active Antenna.

Am pleased to learn that our signal was so good
at times. The name of the store on the west side of
Mt. Pleasant is "Tuma's Country Store."

Also, we do not have an Isabella Community Savings
Bank. It is Isabella Community Credit Union. We do have
an Isabella Bank and Trust, however.

All in all a good report and you went to a lot
of work to put all that information onto paper.

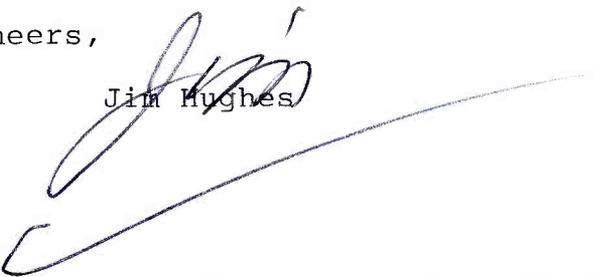

Our musical programming is via Satellite Music Network
from Dallas, Texas.

The Season's Best to you, your family, and others
you know.

During this past year, WMMI has received reprots of
reception from: George Vanish of Trucksville, Pennsylvania,
Dec. 3, 1989; Neil Wolfish of Willowdale, Ontatio (near
Toronto) Dec. 3, 1989; Robert Walker, Wixom, Mich., Dec 31, 1989.

Wonder why our signal heads to the east. Probably because
of the WCCO signal.

Cheers,

Jim Hughes

PS: Last week we received a report from Jim Renfrew of
Rochester, New York, Dec. 8, 1990.

Mr. Kermit Geary
1266 Riverview Dr.
Walnutport, PA 18088

Dear Kermit

Thank You for participating In the test on December 17th.
WGDN AM is a 1000W directional AM with a pattern directed
towards the north.

Most of the listeners from IRCA were from northern Illinois and Wisconsin, So
for you to hear it in PA. is surprising! I stopped sending the test at about
12:50a

Again, Thank You for your participation and your letter!
Best of luck in your hobby and Happy New Year!

P.S. I was operating at a full 1000w during the test, but our old 1962 Gates
BC-1T transmitter was suffering from a modulation problem that day
and I was only able to transmitt at about 50-60% modulation.

I noticed you have been a National Radio Club Member since 1933
My Congratulations to you!! I collect old recievers (in my spare time)
and my 18yr old son and I love listening to old radio shows. It must have
been fun to hear them when they were live!

Very truly yours,

FEBRUARY 11, 1993

KERMIT GEARY
1266 RIVERVIEW DR.
WALNUTPORT, PA. 18088

DEAR KERMIT,

THANKS FOR YOUR RECEPTION REPORT OF WMUS-AM, MUSKEGON, MICHIGAN ON FEBRUARY 5, 1993 FROM 4:00-4:30AM. THE TEST WAS FUN AND I RECEIVED CALLS ON OUR 800 LINE WHEN I REQUESTED RECEPTION REPORTS OVER THE INTROS OF SONGS. WITH THE INTERFERENCE FROM WBAL I'M NOT SURPRISED YOU COULDN'T HEAR ANY VOICE, BUT I'M GLAD THE CID'S CAME THROUGH. I PUT THEM BETWEEN EVERY SONG JUST TO BE ON THE SAFE SIDE AND THEY WERE THE ONLY THING INTELLIGIBLE TO ABOUT HALF OF THE RECEPTION REPORTS I'VE RECEIVED SO FAR. I RECEIVED A TAPE FROM OKLAHOMA OF THE TEST AND IT WAS WEIRD TO HEAR HASH UNDER KAAY, BUT THE CID'S WERE RIGHT THERE, JUST AS YOU DESCRIBED.

I USED TO DX A LOT WHEN I WAS A KID BUT NEVER HEARD OF THE NATIONAL RADIO CLUB UNTIL WAYNE FROM COLORADO SENT US A LETTER REQUESTING THE TEST. I SHOULD BECOME A MEMBER. I'VE GOT A LOT OF BACKYARD(20,000 SQUARE FEET)TO STRING SOME LONGWIRES.

I PUT THE HALF HOUR SHOW TOGETHER BEFORE THE BROADCAST IN OUR 8 TRACK STUDIO, AS I HAD TO BE ON THE AIR ON OUR FM AT THE TIME(OUR AM IS JUST SIMULCAST DURING THE NORMAL DAYTIME HOURS OF OPERATION). WE SHOULD GIVE THANKS TO ANOTHER ENGINEER FRIEND OF MINE WHO CONSULTS WITH ME. I COULDN'T GET WMUS-AM TO COME UP TO FULL POWER ON THE REMOTE CONTROL, SO HE GRACIOUSLY GOT OUT OF BED AND WENT TO OUR TOWER SITE AND REPROGRAMMED THE COMPUTER ON OUR CONTINENTAL TRANSMITTER, OR THERE WOULDN'T HAVE BEEN A TEST!

SPEAKING OF EQUIPMENT AND POWER, WE USE A CONTINENTAL 1KW TRANSMITTER, COMPUTER CONTROLLED BECAUSE WE HAVE LOW POWER PRE-SUNRISE AND POST-SUNSET AUTHORITY AND IT HANDLES ALL OF THAT SO THE PERSON ON THE AIR DOESN'T HAVE TO DEAL WITH IT. OUR AM TOWER IS AT OUR OLD BROADCAST FACILITY IN NORTH MUSKEGON, MI. IT'S IN THE MIDDLE OF A SWAMP WITH GOOD RADIALS IN THE GROUND, SO IT GETS OUT GREAT. IT'S STRONGER IN GRAND RAPIDS, MI. THAN SOME OF THEIR AM'S!! OUR AUDIO PROCESSING IS(IF YOU CAN BELIEVE IT)ARE THREE URIE LA-4'S, EACH MODIFIED FOR LOW, MIDDLE AND TOP END EQUALIZATION, THEN COMBINED INTO THE MICROWAVE. I KNOW THE URIE'S ARE OLD, BUT WE PUT THEM BACK IN SERVICE. WE TRIED OPTIMOD-AM, INOVONICS MAP II AND CRL, BUT COULDN'T GET THE DENSE SOUND WE WANTED, SO THE URIE'S WENT BACK IN. IT IS MY BELIEF THAT DENSE, TIGHT AUDIO WILL CUT THROUGH ALL THE CLUTTER.

BEST REGARDS,

CHRIS ROBERTS

Dear Kermit

CLIFFORD J. GROTH
VICE PRESIDENT
ENGINEERING

I'm replying to your reception report of ~~WDMJ and WIAN~~
~~Marquette and Ishpeming~~, MI on February 7th. It appears
that you received us. The tapes were run by automation.
We operate unattended overnight and you have times listed
when they were scheduled. Two other reports were sent
listing reception at 0122.

I know DX'g is getting difficult because many stations which
operated at reduced power (250 watts) at night use full
power. Also many stations are not shutting down at night.

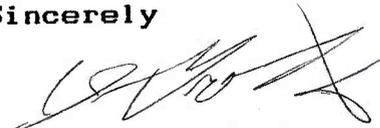

WDMJ and WIAN duplicate programming throughout most days.
The only exception is for local special programs such as
high schools sports when programming is separated. WDMJ is
5 kilowatts day and 1 kw directional night. WIAN, with new
call letters in 1993, is 1 kw fulltime. Because the
Marquette area has relatively poor ground and therefore
radio conductivity the two stations are needed to cover the
communities of Marquette, Ishpeming and Negaunee, Upper
Michigan. The WIAN call is for "Ishpeming And Negaunee."

Please find enclosed a "Radio Dial Card" which has been
brought up to date by me. WDMJ when owned by another
company gave these to listeners. Goetz Broadcasting which
owned WJPD AM-FM purchased WDMJ. We then changed the WDMJ-
AM call to WIAN and combined programming of the two AM's.
WJPD(FM) is programmed separately with country music.

WJPD (FM) is 100KW on 92.3 Mhz. I'd be interested in
reception reports on the FM.

Thanks for the nice letter. I think I've been near your
town. One of my good friend works at Villanova. We took a
trip to your gambling mecca in NJ. Didn't gamble, just spend
money on a nice meal and walked the boardwalk. I have a
son and daughter who have settled in Pittsburg, west of you.
The son works for USAir and the daughter found a job there
after graduating from U of Wisconsin, Madison.

Sincerely

Clifford J. Groth

DATE: March 31, 1998

RE: Signal Report

Dear Mr. Geary,

Yes, you did hear WCCW-AM (1310Khz) in Traverse City Michigan as stated in your letter.

WCCW runs 5000 watts to a 290 foot bottom fed ND tower. The Transmitter is a Harris Solid State SX-5. It is AM stereo and uses a Harris AMS-G1 stereo exciter/generator.

WKJF is our sister station in Cadillac about 50 miles south of Traverse City. WKJF, WTCM and WCCW are owned by Midwestern Broadcasting Co.

I have a National NC-183D, Hammarlund HQ-100AC and a Collins 51J2 that I use for DXing the BC band. It is fun when I have the time. I am also a ham (k8xx) and operate 1.8 Mhz often. It is my favorite band. 1660 Khz from your area comes in very well in Traverse City nearly all night.

WCCW is also on FM at 107.5 MHZ and runs 50,000 watts.

We do not have QSL cards for the radio station, but I hope this confirmation is OK.

Thanks for the great report and tape.

Sincerely, 
Jack Leishman, CE

Dear Mr. Geary,

It is a pleasure to know that our signal can be heard in Pennsylvania. Thanks for the report of the quality of our signal.

Your data is almost exactly what our log contains. The only difference is that you missed the first of our transmission.

We do this frequency measurement the first Saturday morning of every month. The next one is due March 5, 1960 Between 3:30 and 3:45 AM.

Happy hunting in the future for those signals you have yet to hear.

Yours very Truly,

Peter B. Hoekzema

Dear Sir,

This is a letter of verification regarding your reported reception of our signal on the morning of Sat. Aug. 3, 1957, from 2:46 to 3:00 AM EST. We were broadcasting our regular monthly Frequency check. Happy to have your report of such excellent reception. We are a 500 Watt daytimer and have been on the air a little more than a year.

Thank you for your letter and we wish you many more thousands of verifications.

Sincerely,

Bob Schmitt

Kermit Geary,
RFD #2,
Walnutport, Pennsylvania.
Dear Mr. Geary;

RE: VERIFICATION OF
RECEPTION.

It was with a great deal of pleasure that we read your report of reception of WTAC - NBC in Flint.

Your report is correct. This is your verification. It is our regret that we do not have Verification Cards - as such. In view of the fact that reception reports are so seldom received, we feel qualified to refrain from having such cards printed.

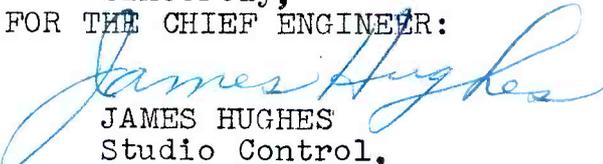

We were quite surprised to learn that our signal had gone as far east. You know, that our signal is directional northward constantly. Comes sunset, we drop our output down to 500-watts from 1,000-watts.

According to your report, which we find correct, you heard WTAC on 600 kilocycles during the morning hours of November 8, 1950. The listening period was from 2:18 until 2:43. During that duration (as during most of the time that night) we were broadcasting election returns from the Flint City Hall. Leon McNew was at the City Hall. Larry DeBeau and Bob Flynn were at the studio giving other returns. It might interest you to know that WTAC was the only station giving election results directly from the City Hall. There are four AM stations and one FM station in Flint.

Should you again hear WTAC, please let us know.

Your return postage is being returned. We do not bother with such matters.

Sincerely,
FOR THE CHIEF ENGINEER:

JAMES HUGHES
Studio Control,
WTAC - NBC,
Flint, Michigan.

Walnutport, Pa.

Dear Sir,

The purpose of this letter is to verify your excellent report of reception of our station during the broadcast of February 13, 1956.

Thanks for the big long letter and I'm sorry I can't at the present answer it in like form. I am going to be extremely busy as tonite is the last night that this station will be on the air. We are closing it down for lack of funds and I am on the loose for a position. I hope to build a new station in the near future. I hate board shifts etc. I would rather build than eat, so I suppose with the bosses help, I'll be constructing again soon. When I get another station, I'll contact the NRC and we ll have another.

Thanks again for your letter and the best of luck in future DXing.

Sincerely,

Richard F. Deitz

DEAR MR GEARY,

IT IS WITH GREAT PLEASURE THAT I CONFIRM YOUR RECEPTION OF RADIO STATION WGKY, CHARLOTTE, MIC HIGAN AS INDICATED ON YOUR RECEPTION REPORT DATED OCTOBER 28, 1980 FROM 5:50 TO 6:00 PM EST.

WGKY CAME INTO EXISTANCE IN EARLY AUGUST OF 1980 AFTER THE SALE OF THE FORMER STATION WCER. THE CALL LETTERS WERE CHANGED AND THE PROGRAMMING IS NOW CONTEMPORARY CHRISTIAN REPLACING THE PREVIOUS EASY-LISTENING TOP 40 FORMAT.

WGKY OPERATES WITH 5000 WATTS OF DAYTIME POWER AND USES 500 WATTS PRESUNRISE POWER WITH A 6 AM SIGN ON TIME ALL YEAR AROUND. THE MOST DISTANT RECEPTION THAT I HAVE CONFIRMED IN THE PAST 12 YEARS IS FROM THE WEST COAST OF FLORIDA AND WE HAVE HAD A FEW REPORTS FROM YOUR AREA AS WELL. THANKS FOR THE TAPE RECORDING.... THE NEW STATION MANAGER GOT A KICK OUT OF IT.

WCER CAME ON THE AIR IN 1956 AND INCREASED POWER FROM 1000 WATTS TO 5000 WATTS IN 1968 AND WAS SOLD TO A CHICAGO FIRM IN 1977 THEN THE A.M. STATION WAS SOLD IN AUGUST OF 1980 WITH THE CHICAGO FIRM RETAINING OWNERSHIP OF THE FM STATION (WMMQ, 92.7 MHZ)

I WISH YOU THE BEST OF LUCK IN THE FUTURE AND AGAIN THANK YOU FOR TAKING THE TIME TO DROP US A NOTE AND A TAPE. THEY WILL BOTH REMAIN IN OUR FILES.

I HAVE ALSO ENCLOSED THE PROGRAM GUIDE AND EVEN A BUMPER STICKER!

BEST REGARDS

Dear Friend DX'er:

This is to verify your W G R D reception report of February 9, 1948, 3:00 - 3:32AM EST.

W G R D is an independent daytime station, operating on a frequency of 1410 kilocycles with a power of 1000 watts.

The studios, at 35 Lafayette, N. E., are RCA equipped, while the transmitting plant, at 1300 Plymouth Rd., N. E., is Western Electric equipped.

The radiating system comprises a self-supporting 200' Truscon tower, 120 ground radials 250' long, plus a 48' square copper mesh ground screen directly underneath the tower is series fed from the transmitter by means of a pressurized 7/8" copper coaxial line approximately 200' long. The ground elevation is approximately 770' above sea level.

With sincere thanks for your kind report and with the best in dialing, we are

Walnutport, PA 18088

February 7, 1986

General Manager
Radio Station W F E N
Box 381
Fenton, MI 48430

Dear Sir,

I am pleased to inform you of my reception of Radio Station WFEN on the morning of Friday, February 7, 1986. Your broadcast on a frequency of 1160 kiloHertz was found reaching into Eastern Pennsylvania at 1:04 A.M., Eastern Standard Time, and I continued to hear your program of news, weather and popular recorded music until 2:10 A.M., E.S.T.

WFEN's signal on 1160 kiloHertz peaked at an excellent level, raising a report of 20 db over S-9 as indicated on the signal-strength meter. With that amount of signal input, your fine transmission dominated the frequency so as to afford clear, intelligible reception of the programming. There were occasional periods, however, when fading occurred and your signal dropped below the interference level, permitting station WJJD, Chicago, Ill., to dominate for short intervals. Your carrier was clean-cut and fully modulated. The tonal quality was excellent. There was no atmospheric static. As the result of these favorable conditions, much of the program conducted by announcer Randy Hollis was heard with good readability at this distance from Fenton of 450 air miles. It was a pleasure to hear your new station for the first time, and you are to be congratulated on the power and efficiency of your transmitting equipment that is able to provide this coverage.

I heard WFEN on my Hammarlund HQ-180 communications receiver, using 18 tubes. The antenna is a Model SM-2 Space Magnet, a rotatable 12-inch ferrite rod with 2 stages of preamplification. Ground connection is made to a well 175 ft. deep. I am situated in the eastern part of the State of Pennsylvania, 60 miles north of the city of Philadelphia near Allentown, Pa., and 21 miles west of the New Jersey state line.

I would be happy to receive your reply, kindly confirming my reception of WFEN on 1160 kiloHertz as reported above. Your verification of the fact that I was tuned to your broadcast of Friday, February 7th, will be greatly appreciated. Return postage is enclosed for your reply. As proof of my reception, I give the following description of some of the program items which I heard:

Mr. Kermit Geary

Dear Mr. Geary:

In reply to your recently received letter, I wish to earnestly express my thanks for the information you have given us.

This is the first time WHAK has taken to the air. Although it is only natural for radio signals to travel great distances during evening hours, it is nevertheless very interesting to note its effects in strength and quality over wide areas. I wish also to state at this point that we are only able to secure such information from letters and reports supplied by folks such as yourself who take the time and patience to listen and write.

After checking your letter against our log, I wish to verify the statements you made, in that they are accurate and correct.

Thanking you again for writing, I remain,

Very sincerely yours,

A handwritten signature in blue ink that reads "H. A. Klenn".

Mr. Kermit Geary
1266 Riverview Drive
Walnutport, PA 18088

Dear Mr. Geary:

Thank you for your reception report of "The Sports Station" AM 1660 WQSN Kalamazoo, Michigan. The details of your report of October 11, 1999 from 7:50 to 8:00 p.m. EDT agree with our official program log on that date and time. I am very pleased to confirm your listening report by way of this QSL letter.

AM 1660 WQSN is one of 85 Expanded Band stations licensed between 1610 and 1700 kHz. The station first signed on the air the evening of September 24, 1998, with non-directional signals of ten thousand watts day and one thousand watts night. The coordinates of our transmitter site are N42.14.11 W85.34.37. This is a shared transmitter site with our co-owned AM 1470 WKLZ. Since our sign-on, we've received hundreds of listener letters from thirty-seven of fifty U.S. states, five Canadian provinces, Bermuda, Finland, Sweden, the United Kingdom, France, Germany, Italy, The Canary Islands and New Zealand!

AM 1660 WQSN is owned by Fairfield Broadcasting Company, locally owned and operated since 1972. In addition to AM 1660 WQSN, our holdings (all in Kalamazoo) are AM 1470 WLKZ (800 watts days, 1,000 watts nights, directional at night), AM 590 WKZO (5,000 watts days and nights, directional at night), and Q-106.5 WQLR-FM (50,000 watts non-directional).

AM 1660 WQSN is a full-time sports station and is affiliated with the One-On-One Sports Network. AM 1470 WKLZ is a full-time talk station and is affiliated with NBC and CNN News. AM 590 WKZO, one of the pioneer U.S. stations (established in 1930) is Kalamazoo's News/Talk station and is locally programmed. Q-106.5 WQLR-FM has an Adult Contemporary format and is an R&R, Gavin and Network 40 reporting station.

Thanks again for making radio an important part of your life and for sharing your listening with us.

Cordially,

Ken Lanphear

"SERVING THE GOLDEN TRIANGLE"

Thursday, April 13, 2000

Kermit Geary
1266 Riverview Dr.
Walnutport, PA 18088

Dear Kermit,

It is *so* very exciting for us to get letters from people who have had a chance to hear our station from long distances, Kermit! We thank you for notifying us of this too. Go ahead and mark down in your reception records that you picked up an AM 1310 WYUR from Bloomfield Hills, Michigan.

The show you heard on Monday, April 3rd was "Days End". The female air talent you heard was Jennifer Dean. It runs Monday through Saturday 10PM – Midnight.

On Tuesday, April 4th you heard our Classical Music Encore. We carry classical music during the daytime Monday through Friday 10AM – Noon and 1PM – 3PM, and then Monday through Saturday mornings from Midnight – 2AM.

We thank you for sharing your experience with us, Kermit. Have a wonderful day!

Sincerely,

A handwritten signature in blue ink, appearing to read 'Suzie Kubacka', is written over the typed name.

Dear Kermit:

Many thanks, fellow, for your swell report on our DX program, also the box top. Glad to hear that you enjoyed the program as we sure had a swell time putting it on. Please accept this letter as verification of your report.

Enclosed is some propaganda including a picture of our transmitter building. Since this pix was taken we have built a studio wing on one side of the building and it was there that the program originated. Our regular studios are in town-five miles away. The picture on the "Winter Sports" page of the AAA booklet was taken down on the side of the transmitter hill. In the background you can just barely make out "beautiful Grand Traverse Bay". Sorry we are fresh out of pictures of our studios, Don Mullen and Mortimer. Don wanted to substitute pictures of Tyrone Power for himself but we nipped that idea in the bud.

We use Collins equipment throughout and our 300 F transmitter is in our opinion the best you can buy. We also are quite proud of our half wave radiator which gives us good coverage 90 miles and more from our plant, which isn't bad for any 250 watter.

When you come up here for your vacation this summer stop in and say hello.

Best wishes,

Jack Stinson,
Chief Engineer

Dear Kermit;

This letter will verify that you did listen to WRBJ-AM, St. Johns, Michigan during an equipment performance test on January 19, 1976 from 12:49 AM to 1:32 AM EST.

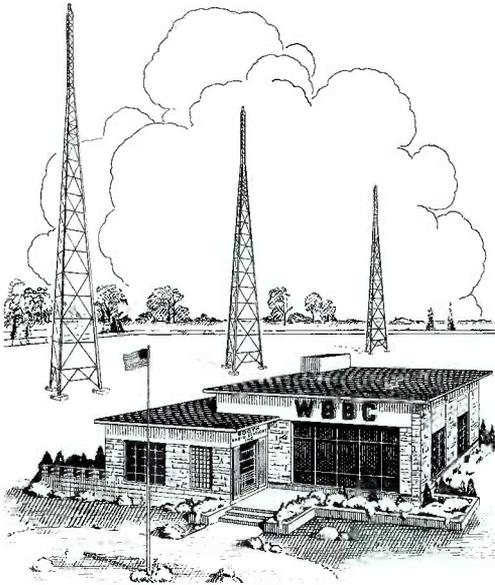

Thanks for listening in for the test and the kind words about our signal. I was very pleased with the eastern reception of the test. During the daylight hours, we can't get more than 12 miles east due to the Canadian station on 1580. Being raised in Dover, NJ I am a die-hard easterner. So far I have had other reports from Penn, Kinnelon, NJ and New Bedford, Mass. I am happy to see other eastern folks helping out.

Thanks again.

Sincerely,

*Kermit Seary
R.D. 2 Box 298
Walnutport, Pennsylvania
18088*

Dear Sir,

This will confirm your reception of WPLB on the morning of February 2, 1970. WPLB is normally directional at night, but for the frequency test, we operate at 1000 watts nondirectional. Our location is $43^{\circ} 09' 18''$ North, $85^{\circ} 15' 25''$ West. At night, we normally operate with two towers, 340° from true north, spaced 100 electrical degrees apart and driven 120° out of phase. The towers are each 150 feet tall, with the bases three feet above terrain. Our transmitter is a Gates BC1T, and we use 500 watts at night and 1000 watts daytime (north tower only). Our operating frequency is 1380 KHz, and the measurement revealed a frequency error of +0.3 cps. The measurement service is located at Pontiac, Michigan, and they cannot receive our directional transmissions.

Unfortunately, we have no formal verification cards, so I hope this letter will suffice.

*Sincerely,
Frederick G. Schroy
Chief Engineer - WPLB AM & FM*

1390 AM

October 31, 1986

Kermit Geary
1266 Riverview Drive
Walnutport, Pa. 18088

Dear Kermit,

It is a pleasure to be able to confirm your reception of WNLF on October 25, 1986 from 6:46 to 7:00 pm EDT at your location. Your description of our programming during that time agreed with our log.

WNLF used to be WGKY and prior to that was WCER which came on the air in August of 1956. We have only recently changed our call letters and have used the christian format since 1980.

We have a rather small staff for a 5,000 watt station but are day-time only and directional to the Northeast toward the Lansing market. Our transmitter is made by RCA and our signal area ranges from Jackson to Flint to Mount Pleasant to Grand Rapids and back toward Charlotte again. This places about 600,000 people in our potential audience.

We haven't had a chance to print up new bumper stickers or other promotional material since the call letters have been changed, however, I do have a "Stick-Up" I will send as well as a copy of our listening area. I hope you will enjoy these as much as I have enjoyed your letter.

Thanks again,

David W. Huva - Ch Oper - WNLF

Dear Kermit:

Thank you for your report of receiving station WAFB on December 3, 1968 at 12:45am EST. This letter is to confirm your report.

WAFB has scheduled a monthly test transmission for frequency monitor calibration on the first Tuesday of every month and this was the test you heard. We also check audio quality and other checks on our transmitter during this time.

The transmitting equipment at WAFB is an RCA BTA-5T transmitter operating at 5000 watts daytime and 500 watts pre sunrise and a Bauer 1000 watt transmitter used for standby operation. Our antenna system is a 315 foot series or rather shunt excited tower.

Sincerely yours

L. Van Prooyen

Dear DXer:

First of all, please excuse this type of a letter. It's not as personal as I'd like it to be, but time forbids answering each report personally.

We would like to thank you for your reception report. A check of our program log for that period agrees with your report, and we are therefore happy to verify same.

Perhaps you might be interested in a brief description of our equipment.

TRANSMITTER: 1000 watt Western Electric 443A

ANTENNAS: Three tower directional, the towers running roughly in a north-south line.

SPEECH INPUT EQUIPMENT: Almost all transistorized of our own design.

LOCATION: Approximately halfway between Ann Arbor and Ypsilanti, Michigan.

As you may have noted, we are now on the air 24 hours a day except Sunday night, when we sign off from 12 midnite until 6AM. Usually at this time we do our transmitter checks and maintenance.

Thank you again for your report and best wishes for continued good DXing luck.

WILLIAM E. GOODRICH,
GENERAL MANAGER

2 April, 1947

Mr. Kermit Geary
R. F. D. # 2
Walnutport, Pa.

Dear Sir:

This is to verify your reception of our station. We have checked with our log and find it checks with your reception report. We appreciate the interest you have shown in broadcasting and our attempt at greater public service.

You might be interested to know that we have received three reports from New Zealand. These reports were made in every case with exceptionally long antennae, ranging from 1000 down to 600 feet in length. It seems that is a common practice in that part of the world.

We are using a Gates model 250A transmitter and a quarter-wave Marconi antenna with co-axial feeder. Our actual service area, which I believe to be above average for a station of our power, on our frequency, is in the neighborhood of 70 to 80 miles in all directions.

On our engineering staff we have three hams: WO QDW, WO TQC, and WO PFB. None of us are on the air as yet but all have plans to start pounding the brass soon.

Due to lack of time and change in staff we have neglected to answer your report, but hope you will bear with us. I am sure that you can understand the amount of work that goes into putting a station on the air.

Very truly yours,

A handwritten signature in cursive script that reads 'Walter L. Lawson'.

Dear Mr. Geary:

We were very happy to receive your reception report of our station on December 7, 1966. WCKD is a daytime station, signing on at 6 a.m. every day and signing off according to sunset hours each month. However, we do conduct a frequency test on the first Wednesday of every month just a few minutes past midnight. Our log states that we did conduct a test from shortly past midnight to approximately 12:15 or 12:20 a.m. Eastern Standard Time. The data you report in your letter of December 8 compares with our Station Log.

Thank you very much once again for your letter. We are always happy to receive reports like yours. If you vacation in the area again, please feel free to stop in and visit with us.

Best wishes for a happy holiday.

Sincerely,

Wes Larson

Dear Mr. Geary,

Thank you for your letter regarding our test broadcast of November 21.

I am sorry you were unable to locate our signal in the "mud", I have had several reports from various sections on the test, mostly from the eastern area.

It would appear from your report that you did hear our earlier test transmission for frequency measurement purposes. The time and tone format agrees with the broadcast format, and it would be rather unlikely that another co-channel station would be using this particular tone sequence. The frequency test transmission ran from a little before 12:30A to a little after 12:45A, and was broadcast first with 500W, and then at 250W, for the last 5 minutes.

Our night man has just come in, and asked if you were listening to his show, "Pat's Record Room." (This show goes off at 12M)

Thank you again for your report, and best wishes for successful DXing.

Sincerely yours,

Dear Kermit:

Thank you very much for your SWL Report of February 2, 1960. Your report is correct in all aspects.

Monday morning is the only morning that we are off the air. We will return to the air for a frequency check as usual on the first day of each month.

Our transmitter is a Gates Model 250-GY with 250 watts to a pair of 811A's.

It beats me how a SWL will stay up until 3:00 am in the morning to listen for radio stations!

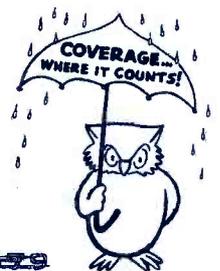

Another radio which you may like to hear is Radio Station KCLN on 1300, Clinton, Iowa. The best time to hear them would be at 6:55 to 7:00 PM, EST. The Chief Engineer at KCLN is Milton Nicholas.

Thanks again for your SWL Report.

MACKINAW AVENUE,
CHEBOYGAN, MICHIGAN

1240 KCS. FULLTIME
PHONE
5 5 4

Dear Friend:

Thank you for the fine DX report you have submitted during our equipment tests.

We appreciate this friendly act on your part, inasmuch as it enables us to determine our skywave coverage to some extent.

WCBY is owned and operated by the Straits Broadcasting Company of Cheboygan, Michigan and operates on a frequency of 1240 KC. with a carrier power of 250 watts. At the present time we are operating with a 4.8 ohm resistor in series with a 150 foot vertical uniform cross-section guyed tower. This is in conformance with FCC requirements to protect existing co-channel and adjacent channel stations by limiting our effective power output to essentially 75 millivolts per meter at one mile.

Our transmitter is a Collins type 300-J2 using two (2) Eimac type 4-125A tubes in the final, parallel connected, modulated with two (2) Eimac 4-125A tubes connected push-pull.

Our audio and monitoring equipment is Gates. Our antenna resistance is 35.4 ohms with the series resistor. We are running 2650 volts at 123ma. into our RF Finals.

WCBY is located at the Northwest edge of the City of Cheboygan, a town of 7,000 population. Cheboygan is located at the top of the lower peninsula of Michigan, right in the heart of Michigan's Water Wonderland and is 15 miles from where the famous Straits of Mackinac Bridge, the world's longest, is being built. Our population increases three or fourfold during the resort season.

Should you wish more information concerning WCBY, please feel free to ask us.

Thanking you for your very fine report, and hoping to hear from you again, I am

Sincerely,

Norbert C. Poeppelman

Dear Mr. Geary

This is to acknowledge your letter of October fourteenth and to verify your reception of our station on that day.

From all of the reports that we have received here covering our occasional skip reception, I am beginning to believe that we have somehow made a single 300' vertical radiator into a directional affair! With the exception of two letters, those that we have gotten from any great distance have been in the New York, Pennsylvania district.

Thank you for your report, and I sincerely hope that you will be able to hear us again in the near future.

Sincerely yours

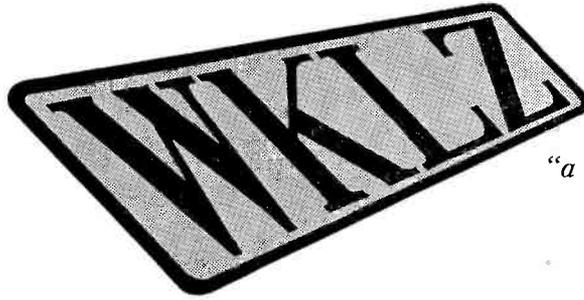

Stephen Cole
Chief Engineer

Dear Sir:

We are happy to verify your reception of WKMI on 1360 K.C. on Aug. 23, 1953 from 2:02 AM to 2:36 AM. E.S.T. Your report is correct and we congratulate you on your fine manner in reporting. We were using only 250 watts at that time due to losing a tower in a tornado Aug 1st. We expect to be back on 1000 watts in about a month. WKMI was formerly called W G F B until Jan. 1, 1953. when we changed call letters. We will be on each Saturday night and Sunday A.M. until 2:30 AM with the Street of Dreams show. We also conduct a frequency measurement test at 1:30 AM to 1:45 AM every second Tuesday of each month with only a 400 cycle test tone which is "wobbled" every 5 minutes for 10 or 15 seconds to identify it to the measuring station in Detroit. We use a four tower (300ft) array ordinarily during evening hours, which is beamed southwest over the city and northeast of us. Transmitter is about 3 1/2 miles northeast of city. We use a Raytheon model RA-1000 transmitter. Now best of luck in future.
Sincerely yours, Carl Stephens, Chief Engineer, WKMI

Walnutport, Pennsylvania.

Dear Mr. Geary:

I wish to express my appreciation for the reception report on the test program from our station the morning of September 11th. Your list of the program material heard during this test corresponds exactly with our station log.

The test period was conducted for the purpose of adjusting our new General Radio modulation monitor. We have been on the air since April 17th, this year but due to the material shortages have been operating without a modulation monitor up until this time. We had special authorization from the Federal Communications Commission to use a three inch oscilloscope in lieu of the approved type monitor. The transmitting equipment is all Raytheon with carrier power of 1000 watts. The antenna is a 215 foot verticle, guyed tower.

We have no scheduled test periods so I can't advise you when you might be able to hear us again, but as our back ordered equipment continues to come in we will be on the air testing it when we put it in operation. Thanks again for the fine report and lots of luck in your future DXing activities.

Yours

Dear Mr. Geary:

This is to confirm your letter of reception of WFUR written on November 7. After checking with our program director, I find the information you give to be correct. At the time of your reception, we were concluding our Sunday of broadcasting.

We are using a Raytheon 1000W transmitter which employs 833's in the final and also the modulator stage. Our tower is an Andrew and is 205' from ground to tip.

Appreciated hearing from you, as it is of primary interest to us to know just how far we succeed in reaching.

Thanking you, I remain,

Sincerely yours,

James R. Kincaid, Engineer

ENGINEERING DEPARTMENT

Dear Listener:

Having received your signal report dated Jan. 30, 1974
I am pleased to inform you that the information contained in your
report conforms to the program material transmitted.

Please accept our thanks for your fine interest in broadcast
listening, and we wish you further success in extending your logging
operation to many more stations throughout the world.

Feeling this report has been of mutual service, I remain

Sincerely yours,

Jeffrey P. Sommerville
Chief Engineer

NOTES:

Transmitter.....Gates BC-1H
Antenna.....Two 200 foot Towers in line at 165 deg True

Daytime.....Two Towers arranged in a heart shape with
null at 165 deg True

Direction of major lobe is 345 deg True North

Power.....1,000 Watts Daytime-Directional

Frequency..1590 kHz

Transmitter location: N. Lat. 42 deg 43' 42"
W. Long. 82 deg 31' 15"

SEPT. 12, 1948

DEAR MR. GEARY,

I HOPE YOU'LL FORGIVE ME FOR NOT REPLYING SOONER; BUT I DO WANT TO TAKE THIS TIME TO ACKNOWLEDGE YOUR LETTER, AND VERIFY YOUR REPORT, OF AUGUST 2ND.

YOUR REPORT IS TRULY MUSIC TO AN ENGNEER'S EARS, BUT ACCORDING TO OTHER REPORTS IT MUST BE TRUE. OUR STATION RECEIVED NUMEROUS REPORTS FROM THE EAST COAST, AND ALL INDICATED GOOD RECEPTION.

OUR EQUIPMENT CONSISTS OF RAYTHEON STUDIO EQUIPMENT, AN RA-1000 RAYTHEON KILOWATT TRANSMITTER FEEDING A 200FT-5 GUY, WINCHARGER TOWER. OUR TRANSMITTER LOCATION IS APPROXIMATELY FOUR MILES WEST OF ALMA ON US-27. THE LAND IS FAIRLY FLAT.

THANKS AGAIN, AND TILL SUCH TIME AS WE MAY HAVE FURTHER CORRESPONDENCE, I REMAIN,

SINCERELY YOURS,

Robert G. McLaughlin
CHIEF ENGINEER

Dear Mr. Geary:

Thank you for your DX report of April 23, 1947. I have checked our logs and find this report to be correct. This letter will serve as verification.

Thank you very much for your interest in WJEF.

Cordially yours,

Bruce M. Glycadgis
Chief Engineer

* Dear B.C.L.

Thank you for your reported reception of W T R X.

This letter confirms your reception on SUNDAY JANUARY 23, 1966
at 3:01 AM E.S.T.

W T R X is a DA-2 station, that is, we have a different pattern for daytime and nighttime operation. Also we reduce power from 5KW to 1KW at nite. The antenna system consists of three vertical towers of unequal height, the northern tower being 370' the center and south towers being 200'.

Enclosed you will find our coverage map. As you can see our major lobe is to the north.

In the event that you are in the area please feel free to stop in and tour the operation.

Sincerely
Thomas E. Mehrens

Chief Engineer

DEC. 13, 1957

Dear Mr. Geary:

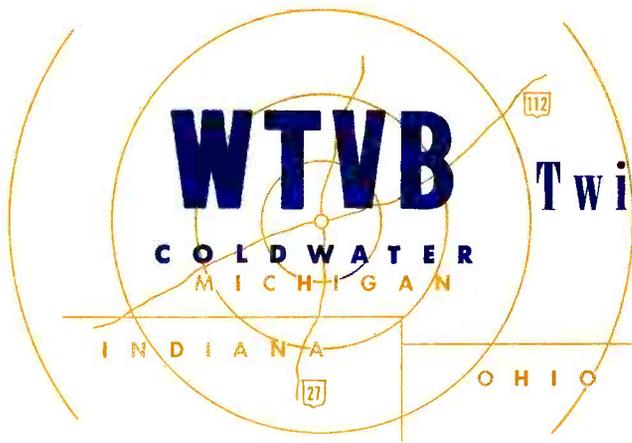

Thank you for your reception report of the 8th. You did indeed receive our signal the early morning of Dec. 7. I conducted that frequency check, as I do at the same time the first Saturday of each month, so it isn't necessary to check our logs to verify your report. We generally get several reports each month after a frequency check, most of them from the East. We conduct our frequency check on non-directional antenna. We also operate non-directional during the day, and directional nights.

This station, until last spring, when it was sold, had the call letters WKNK. There was no change of power or frequency at the time.

Thank you once again for your report.

Sincerely,

James Swanson, Ch. Eng.

Twin Valley Broadcasters, Inc.

This letter is to verify your report of reception of the WTVB equipment test signal at *2:11* AM on the morning of *July 1* 1949.

Thank you for sending this reception report. The engineering staff of WTVB invites you to continue to watch our frequency from time to time for further equipment tests.

Sincerely yours,

E. H. Munn, Jr.
Chief Engineer
