Dear Mr. Geary:

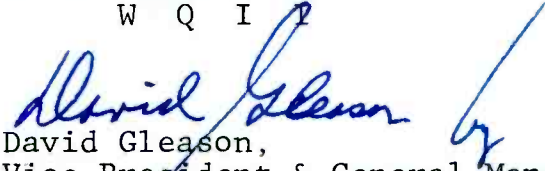

This will verify your report of WQII, San Juan, on
November 5, 1978.

The format structure and songs played match the des-
criptions in your report.

WQII operates with 10,000 watts, 24 hours a day into
a 4-tower Directional System protecting WRVA and XEMR.

Sincerely,

METRO BROADCASTING CO., INC.
W Q I I

Dear Kermit:

This letter is to certify and verify as correct your reception of WQII on November 10, 1975 at 2:11 AM, AST.

Your report agrees with our program log for that time and date.

At the time of your reception, 11-Q was in regularly scheduled programming with 10,000 watts feeding a four (4)-tower directional array with major nulls towards the Dominican Republic and WRVA.

WQII broadcasts seven (7) days a week, 24 hours a day.

Best regards,

David Gleason

Dear friend:

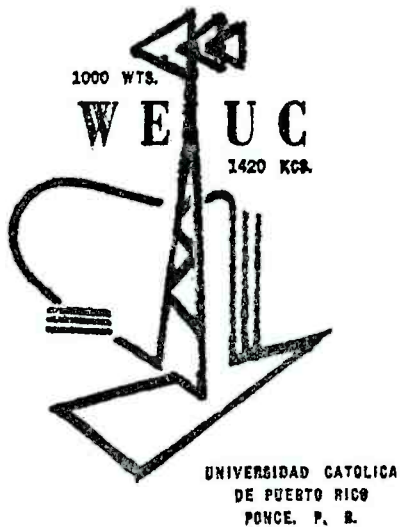

Thanks for your DX Report. Sorry that the conditions were not so good. We will try again early in January to see how many others are able to pick up our signal.

We operate daily from 6:00 a.m. to 11:00 p.m. Atlantic Standard Time.

Your report is very much appreciated. It is a pleasure for us to participate in this kind of activities.

Cordially,

Ricardo Vega
Mgr. & Chief Eng.

ARMED FORCES RADIO SERVICE

AIO 851, C/O Postmaster
New York, New York
12 May 1952

Kermit Geary
R.F.D. # 2,
Walnutport
Pennsylvania

Dear Mr. Geary;

Received your letter on reception of the DX Program broadcast by Radio Station ACE, San Juan, Puerto Rico, 31 March 1952 from 0900 to 1000 GMT.

We are very happy to *Verify* your listening reception Comments.

Thank you very much for the comments, the Engineer was impressed by the helpful comments of the many members of the National Radio Club and many of them have proven to be quite helpful and constructive.

We are now anticipating the arrival of a new 1 KW transmitter with tower and in the future would be happy to broadcast another DX Program. We could then provide better coverage to all DX'RS.

As it is now we are rather proud of the redesigned surplus high frequency Signal Corps transmitter operating at 200 W with antenna on a diagonal line 30' to 60' elevation, 153' long running North East by North and South West by South.

We received a total of 25 comments from various places up and down the East Coast from Elizabeth City N.C. to Gloucester, Mass - Ontario, Canada - North Girard, Pa., Glencove N.Y., Paxton Ill., Ohio, Tennessee, and one from Vallejo, California and also one from Albuquerque, New Mexico. Various others from the State of Pennsylvania and New York and the Brooklyn Area. Our thanks to you all for a good job and;

Continued good listening,

ARNOLD J. TINSETH
Station Manager
AFRS, Station ACE

HEADQUARTERS

APO 851. C/O POSTMASTER
NEW YORK, NEW YORK

19 December 1951

Mr. Kermit Geary,
RFD #2
Walnutport Pennsylvania.

Dear Mr. Geary;

Wish to thank you very deeply for your fine constructive comments on reception of our AFRS outlet here in San Juan.

On November 22nd 1951 we were operating on two hundred fifty watt, Airco Transmitter, 1470 KC's.

We were greatly surprised to hear from such a distance and our engineer Mr. Tomas Valines wishes to thank you for your comments from the engineering standpoint.

We are located at the US NAVAL Station, San Juan, P. R. with antenna stranded cable $\frac{1}{4}$ wave on telephone poles, cable at 45 feet elevation.

The Airco Transmitter we are using is a surplus Army Signal set with lots of bugs which Mr. Valines is working on, we alternate with a Collins Model 32 RA- 7 of only 50 watts on days when the bigger set is down for alterations so that is why you probably have not been receiving us more often, incidentally both transmitters are High Frequency transmitters re-designed for standard broadcast by our engineer.

Thank you again very much for your helpful information and send you the Seasons greeting from AFRS San Juan, P. R.

Sincerely yours,

ARNOLD J. TINSETH

RADIO STATION AHD
Armed Forces Radio Station
Ramey AFB, P. R.

April 3, 1952

Mr. Kermit Geary
R.F.D. #2
Walnutport, Pennsylvania

Dear Sir:

Thanks, very much, for your reception report(s). You heard our frequency-check transmission(s) for Feb. and Mar.; during which times we were radiating two hundred-fifty watts. Up to now, we've never attempted to transmit for this test on our assigned power of fifty (50)-watts.

Each month, just prior to our test transmission, we soup up the transmitter and touch up the tuning from the antenna, on back. When the test begins, we attempt to hold right on the 100%-mark on the modulation-monitor indicator. During the test, AHD radiates a little more than 250-watts from a long-wire, top-loaded antenna. The design of the antenna is the reason for our long skip -- We've had reports from many East-coast states, Ohio, Illinois, Nebraska; and even one from Albuquerque, New Mexico.

This station is completely GATES equipped and the present rig was first put on the air last May 26. Our set-up is the same as you'd find in many 250-watt B'cast. stations there in the U.S.A. We have the usual run of auxiliary equipment, which includes Freq. Monitor, Mod, Monitor, Tape Recorders, disc recorder, remote-line amp., Short-wave receivers, Limiter, etc.

You may consider this a confirmation of both your recorded receptions of AHD (Feb. 21, '52 and Mar. 20, '52) between the times 0430 and 0445 - Atlantic Standard Time.

Please excuse the delay in answering your communications - we are in the process of installing some new studio facilities, and the complete staff of AHD has been rather busy.

Thanks, again, for your report. We shall be happy to reply to any correspondence you may favor us with in the future.

Very truly yours,

R. C. Knowland

Walnutport, Pa. 18088

Dear Mr. Geary:

Thank you so much for your letter of October 3rd. I am truly sorry your first letter was never answered and that your second letter has taken so long to be answered. Let me assure you that the reason your 1st letter was never answered was because at that time no one was really in charge of Public Affairs, but, let it be known that I am now the Public Affairs Director (I was the Sales Correspondent) and you can be sure that all letters will be answered, late but sure.

Getting back to your letter, it is really good to know that WBMJ is enjoyed outside of Puerto Rico (would you believe that in the outskirts of the island, the station does not meet the frequency necessity to reach these listeners?).

The DJ you mention in your letter is Moonshadow, he is our #1 DJ. He now has a morning show (6AM-9AM) with a program full of satires. Since he's been on this particular program, the ratings have gone up tremendously.

Well my friend if you are ever in San Juan, either give us a call or drop by, we would be more than happy to show you around the station.

Very truly yours,

MID-OCEAN BROADCASTING CORP.

December 22, 1971

Kermit Geary
R.D. 2 Box 298
Walnutport, Pennsylvania 18088

Dear Mr. Geary,

Thank you so much for putting in the "late hours" to hear our test. It was an interesting experiment to seek Stateside listeners. Reception reports came to us from six different states. According to the reports we didn't boom-in, but our signal was recognized and logged.

This letter is to confirm that the information you sent regarding the WCGB test program of December 6, 1971 at 2:00-2:30 a.m. AST conforms to our log.

WCGB is a daytime station on 1050 Khz with 1000 watts of power. Located on the south coast of Puerto Rico, near Juana Diaz, WCGB programs in Spanish with the exception of one and a half hours of English programs at mid-day. Owned by Grace Mission, Inc. of Grand Rapids, Michigan, our purpose is to present Jesus Christ as the Answer to man's need. We program popular music of the slower, lighter style (Spanish Bolero) along with five-minute special Christian messages and some regular religious programs of various denominations. Our antenna is located in a marshy area often under salt water. Thus we have good response from most of the Island of Puerto Rico. Having just celebrated our fourth anniversary on Thanksgiving Day we are very pleased with the acceptance to our broadcast service in this area.

If you're ever on vacation in this area be sure to stop and see us. Until then, good luck in your DXing. Thanks again for your response to our test.

Dear Mr. Geary:

Thank you very much for your report on our signal up your way. Your letter was one of the many received from the United States and Canada. We are glad to acknowledge and verify your reception of our program.

In cooperation with the Courtesy Committee of the NRC, we are arranging a special DX Test Program on our station. The scheduled date and time is Tuesday, February 26, 1957 from 4:30 - 5:00 AST.

WIVV is owned and operated by the Calvary Baptist Mission of Puerto Rico, and operated on an assigned frequency of 1370 kc., with a power output of 1000 watts. We broadcast 17 hours a day, beginning at 6:00 a.m. Our initial broadcast was December 8, 1956.

Our equipment is all new R.C.A. The transmitter is 1KW BTA-1MX, using 470 feet of RG 18U coax line feeding into a 200 foot guyed tower. The tower is in a marshy low swamp which gives us a good ground system.

Our programming is 50% religious, 40% good sweet music of the classical and semi-classical nature, and 10% public service and local reports. We broadcast 15 hours in English and 2 hours in Spanish.

Vieques is a small island, 23 miles long and 5 miles wide, east of Puerto Rico with a population of ten thousand. Pineapple, sugar cane, and coconuts are the main crops.

On survey, we find our greatest listening audience is in the Virgin Islands with a total population of $1\frac{1}{2}$ million, most of which are English speaking people. Our signal is heard regularly and all day by audiences nearly one thousand miles away. We are very happy about this.

Thank you again for your report and write again when you have time.

Sincerely,

David Crane

Dear Mr. Geary:

This letter is to verify your DX report.

We have had considerable response from you fellow members which is very gratifying.

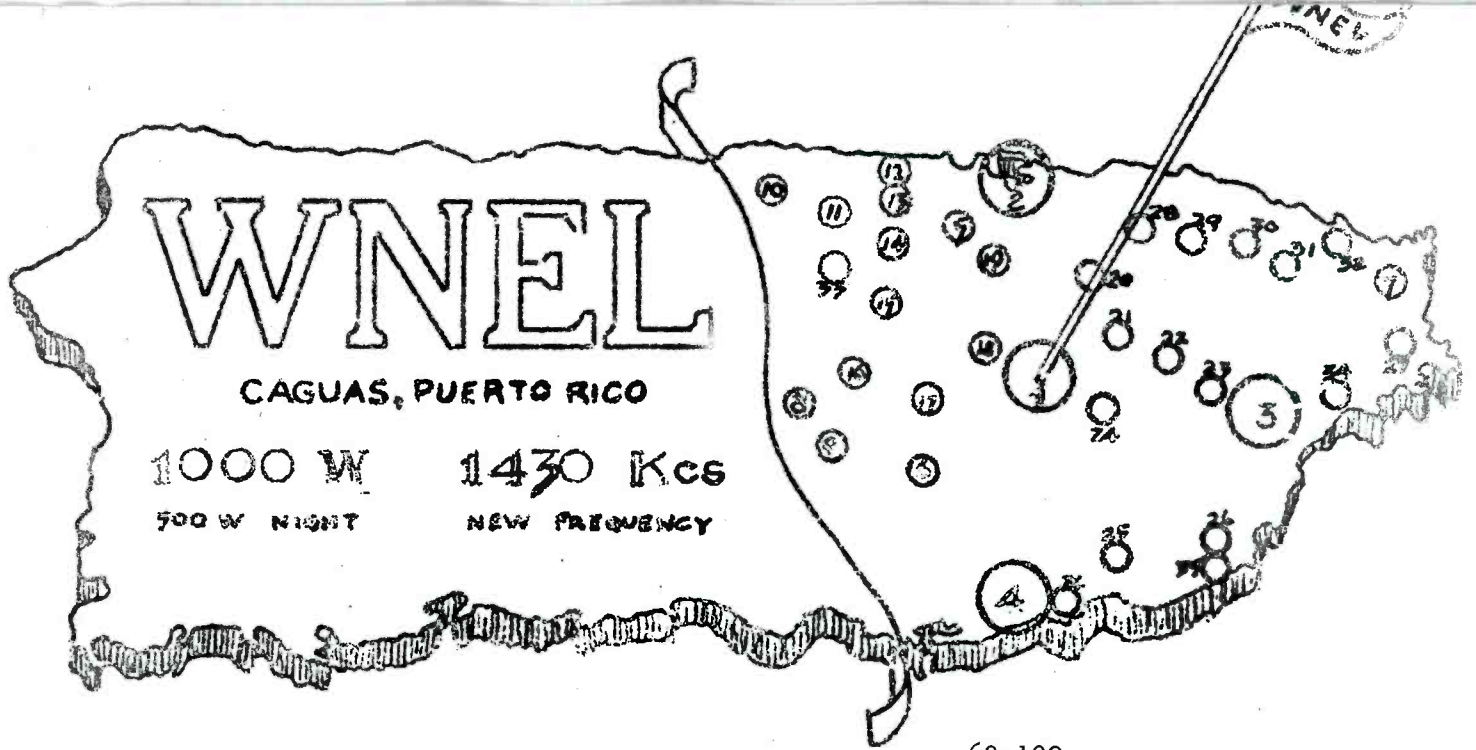

Each night we have added several announcements saluting your fellow members specifically stating our call letters power, and frequency. These announcements will be scheduled between 12 midnight and 6 A.M. in the morning.

Thank you for your interest. If there is any further information your members would like in these announcements please notify us.

Yours truly,

Walter R. Eddy
Chief Engineer

Walnutport, Pa.

Dear Mr. Geary:

Thank you so much for your very kind letter of February 6th, 1962 in which you reported the excellent reception of WNEL on Monday February 5th, 1962.

The log as noted by you in your letter is completely correct - - and as a proof we are enclosing herewith a copy of the daily programming of WNEL, Caguas, as well as various other circulars showing our normal, primary coverage map for said station.

WNEL, Caguas, at present, is one of the two stations operating on a twenty four (24) hour schedule (except for Sunday nights) - - and we are receiving constant reports of good quality reception from many parts of the world.

Thanking you once again for your interest, we are,

Most cordially yours,

Dear Sir:

We beg to acknowledge receipt of your letter of March 20, in regard to our last Frequency check broadcast .

After a careful examination of our logs by our Asst. Chief Enginner, Mr Muñoz, your report is correct.

Our Chief Engineer, Mr. Biascoechea read your letter and appreciate very much your interest and your nice letter.

We use to have our Frequency check broadcast every 20th of the month and at the same hour.

Thanking you for your letter, we beg to remain,

Cordially yours,

Inter American Radio Corp WMIA

Walnutport, Pa.

Dear Mr. Geary:

This is to confirm your reception for Radio Station WMDD on December 15, 1949 during our frequency check between 4:00 and 4:05 am local time.

Your report was exactly what happened here even to the half minute. Thanks for the fine report and here's wishing you lots of DX listening in the future.

Sincerely,

Bob Storey
Chief Engr.

Please confirm my reception of Station WLEO, Ponce. I shall be very happy to receive your reply, kindly verifying the fact that I heard your broadcast as reported in this letter. A 6¢ stamp is enclosed for return postage via air mail. As proof that I was tuned to WLEO, I give the following description of your program to which I listened:

WLEO, 1170 kc.; Monday morning, December 24, 1956,

4:57 to 5:30 A.M., Puerto Rico time:

4:57 A.M., Sign-On Announcement in English:

"Good Morning. This is Radio Station WLEO, Ponce, Puerto Rico, owned and operated by the Ponce Broadcasting Corporation". The location of your studios and transmitter was announced. It was stated that "WLEO operates on a frequency of 1170 kilocycles with a power of 250 watts by authority of the Federal Communications Commission in Washington, District of Columbia".

4:58 A.M., Sign-On Announcement in Spanish.

4:59 A.M., Announcement in Spanish:

"Emisora W-L-E-O, transmite wleo en 1170 kilociclos desde la ciudad de Ponce, Puerto Rico".

5:00 to 5:30 A.M., Program for "Los Madrugadores", consisting of typical Puerto Rican music and singing, along with frequent time announcements:

5:01 A.M., Time Announcement: "Cinco, un minuto en la madrugada"

5:02 to 5:05 A.M., Song by a tenor. "Sueño" was mentioned frequently.

5:05 A.M., Time Announcement: "Cinco con cinco minutos en la mañana".

5:06 to 5:08 $\frac{3}{4}$ A.M., Song by a tenor.

5:08 $\frac{3}{4}$ A.M., Time Announcement.

5:09 to 5:12 A.M., Music and Singing.

5:12 A.M., Time Announcement.

5:13 to 5:16 A.M., Music and Singing by men.

5:16 A.M., Time Announcement: "5 con 16 minutos en la mañana".

5:17 to 5:20 A.M., Music and singing by men.

5:20 A.M., Time Announcement.

5:21 to 5:24 A.M., Song by a male vocalist.

5:24 A.M., Time Announcement: "5 con 24 minutos".

5:25 to 5:28 A.M., Guitar music, with singing by a man.

5:29 A.M., Time Announcement: "5 con 29 minutos".

5:29 A.M., Orchestra Music.

5:30 A.M., Announcement:

"WLEO, transmite wleo en 1170 kilociclos desde la ciudad de Ponce, Puerto Rico. 5 con 30 minutos".

Please compare the above information with your Station Log of this early-morning broadcast and, if my report is correct, kindly send me a verification of my reception of WLEO, Ponce, on 1170 kilocycles. Your attention to this request will be greatly appreciated.

Best wishes to you, Sir, and to WLEO and its Personnel for continued luck and success in broadcasting. I hope to hear your programs again on future occasions. Looking forward to receiving your reply in confirmation of my reception, for which I thank you, I am,

Very truly yours,

Confirmed Alben Tech Dir.

Dear sir:

We reply to your letter reporting our Special broadcast of March 17 from 4:00 to 4:30 A.M. A. S. T.

There is no doubt that your report is correct as to having caught our station sometime during that period and we are sorry to report that you could not get the full half hour clearly.

We received thirty reports fifteen of which were entirely negative. Please for give us if we can not answer each and every one of you in detail.

Many thanks for your report and till we meet again on the air.

Sincerely

Dear Kermit,

Received your report on reception during the hurricane. Needless to say, we were a bit surprised. We also appreciate your very accurate technical report, as this is always a big help to us.

I believe that a lot of our "soup" comes from our transmitter and antenna installation - it is by far, one of the best I have ever seen. The engineer who put it in knew his business. One of the better features of the system is the way it is grounded. We have a copper wire "Spider web" around it.

Your logging is quite accurate. So we here by QSL your letter and confirm your report.

Thanks again for the letter and best wishes from our staff.

Sincerely,

Dean Brian,
Production Mgr.

Dear Sir.:

It certainly was a great pleasure to receive your letter regarding our test program of June 14. You will never imagine the joy everyone in this station experienced upon reading your words describing our strong and clear signals, fine tonal quality, excellent modulation, etc.

Our station has a power of 1000 (One thousand) watts, using Gates equipment and a 200 ft. Wincharges tower.

Your reception of WYRF on June 14 was 100 % correct. Your log checks with ours to the dot.

We expect to be officially on the air sometime this week and would appreciate it if you check and report on our reception during operation time which will be daily from 7:00 A. M. to 11:00 P. M. Atlantic Standard Time.

We are very grateful to you for your report and your best wishes for the station's success. Should you be in Puerto Rico sometime in the future, it will be a great pleasure for us to thank you personally.

With best wishes, we remain

Very truly yours,

December 29, 1961

Mr. Kermit Geary
R.D. 2, Box 298
Walnutport, Pa.,

Dear Mr. Geary:

This will acknowledge receipt of your reception report of our broadcast on the morning of December 24, 1961.

I am happy to advise that it checks out completely with our station log. Apparently, you must have some knowledge of Spanish to have given us such a thorough report.

At the time of your reception we were testing our new 5 kw. transmitter on the air, which the Federal Communications Commission recently cleared for "day-time" use. After January 1, therefore, our power will be 5 kw. by day and 250 watts by night.

Best wishes for the new year.

Sincerely yours,

Dear Sir,

I was so glad reading your letter, knowing that our 250 watts reached as far as Pennsylvania.

Before confirm your report, let me congratulate you for your good receiver and thanks you for the interest you have taken after having listening our Radio Aerppuerto Internacional (WRAI)

It is of great pleasure to me to inform you that your report is correct in all its parts and that our programing is exactly what you say on all sundays from 6:30 P.M. to 7:30 P.M.

Our transmitter is a new Collins of 1 K W but we are using it in 250 watts with a small tower of only 150 feet of elevation.

Our frequency, as you know is 1520 Kc. and also as you say is idenify as Frecuencia de Oro.

Accept this letter as a confirmation of your report and excuse me for the many mistakes, I can incurred in this your language (The English Language)

Thanks for having written and count me as a friend of your.

Very truly yours,

RAMON ESPINOSA ORTA

Dear Mr. Geary:

Thank you for your nice letter of January 2, 1971, where you report reception of our station WQBS in Walnutport. I am happy to confirm that your description fits the programming we aired in the early morning hours.

Your reception extremely unusual since we operate with nighttime power of 1,000 and are directional southeast. In other words, the brunt of our signal goes in a direction exactly opposite to your location. And, as you noted, CMQ also operates on 630 khz --- they are running around 500,000 watts.

Best wishes for a Happy New Year.
