Dear Mr. Maguire:

We are glad to verify your report on our special DX program broadcast early February 5th. Your report checks with our log, so you can add this letter to your collection of verifications.

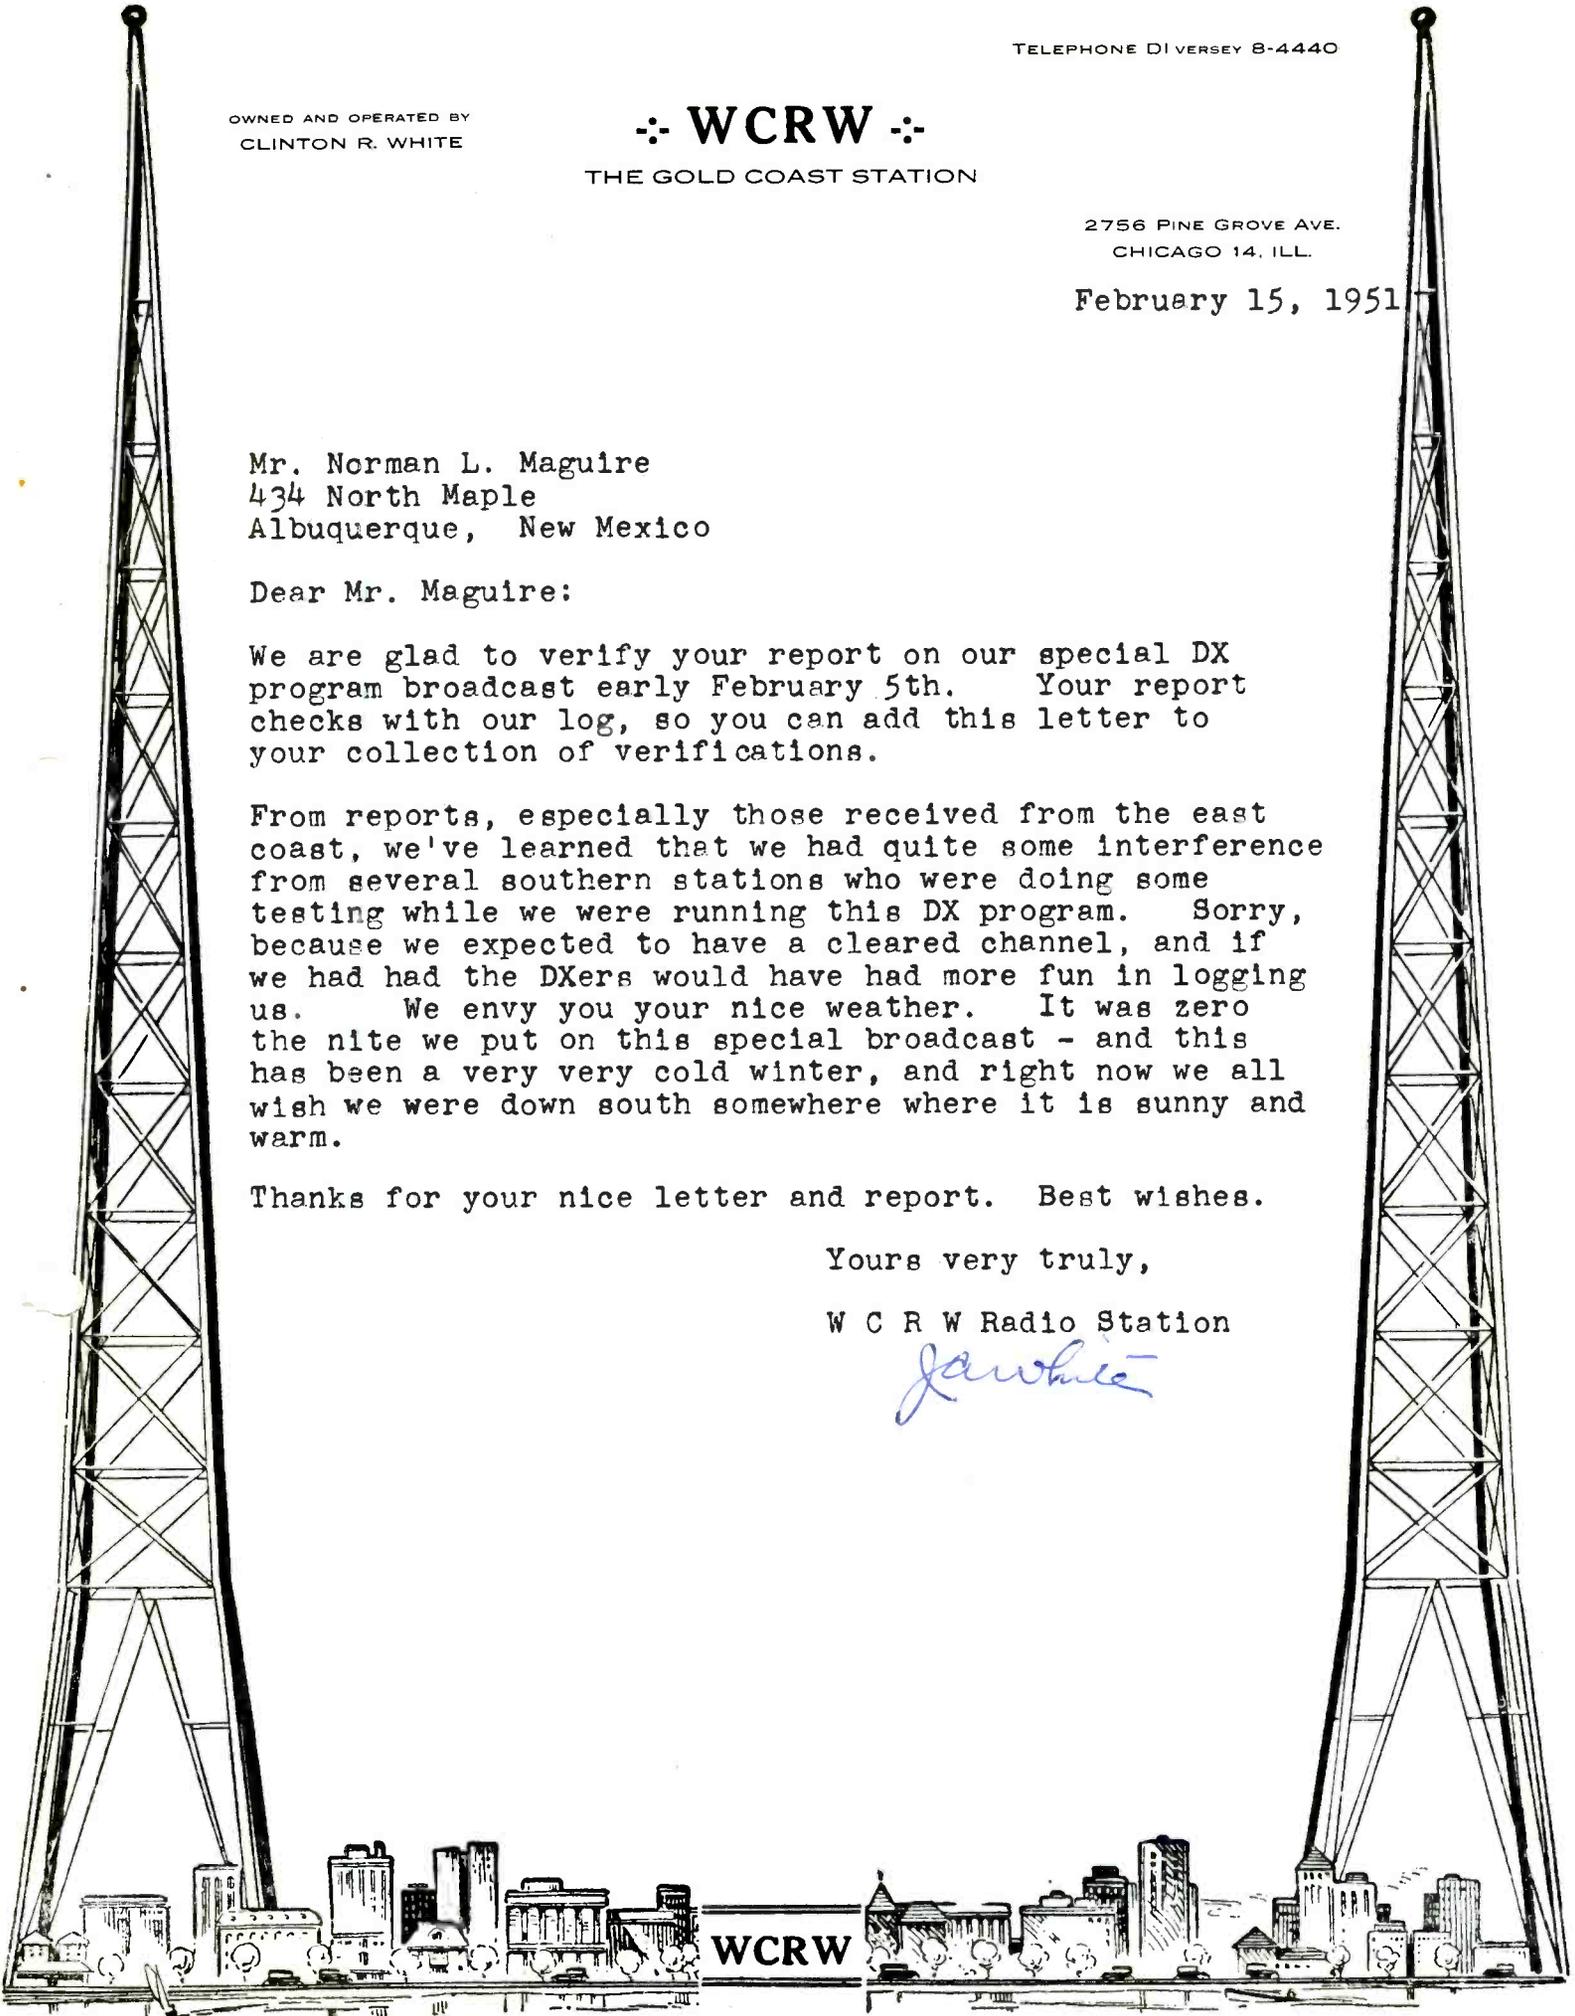

From reports, especially those received from the east coast, we've learned that we had quite some interference from several southern stations who were doing some testing while we were running this DX program. Sorry, because we expected to have a cleared channel, and if we had had the DXers would have had more fun in logging us. We envy you your nice weather. It was zero the nite we put on this special broadcast - and this has been a very very cold winter, and right now we all wish we were down south somewhere where it is sunny and warm.

Thanks for your nice letter and report. Best wishes.

Yours very truly,

August 29, 1960

Mr. Norman L. Maguire
1420 Columbia Drive, NE
Abbuquerque, New Mexico

Dear Sir:

This will confirm your report of reception of our signal on August 21st, beginning at 5:30 a.m. central daylight time. I talked with the announcer mentioned in your report, and we can very definitely confirm that you did receive our signal.

You might also be interested to know that we received a report of the same transmission from a fellow in New Zealand. To my knowledge, this is the first report of reception from either of these two locations.

We are feeding 5000 watts to a simple directional array consisting of two towers approximately a quarter wave length in height, exactly one quarter wave apart (213.97') on a line bearing 8° East of true North.

This array radiates a figure eight pattern with the center of the major lobe South 8° West and the center of the North lobe is of course 8° East of North.

I am amazed how some hams can get such a terrific kick out of broadcast listening. I have held a ham ticket, (W9WPO) since 1936, and although due to the press of business I have been unable to pursue the hobby for the last seven or eight years, it still holds a great fascination for me.

Best D-X and 73.

Sincerely,

MARION BROADCASTING CO.

Dear Mr. Williams:

This is to verify your reception of W K A N on the morning of May 17, 1947 from 2:15 AM to 2:31 AM, CST.

Thank you very much for your report of reception of our signals, and be assured that we appreciate your interest in our station.

We are operating a Raytheon one kilowatt AM transmitter using a 300' shunt-fed tower. The AM tower also supports the eight circular FM antenna elements, mounted on one side of the structure. Our FM transmitter, a 10 kilowatt Federal Telephone and Radio Company product, will be placed under test sometime in June.

Our regular programming, daytime only on AM will begin on June 2, 1947. We are pleased with the reports that have been coming in from Texas to Canada, and feel that our antenna is doing a good job for us.

Thank you again, and feel free to call upon us for any further information you may be interested in.

Dear Mr. Maguire:

Thank you very much for your report of January 14, 1950, concerning reception of radio station WKRS from 3:03 A.M. to 3:26 A.M., CST, on that date. This letter is to confirm the items and announcements heard during the broadcast period that you monitored.

WKRS is the AM sister to WKRS FM, which has been operating on 106.7 megacycles (channel 294), since July 25, 1948. WKRS, authorized to operate with 1,000 watts on 1220 kilocycles, commenced its program test on September 25, 1949. The station employs Western Electric speech input equipment, microphones, limiting amplifier and Gates Model BCLF one kilowatt transmitter. Phasing equipment is by Gates, and the two tower directional array employs a Blaw Knox type CFN insulated self-supporting vertical radiator 320 feet over all and a Wincharger type 101 insulated guyed vertical radiator 228 feet over all.

WKRS FM shares studios and control facilities with its AM affiliate and employs a Western Electric Model 54A eight bay cloverleaf antenna mounted on top of the CFN tower, giving an effective radiated power of 12,000 watts.

With my very best wishes for continued DX listening, I am

Dear Mr. Maguire:

Thank you for your letter of April 19. We are always very happy to hear from our DX listeners. Your reception report corresponds exactly with our station log. You heard our regular monthly frequency check which we broadcast from 12:50 to 1:05 am. CST each third Saturday morning of each month.

We use a 1 kilowatt Western Electric transmitter directly coupled to a 517 foot tower, the top 54 feet being the FM antenna. We use a 3 kilowatt General Electric FM transmitter. This gives us complete coverage of Southern Illinois on both AM and FM.

If there is any other information I can furnish you about our stations, I shall be very happy to do so.

Sincerely yours,

Gerald L. Stout

DEAR SIR:

THANK YOU VERY MUCH FOR YOUR RECEPTION REPORT OF MAY 21, 1979. YOUR REPORT WAS CORRECT AS WE WERE ON DURING THE TIME PERIOD STATED. WE ARE A 1000 WATT STATION-DAYTIME IN NATURE-OPERATING FROM 6AM TO SUNSET. ALTON IS LOCATED CLOSE TO THE ST. LOUIS AREA.(ABOUT 15 AIR MILES AWAY FROM ST. LOUIS CITY.) WE ARE GRATIFIED THAT OUR SIGNALS WERE RECEIVED AT SUCH A GREAT DISTANCE FROM ALTON AND ARE PARTICULARLY INTERESTED IN THE FACT THAT OUR SIGNAL ECLIPSED XERF WHICH IS A VERY POWERFUL STATION ON OUR SAME FREQUENCY. WE UNDERSTAND THAT STATION XERF IS A 250,000 WATT STATION AND THAT MAKES RECEPTION OF OUR STATION EVEN MORE INTERESTING.

THANKING YOU AGAIN FOR YOUR SIGNAL REPORT, I REMAIN,

SINCERELY YOURS,

Nicholas Bono

NICHOLAS BONO,

September 27, 1951

Norman L. Maguire
434 North Maple
Albuquerque, New Mexico

Dear Sir:

Thank you for your letter dated September 18, 1951. It seems certain that you did receive WPEO on that date. Your review of the programs coincides with our log, and our music sheets indicate the tunes you heard were played.

In as much as I did those shows myself, your recap of the chatter also rings a familiar bell...so I guess that makes it conclusive.

Thanks again for your letter. We certainly appreciate the time and trouble you took for us. Your letter has been seen by all employees, and will be kept in the chief engineer's file.

Sincerely,

A handwritten signature in cursive script that reads "Bob Lee".

FULL RANGE HIGH FIDELITY

Dear Radio Friend:

We here at WRAM RADIO want to thank you for your report of reception of WRAM on November 4, 1957. The response to our test was very great so we will blame our "slow to verify" to that fact.

Some facts about WRAM'S young life. We went on the air May 5th, 1957 with operating power of 1000 watts. We are both daytime and directional. Most of our equipment is Collins. Our transmitter is located 5 miles northeast of Monmouth, Ill, on U.S. Highway #34. Our antennas are 152 feet high, 230.2 ft. spaced, and set on a line bearing 0 degrees true.

This letter will serve to verify your report of reception as our log agrees with your report. Thanks again and maybe we will meet on a future test.

Dear Norman,

Thank you very much for your letter of last week, I am sorry that I did not get around to answering it sooner. We were certainly glad to hear from you and hope that you will accept this letter as verification.

WRMS is a 500w directional station with the pattern aimed right in your direction. We have been on the air for only one year and was very happy to enter your letter in our files of QSL's. I will enclose a coverage map and if you have any questions feel free to call on us at any time.

Be looking for you on the bands,

Dear Mr. Norman L. Maguire:

We wish to thank you for your report on our signals. We are pleased to know that WSIV can be heard in Glastonbury, Connecticut.

WSIV is a daytime operated station, but we obtained special permission from the FCC to broadcast the state tournament ~~XXXX~~ basket ball games after 10 PM.

The operating power is 250 watts.

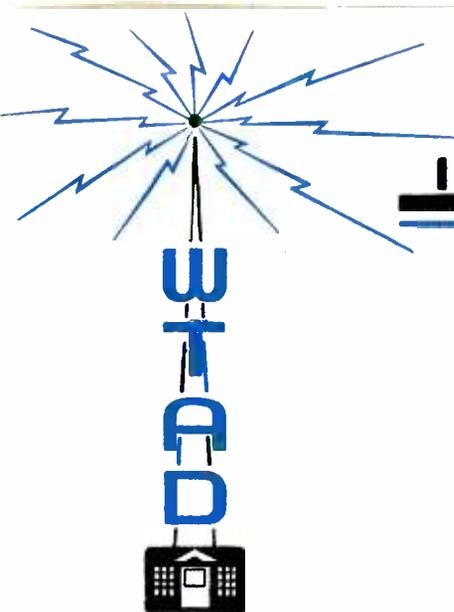

We conduct frequency checks on the last Saturday of each month from 3:30 AM to 3:45 AM CST if you care to listen then.

This letter will serve as verification on your report which checks with our logs.

Yours very truly

CENTRAL ILLINOIS RADIO CORPORATION

Offices and Studios in Hotel Jefferson • Telephone 9106 • PEORIA 2, ILLINOIS

"Your Home Station"

April 25, 1947

Mr. Norman L. McGuire
185 Williams Street
Glastonbury, Conn.

Dear Mr. McGuire:

We appreciated very much your message concerning reception of WWXL. The many details connected with establishing a new station has necessarily delayed our reply.

Inspection of our records of the date stated indicates that your report was essentially correct and is hereby verified.

Details of possible interest concerning WWXL are as follows: Radio Station WWXL is owned and operated by the Central Illinois Radio Corporation, all stock of which is owned by local business men.

Station construction was started November 12, 1946, and completed by February 15, 1947. Our studios are located in Hotel Jefferson in downtown Peoria. The transmitter is located on a bluff 2 miles south east of Peoria in Creve Coeur, Illinois.

Our transmitter which is a Raytheon Model RA-1000, operates on a frequency of 1580 kilocycles and supplies a power output to the antenna of 1000 watts. The antenna is a Wincharger type 101, guyed tower of uniform cross section, 200 feet in height.

The antenna is supplied with power from the transmitter through one of a pair of 7/8 inch co-axial transmission lines.

The ground system is comprised of 120 radials, 3 degrees apart 200 feet in length.

Hours of operation at present are from 6:00 A.M. to 6:30 P.M.

Please accept our thanks for your communication. We will be glad to receive any additional comments you care to give in regard to our daily program.

Sincerely yours,
Charles R. Bilyue
