METRO SHARE LEADERS AND MAJOR MARKET SHARE CHANGES

This table shows the 12+ Metro Share (6AM-MID, Mon-Sun) leaders for each rated market. Also listed are the stations in each market which had the largest gain in share or loss in share.

The period covered for the share changes is Spring 1992 to Spring 1993. I am convinced that year-to-year comparisons are more accurate and valid than "last book" comparisons.

\*\*\*\* Based on 12+ Metro, 1/4 HR AVG, Broadcast Week. Calculated by dividing listening to non-listed stations by total listening to all radio stations. A large part of the non-listed listening is probably to public and non-commercial stations. Other listening to distant stations (clears). Other listening will be to local commercial stations which do not qualify for listing in the rating book. The importance of this table (and the table above) is that this is listening that is not going to local commercial outlets. This affects CPM's and the effectiveness of local radio.
