APPLICATION FOR NEW BROADCAST STATION LICENSE

INSTRUCTIONS

A. This form is to be used in all cases when applying for a broadcast station license. It consists of this part, Section I, and the following sections:

Section II - A, License Application Engineering Data Standard Broadcast
Section II - B, License Application Engineering Data FM Broadcast
Section II - C, License Application Engineering Data Television Broadcast

B. Prepare and file three copies of this form and all exhibits with Federal Communications Commission, Washington, D.C. 20554.

C. Number exhibits serially in the space provided in the body of the form and list each exhibit in the space provided on page 2 of this Section. Date each exhibit and each antenna pattern.

D. The name of the applicant must be stated exactly as it appears on the construction permit which is being covered.

E. Information called for by this application which is already on file with the Commission need not be refilled in this application provided (1) the information is now on file in another application or FCC form filed by or on behalf of this applicant; (2) the information is identified fully by reference to the file number (if any), the FCC form number, and the filing date of the application or other form containing the information and the page or paragraph referred to, and (3) after making the reference, the applicant states "No change since date of filing." Any such reference will be considered to incorporate into this application all information, confidential or otherwise, contained in the application or other form referred to. The incorporated application or other form will thereafter, in its entirety, be open to the public.

F. This application shall be personally signed by the applicant, if the applicant is an individual; by one of the partners, if the applicant is a partnership; by an officer, if the applicant is a corporation; by a member who is an officer, if the applicant is an unincorporated association; by such duly elected or appointed officials as may be competent to do so under the laws of the applicable jurisdiction, if the applicant is an eligible government entity; or by the applicant's attorney in case the applicant's physical disability or of his absence from the United States. The attorney shall, in the event he signs for the applicant, separately set forth the reason why the application is not signed by the applicant. In addition, if any matter is stated on the basis of the attorney's belief only (rather than his knowledge), he shall separately set forth his reasons for believing that such statements are true.

G. BE SURE ALL NECESSARY INFORMATION IS FURNISHED AND ALL PARAGRAPHS ARE FULLY ANSWERED. IF ANY PORTIONS OF THE APPLICATION ARE NOT APPLICABLE, SPECIFICALLY STATE. DEFECTIVE OR INCOMPLETE APPLICATIONS MAY BE RETURNED WITHOUT CONSIDERATION.

H. See back of last page for Privacy Act Notice.

FINANCIAL DATA

4. Give actual costs of making installation for which construction was authorized

All previous edition of this form is cancelled.
5. (a) Attach a detailed balance sheet, as at the completion date of the authorized construction, showing applicant's financial position as shown in Exhibit No. 2. (b) If the actual cost of construction materially exceeds the original estimated cost of construction, attach as Exhibit No. 3 a detailed statement showing the plan used to finance such construction. (If applicant is licensee of a broadcast station having on file with the Commission an Annual Financial Report (FCC Form 324) showing its financial position within the past 12 months and the request in this application is for a change in existing facilities, these exhibits need not be supplied provided that no substantial reduction in financial position has occurred.)

6. State changes, if any, in capitalization, and report any contracts affecting ownership not shown in the application for construction permit. (If none, so state)

NONE

7. Apart from the apparatus constructed, have all the terms, conditions, and obligations set forth in the above-described application for construction permit been fully met?

Yes ☑ No ☐

If "No", state exceptions.

8. Is a request for authority to conduct program tests a part of this application?

Yes ☐ No ☐

THE APPLICANT hereby waives any claim to the use of any particular frequency or of the ether as against the regulatory power of the United States because of the previous use of the same, whether by license or otherwise, and requests an authorization in accordance with this application. (See Section 304 of the Communications Act of 1934).

THE APPLICANT represents that this application is not filed for the purpose of impeding, obstructing, or delaying determination on any other application with which it may be in conflict.

THE APPLICANT acknowledges that all the statements made in this application and attached exhibits are considered material representations, and that all the exhibits are a material part hereof and are incorporated herein as if set out in full in the application.

CERTIFICATION

I certify that the statements in this application are true, complete, and correct to the best of my knowledge and belief, and are made in good faith.

Signed and dated this 6 day of April, 1977

12. Attach as Exhibit No. 4E, data, diagrams, and appropriate graphs together with description of measurement procedures and instruments with regard to the following: All measurements shall be made with the equipment adjusted for normal program operation and shall include all circuits between the main studio microphone terminals and the antenna output, including telephone lines, preemphasis circuits and any equalizers employed except for microphones, and without compression if a compression amplifier is installed.

a. Audio frequency response from 50 to 15,000 Hertz for approximately 25, 50 and 100 percent modulation. Measurements shall be made on at least the following audio frequencies; 50, 100, 400, 1000, 5000, 10,000 and 15,000 Hertz. The frequency response measurements shall normally be made without deemphasis; however, standard 75 microsecond deemphasis may be employed in the measuring equipment or system provided the accuracy of the deemphasis circuit is sufficient to insure that the measured response is within the prescribed limits.

b. Audio frequency harmonic distortion for 25, 50 and 100 percent modulation for the fundamental frequencies of 50, 100, 400, 1000 and 5000 Hertz. Audio frequency harmonics for 100 percent modulation for fundamental frequencies of 50, 100 and 400 Hertz. Measurements shall normally include harmonics to 10,000 Hertz. The distortion measurements shall be made employing 75 microsecond deemphasis in the measuring equipment or system.

c. Output noise level (frequency modulation) in the band of 50 to 15,000 Hertz in decibels below the level representing 100 percent amplitude modulation. The noise measurements shall be made employing 75 microsecond deemphasis in the measuring equipment or system.
13. In what respect, if any, does the apparatus constructed differ from that described in the application for construction permit or in the permit?

1. DIFFERENT MAKE OF TRANSMITTER

2. DIFFERENT MAKE OF MODULATION MONITORS

3. DIFFERENT MAKE OF TRANSMISSION LINE

I certify that I represent the applicant in the capacity indicated below and that I have examined the foregoing statement of technical information and that it is true to the best of my knowledge and belief.

Gentlemen:

Enclosed are the following applications:

1. Three copies of FCC Form 302 with all exhibits including Stereo Proof of performance for FM station KCT, File No. BPH 9901, which has been constructed, tested, and is ready for operation as soon as authority is received.

2. Three copies of FCC Form 318, requesting Subsidiary Communication Authorization for operation in connection with FM Station KCT, Lamesa, Texas.

3. Three copies of FCC Form 302, with Engineering exhibit No. B1, (Antenna Impedance Measurements) submitted for AM station KPAT, Lamesa, Texas, following completion of construction of the FM Station.

We believe these applications are complete, however, we will be ready to supply any further data which may be required. We are anxious to begin program test operation on KCT, the new FM station and will appreciate receiving a COLLECT telegram notifying us of approval. Thank you.

Sincerely,

Galen C. Gilbert
President

KPLT Radio, Inc.

Encl.

CG/AG
News service from Continental Network, a division of Texas State Network, has been agreed on by the Network and the Station; however, formal contracts have not been executed as of this date. These are expected to be completed soon, and a copy will be filed with the Commission as soon as available. The agreement will be the standard agreement now being used by the network and a number of stations in Texas.
The increased cost of construction has been paid for from earnings which the station (KPET AM) has accumulated since the FM application was filed. All construction costs have been paid, and the present financial condition of the applicant is much improved over the position at the time of the original application approximately one year ago.

As indicated by Exhibit 2 of this application, KPET Radio, Inc., has cash on hand of more than $37,000.00, current notes receivable of more than $15,000.00, and accounts receivable of more than $26,000.00.

The company owes less than $2,000.00 in current liabilities.

FEDERAL COMMUNICATIONS COMMISSION
P. O. C. WASHINGTON, D. C.
Gentlemen:

On January 9, 1974, the Federal Communications Commission revised the rules and regulations concerning the Emergency Broadcast System (EBS), with an effective date of March 15, 1974.

The EBS provides facilities for the President and the Federal Government, as well as heads of State and Local Governments, or their designated representatives with a means of communicating with the American public during emergency situations.

The new revisions, coordinated with the National Industry Advisory Committee (NIAC) and the Office of Telecommunications Policy (OTP), are intended to clarify the language contained in the present rules so that operating personnel can more readily understand the actions necessary to successfully participate in the EBS.

Revised State EBS Operational Plans are in process of preparation, including details for use of the EBS in State and Local emergencies (See Sections 73.935, 73.936, and 73.937). These plans will be considered at State Emergency Communications Committee meetings.

In order to expedite the preparation of the State EBS Operational Plans with a minimum of correspondence and administrative delay, the Commission has issued an EBS Authorization to your station. It will be most helpful if you will either accept or decline this offer within the next 30-days. In the event you elect to decline this offer, it is respectfully requested that you return the EBS Authorization to the Emergency Communications Division, Federal Communications Commission, Washington, D. C. 20554 for cancellation. In either event, the appropriate EBS checklist and EBS Station Designation will be forwarded to you in the immediate future. Any questions concerning this matter should be directed to your State Emergency Communications Committee Chairman or to the Emergency Communications Division, Federal Communications Commission, Washington, D. C. 20554.

Your cooperation and indulgence is gratefully appreciated.

Sincerely yours,

[Signature]

Please attach the duplicate copy of this notice to your remittance to insure proper credit for payment. Checks or money orders should be made payable to the "Federal Communications Commission".
FM BROADCAST STATION CONSTRUCTION PERMIT

Subject to the provisions of the Communications Act of 1934, as amended, treaties, and Commission Rules, and further subject to the conditions set forth in this permit, authority is hereby granted to construct an FM broadcast station located and described as follows:

Permittee: KPET RADIO, INC.

Authorized assignment:
1. Frequency (MHz) .....................: 104.7
2. Transmitter output power ..........: 21 kilowatts
3. Effective radiated power ..........: 100 kilowatts (H&V)
4. Antenna height above average terrain (feet) ..........: 225 feet (H&V)
5. Hours of operation .................: Unlimited
6. Station location ....................: Lamesa, Texas
7. Main studio location ...............: 2 mi S-SE of center of Lamesa, Texas
8. Remote Control point ..............: ----
                                           West Longitude: 101° 56' 11"
                                            PHELPS-DODGE, CFM-HP-10, 10 sections (H&V), side-mounted near the
                                            top of KPET(AM) tower. Overall height above ground: 282 feet

10. Transmitter location ...............: 2 mi S-SE of center of Lamesa, Texas

11. Transmitter(s) ....................: AEL, FM-25KE
12. Obstruction markings specifications in accordance with the following paragraphs of FCC Form 715: 1, 3, 12, 21
13. Conditions: During installation of the FM antenna, KPET(AM) shall determine operating power by the indirect method. Upon completion of the installation, the antenna resistance of the KPET(AM) antenna structure shall be remeasured and the result submitted in a separate application (FCC Form 302) as a request to determine operating power by the direct method. Data submitted shall include a sketch of the combined installation.
14. Date of required commencement of construction : November 23, 1976
15. Date of required completion of construction ......: September 23, 1977

Equipment and program tests shall be conducted only pursuant to Sections 73.216 and 73.217 of the Commission Rules. This permit shall be automatically forfeited if the station is not ready for operation within the time specified or within such further time as the Commission may allow unless completion of the station is prevented by causes not under the control of the permittee. See Section 1.599 of the Commission Rules.

This construction permit consists of this page and pages

Dated: September 23, 1976

Kim
F.C.C. - WASHINGTON, D.C.
OBSTRUCTION MARKING AND LIGHTING SPECIFICATIONS
FOR ANTENNA STRUCTURES

It is to be expressly understood that the issuance of these specifications is in no way to be considered as precluding additional or modified marking or lighting as may hereafter be required under the provisions of Section 30A(q) of the Communications Act of 1934, as amended.

PAINTING

1. Antenna structures shall be painted throughout their height with alternate bands of aviation surface paint and white, and painted with aviation surface orange bands at both top and bottom. The width of the bands shall be equal and approximately one-twentieth the height of the structure, provided, however, that the bands shall not be more than 100 feet nor less than 1/2 feet in width. All towers shall be cleared or repainted as often as necessary to maintain good visibility.

TOP LIGHTING

2. There shall be installed at the top of the tower at least two 115- or 125-watt lamps (A21/TS) enclosed in aviation red obstruction light globes. The two lights shall burn simultaneously from sunset to sunrise and shall be positioned so as to insure unobstructed visibility of at least one of the lights from aircraft at any normal angle of approach. A light sensitive control device or an astronomic dial clock and time switch may be used to control the obstruction lighting in lieu of manual control. When a light sensitive device is used it should be adjusted so that the lights will be turned on at a north sky light intensity level of about thirty-five foot candles and turned off at a north sky light intensity level of about fifty-eight foot candles.

3. There shall be installed at the top of the structure one 300 m/m electric code beacon equipped with two 620- or 75-watt lamps (PS-40, Code Beacon type), both lamps to burn simultaneously, and equipped with aviation red color filters. Where a rod or wire guy of not more than 20 feet in height and incapable of supporting this beacon is mounted on top of the structure and it is determined that such additional construction does not permit unobstructed visibility of the code beacon from aircraft at any normal angle of approach, there shall be installed two such beacons positioned so as to insure unobstructed visibility of at least one of the beacons from aircraft at any normal angle of approach. The beacons shall be equipped with a flashing mechanism producing not more than 40 flashes per minute nor less than 12 flashes per minute with a period of darkness equal to approximately one-half of the luminous period.

INTERMEDIATE LIGHTING

4. At approximately one-half of the overall height of the tower one similar flashing 300 m/m electric code beacon shall be installed in such position within the tower proper that the structural members will not impair the visibility of this beacon from aircraft at any normal angle of approach. In the event this beacon cannot be installed in a manner to insure unobstructed visibility of it from aircraft at any normal angle of approach, there shall be installed two such beacons at each level. Each beacon shall be mounted on the outside of the tower at the prescribed height.

5. At approximately two-fifths of the overall height of the tower one similar flashing 300 m/m electric code beacon shall be installed in such position within the tower proper that the structural members will not impair the visibility of this beacon from aircraft at any normal angle of approach. In the event this beacon cannot be installed in a manner to insure unobstructed visibility of it from aircraft at any normal angle of approach, there shall be installed two such beacons. Each beacon shall be mounted on the outside of the tower at the prescribed height.

6. At approximately two-thirds, four-ninths and two-ninths of the overall height of the tower one similar flashing 300 m/m electric code beacon shall be installed in such position within the tower proper that the structural members will not impair the visibility of this beacon from aircraft at any normal angle of approach. In the event these beacons cannot be installed in a manner to insure unobstructed visibility of the beacons from aircraft at any normal angle of approach, there shall be installed two such beacons at each level. Each beacon shall be mounted on the outside of diagonally opposite corners or opposite sides of the tower at the prescribed height.

7. On levels at approximately four-sixths and two-sixths of the overall height of the tower one similar flashing 300 m/m electric code beacon shall be installed in such position within the tower proper that the structural members will not impair the visibility of this beacon from aircraft at any normal angle of approach. In the event these beacons cannot be

8. On levels at approximately three-fourths, one-half and one-quarter of the overall height of the tower one similar flashing 300 m/m electric code beacon shall be installed in such position within the tower proper that the structural members will not impair the visibility of the beacon from aircraft at any normal angle of approach. In the event these beacons cannot be installed in a manner to insure unobstructed visibility of the beacons from aircraft at any normal angle of approach, there shall be installed two such beacons at each level. Each beacon shall be mounted on the outside of diagonally opposite corners or opposite sides of the tower at the prescribed height.

9. On levels at approximately two-thirds, four-ninths and two-ninths of the overall height of the tower one similar flashing 300 m/m electric code beacon shall be installed in such position within the tower proper that the structural members will not impair the visibility of this beacon from aircraft at any normal angle of approach. In the event these beacons cannot be installed in a manner to insure unobstructed visibility of the beacons from aircraft at any normal angle of approach, there shall be installed two such beacons at each level. Each beacon shall be mounted on the outside of diagonally opposite corners or opposite sides of the tower at the prescribed height.

10. On levels at approximately four-fifths, three-fifths, two-fifths and one-fifth of the overall height of the tower one similar flashing 300 m/m electric code beacon shall be installed in such position within the tower proper that the structural members will not impair the visibility of this beacon from aircraft at any normal angle of approach. In the event these beacons cannot be

11. Antenna structures constructed prior to November 1, 1970 shall conform to these pointing specifications when next repainted but in no event later than Nov. 1, 1977 (Sec. 17.43).

THIS FORM IS A PART OF AND SHALL BE ATTACHED TO THE CURRENT INSTRUMENT OF AUTHORIZATION.
be installed two such beacons at each level. Each beacon shall be installed two such beacons at each level. Each beacon shall be mounted on the outside of diagonally opposite corners or opposite sides of the tower at the prescribed height.

10.2 On levels at approximately five-sixths, two-thirds, one-half, one-third and one-eighth of the over-all height of the tower one similar flashing 300 m/m electric code beacon shall be installed in such a position within the tower proper that the structural members will not impair the visibility of this beacon from aircraft at any normal angle of approach. In the event these beacons cannot be installed in a manner to insure unobstructed visibility of the beacons from aircraft at any normal angle of approach, such beacons shall be installed in two such beacons at each level. Each beacon shall be mounted on the outside of diagonally opposite corners or opposite sides of the tower at the prescribed height.

10.3 On levels at approximately one-sixth, one-half, one-third and one-eighth of the over-all height of the tower one similar flashing 300 m/m electric code beacon shall be installed in such a position within the tower proper that the structural members will not impair the visibility of this beacon from aircraft at any normal angle of approach. In the event these beacons cannot be installed in a manner to insure unobstructed visibility of the beacons from aircraft at any normal angle of approach, such beacons shall be installed in two such beacons at each level. Each beacon shall be mounted on the outside of diagonally opposite corners or opposite sides of the tower at the prescribed height.

10.4 On levels at approximately one-third, one-half, one-third and one-fourth of the over-all height of the tower one similar flashing 300 m/m electric code beacon shall be installed in such a position within the tower proper that the structural members will not impair the visibility of this beacon from aircraft at any normal angle of approach. In the event these beacons cannot be installed in a manner to insure unobstructed visibility of the beacons from aircraft at any normal angle of approach, such beacons shall be installed in two such beacons at each level. Each beacon shall be mounted on the outside of diagonally opposite corners or opposite sides of the tower at the prescribed height.

11. At the approximate mid-point of the over-all height of the tower there shall be installed approximately one-twentieth of two 116- or 125-watt lamps (A21/TS) enclosed in aviation red obstruction light globes. Each light shall be mounted low enough to insure unobstructed visibility of at least one light at each level from aircraft at any normal angle of approach.

12. On levels at approximately one-twelfth and one-third of the over-all height of the tower, there shall be installed approximately one-twentieth of two 116- or 125-watt lamps (A21/TS) enclosed in aviation red obstruction light globes shall be installed on each outside corner of the structure.

13. On levels at approximately one-sixth and one-fourth of the over-all height of the tower, at least one 116- or 125-watt lamp (A21/TS) enclosed in aviation red obstruction light globe shall be installed on each outside comer of the structure.

14. On levels at approximately four-thirds, and one-fourth of the over-all height of the tower, at least one 116- or 125-watt lamp (A21/TS) enclosed in aviation red obstruction light globe shall be installed on each outside comer of the structure.

15. On levels at approximately one-sixth, one-half, and one-sixth of the over-all height of the tower, at least one 116- or 125-watt lamp (A21/TS) enclosed in an aviation red obstruction light globe shall be installed at each outside corner of the structure.

16. On levels at approximately one-sixth, one-half, one-sixth and one-eight of the over-all height of the tower, at least one 116- or 125-watt lamp (A21/TS) enclosed in an aviation red obstruction light globe shall be installed at each outside corner of the structure.

17. On levels at approximately one-twelfth and one-third of the over-all height of the tower, at least one 116- or 125-watt lamp (A21/TS) enclosed in an aviation red obstruction light globe shall be installed at each outside corner of the structure.

18. On levels at approximately one-twelfth, one-third and one-third of the over-all height of the tower, at least one 116- or 125-watt lamp (A21/TS) enclosed in an aviation red obstruction light globe shall be installed at each outside corner of the structure.

19. On levels at approximately one-twelfth, one-third and one-third of the over-all height of the tower, at least one 116- or 125-watt lamp (A21/TS) enclosed in an aviation red obstruction light globe shall be installed at each outside corner of the structure.

20. All lighting shall be exhibited from sunset to sunrise unless otherwise specified.

21. All lights shall burn continuously. Shall be controlled by a light sensitive device adjusted such that the lights will be turned on at a north sky light intensity level of about 35 foot candles and turned off at a north sky light intensity level of about 58 foot candles.

22. During construction of an antenna structure, for which obstruction lighting is required, at least two 116- or 125-watt lamps (A21/TS) enclosed in aviation red obstruction light globes, shall be installed at the uppermost point of the structure. In addition, as the height of the structure exceeds each level at which permanent obstruction lights will be required, two similar lights shall be displayed nightly from sunset to sunrise until the permanent obstruction light globes have been installed and placed in operation, and shall be positioned so as to insure unobstructed visibility of each light at any normal angle of approach. In lieu of the above temporary warning lights, the permanent obstruction lighting fixtures shall be installed and operated at each required levels as each such levels exceeded in height during construction.

F.C.C. - WASHINGTON, D. C.
THE APPLICANT hereby waives any claim to the use of any particular frequency or of the ether as against the regulatory power of the United States because of the previous use of the same, whether by license or otherwise, and requests an authorization in accordance with this application. (See Section 304 of the Communications Act of 1934).

THE APPLICANT represents that this application is not filed for the purpose of impeding, obstructing, or delaying determination on any other application with which it may be in conflict.

THE APPLICANT acknowledges that all the statements made in this application and attached exhibits are considered material representations, and that all the exhibits are a material part hereof and are incorporated herein as if set out in full in the application.

CERTIFICATION

I certify that the statements in this application are true, complete, and correct to the best of my knowledge and belief, and are made in good faith.

Signed and dated this ______ day of ______ , 1976

(This Section should not be signed and dated until all the following Sections and Exhibits have been prepared and attached.

INCLUDE FILING FEE WITH THIS APPLICATION. SEE PART 1 OF FCC RULES FOR AMOUNT OF FEE.

WILLFUL FALSE STATEMENTS MADE ON THIS FORM ARE PUNISHABLE BY FINE AND IMPRISONMENT.

FEDERAL COMMUNICATIONS COMMISSION

Application for Authority to Construct a New Broadcast
Station or Make Changes in an Existing Broadcast Station

INSTRUCTIONS

A. This form is to be used in applying for authority to construct a new
standard, commercial FM, or television broadcast station, or to make
changes in existing broadcast stations. This form consists of this
part, Section I, and the following sections:

Section II. Legal Qualifications of Broadcast Applicant
Section III. Financial Qualifications of Broadcast Applicant
Section IV-A. Statement of Program Service of Broadcast Applicant
(AM-FM)
Section IV-B. Statement of Program Service of Broadcast Applicant
(TV)
Section V-A. Standard Broadcast Engineering Data
Section V-B. FM Broadcast Engineering Data
Section V-C. Television Broadcast Engineering Data
Section V-G. Antenna and Site Information
Section VI. Equal Employment Opportunity Program

B. Prepare three copies of this form and all exhibits. Sign one copy
of Sections II, III, IV-A, and IV-B, and any additional copy (a total of
four) of Section V-G and associated exhibits, and one additional copy
(a total of four) of Section V-C and associated exhibits. File all the
above pages, except the amendment and map, and show date when each
page was taken.

C. Number exhibits serially in the space provided in the body of the form
and list each exhibit in the space provided on page 2 of this
section. Show date of preparation of each exhibit, antenna pattern,
and map, and show date when each photograph was taken.

D. The name of the applicant stated in Section I hereof shall be the
exact corporate name, if a corporation; if a partnership, the names of
all partners and the name under which the partnership does business;
if an unincorporated association, the name of an executive officer or
his office, and the name of the association. In other Sections of the form
the name alone will be sufficient identification of the applicant.

E. Information called for by this application which is already on file
with the Commission (except that called for in Section III which is
more than 90 days old and in Section V-G) need not be repeated in
this application provided (1) the information is now on file in another
application or FCC Form filed by or on behalf of this applicant, (2)
the information is identified FULLY by reference to the file number of
any) the FCC form number, and the filing date of the application or
other form containing the information and the page or paragraph refer-
to, and/or making the reference, the applicant states "No
change since date of filing." Any such reference will be considered
to incorporate into this application all information contained or
otherwise contained in the application or other form referred to. The
incorporated application or other form will thereafter, in its entirety,
be open to the public. (See Section 1.526 of the Commission's Rules
and Regulations. "Records to be maintained locally for public
inspection by applicants, permittees, and licensees."

F. This application shall be personally signed by the applicant, if the
applicant is an individual, by one of the partners, if the applicant is a
partnership, by an officer, if the applicant is a corporation, by a mem-
ber who is an officer, if the applicant is an unincorporated association
by such duly elected or appointed officials as may be competent to do
so under the laws of the applicable jurisdiction, the applicant is an
eligible government entity; or by the applicant in case of the
applicant's physical absence or by his absence from the United
States. The attorney shall, in the event he signs for the applicant,
accurately set forth the reasons why the application is not signed by
the applicant. In addition, if any matter is stated on the basis of the
attorney's belief only (rather than his knowledge), he shall separately
set forth the reasons for believing that such statements are true.

G. Before filing out this application, the applicant should familiarize
himself with the Communications Act of 1934, as amended, Parts 1, 2,
17 and 73 of the Commission's Rules and Regulations.

H. BE SURE ALL NECESSARY INFORMATION IS FURNISHED AND
ALL PARAGRAPHS ARE FULLY ANSWERED. IF ANY PORTIONS
OF THIS APPLICATION ARE NOT APPLICABLE, SPECIALLY
NOTE SO. DEFECTIVE OR INCOMPLETE APPLICATIONS MAY
BE RETURNED WITHOUT CONSIDERATION.

FOR COMMISSION USE ONLY
be installed two such beacons at each level. Each beacon shall be installed two such beacons at each level. Each beacon shall be mounted on the outside of diagonally opposite corners or opposite sides of the tower at the prescribed height.

(SIDE LIGHTS)

11 At the approximate mid point of the overall height of the tower there shall be installed at least two 116- or 125-watt lamps (A21/TS) enclosed in aviation red obstruction light globes. Each light shall be mounted in such a manner to assure unobstructed visibility of at least one light at each level from aircraft at any normal angle of approach.

12 On levels at approximately two-thirds and one-third of the overall height of the tower, there shall be installed at least two 116- or 125-watt lamps (A21/TS) enclosed in aviation red obstruction light globes. Each beacon shall be mounted on the outside of diagonally opposite corners or opposite sides of the tower at the prescribed height.

13 On levels at approximately one-twelfth, one-sixth, and one-third of the overall height of the tower, at least one 116- or 125-watt lamp (A21/TS) enclosed in aviation red obstruction light globe shall be installed on each outside corner of the structure.

14 On levels at approximately one-fifth, one-third, and one-seventh of the overall height of the tower, at least one 116- or 125-watt lamp (A21/TS) enclosed in aviation red obstruction light globe shall be installed on each outside corner of the structure.

15 On levels at approximately one-twelfth, one-sixth, and one-third of the overall height of the tower, at least one 116- or 125-watt lamp (A21/TS) enclosed in aviation red obstruction light globe shall be installed on each outside comer of the structure.

16 On levels at approximately one-seventh, one-fifteenth, three-sevenths, and one-five-elevenths of the overall height of the tower, at least one 116- or 125-watt lamp (A21/TS) enclosed in aviation red obstruction light globe shall be installed on each outside corner of the structure.

17 On levels at approximately one-fifteenth, one-seventh, three-eighths, and one-fourth of the overall height of the tower, at least one 116- or 125-watt lamp (A21/TS) enclosed in aviation red obstruction light globe shall be installed on each outside corner of the structure.

18 On levels at approximately one-fifteenth, one-seventh, five-ninths, one-third, and one-fourth of the overall height of the tower, at least one 116- or 125-watt lamp (A21/TS) enclosed in aviation red obstruction light globe shall be installed on each outside corner of the structure.

19 On levels at approximately nineteen-tenths, seven-tenths, one-tenth, and three-tenths and one-tenth of the overall height of the tower, at least one 116- or 125-watt lamp (A21/TS) enclosed in aviation red obstruction light globe shall be installed on each outside corner of the structure.

20 All lighting shall be exhibited from sunset to sunrise unless otherwise specified.

21 All lights shall burn continuously or shall be controlled by light sensitive devices and shall be extinguished when the lights will be turned on at north sky light intensity level of about 25 foot candles and turned off at north sky light intensity level of about 5 foot candles.

22 During construction of an antenna structure, for which obstruction lighting is required, at least two 116- or 125-watt lamps (A21/TS) enclosed in aviation red obstruction light globes, shall be installed at the uppermost point of the structure. In addition, as the height of the structure exceeds each level at which permanent obstruction lights will be required, two similar lights shall be displayed nightly from sunset to sunrise until the permanent obstruction lights have been installed and placed in operation, and shall be positioned so as to insure unobstructed visibility of at least one light at any normal angle of approach.

In lieu of the above temporary warning lights, the permanent obstruction lighting fixtures shall be installed and operated at each required level as each such level is reached during construction.
May 15, 1976

Federal Communications Commission
Washington, D. C. 20554

Gentlemen:

This is in reference to our application File No. BFM-9807,Filed March 2, 1976, requesting authority to construct a new FM station in Lamesa, Texas.

Attached is an amendment to this application which we are filing in order to change Frequency and type of antenna.

There have been no other changes in information previously filed.

We believe the enclosed Amendment is complete, however, if any additional data is required, please advise.

Sincerely,

KPEE Radio, Inc.

President

Galen O. Gilbert/ag
This will acknowledge receipt of application(s) described as follows:
AMENDMENT TO CHANGE FREQUENCY; CHANGE ANTENNA AND
CHANGE TPO. FILE NUMBER BPH-9901 ASSIGNED.

Handling of inquiries and correspondence will be expedited if reference is
made to the file number(s) specified above. The application(s) will be
considered by the Commission and you will be advised of the action taken.
KPET RADIO, INC.

CONSULTING RADIO ENGINEER

ARLINGTON, TEXAS
### FM Broadcast Engineering Data

**Name of applicant:** KPET RADIO, INC.

#### 1. Purpose of authorization applied for:

(Indicate by check mark)

- [X] Construct a new station
- [ ] Change effective radiated power or antenna height above average terrain
- [ ] Change transmitter location
- [ ] Change frequency
- [X] Change antenna system
- [ ] Install auxiliary or alternate main transmitter
- [ ] Other changes (specify)
- [ ] Change studio location

If this is not for a new station, summarize briefly the nature of the changes proposed.

12. Will the studios, microphones, and other equipment proposed for transmission of programs be designed for compliance with the FM Technical Standards?  
Yes [x] No [ ]

13. If this application is for modification of construction permit state briefly as Exhibit No. the present status of construction and indicate when it is expected that construction will be completed.

14. Attach as Exhibit No. map(s) (Sectional Aeronautical Charts where obtainable) of the area proposed to be served and shown thereon:

(a) Proposed transmitter location and the radii along which the profile graphs have been prepared
(b) The 3.10 .v/m and the 1 mv/m contours predicted
(c) On the map(s) showing the 3.10 v/m contour, clearly indicate the legal boundaries of the principal community proposed to be served. Submit a statement identifying the source relied upon for the placement of the boundaries
(d) Scale of miles

15. (a) Attach as Exhibit No ON FILE map(s) (topographic where obtainable, such as U. S. Geological Survey quadrangles) for the area within 15 miles of the proposed transmitter location and shown thereon the following data:

1. Proposed transmitter location—accurately plotted.
2. Transmitter location and call letters of all radio stations (except amateur) and the location of established commercial and government receiving stations within 2 miles of the proposed transmitter location.
3. Proposed location of mail studio;
4. Character of the area within 2 miles of proposed transmitter location, suitably designated as to residential, business, industrial, and rural nature;
5. At least eight radials each extending to a distance of ten or more miles from the proposed transmitter location, one or more of which must extend through the principal city or cities to be served.
6. If the proposed transmitter location is outside the boundaries of the principal community proposed to be served, the topography of the intervening area must be clearly shown.

ON FILE

b. Attach as Exhibit No. profile graphs for the radials in (a)(5) above. Each graph shall show the elevation of the antenna radiation center, identify each graph by its bearing from the proposed transmitter location. Direction true north shall be zero azimuth and angles measure clockwise. Show source of topographic data on each.

16. From the profile graphs in 15(b), for the eight mile distance between two and ten miles from the proposed transmitter location, and in accordance with the procedure prescribed in Section 73.313 of the Commission Rules, supply the following tabulation of data:

<table>
<thead>
<tr>
<th>Radial bearing (degrees true)</th>
<th>Average elevation of radial (2-10 mi.) in feet above mean sea level</th>
<th>Height in feet of antenna radiation center above average elevation of radial (2-10 mi.)</th>

THAT he is a consulting radio engineer with office at Arlington, Texas; that he graduated from Texas A. & M. College in 1933 with a B. S. Degree in Electrical Engineering; that he was a radio engineer-operator with the Second Byrd Antarctic Expedition to Little America from 1933 to 1935; that he was a member of the General Engineering Department of the Columbia Broadcasting System in New York, N. Y. from 1935 to 1945, and during his employment at CBS he specialized in radio-frequency measurements, field intensity surveys and measurements, the design of directional antennas, r-f equipment, etc., and at various periods with CBS he held the positions of Engineer, Radio-Frequency Division, Chief Latin American Engineer, Engineer-in-Charge International Broadcasting, and Acting Engineer-in-Charge, Radio Frequency Division; that he has been in business for himself and has been active as a consulting radio engineer and maintained an office as such from 1945 to date; that he is registered as a professional engineer by the State of Texas, Serial No. 6218, and is entitled to practice as such; and that he has qualified as an expert engineer at hearings before the Federal Communications Commission and has presented testimony at such hearings on several occasions.

THAT this engineering exhibit was prepared by him personally or under his direct supervision and is true of his own knowledge except as to such statements as are herein stated on information and belief, and as to such statements, he believes them to be true.

By C. Hutcherson
Affiant

Subscribed and sworn to before me this 14th day of May, 1976

NOTARY PUBLIC
My commission expires June 1, 1977
INTRODUCTION:

The applicant, KPET RADIO, INC., requests permission to amend its application for a new FM broadcast station in Lamesa, Texas by changing the proposed channel and type antenna.

FM CHANNEL:

The new channel requested is no. 284C, 104.7 mHz, which is allocated to Lamesa in the FCC Table of Assignments, Section 73.202 (b) of the rules.

SITE LOCATION:

No change is proposed for the transmitting and studio site as described in the original application.

PROPOSED EQUIPMENT:

The proposed antenna would be changed to a Phelps Dodge type CFM-HP-10, circularly polarized 10-Bay and supported by the KPET AM existing tower. The height of the radiation center of the FM antenna would remain the same, namely 3170 feet above mean sea level.

The transmission line would consist of 410 feet of Andrew Corp. type HJ8-50B, 3-inch diameter copper coaxial heliax.

The effective radiated power would be 100 kw for the horizontal and 100 kw for the vertical polarization, which figures are based upon a transmitter...
output power of 21.0 kw; a transmission line loss of 2.82 kw; and an antenna power gain of 5.5 for each mode.

**FIG. 6A** is a drawing of the vertical plan sketch of the antenna.

**PROPOSED SERVICE AREA:**

No change is proposed for this data and maps as shown in the original application.

**ALLOCATION STUDY:**

Channel 284 at the proposed site in Lamesa would not be short-spaced with any station as shown by the table below.

11. Proposed operation

Transmitter power output in kilowatts | Power dissipation within transmission line in kilowatts |
--------------------------------------|----------------------------------------------------------|
17.37                                 | 2.22                                                     |

Antenna input power in kilowatts | Effective radiated power in kilowatts (Must be same as shown in Para. 2) |
---------------------------------|--------------------------------------------------------------------------|
15.15                            | Horizontal: 100, Vertical: 100                                         |

12. Will the studios, microphones, and other equipment proposed for transmission of programs be designed for compliance with the FM Technical Standards?  Yes [X] No [ ]

13. If this application is for modification of construction permit state briefly as Exhibit No. the present status of construction and indicate when it is expected that construction will be completed.

14. Attach an Exhibit No. E1 map(s) (Sectional Aeronautical Charts where obtainable) of the area proposed to be served and shown drawn thereon:
   a. Proposed transmitter location and the radials along which the profile graphs have been prepared.
   b. The 3.16 v/m and the 1 mv/m contours predicted.
   c. On the map(s) showing the 3.16 v/m contour, clearly indicate the legal boundaries of the principal community proposed to be served. Submit a statement identifying the source relied upon for the placement of the boundaries.
   d. Scale of miles.

Areas and population: (latest census) 1970

<table>
<thead>
<tr>
<th>Area (sq. mi.) within 1 mv/m contour</th>

</tr>
</tbody>
</table>

15. a. Attach an Exhibit No. E1 a map(s) (topographic where obtainable, such as U. S. Geological Survey quadrangles) for the area within 15 miles of the proposed transmitter location and shown drawn thereon the following data:
   1. Proposed transmitter location - accurately plotted;
   2. Transmitter location and cell letters of all radio stations (except amateur) and the location of established commercial and government receiving stations within 2 miles of the proposed transmitter location;
   3. Proposed location of mail studio;
   4. Character of the area within 2 miles of proposed transmitter location, suitably designated as residential, business, industrial, and rural nature;
   5. At least eight radials extending to a distance of ten or more miles from the proposed transmitter location, or more of which must extend through the principal city or cities to be served.
   6. If the proposed transmitter location is outside the boundaries of the principal community proposed to be served, the topography of the intervening area must be clearly shown.

b. Attach as Exhibit No. E1 profile graphs for the radials in (a) above. Each graph shall show the elevation of the antenna radiation center, Identify each graph by its bearing from the proposed transmitter location. Direction true north shall be zero azimuth and angles measure clockwise. Show source of topographical data on each.

16. From the profile graphs in 15(b), for the eight mile distance between two and ten miles from the proposed transmitter location, and in accordance with the procedure prescribed in Section 73.113 of the Commission Rules, supply the following tabulation of data:

<table>
<thead>
<tr>
<th>Radial bearing (degrees true)</th>
<th>Average elevation of radial (2-10 mi.) in feet above mean sea level</th>
<th>Height in feet of antenna radiation center above average elevation of radial (2-10 mi.)</th>

NOTARY PUBLIC

My commission expires June 1, 1977
KPET RADIO, INC.

PROPOSED NEW FM BROADCAST STATION AT

LAMESA, TEXAS

INTRODUCTION:

The applicant, KPET RADIO, INC., licensee of radio station KPET, Lamesa, Texas, 690 kc, 0.25 kw U, requests permission to construct a new FM broadcast station in Lamesa, Texas.

FM CHANNEL:

The FM channel requested is no. 262C, 100.3 mHz, which is allocated to Lamesa in the FCC Table of Assignments, Section 73.202(b) of the rules.

PROPOSED SITE LOCATION:

The proposed FM transmitting and studio site would be the same as that of AM station KPET, Lamesa, Texas. The geographic coordinates are: Longitude 32° 42' 27" north, & longitude 101° 56' 11" west.

FIG. 1 is a map showing: (1) the proposed FM site and the existing KPET site; (2) the character of the area; (3) the location of other stations in the area; & (4) the two-mile radius.

FIG. 2 is an aerial photograph of the site.
PROPOSED EQUIPMENT:

The proposed FM transmitter would be an A E L type FM-25KE which is rated at 25 kw output power.

The modulation monitor would be a Belar type FMM-1 along with Belar type FMS-1 stereo monitor.

The transmission line would consist of 400 feet of Andrew Corp. type HJ8-50B, 3-inch diameter copper coaxial heliax.

The proposed FM antenna would be a 12-bay Phelps Dodge type CFM-HP-12 circularly polarized and supported by the KPET AM existing tower. The height of the radiation center of the FM antenna would be 3170 feet above mean sea level.

The effective radiated power would be 100 kw for the horizontal and 100 kw for the vertical polarization, which figures are based upon a transmitter output power of 17.37 kw; a transmission line loss of 2.22 kw; and an antenna power gain of 6.6 for each mode.
PROPOSED SERVICE AREA:

Eight radials were drawn in various directions from the proposed site as indicated on the elevation map of FIG. 3. The elevations out to 10 miles along these radials were plotted against distance as shown by the Profile Graphs of FIG. 4. The average elevation of the eight-mile sector between 2 and 10 miles from the antenna was determined from the profile graph for each radial. This was obtained by averaging a number of equally spaced points on the curve. The distance to the desired contour was then determined from propagation curves of the FCC FM Standards, Fig. 1 (Replacement) of Section 73.333, a tabulation of which is contained in FCC Form No. 301, Section V-B, paragraph 17 of this application.

From these data, FIG. 5 was prepared which shows the proposed city grade (70 dbu) 3.16 mv/m contour, and the 60 dbu (1 mv/m) contour drawn on a suitably scaled map.

FIG. 6 is a drawing showing the vertical plan sketch of the antenna.
ALLOCATION STUDY:

Channel #262 at the proposed site in Lamesa would not be short-spaced with any station as shown by the Table below:

Federal Communications Commission
Washington, D. C. 20554

Gentlemen:

Enclosed are 3 copies of FCC Form 301, Application for Authority to Construct a New FM Broadcast station, complete with exhibits, and executed as required.

There is also a check for $400.00 which is the filing fee for this application.

The application proposed to build a Class C FM station in Lamesa, Texas, on Channel 252.

We believe we have answered all questions relating to this matter, and we will be ready to send supplemental information if required.

We believe it is in the public interest to operate the proposed FM station in Lamesa, Texas and will appreciate your processing the application at the earliest time.

Thank you,

Sincerely,

[Signature]

Calen O. Albert
President
WGT Radio, Inc.

Section I UNITED STATES OF AMERICA
FEDERAL COMMUNICATIONS COMMISSION

Application for Authority to Construct a New Broadcast Station or Make Changes in an Existing Broadcast Station

INSTRUCTIONS

This form is to be used in applying for authority to construct a new standard, commercial FM, or television broadcast station, or to make changes in existing broadcast stations. This form consists of this part, Section I, and the following sections:

Section II, Legal Qualifications of Broadcast Applicant
Section III, Financial Qualifications of Broadcast Applicant
Section IV-A, Statement of Program Service of Broadcast Applicant (AM-FM)
Section IV-B, Statement of Program Service of Broadcast Applicant (TV)
Section V-A, Standard Broadcast Engineering Data
Section V-B, FM Broadcast Engineering Data
Section V-C, Television Broadcast Engineering Data
Section V-G, Antenna and Site Information
Section VI, Equal Employment Opportunity Program

B. Prepare three copies of this form and all exhibits. Sign one copy of Sections I, IV-A, and IV-B. Prepare one additional copy (a total of four) of Section V-G and associated exhibits, and one additional copy (a total of four) of Section V-C and associated exhibits. File all the above with Federal Communications Commission, Washington, D.C. 20554. A SEPARATE AND COMPLETE APPLICATION (including all exhibits) MUST BE FILED FOR EACH AM STATION, EACH FM STATION, AND EACH TV STATION.

C. Number exhibits serially in the space provided in the body of the form and list each exhibit in the space provided on page 2 of this form. Show date of preparation of each exhibit, antenna pattern, and map, and show date when each photograph was taken.

D. The name of the applicant stated in Section I hereof shall be the exact corporate name, if a corporation; or the individual name, if a partnership, of the names of all partners and the name under which the partnership does business; if an unincorporated association, the name of the individual, officer, and the name of the association. In other Sections of the form the name alone will be sufficient for identification of the applicant.

E. Information called for by this application which is already on file with the Commission (except that called for in Section III which is over 90 days old and in Section V-G) need not be refiled in this application provided (1) the information is now on file in another application or FCC Form filed by or on behalf of this applicant; (2) the information is identified FULLY by reference to the file number (if any) the FCC form number, and the filing date of the application or other form containing the information and the page or paragraph referred to, and (3) after making the reference, the applicant states: "No change since date of filing." Any such reference will be considered to incorporate into this application all information, confidential or otherwise, contained in the application or other form referred to. The incorporated application or other form will thereafter, in its entirety, be open to the public. (See Section 1.526 of the Commission's Rules and Regulations, "Records to be maintained locally for public inspection by applicants, permittees, and licensees.")

F. This application shall be personally signed by the applicant, the individual, or the corporation, by a member information called for by this application which is already on file with the Commission (except that called for in Section III which is over 90 days old and in Section V-G) need not be refiled in this application provided (1) the information is now on file in another application or FCC Form filed by or on behalf of this applicant; (2) the information is identified FULLY by reference to the file number (if any) the FCC form number, and the filing date of the application or other form containing the information and the page or paragraph referred to, and (3) after making the reference, the applicant states: "No change since date of filing." Any such reference will be considered to incorporate into this application all information, confidential or otherwise, contained in the application or other form referred to. The incorporated application or other form will thereafter, in its entirety, be open to the public. (See Section 1.526 of the Commission's Rules and Regulations, "Records to be maintained locally for public inspection by applicants, permittees, and licensees.")

G. Before filing out this application, the applicant should familiarize himself with the Communications Act of 1934, as amended, Parts 1, 2, 73 and 79 of the Commission's Rules and Regulations.

H. BE SURE ALL NECESSARY INFORMATION IS FURNISHED AND ALL PARAGRAPHS ARE FULLY ANSWERED. IF ANY PORTIONS OF THE APPLICATION ARE NOT APPLICABLE, SPECIFICALLY SO STATE. DEFECTIVE OR INCOMPLETE APPLICATIONS MAY BE RETURNED WITHOUT CONSIDERATION.

FOR COMMISSION USE ONLY

74 CHANGES APPROVED BY GAO: B-180227/H002751
THE APPLICANT hereby waives any claim to the use of any particular frequency or of the ether as against the regulatory power of the United States because of the previous use of the same, whether by license or otherwise, and requests an authorization in accordance with this application. (See Section 304 of the Communications Act of 1934).

THE APPLICANT represents that this application is not filed for the purpose of impeding, obstructing, or delaying determination on any other application with which it may be in conflict.

THE APPLICANT acknowledges that all the statements made in this application and attached exhibits are considered material representations, and that all the exhibits are a material part hereof and are incorporated herein as if set out in full in the application.

CERTIFICATION

I certify that the statements in this application are true, complete, and correct to the best of my knowledge and belief, and are made in good faith.

Signed and dated this 2nd day of March 1976.

(This Section should not be signed and dated until all the following Sections and Exhibits have been prepared and attached.)

INCLUDE FILING FEE WITH THIS APPLICATION. SEE PART 1 OF FCC RULES FOR AMOUNT OF FEE.

WILLFUL FALSE STATEMENTS MADE ON THIS FORM ARE PUNISHABLE BY FINE AND IMPRISONMENT. U. S. CODE, TITLE 18, SECTION 1001.

If applicant is represented by legal or engineering counsel, state name and post office address:

As used in paragraphs 6 to 8 and 18 to 20, both inclusive, of Section II of this form, the words "party to this application" have the following meanings, respectively: In case of an individual applicant, the applicant. In case of a partnership applicant, all partners, including limited and silent partners. In case of a corporate applicant, all officers, directors, stockholders of record, persons owning the beneficial interest in any stock, subscribers to any stock, and persons who voted any of the voting stock at the last stockholders meeting. In case of any other applicant, all executive officers, members of the governing board, and owners or subscribers to any membership or ownership interest in the applicant. (Note: If the applicant considers that it would be an unreasonable burden, it may request the Commission for a waiver of the strict terms of this requirement).

1. Applicant is (Check one): An individual [], a general partnership [], a limited partnership [], a corporation [], an unincorporated association []

2. If applicant is not an individual, give the State, District, Territory or Possession under the laws of which it is organized.

3. Submit as Exhibit No. [ ] three copies (ONE COPY CERTIFIED) of each of the Articles and By Laws, if applicant is a corporation or incorporated association, or three copies (ONE COPY SIGNED) of the partnership agreement, if applicant is a partnership. (ARTICLES MUST BE CERTIFIED BY SECRETARY OF STATE OR OTHER PROPERLY DESIGNATED STATE OFFICIAL AND BY LAWS MUST BE CERTIFIED BY APPROPRIATE OFFICIAL OF THE COMPANY)

4. If applicant is a corporation or an unincorporated association, indicate specifically by reference to page and paragraph of the articles of incorporation or of association, the charter powers relied upon by the applicant to show that it is legally empowered to construct and operate the proposed station. If the articles of incorporation do not specifically authorize kind of business sought to be entered into, attach a statement from Secretary of State or other officer interpreting the language relied upon.

ARTICLES OF INCORPORATION, PAGE 1, Article III, Para. (a)

CITIZENSHIP AND OTHER STATUTORY REQUIREMENTS (See instructions above)

6. If applicant is an individual, is the applicant a citizen of the United States? or, if applicant is not an individual, are all parties to this application citizens of the United States? Yes [ ] No [ ]

If the answer is "No", state the name and citizenship of each person who is not a citizen of the United States.

7. (a) Is applicant or any party to this application a representative of an alien or of a foreign government? Yes [ ] No [ ]

(b) If applicant is a corporation, is more than 20 percent of the capital stock owned by aliens or their representatives, or by a foreign government or a representative thereof, or by any corporation organized under the laws of a foreign country? Yes [ ] No [ ]

(c) If applicant is a corporation and is controlled by another corporation or corporations, is more than 25 percent of the capital stock of such controlling corporation or corporations owned by aliens or their representatives, or by any corporation organized under the laws of a foreign country? Yes [ ] No [ ]

(d) If the answer to any of the foregoing parts of this paragraph is "Yes", submit as Exhibit No. a full disclosure concerning the persons and matters involved.

8. (a) Has applicant or any party to this application had a station license revoked by order or decree of any Federal court? Yes [ ] No [ ]

(b) Has the applicant or any party to this application been found guilty by a Federal court of the violation of the laws of the United States relating to unlawful restraints and monopolies and to combinations, contracts, or agreements in restraint of trade? Yes [ ] No [ ]

(c) Has the applicant or any party to this application been finally adjudged guilty by a Federal court of unlawfully monopolizing or attempting unlawfully to monopolize radio communications, directly or indirectly, through the control of the manufacture or sale of radio apparatus, through exclusive traffic arrangements, or by any other means, or to have been using unfair methods of competition? (See Section 313 of the Communications Act of 1934) Yes [ ] No [ ]

(d) Has the applicant or any party to this application been found guilty by any court of (1) any felony, (2) any crime not a felony, involving moral turpitude, (3) the violation of any State, territorial or local law relating to unlawful lotteries, restraints and monopolies and combinations, contracts or agreements in restraint of trade, or (4) using unfair methods of competition? Yes [ ] No [ ]

(e) Is there now pending in any court or administrative body against the applicant or any party to this application any action involving any of the matters referred to in Paragraphs 8a, b, c, and d above? Yes [ ] No [ ]

(f) Have voluntary proceedings in bankruptcy been instituted by, or have involuntary proceedings in bankruptcy ever been brought against applicant or any party to this application? Yes [ ] No [ ]

(g) Are there outstanding any unsatisfied judgments or decrees against applicant or any party to this application? Yes [ ] No [ ]

(b) If the answer to any of the foregoing parts of this paragraph is "Yes", submit as Exhibit No. a full disclosure concerning the persons and matters involved, identifying the court and the proceeding (by dates and file numbers), stating the facts upon which the proceeding was based or the nature of the offense committed, and the disposition of the matter.
11. At the last meeting of stockholders were any shares of stock voted by proxy? Yes [ ] No [X]

If so, state

<table>
<thead>
<tr>
<th>Class of stock</th>
<th>No. of shares</th>
<th>Meeting date</th>
<th>No. voted by stockholders in person</th>
<th>No. voted by proxy</th>
<th>Name of each proxy voting 1 percent or more of each class</th>
</tr>
</thead>
</table>

12. In connection with the stockholders and stock subscribers named in Table 1 to this form, is the beneficial owner of the stock a person other than the owner of record or subscriber? Yes [ ] No [X]

If so, submit as Exhibit No. a statement of (a) the name of the owner of record, or subscriber, (b) the name of the beneficial owner, (c) the conditions under which the owner or subscriber holds any votes or has subscribed for such stock, and (d) a copy of any contract or other instrument relating to such conditions.

13. Has applicant any other obligations or securities authorized or outstanding which bear voting rights either absolutely or upon any contingency? Yes [ ] No [X]

If so, submit as Exhibit No. a statement of (a) the nature of such securities, (b) the face value or par value, (c) the number of units authorized, (d) the number of units issued and outstanding, (e) the number of units, if any, proposed to be issued, (f) the conditions or contingency upon which such securities may be voted, and (g) facts showing whether or not such securities have been voted or entitled to be voted in the past 5 years and at the present time.

14. a. Is applicant corporation, directly or indirectly, controlled by another corporation or legal entity? Yes [X] No [ ]

b. Is 10 percent or more of the stock of applicant corporation owned by another corporation or legal entity? Yes [X] No [ ]

c. If the answer to any of the foregoing parts of this paragraph is "Yes", state below the name of such other corporation or legal entity, and submit as Exhibit No. 2 a statement of how such control, if any, exists and the extent thereof, and (b) with respect to such other corporation or legal entity, a statement answering paragraphs 10 to 14, inclusive and the information requested in Tables I and II of this section.

15. Is the corporation or legal entity named in paragraph 14 in turn a subsidiary? Yes [ ] No [X]

If so, state below the name of such other parent corporation or legal entity, and submit as Exhibit No. a statement for such each corporation or legal entity answering paragraphs 10 to 14 and the information requested in tables I and II of this section, to and including the organization having final control.

UNINCORPORATED ASSOCIATION (OR OTHER LEGAL ENTITY)

INSTRUCTION: If applicant is an unincorporated association or a legal entity other than an individual, partnership or corporation, answer paragraphs 16 and 17.

16. State the nature of the applicant, cite the laws under which organized, and submit as Exhibit No. a copy of such laws.

DOES NOT APPLY — APPLICANT IS A CORPORATION

17. State the total number of members or persons holding any ownership interest in the applicant.

(*) Application requesting permission to assign license of KOKN, Pawhuska, Okla., from Cherokee Broadcasting Co. to Coleman Broadcasting Co. tendered for filing with FCC on Dec.11, 1975 (BAL 8579)
## OTHER BROADCAST INTERESTS (See instructions on page 1)

18. Does applicant or any party to this application have now, or has applicant or any such party had, any interest in, or connection with, the following:

(a) Any standard, FM, or television broadcast station? 
(b) Any application pending before the Commission? 
(c) Any application which has been denied by the Federal Communications Commission? 
(d) Any broadcast station the license of which has been revoked?

If the answer to any of the foregoing parts of this paragraph is "Yes", show particulars in the table below.

<table>
<thead>
<tr>
<th>(1) Name of party having such interest</th>
<th>(2) Nature of interest or connection (giving dates)</th>
<th>(3) Call letters of station or file number of application</th>
<th>(4) Location</th>
</tr>
</thead>
</table>

**SEE EXHIBIT NUMBER 3**

19. Is the applicant or any party to this application controlled, directly or indirectly, by any person who has any interest in or connection with any broadcast station or application of the type referred to in Paragraphs 18(a) to (d)? If so, submit as Exhibit No. giving full particulars.

20. (a) Are any of the parties to this application related to each other (as husband, wife, father, mother, brother, sister, son or daughter)?
(b) Does any member of the immediate family (i.e., husband, wife, father, mother, brother, sister, son or daughter) of any party to this application have any interest in or connection with any other broadcast station or pending application?
(c) If answer is "Yes" to either (a) or (b) above, state (a) names of the persons, (b) relationship, (c) nature and extent of such interest or connection, (d) name of applicant or call letters of station, (e) file number of application, and (f) location of station or proposed station involved.

**SEE EXHIBIT NUMBER 5**

## OWNERSHIP AND CONTROL OF STATION

21. The Commission is seeking in this paragraph information as to contracts and arrangements now in existence, as well as any arrangements or negotiations, written or oral, which relate to the present or future ownership, control or operation of the station; the questions must be answered in light of this instruction.

(a) Applicant's control over the station is to be by reason of: (Indicate by check mark)

<table>
<thead>
<tr>
<th>Ownership</th>
<th>Lease</th>
<th>Other authority</th>
</tr>
</thead>
<tbody>
<tr>
<td>✓</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

(b) Name and address of the owner of the station (if other than the applicant)

**APPLICANT IS OWNER**

(c) Will the applicant have and maintain absolute control of the station, its equipment and operation, including complete supervision of the programs to be broadcast? If "No," explain.

<table>
<thead>
<tr>
<th>Yes</th>
<th>No</th>
</tr>
</thead>
<tbody>
<tr>
<td>✓</td>
<td></td>
</tr>
</tbody>
</table>

(d) Are there any documents, instruments, contracts or understandings relating to ownership, management, use or control of the station or facilities, or any right or interest therein?

If so, attach as Exhibit No. copies of all such documents, instruments or contracts and state the substance of oral contracts or understandings.

<table>
<thead>
<tr>
<th>Yes</th>
<th>No</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>✓</td>
</tr>
</tbody>
</table>
The Commission is seeking in the questions that follow information as to contracts and arrangements now in existence, as well as any arrangements or negotiations, written or oral, which relate to the present or future financing of the station; the questions must be answered in the light of this instruction.

IF CONTEMPLATED EXPENDITURES ARE LESS THAN $5,000 COMPLETE PARAGRAPH 1 OF SECTION III ONLY.

1. a. Give estimated initial costs of making installation for which application is made. If performed under a contract for the completed work, the facts as to such contract must be stated in lieu of estimates as to the several items. In any event, the cost shown must be the costs in place and ready for service, including the amounts for labor, supervision, materials, supplies and freight. Cost items such as professional fees, mobile and STL equipment, non-technical studio furnishings, etc., should be included under "Other Items" below, and itemized.

Funds, Property, etc., to be Furnished by Parties Connected with Applicant or by Others

Submit as Exhibit No. 9 a statement setting forth the full name and address of each person (whether or not connected with applicant, but including partners, shareholders, or subscribers to capital stock of the applicant) who has furnished or will furnish funds, property, service, credit, loans, donations, assurances, or other things of value, or will assist in any other manner in financing station. For each person (other than financial institutions or equipment manufacturers) who has furnished or will furnish one percent or more of the total of things of value, excluding loans from financial institutions and equipment credit, supply the additional information requested in a to d below. For financial institutions or equipment manufacturers, supply the additional information requested in e below. (**Furnish** or **furnished** as herein used includes payments for capital stock or other securities, loans and other credits, gifts and any other contributions.)

a. For each person who has agreed to furnish funds, purchase stock, extend credit, or guarantee loans, submit a copy of the agreement by which each person is so obligated, showing the amount, rate of interest, terms of repayment, and security, if any. If no security is required, so state.

b. For each person (except financial institutions) who has agreed to furnish funds or purchase stock, but who has not already done so, submit a balance sheet or, in lieu thereof, a financial statement showing all liabilities and containing current and liquid assets sufficient in amount to meet current liabilities (including amounts payable during the next year on long term liabilities) and, in addition, to indicate financial ability to comply with the terms of the agreement. The balance sheets submitted should segregate receivables and payables to show the amounts due within one year and those due after one year. The term and liquid assets refers to items such as cash, or loan value of insurance, government bonds and publicly traded securities (provided, however, that such securities must be identified by the market or exchange on which traded, at their current market value), or other assets which may be readily used or converted to provide funds to meet the proposed commitments. Current assets such as accounts receivable which result from normal operation of a business, inventory, etc., are not considered as a readily available source of funds without a specific showing that such assets can be relied upon to provide funds to meet proposed commitments. However, if accounts receivable have been "aged" and certified collectible within 90 days by a professional accountant, three-fourths (3/4) of such accounts receivable will be treated as "liquid." If a balance sheet or a financial statement does not clearly indicate liquid and current assets sufficient in amount to meet current liabilities and in addition, sufficient liquid assets to meet the proposed commitments, it should be supplemented by a statement showing the manner in which non-liquid assets will provide such funds. When the applicant relies upon "non-liquid assets," a statement must be submitted showing the extent to which such assets have liens or prior obligations against them.

All balance sheets, or financial statements submitted in accordance with this section must be dated. In any event, a mere statement of total assets and total liabilities, or a statement of net worth, is not acceptable under the terms of this section.

c. Net income after Federal income tax, received for the past two years by each person who will furnish funds, property, service, credit, loans, donations, assurances, or other things of value. (A statement that income tax for the required periods was in excess of a certain specified amount will be sufficient.)

d. If applicant or any person named in the exhibit has pledged, hypothecated or otherwise encumbered any stocks or other securities for the purpose of providing applicant with funds for construction of the station herein requested, submit a statement explaining each such transaction.

e. For financial institutions or equipment manufacturers who have agreed to make a loan or extend credit, submit a copy of the document by which the institution or manufacturer has indicated its willingness to provide such loan or credit, showing the amount of loan or credit, terms of payment or repayment of loan, collateral or security required, and rate of interest to be charged. If there are any special requirements such as a moratorium on principal or interest, or a waiver of collateral, etc., it must be shown on the document of credit. In the event such document requires special endorsements or guarantees, a statement from the party or parties required to provide such endorsement or guarantee must be submitted with the document as supporting evidence of their willingness to so provide.
Call letters of station

FM Application

City and state which station is licensed to serve

IAMESA, TEXAS

PART I

Ascertained of Community Needs

1. State in Exhibit No. the methods used by the applicant to ascertain the needs and interests of the public served by the station. Such information shall include (1) identification of representative groups, interests and organizations which were consulted and (2) the major communities or areas which applicant principally undertakes to serve.

2. Describe in Exhibit No. the significant needs and interests of the public which the applicant believes his station will serve during the coming license period, including those with respect to national and international matters.

3. List in Exhibit No. typical and illustrative programs or program series (excluding Entertainment and News) that applicant plans to broadcast during the coming license period to meet those needs and interests.

NOTE: Sufficient records shall be kept on file at the station, open for inspection by the Commission, for a period of 3 years from the date of filing of this statement (unless requested to be kept longer by the Commission) to support the representations required in answer to Question 1. These records should not be submitted with this application and need not be available for public inspection.

PART II

Past Programming

2. A. State the total hours of operation during the composite week:

B. Attach as Exhibit No. one exact copy of the program logs for the composite week used as a basis for responding to questions herein. Applicants utilizing automatic program logging devices must comply with the provisions of Sections 73.112(c) and 73.282(c). Automatic recordings will be returned to the applicant. Exact copies will not be returned. If applicant has not operated during all of the days of the composite week which would be applicable to the use of this form, applicant should so notify the Commission and request the designation of substitute day or days as required.

3. A. State the amount of time (rounded to the nearest minute) the applicant devoted in the composite week to the program types (see Definitions) listed below. Commercial matter within a program segment shall be excluded in computing time devoted to that particular program segment (e.g., a 15-minute news program containing 3 minutes' commercial matter shall be counted as a 12-minute news program).

<table>
<thead>
<tr>
<th>Hours</th>
<th>Minutes</th>
<th>% of Total Time on Air</th>

</tr>
<tr>
<td>(2) Public Affairs</td>
<td></td>
<td></td>
</tr>
<tr>
<td>(3) All other programs, exclusive of Entertainment and Sports</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

B. If in the applicant's judgment the composite week does not adequately represent the station's past programming, applicant may in addition provide in Exhibit No. the same information as required in 3-A above (using the same format) for a calendar month or longer during the year preceding the filing of this application. Applicant shall identify the time period used. Applicant need not file the program logs used in responding to this question unless requested by the Commission.

4. List in Exhibit No. typical and illustrative programs or program series (excluding Entertainment and News) broadcast during the year preceding the filing of this application which have served public needs and interests in applicant's judgment. Denote, by underlining the Title, those programs, if any, designed to inform the public on local, national or international problems of greatest public importance in the community served by the applicant. Use the format below.

Title Source* Type* Brief Description Time Broadcast & Duration How Often Broadcast

5. Submit in Exhibit No. the following information concerning the applicant's news programs:

A. The staff, news gathering facilities, news services and other sources utilized, and

B. An estimate of the percentage of news program time devoted to local and regional news during the composite week.

6. In connection with the applicant's public affairs programming, describe its policy during the past renewal period with respect to making time available for the discussion of public issues and the method of selecting subjects and participants.

*See Definitions Section IV-A, Page 7
7. Describe briefly the applicant's program format(s) during the past 12 months (e.g., country and western music, folk music, classical music, foreign language, jazz, standard pop songs, etc.) and the approximate percentage of time per week devoted to such format(s).

8. State how and to what extent (if any) applicant's station contributed during the past license period to the over-all diversity of program services available in the area or communities served.

9. Was the applicant affiliated with one or more national, regional or special radio networks during the past license period?
   Yes_____ No______. If "yes," give name(s) of network(s):

10. State the number of public service announcements broadcast by the applicant during the composite week:

11. A. If this application is for an FM station, did the programming duplicate that of any AM station?
    Yes____ No______.("Duplicate" means simultaneous broadcasting of a particular program over both the AM and FM stations or the broadcast of a particular FM program within 24 hours before or after the identical program is broadcast over the AM station—Section 73.242(a) of the Rules and Regulations.)
    B. If the answer is "yes," identify the AM station by call letters; describe its relation to the FM station; and state the number of hours each day in the composite week that were duplicated.

12. A. In applicant's judgment, does the information supplied in this Part II adequately reflect its past programming?
    Yes_____ No______.  
    B. If "no," applicant may attach as Exhibit No.____ such additional information as may be necessary to describe accurately and present fairly its program service.
    C. If applicant's programming practices for the period covered by this statement varied substantially from the programming representations made in applicant's last renewal application, the applicant shall submit as Exhibit No.____ a statement explaining the variations and the reasons therefor.

PART III

Proposed Programming

13. State the proposed total hours of operation during a typical week: 124

14. State the minimum amount of time the applicant proposes to devote normally each week to the program types (see Definitions) listed below. Commercial matter within a program segment shall be excluded in computing time devoted to that particular program segment (e.g., a fifteen-minute news program containing 3 minutes' commercial matter shall be computed as a 12-minute news program.)

<table>

15. Submit in Exhibit No.____ the following information concerning the applicant's proposed news programs:
   A. The staff, news gathering facilities, news services and other sources to be utilized; and
   B. An estimate of the percentage of news program time to be devoted to local and regional news during a typical week.
16. In connection with the applicant’s proposed public affairs programming describe its policy with respect to making time available for the discussion of public issues and the method of selecting subjects and participants.

SEE EXHIBIT NUMBER 14

17. Describe the applicant’s proposed programming format(s), e.g., country and western music, talk, folk music, classical music, foreign language, jazz, standard pops, etc., and the approximate percentage of time per week to be devoted to such format(s).

SEE EXHIBIT NUMBER 15

18. State how and to what extent (if any) applicant proposes to contribute to the over-all diversity of program services available in the area or communities to be served.

SEE EXHIBIT NUMBER 16

19. State the minimum number of public service announcements applicant proposes to present during a typical week: 56

20. Will the applicant be affiliated with one or more national, regional, or special radio networks? Yes X No.

If "yes," give name(s) of network(s): TEXAS STATE NETWORK

21. A. If this application is for an FM station will the programming duplicate that of any AM station? Yes X No.

("Duplicate" means simultaneous broadcasting of a particular program over both AM and FM stations or the broadcast of a particular FM program within 24 hours before or after the identical program is broadcast over the AM station—Section 73.242(a) of the Rules and Regulations.)

B. If the answer is "yes," identify the AM station by call letters; describe its relation to the FM station; and state the number of hours each day proposed to be duplicated.

KPET AM, Lamesa, Texas, licensed to the Applicant
Duplication will be limited to News, Public Affairs, and other local and area programs.
Average daily duplication estimated to total: 2½ hours

PART IV
Past Commercial Practices

22. Give the following information with respect to the composite week:

A. Total broadcast time

B. Time devoted to commercial matter:

1. Amount in hours and minutes

2. Percentage
23. State the number of 60-minute segments of the composite week (beginning with the first full clock hour, and ending with the last clock hour of each broadcast day) containing the following amounts of commercial matter:

A. Up to and including 10 minutes
B. Over 10 and up to and including 14 minutes
C. Over 14 and up to and including 18 minutes
D. Over 18 minutes

List each segment in category (D) above, specifying the amount of commercial time in the segment, and the day and time broadcast.

24. A. In the applicant's judgment, does the information supplied in this Part IV for the composite week adequately reflect its commercial practices? Yes  No  
B. If "no," applicant may attach as Exhibit No. ______ such additional material as may be necessary to describe adequately and present fairly its commercial practices. 
C. If applicant's commercial practices for the period covered by this statement varied substantially from the commercial representations made in applicant's last renewal application, the applicant shall submit as Exhibit No. ______ a statement explaining the variations and the reasons therefor.

PART V
Proposed Commercial Practices

25. State the maximum percentage of commercial matter which the applicant proposes normally to allow during the following segments of a typical week:

<table>
<thead>
<tr>
<th>Segment</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>6 a.m. - 6 p.m.</td>
<td>30%</td>
</tr>
<tr>
<td>All hours</td>
<td>30%</td>
</tr>
</tbody>
</table>

If applicant proposes to permit this level to be exceeded at times, state under what circumstances and how often this is expected to occur, and the limits that would then apply.

Not to be exceeded under normal conditions. Exceptions may be: During Election campaigns, a maximum of 22 minutes commercial matter in any one hour, with no more than 10% of clock hours to exceed 18 minutes, and with all of excess above 18 minutes to be political advertising.

Also, during infrequent cases, local events, seasonal broadcasts, or emergency broadcasts, when public affairs broadcasts consume unusual amounts of time, the applicant may exceed the normal maximum by no more than 2 minutes, in no more than 2 clock hours in a given week.

26. What is the maximum amount of commercial matter in any 60-minute segment which the applicant proposes normally to allow? 18 minutes

If applicant proposes to permit this amount to be exceeded at times, state under what circumstances and how often this is expected to occur, and the limits that would then apply.

See response above, Paragraph No. 25
PART VI
General Station Policies and Procedures

27. State the name(s) and position of the person(s) who determines day-to-day programming, makes decisions, and directs the operation of the station covered by this application and whether he is employed full time in the operation of the station.

Galen O. Gilbert - President, part time
Jimmy Young - Vice President, full time (Station manager)

28. A. Does the applicant have established policies with respect to programming and advertising standards (whether developed by the station or contained in a code of broadcasting standards and practices) to guide the operation of the station?

   Yes X No______

B. If "yes," attach as Exhibit No. ______ a brief summary of such policies. (If the station relies exclusively upon the published code of any national organization or trade association, a statement to that effect will suffice.)

29. State the methods by which applicant undertakes to keep informed of the requirements of the Communications Act and the Commission's Rules and Regulations, and a description of the procedures established to acquaint applicant's employees and agents with such requirements and to ensure their compliance.

     A continuing study of FCC rules and regulations is made by the President of the company, with regular reports from the company Washington Counsel, Russell Rowell.

     The company subscribes to Perry's "Broadcasting and the Law", Broadcasting Magazine, and BM/E Magazine. The Station has current copies of FCC Rules and Regulations, and receives up-date material.

     Regular Staff meetings will be held to acquaint all members of needed changes and developments. This plan will insure full cooperation of the staff in line with Federal Communications Commission requirements. It is the applicant's intention to comply with all such requirements and to render a complete service in the public interest.

30. If, as an integral part of its station identification announcements, applicant makes or proposes to make reference to any business, profession or activity other than broadcasting in which applicant or any affiliate or stockholder is engaged or financially interested, directly or indirectly, set forth typical examples and approximate frequency of their use.

     NONE

31. State the number of station employees: ______. If the station has or proposes to have ten or more employees, state in Exhibit No.______ the number of full-time and part-time employees in the programming, sales, technical, and general and administrative departments. Do not list the same employee in more than one category. However, if an employee performs multiple services, this may be so shown by identifying him with his various duties e.g., if two employees are combination announcers and salesmen, the list would include an entry of "two programming-sales".
PART VII
Other Matters and Certification

3. Applicant may submit as Exhibit No. ________ any additional information which, in its judgment, is necessary adequately to describe or to present fairly its services and operations in relation to the public interest.

34. The undersigned has familiarized himself with paragraph 7 of the Instructions on page 7 of Section IV-A concerning signature requirements and in light of its provisions does hereby:

A. Acknowledge that all the statements made in this Section IV-A and the attached exhibits are considered material representations and that all the exhibits are a material part hereof and are incorporated herein as if set out in full in the application form; and

B. Certify that the statements herein are true, complete, and correct to the best of his knowledge and belief and are made in good faith.

WILLFUL FALSE STATEMENTS MADE IN THIS FORM ARE PUNISHABLE BY FINE AND IMPRISONMENT. U. S. CODE, TITLE 18, SECTION 1001.
Part I

1. To assure nondiscrimination in recruiting:
   a. Posting notices in station employment offices informing applicants of their equal employment rights and their right to notify the Federal Communications Commission or other appropriate agency if they believe they have been the victim of discrimination.
   b. Placing a notice in bold type on the employment application informing prospective employees that discrimination because of race, color, religion, national origin, or sex, is prohibited and that they may notify the Federal Communications Commission or other appropriate agency if they believe they have been discriminated against.
   c. Placing employment advertisements in media which have significant circulation among minority-group people or women in the recruiting area.
   d. Recruiting through schools and colleges with significant minority-group or women enrollments.
   e. Maintaining systematic contacts with women's minority and human relations organizations, leaders and spokesmen to encourage referral of qualified minority and women applicants.
   f. Encouraging present employees to refer women and minority applicants.
   g. Making known to all recruitment sources that qualified women and minority members are being sought for consideration whenever the station hires.

2. To assure nondiscrimination in selection and hiring:
   a. Instructing personally those of your staff who make hiring decisions that women and minority applicants for all jobs are to be considered without discrimination.
   b. Where union agreements exist:
      (1) Cooperating with your unions in the development of programs to assure qualified minority persons of equal opportunity for employment;
      (2) Including an effective nondiscrimination clause in new or renegotiated union agreements.
   c. Avoiding use of selection techniques or tests which have the effect of discriminating against women and minority groups.

3. To assure nondiscriminatory placement and promotion:
   a. Instructing personally those of the station staff who make decisions on placement and promotion that women and minority employees are to be considered without discrimination, and that job areas in which there is little or no female or minority representation should be reviewed to determine whether this results from discrimination.
   b. Giving women and minority group employees equal opportunity for positions which lead to higher positions. Inquiries as to the interest and skills of all lower paid employees with respect to any of the higher paid positions, followed by assistance, counseling, and effective measures to enable employees with interest and potential to qualify themselves for such positions.
c. Reviewing seniority practices and seniority clauses in union contracts to ensure that such practices or clauses are nondiscriminatory and do not have a discriminatory effect.

4. To assure nondiscrimination in other areas of employment practices:
   a. Examining rates of pay and fringe benefits for present employees with equivalent duties, and adjusting any inequities found.
   b. Advising all qualified employees whenever there is an opportunity to perform overtime work.

EXISTING LICENSEE PART II

Assignors and transferors other than in the case of pro forma or involuntary assignments and transfers, and renewal applicants file the following exhibit:

Submit a report as Exhibit No.____ indicating the manner in which the specific practices undertaken pursuant to the station's equal employment opportunity program have been applied and the effect of these practices upon the applications for employment, hiring, and promotions of women and minority group members.

EXISTING LICENSEE PART III

Assignors, transferors, and applicants for renewal file the following exhibit:

Submit as Exhibit No.____ a brief description of any complaint which has been filed before any body having competent jurisdiction under Federal, State, territorial or local law, alleging unlawful discrimination in the employment practices of the applicant, including the persons involved, the date of filing, the court or agency, the file number (if any), and the disposition or current status of the matter.

1 Copy certified
I, MARK W. WHITE, JR., Secretary of State of the State of Texas, DO HEREBY CERTIFY that the attached is a true and correct copy of the following described instruments on file in this office:

K P E T RADIO, INC.

Articles of Incorporation September 10, 1973

IN TESTIMONY WHEREOF, I have hereunto signed my name officially and caused to be impressed hereon the Seal of State at my office in the City of Austin, this

17th day of September, A. D. 1973.

[Signature]
Secretary of State
ARTICLES OF INCORPORATION
OF
K P E T RADIO, INC.

We, the undersigned natural persons of the age of twenty-one (21) years or more, at least two of whom are citizens of the State of Texas, acting as incorporators of a corporation under the Texas Business Corporation Act, do hereby adopt the following Articles of Incorporation for such corporation:

ARTICLE I
The name of this corporation is K P E T RADIO, INC.

ARTICLE II
The period of its duration is perpetual.

ARTICLE III
The purpose or purposes for which the corporation is organized are:

(a) To acquire, operate and maintain a radio broadcasting station or stations and to perform all acts and conduct all business in any way connected with, related to and arising from the ownership or operation of a private and/or public broadcasting station or stations, in accordance with the rules prescribed by the Federal Communication Commission of the United States of America.

(b) To acquire, operate and maintain telecasting or television stations and to perform all acts and conduct all business in any way connected with, relating to and arising from, the ownership or operation of private and/or public television or telecasting station or stations in accordance with the rules prescribed by the Federal Communication Commission of the United States of America.

(c) To engage in any business not prohibited by law, related or unrelated to those described in Clauses (a) and (b) of this Article III, from time to time authorized or
(b) The number of Directors of the corporation set forth in Clause (a) of this Article VII shall constitute the authorized number of directors until changed by an amendment of a bylaw duly adopted by the vote or written consent of the holders of a majority of the then outstanding shares of stock of the corporation.

ARTICLE VIII

The names and addresses of the incorporators are:

R. Stansell Clement 209 North Houston Avenue
                    Lamesa, Texas 79331

Galen O. Gilbert 9145 Villa Park Circle
                  Dallas, Texas 75225

Elnora K. Gilbert 9145 Villa Park Circle
                  Dallas, Texas 75225

IN WITNESS WHEREOF, we have hereunto set our hands on this the 7th day of September, A. D. 1973.

Galene O. Gilbert
Elnora K. Gilbert
R. Stansell Clement

THE STATE OF TEXAS
COUNTY OF DAWSON

I, the undersigned authority, a Notary Public, do hereby certify that on this 7th day of September, A. D. 1973, personally appeared Galen O. Gilbert, Elnora K. Gilbert and R. Stansell Clement, who each being by me first duly sworn, severally declared that they are the persons who signed the foregoing document as incorporators, and that the statements therein contained are true.

(Edwyna Carroll)  Notary Public in and for Dawson County, Texas.
approved by the Board of Directors of this corporation, or carry on any trade or business which can, in the opinion of the Board of Directors of the company, be advantageously carried on in connection with or auxiliary to those described in Clauses (a) and (b) of this Article III, and to do all such things as are incidental or conducive to the attainment of the above objects or any of them.

ARTICLE IV

The aggregate number of shares which the corporation shall have authority to issue is three thousand (3,000), having a par value of One Hundred and No/10C ($100.00) Dollars each.

ARTICLE V

The corporation will not commence business until it has received for the issuance of its shares a consideration of the value of One Thousand and No/100 ($1,000.00) Dollars, consisting of money, labor done, or property actually received, which sum is not less than One Thousand and No/100 ($1,000.00) Dollars.

ARTICLE VI

The post office address of its initial registered office is 209 North Houston Avenue, Lamesa, Texas 79331, State of Texas, and the name of its initial registered agent at such address is R. Stansell Clement.

ARTICLE VII

(a) The number of directors constituting the initial Board of Directors is three (3), and the names and addresses of the persons who are to serve as Directors until the first annual meeting of the shareholders or until their successors are elected and qualified are:

Galen O. Gilbert  
9145 Villa Park Circle  
Dallas, Texas 75225

Elnora K. Gilbert  
9145 Villa Park Circle  
Dallas, Texas 75225

Ralph Lynch  
406 Magnolia  
Tahlequah, Oklahoma 74464
BY-LAWS OF K P E T RADIO, INC.

ARTICLE I. OFFICES

The principal office of the corporation in the State of Texas shall be located in the City of Lamesa, Dawson County, Texas, and the business of said corporation is to be transacted in Dawson County, Texas, and elsewhere within or without the State of Texas, as the Board of Directors may designate, in accordance with the laws of the State of Texas.

ARTICLE II. SHAREHOLDERS

SECTION 1. Annual Meeting. The annual meeting of the shareholders shall be held on the first Friday in the month of February in each year, beginning with the year 1975, at the hour of 10 o'clock A.M., for the purpose of electing Directors and for the transaction of such other business as may come before the meeting. If the day fixed for the annual meeting shall be a legal holiday in the State of Texas, such meeting shall be held on the next succeeding business day. If the election of Directors shall not be held on the day designated herein for any annual meeting of the shareholders, or at any adjournment thereof, the Board of Directors shall cause the election to be held at a special meeting of the shareholders as soon thereafter as conveniently may be.

SECTION 2. Special Meetings. Special meetings of the shareholders, for any purpose or purposes, unless otherwise prescribed by statute, may be called by the President or by the Board of Directors, and shall be called by the President at the request of the holders of not less than twenty-five per cent of all the outstanding shares of the corporation entitled to vote at the meeting.

SECTION 3. Place of Meeting. The Board of Directors may designate any place, either within or without the State of Texas.
unless otherwise prescribed by statute, as the place of meeting for any annual meeting or for any special meeting called by the Board of Directors. A waiver of notice signed by all shareholders entitled to vote at a meeting may designate any place, either within or without the State of Texas, unless otherwise prescribed by statute, as the place for the holding of such meeting. If no designation is made, or if a special meeting be otherwise called, the place of meeting shall be the principal office of the corporation in the State of Texas.

SECTION 4. Notice of Meeting. Written or printed notice stating the place, day and hour of the meeting and, in case of a special meeting, the purpose or purposes for which the meeting is called, shall be delivered not less than two nor more than seven days before the date of the meeting, either personally or by mail, by or at the direction of the President, or the Secretary, or the officer or persons calling the meeting, to each shareholder of record entitled to vote at such meeting. If mailed, such notice shall be deemed to be delivered when deposited in the United States mail, addressed to the shareholder at his address as it appears on the stock transfer books of the corporation, with postage thereon prepaid.

SECTION 5. Closing of Transfer Books or Fixing of Record Date. For the purpose of determining shareholders entitled to notice of or to vote at any meeting of shareholders or any adjournment thereof, or shareholders entitled to receive payment of any dividend, or in order to make a determination of shareholders for any other proper purpose, the Board of Directors of the corporation may provide that the stock transfer books shall be closed for a stated period but not to exceed, in any case, twenty days. If the stock transfer books shall be closed for the purpose of determining shareholders entitled to notice of or to vote at a meeting of shareholders, such books shall be closed
for at least two days immediately preceding such meeting. In lieu of closing the stock transfer books, the Board of Directors may fix in advance a date as the record date for any such determination of shareholders, such date in any case to be not more than twenty days and, in case of a meeting of shareholders, not less than two days prior to the date on which the particular action, requiring such determination of shareholders is to be taken. If the stock transfer books are not closed and no record date is fixed for the determination of shareholders entitled to notice of or to vote at a meeting of shareholders, or shareholders entitled to receive payment of a dividend, the date on which notice of the meeting is mailed or the date on which the resolution of the Board of Directors declaring such dividend is adopted, as the case may be, shall be the record date for such determination of shareholders, such date in any case to be not more than twenty days and, in case of a meeting of shareholders, not less than two days prior to the date on which the particular action, requiring such determination of shareholders, is to be taken. If the stock transfer books are not closed and no record date is fixed for the determination of shareholders entitled to notice of or to vote at a meeting of shareholders, or shareholders entitled to receive payment of a dividend, the date on which notice of the meeting is mailed or the date on which the resolution of the Board of Directors declaring such dividend is adopted, as the case may be, shall be the record date for such determination of shareholders. When a determination of shareholders entitled to vote at any meeting of shareholders has been made as provided in this section, such determination shall apply to any adjournment thereof.

SECTION 6. Voting Lists. The officer or agent having charge of the stock transfer books for shares of the corporation shall make, at least twenty days before each regular meeting
of shareholders, a complete list of the shareholders entitled to vote at such meeting, or any adjournment thereof, arranged in alphabetical order, with the address of and the number of shares held by each, which list, for a period of twenty days prior to such meeting, shall be kept on file at the registered office of the corporation and shall be subject to inspection by any shareholder at any time during usual business hours. Such list shall also be produced and kept open at the time and place of the meeting and shall be subject to the inspection of any shareholder during the whole time of the meeting. The original stock transfer book shall be prima facie evidence as to who are the shareholders entitled to examine such list or transfer books or to vote at any meeting of shareholders.

SECTION 7. Quorum. A majority of the outstanding shares of the corporation entitled to vote, represented in person or by proxy, shall constitute a quorum at a meeting of shareholders. If less than a majority of the outstanding shares are represented at a meeting, a majority of the shares so represented may adjourn the meeting from time to time without further notice. At such adjourned meeting at which a quorum shall be present or represented, any business may be transacted which might have been transacted at the meeting as originally notified. The shareholders present at a duly organized meeting may continue to transact business until adjournment, notwithstanding the withdrawal of enough shareholders to leave less than a quorum.

SECTION 8. Proxies. At all meetings of shareholders, a shareholder may vote by proxy executed in writing by the shareholder or by his duly authorized attorney in fact. Such proxy shall be filed with the secretary of the corporation before or at the time of the meeting.
SECTION 9. Voting of Shares. Subject to the provisions of Section 11 of this Article II, each outstanding share entitled to one vote upon each matter submitted to a vote at a meeting of shareholders.

SECTION 10. Voting of Shares by Certain Holders. Shares standing in the name of another corporation may be voted by such officer, agent or proxy as the by-laws of such corporation may prescribe, or in the absence of such provision, as the board of directors of such corporation may determine.

Shares held by an administrator, executor, guardian or conservator may be voted by him, either in person or by proxy, without a transfer of such shares into his name. Shares standing in the name of a trustee may be voted by him, either in person or by proxy, but no trustee shall be entitled to vote shares held by him without a transfer of such shares into his name.

Shares standing in the name of a receiver may be voted by such receiver, and shares held by or under the control of a receiver may be voted by such receiver without the transfer thereof into his name if authority so to do be contained in an appropriate order of the court by which such receiver was appointed.

A shareholder whose shares are pledged shall be entitled to vote such shares until the shares have been transferred into the name of the pledgee, and thereafter shall be entitled to vote the shares so transferred.

Shares of its own stock belonging to the corporation or held by it in a fiduciary capacity shall not be voted, directly or indirectly, at any meeting, and shall not be counted in determining the total number of outstanding shares at any given time.
SECTION 11. Cumulative Voting. Unless otherwise provided by law, at each election for Directors every shareholder entitled to vote at such election shall have the right to vote, in person or by proxy, the number of shares owned by him for as many persons as there are Directors to be elected and for whose election he has a right to vote, or to cumulate his votes by giving one candidate as many votes as the number of such Directors multiplied by the number of his shares shall equal, or by distributing such votes on the same principle among any number of candidates.

SECTION 12. Informal Action by Shareholders. Unless otherwise provided by law, any action required to be taken at a meeting of the shareholders, or any other action which may be taken at a meeting of the shareholders, may be taken without a meeting if a consent in writing, setting forth the action so taken, shall be signed by all of the shareholders entitled to vote with respect to the subject matter thereof.

ARTICLE III. BOARD OF DIRECTORS

SECTION 1. General Powers. The business and affairs of the corporation shall be managed by its Board of Directors.

SECTION 2. Number, Tenure and Qualifications. The number of directors of the corporation shall be not less than three and or more than seven, as may be determined by the Board of Directors from time to time.

SECTION 3. Regular Meetings. A regular meeting of the Board of Directors shall be held without other notice than this by-law immediately after, and at the same place as, the annual meeting of shareholders. The Board of Directors may provide, by resolution, the time and place for the holding of additional regular meetings without other notice than such resolution.
SECTION 4. Special Meetings. Special meetings of the Board of Directors may be called by or at the request of the President or any two Directors. The person or persons authorized to call special meetings of the Board of Directors may fix the place for holding any special meeting of the Board of Directors called by them.

SECTION 5. Notice. Notice of any special meeting shall be given at least two days previously thereto by written notice delivered personally or mailed to each director at his business address, or by telegram. If mailed, such notice shall be deemed to be delivered when deposited in the United States mail so addressed, with postage thereon prepaid. If notice be given by telegram, such notice shall be deemed to be delivered when the telegram is delivered to the telegraph company. Any director may waive notice of any meeting. The attendance of a director at a meeting shall constitute a waiver of notice of such meeting, except where a director attends a meeting for the express purpose of objecting to the transaction of any business because the meeting is not lawfully called or convened.

SECTION 6. Quorum. A majority of the number of directors fixed by Section 2 of this Article III shall constitute a quorum for the transaction of business at any meeting of the Board of Directors, but if less than such majority is present at a meeting, a majority of the directors present may adjourn the meeting from time to time without further notice.

SECTION 7. Manner of Acting. The act of the majority of the directors present at a meeting at which a quorum is present shall be the act of the Board of Directors.

SECTION 8. Vacancies. Any vacancy occurring in the Board of Directors may be filled by the affirmative vote of a majority of the remaining directors though less than a quorum of the Board of Directors, unless otherwise provided by law.
A director elected to fill a vacancy shall be elected for the unexpired term of his predecessor in office. Any directorship to be filled by reason of an increase in the number of directors shall be filled by election at an annual meeting or at a special meeting of shareholders called for that purpose.

SECTION 9. Compensation. By resolution of the Board of Directors, the Directors may be paid their expenses, if any, of attendance at each meeting of the Board of Directors, and may be paid a fixed sum for attendance at each meeting of the Board of Directors or a stated salary as Director. No such payment shall preclude any director from serving the corporation in any other capacity and receiving compensation therefor.

SECTION 10. Presumption of Assent. A director of the corporation who is present at a meeting of the Board of Directors at which action on any corporate matter is taken shall be presumed to have assented to the action taken unless his dissent shall be entered in the minutes of the meeting or unless he shall file his written dissent to such action with the person acting as the secretary of the meeting before the adjournment thereof or shall forward such dissent by registered mail to the Secretary of the corporation immediately after the adjournment of the meeting. Such right to dissent shall not apply to a Director who voted in favor of such action.

ARTICLE IV. OFFICERS

SECTION 1. Number. The officers of the corporation shall be a President, a Vice-President, a Secretary and a Treasurer, each of whom shall be elected by the Board of Directors. Such other officers and assistant officers as may be deemed necessary may be elected or appointed by the Board of Directors.

SECTION 2. Election and Term of Office. The officers of the corporation to be elected by the Board of Directors shall be elected annually by the Board of Directors at the first meet-
ing of the Board of Directors held after each annual meeting of the shareholders. If the election of officers shall not be held at such meeting, such election shall be held as soon thereafter as conveniently may be. Each officer shall hold office until his successor shall have been duly elected and shall have qualified or until his death or until he shall resign or shall have been removed in the manner hereinafter provided.

SECTION 3. Removal. Any officer or agent elected or appointed by the Board of Directors may be removed by the Board of Directors whenever in its judgment the best interests of the corporation would be served thereby, but such removal shall be without prejudice to the contract rights, if any, of the person so removed.

SECTION 4. Vacancies. A vacancy in any office because of death, resignation, removal, disqualification or otherwise, may be filled by the Board of Directors for the unexpired portion of the term.

SECTION 5. President. The President shall be the principal executive officer of the corporation and, subject to the control of the Board of Directors, shall in general supervise and control all of the business and affairs of the corporation. He shall, when present, preside at all meetings of the shareholders and of the Board of Directors. He may sign, with the Secretary or any other proper officer of the corporation thereunto authorized by the Board of Directors, certificates for shares of the corporation, any deeds, mortgages, bonds, contracts, or other instruments which the Board of Directors has authorized to be executed, except in cases where the signing and execution thereof shall be expressly delegated by the Board of Directors or by these By-Laws to some other officer or agent of the corporation, or shall be required by law to be otherwise signed or executed; and in general shall perform all duties incident to the office of President and such other duties as may be prescribed by the Board of Directors from time to time.
SECTION 6. Vice-President. In the absence of the President or in event of his death, inability or refusal to act, the Vice-President shall perform the duties of the President, and when so acting, shall have all the powers of and be subject to all the restrictions upon President. The Vice-President shall perform such other duties as from time to time may be assigned to him by the President or by the Board of Directors.

SECTION 7. Secretary. The Secretary shall: (a) keep the minutes of the shareholders' and of the Board of Directors' meetings in one or more books provided for that purpose; (b) see that all notices are duly given in accordance with the provisions of these By-Laws or as required by law; (c) be custodian of the corporate records and of the seal of the corporation and see that the seal of the corporation is affixed to all documents the execution of which on behalf of the corporation under its seal is duly authorized; (d) keep a register of the postoffice address of each shareholder which shall be furnished to the Secretary by such shareholder; (e) have general charge of the stock transfer books of the corporation; and (f) in general perform all duties incident to the office of Secretary and such other duties as from time to time may be assigned to him by the President or by the Board of Directors.

SECTION 8. Treasurer. If required by the Board of Directors, the Treasurer shall give a bond for the faithful discharge of his duties in such sum and with such surety or sureties as the Board of Directors shall determine. He shall: (a) have charge and custody of and be responsible for all funds and securities of the corporation; receive and give receipts for moneys due and payable to the corporation from any source whatsoever, and deposit all such moneys in the name of the corporation in such banks, trust companies or other depositaries as shall be selected in accordance with the provisions of Article V of these By-Laws; and (b) in general perform all of the
duties incident to the office of Treasurer and such other duties as from time to time may be assigned to him by the President or by the Board of Directors.

SECTION 9. Salaries. The salaries of the officers shall be fixed from time to time by the Board of Directors and no officer shall be prevented from receiving such salary by reason of the fact that he is also a director of the corporation.

SECTION 10. Offices. Any shareholder, officer or member of the Board of Directors may hold more than one office in the Corporation.

ARTICLE V. CONTRACTS, LOANS, CHECKS AND DEPOSITS

SECTION 1. Contracts. The Board of Directors may authorize any officer or officers, agent or agents, to enter into any contract or execute and deliver any instrument in the name of and on behalf of the corporation, and such authority may be general or confined to specific instances.

SECTION 2. Loans. No loans shall be contracted on behalf of the corporation and no evidences of indebtedness shall be issued in its name unless authorized by a resolution of the Board of Directors. Such authority may be general or confined to specific instances.

SECTION 3. Checks, drafts, etc. All checks, drafts or other orders for the payment of money, notes or other evidences of indebtedness issued in the name of the corporation, shall be signed by such officer or officers, agent or agents of the corporation and in such manner as shall from time to time be determined by resolution of the Board of Directors.

SECTION 4. Deposits. All funds of the corporation not otherwise employed shall be deposited from time to time to the credit of the corporation in such banks, trust companies or other depositaries as the Board of Directors may select.
ARTICLE VI. CERTIFICATES FOR SHARES AND THEIR TRANSFER

SECTION 1. Certificates for Shares. Certificates representing shares of the corporation shall be in such form as shall be determined by the Board of Directors. Such certificates shall be signed by the President and by the Secretary or by such other officers authorized by law and by the Board of Directors so to do. All certificates for shares shall be consecutively numbered or otherwise identified. The name and address of the person to whom the shares represented thereby are issued, with the number of shares and date of issue, shall be entered on the stock transfer books of the corporation. All certificates surrendered to the corporation for transfer shall be canceled and no new certificate shall be issued until the former certificate for a like number of shares shall have been surrendered and canceled, except that in case of a lost, destroyed or mutilated certificate a new one may be issued therefor upon such terms and indemnity to the corporation as the Board of Directors may prescribe.

SECTION 2. Transfer of Shares. Transfer of shares of the corporation shall be made only on the stock transfer books of the corporation by the holder of record thereof or by his legal representative, who shall furnish proper evidence of authority to transfer, or by his attorney thereunto authorized by power of attorney duly executed and filed with the secretary of the corporation, and on surrender for cancellation of the certificate for such shares. The person in whose name shares stand on the books of the corporation shall be deemed by the corporation to be the owner thereof for all purposes.

ARTICLE VII. FISCAL YEAR

The fiscal year of the corporation shall begin on the first day of January and end on the 31st day of December in each year.

ARTICLE VIII. DIVIDENDS

The Board of Directors may from time to time declare,
and the corporation may pay, dividends on its outstanding shares in the manner and upon the terms and conditions provided by law and its Articles of Incorporation.

ARTICLE IX. SEAL

The Board of Directors shall provide a corporate seal which shall be inscribed, "K P E T RADIO, INC.", an impression of which is as follows, to-wit:

ARTICLE X

Election under Section 1244 of the Internal Revenue Code is hereby adopted and reserved unto the various stock holders with reference to any loss sustained in connection with common stock issued by the Corporation.

ARTICLE XI. WAIVER OF NOTICE

Unless otherwise provided by law, whenever any notice is required to be given to any shareholder or director of the corporation under the provisions of these By-Laws or under the provision of the Articles of Incorporation, a waiver thereof in writing, signed by the person or persons entitled to such notice, whether before or after the time stated herein, shall be deemed equivalent to the giving of such notice.
ARTICLES XII. AMENDMENTS

These By-Laws may be altered, amended or repealed and new By-Laws may be adopted by a vote of the shareholders representing a majority of all the shares issued and outstanding, at any annual shareholders' meeting or at any special shareholders' meeting when the proposed amendment has been set out in the notice of such meeting.

ADOPTED this 2nd day of September, A.D. 1973, by the undersigned of the Board of Directors.

[Signatures]

I, the undersigned, Secretary of K P E T RADIO, INC., do hereby certify that the above and foregoing instrument is a true and correct copy of the By-Laws adopted by said Corporation at a meeting held on 1973.

[Signature]

Secretary
KPET Radio, Inc., the applicant corporation, is controlled by KTLQ Radio, Inc., Tahlequah, Oklahoma. The Stock of KTLQ Radio, Inc. is Common Stock, with $10 par value per share. Each share represents 1 vote. A total of 16,000 shares are authorized. There are 15,500 shares issued and outstanding. These shares are owned as follows:

Galen O. Gilbert - 9300
Ralph Lynch - - 3100
Joe L. McCullah - 3100

The three persons listed above are the only stockholders of KTLQ Radio, Inc. There were no shares voted by proxy at the last meeting of stockholders.

The beneficial owners of the stock are the individuals listed above, and there are no other beneficial owners of any of the stock. KTLQ Radio, Inc. has no other obligations or securities authorized or outstanding which bear voting rights either absolutely or upon any contingency. KTLQ Radio, Inc. is not directly or indirectly controlled by another corporation or legal entity.

Tables I and II with information for KTLQ Radio, Inc., are attached as a part of this exhibit.
The above data is for KTLG Radio, Inc., controlling shareholder in the applicant corporation (KTLG Radio, Inc.), based in Fort Worth, TX 76129. The name of the company is KTLG Radio, Inc. The address of the company is 3301 Willow Street, Fort Worth, TX 76129.

- KETN, Inc., licensee of KETN - Secretary & Director, qualifying shares only (Neosho, Mo.)
- KSWM, Inc., licensee of KSWM & KSWM FM, Secretary & Director (Aurora, Mo.)
- Cherokee Broadcasting Company, licensee of KOKN, Secretary & Director, (Pawhuska, Okla)
- KZEE Radio, Inc., licensee of KZEE, Secretary & Director (Weatherford, Tex.)
(a) Galen O. Gilbert is husband of Elnora Gilbert

(b) Galen O. Gilbert is husband of Elnora Gilbert

(c) Elnora Gilbert is Secretary & Director of several stations in which Galen O. Gilbert has controlling interest.

(d) KPET Radio, Inc. - Secretary

KBTN, Inc. - Secretary & Director, owns qualifying shares

KSWM, Inc. - Secretary & Director

Cherokee Broadcasting Company - Secretary & Director

KZEE Radio, Inc. - Secretary & Director
The Applicant has secured cost proposals from Collins Radio Company, Harris Communications, CCA Electronics Corporation, CSI Electronics, Sparta Electronics, Wilkerson Electronics, and RCA. Also, the applicant has located various items of Reconditioned electronic equipment which is available at savings over that of new equipment. The applicant proposed to accept certain of the proposals from manufacturers, and will purchase some used and rebuilt items. The cost of purchase of equipment, and construction of the station is a total of the acceptable proposals from these sources.

The Applicant is licensee of Radio Station KPET, a 250 watt fulltime AM station in Lamesa, Texas. The proposed FM station will be located in the building now being used by the AM operation; the staff of the AM station will essentially be used in the operation of the FM station. Therefore, the first year cost of operation will primarily consist of power to operate the FM Transmitter, and cost of expansion of News and programming facilities. The estimated cost totals are as follows:

<table>
<thead>
<tr>
<th>Item</th>
<th>Cost</th>
</tr>
</thead>
<tbody>
<tr>
<td>Power</td>
<td>$1,200</td>
</tr>
<tr>
<td>NEWS</td>
<td>1,400</td>

</tr>
<tr>
<td>Misc.</td>
<td>1,000</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>$12,000</strong></td>
</tr>
</tbody>
</table>

*The applicant anticipates the addition of 1 person to programming staff. The major part of the work in operating the FM station will be done by existing KPET AM staff. These estimates are based on experience of applicant officers in the building
of FM stations at Tahlequah, Oklahoma, and Aurora, Missouri several years ago. It is felt that the estimates are realistic in view of the ongoing operation of KPET AM, which has been operating for several years with a full staff, and with all primary costs covered by present operation.
ASCERTAINMENT OF COMMUNITY NEEDS & INTERESTS

(1) The needs and interests of the public in the Community and area to be served by the proposed FM station were determined through personal interviews and discussions, telephone interviews and review of mail which has been received by the AM station operated by the licensee. Interviews with Community leaders were made by the Vice President and Director of the applicant corporation, Jimmy Young. Interviews with the general public were made by Young, and by the following members of the staff of KPET:

Jesse Gilbert, News Director
Robert Tomlinson, Program Director
Dorothy Haney, Sales Director and Public Relations Dir.
Margie Seay, Traffic Director
Chebby Gonzales, Director of Spanish Language Programs

Representative groups, organizations and individuals were consulted including the following categories of Community Institutions or elements:

1. Government (local, county, state & federal)
2. Business
3. Labor
4. Agriculture
5. Education
6. Professions
7. Charities
8. Civic, Neighborhood and Fraternal organizations
10. Recreation
11. Environment
12. Organizations of and for Youth and Students
13. Organizations of and for the Elderly
14. Religion
15. Minority and ethnic groups
16. Organizations of and for Women
17. Military representatives
18. Cultural groups
19. Consumer Services

A listing of the persons surveyed, and the groups represented, including affiliation of each, is attached as a part of this exhibit. In the case of Minority and ethnic groups whose representatives were interviewed, the interviews included —

(2) The major community which KPET Radio, Inc. will undertake to serve with the proposed FM station is Lamesa. Service is to be provided for the entirety of Dawson County, as well as parts of Gaines County, Terry County, Lynn County, Borden County, Howard County, Martin County, and Andrews County. The proposed FM station will be especially valuable to residents of all of Dawson County, as well as to rural residents and residents of small towns in adjacent counties. This will be an important addition to service of a Local nature for these people especially at night, when the coverage area of KPET AM is more limited. The proposed FM station will reach a number of towns and rural areas not receiving good local service at night.
Two counties of this group have no local station located within their borders. These are Borden and Martin counties. Good day time service is provided by KPET AM, and the proposed FM station will supplement this local service during the day, and will add a large population at night not previously receiving good night time service. All other adjacent counties are locations of local stations.

The complete survey is reported in the attached material. The report reflects the results of the survey which was made within the past 60 days, with completion of the survey on February 20, 1976.

The FCC Primer and FCC Explanatory Releases regarding Ascertainment of Community Needs and desires were used in setting the format of the survey. In addition, the May 20, 1975 release of the Federal Communications Commission regarding "Community Problems, Ascertainment by Broadcast Applicants, a notice of Inquiry and Proposed Rulemaking, was studied, in order to work toward improvements in the Ascertainment process, thru additions or changes in the current guidelines.

The survey represents a cross section of the Leadership of the Community, and the area, and of the General Public.
IDENTIFICATION OF REPRESENTATIVE GROUPS, INTERESTS
AND ORGANIZATIONS CONSULTED IN SURVEY

The population of Lamesa and Dawson County was studied in an effort to identify the separate and definite components which make up the community. The various categories of Community institutions or elements identified earlier in this exhibit were determined to be present in Lamesa and Dawson. Individuals representing these groups, interests and organizations were interviewed. In the process of the study it was discovered that the following were the stronger elements of Community life:

1. Agriculture and related service groups
2. The Governmental organizations active in the community
3. The Educational organizations of the Community
4. The Business segments of the community
5. Minority and Ethnic population, particularly population with Spanish surname
6. Religious organizations of the community
7. Civic, Naborhood & Fraternal organizations
8. Public Safety, Health and Welfare
9. Youth organizations
10. Organizations of and for women

As in many smaller communities, there are instances of a cross-over in leadership in several areas. In the case of this survey, most of the persons who were interviewed were active in more than one important area of the community.
We have therefore shown several affiliations with a number of the persons interviewed. This will assist in putting the material in perspective, and in forming a view of the community and area.

It should be noted that special emphasis was made in order to properly reach the leadership of both the small Black population, and the much larger group of citizens with Spanish surname. This is a very valuable part of the survey and led to a number of important areas of concern.

As indicated earlier, the survey covered the area of proposed service of the new station, with major emphasis on Lamesa, where the majority of the population of the county is located. In addition, interviews were made with both leaders and the general public in towns in the county and area. Among these representative interviews were residents of:

- O'Donnell, Texas
- Gail, Texas
- Ackerley, Texas
- Patricia, Texas
- Welch, Texas
- Hatch, Texas

And, numerous rural areas and communities

There follows here a listing of Individuals interviewed, with organization, major interest, and affiliation indicated. In the case of the members of the General Public who were interviewed, their Work affiliation and other information is noted.

REPRESENTATIVE GROUPS, INTERESTS AND ORGANIZATIONS CONSULTED
GOVERNMENT

LELAND MILLER, 605 Court D, Lamesa - County Tax Assessor and Collector

MRS. MARTIN TRAVINO, 1206 S. 12th, Lamesa, Texas - Housewife
ANALYSIS OF COMMUNITY

A complete study of the composition of the population of Lamesa and Dawson County was made in order to provide guidance for securing a cross section of the various interests in the community and county. Lamesa is the only major community in the county and consists of 11,559 residents, according to the 1970 United States Census. Dawson County had a population of 16,604 according to the same census. Records of utility connections, and city records indicate a 1973 population of 12,079 in Lamesa. The 1970 census indicated a white population of 91.9%, Negro 7.3% and other .8%. Population with Spanish surnames - generally referred to as Mexican-Americans were included in the white percentage figures. City officials and Chamber of commerce data indicate about 1/3 of the 91.9% white population is "Mexican American". Ackerly with a population of 348 and O'Donnell with 1,148 are the other principal towns in the county. Of the County population, the female total was 8,582, and male population was 8,022. Total white population was 15,637, and black population was 967. Persons with Spanish surnames totaled 5,241. Standard Rate & Data Service in their April, 1975 publication shows Dawson County with Retail Sales of $50,530,000. This represents $10,513 in retail sales per household. The same source shows Dawson county as having a total of $66,017,000 in Consumer spendable income. This represents $12,894 per household. The economic base of Lamesa and Dawson County is closely related to Agriculture. Farm income totals $38,484,000. With income from Agriculture related businesses, the total of farm based income is $58,126,000, or about 80% of total income of the county.
The average median income per family in the county is estimated at $7,022, according to the Texas Industrial Commission. Approximately 26% of the population has median family income of less than $3,500.

Most residents of the county are either Protestant or Catholic by faith, and there is no Jewish or other organized religious group reported in the community.

Lamesa Public Schools include programs for kindergarten through high school level, and there is a Two Year College program available at the Lamesa Campus of Howard College. There is also a "Head start" program in the community, which gives training to pre-school age students. There are several private day care centers, in addition to the Lamesa Day Care Center. The Lamesa Day care Center furnishes care for children whose parents are working, but who are unable to provide care for their children.

The Lamesa Public school system includes 3 elementary schools, 1 middle school, and 1 senior high school. Also, 1 vocational technical school for high school level students. This school also provides night classes for adults. Howard College of Big Spring, Texas, has conducted extension courses in Lamesa for a little over three years. In order to increase the productivity of the extension courses, the Lamesa Industrial Foundation, purchased the building and land to function as a permanent extension facility of Howard College. Presently, the Lamesa Campus of Howard College, as the facility is known, is conducting 20 college credit courses, and 20 non-credit courses. This extension campus plans to offer the first two years of college curriculum in its entirety within the next two years.
There is 1 accredited hospital with 72 beds in Lamesa. Also, 4 nursing homes, with a total of 161 beds. There is one private clinic, 7 general practitioners, 3 dentists, and 1 chiropractor. A total of 184 persons are working in the operation of the hospital, nursing homes, clinic and related offices.

Lamesa is the location of a public Library, three community centers, a museum and an auditorium.

There are a number of civic organizations for both men and women, youth and elderly. These include, among others, Rotary, Lions, Kiwanis, Optimist Clubs; Delta Kappa Gamma; Beta Sigma Phi; Business PROFESSIONAL Women; Garden clubs; Lamesa Cotton Promotion Council; Dawson County Farm Bureau; Hospital Auxiliary; Women's Study clubs; Parents organizations in connection with the public schools; Pioneers Association; Country Club. Youth organizations include Boy Scouts, Girl Scouts, Rainbow Girls; De MoLays; 4 H clubs; Future Farmers of America; Boys Club; also, there is a Senior Citizens organization which is very active. The Lamesa National Guard is the only military organization in the town. Recruiters for Army, Navy Marines and Air Force visit Lamesa from Lubbock and Midland. Inasmuch as the small amount of industry in the town is agriculturally oriented, there are no labor unions organized in Lamesa.

Major annual events in the community include the Lamesa Rodeo, Country Club Golf Tournament, Dawson County Fair and Community Carnival, Dawson County Jr. Livestock Show, and Lamesa Optimist Softball Tournament. Also, the Lions Club Annual equipment sale and auction. Lamesa is the site of numerous District and area conventions.
There are representatives of the Soil Conservation Service, the United States Department of Agriculture; Farmers Home Administration; Production Credit Association; Texas Employment Service; Cotton Classing Office. These and other federal programs are located mainly in the Lamesa Federal Building, formerly the Lamesa Post Office Building.

The City of Lamesa maintains 7 parks, 156 acres total, with the following facilities: shaded picnic areas, barbecue pits and tables, 2 swimming pools, 2 lighted tennis courts, 1 lighted volleyball court, 9 little league baseball fields (3 lighted) 1 lighted regulation baseball park, 3 softball fields (2 lighted). Also, available are overnight camping facilities for campers and trailers. The Boys Club program is on a year round basis. Plains Fairway inc. maintains a 9 hole golf course open to the public. The Senior Citizens center has been remodeled recently.

Lamesa has the Council-Manager form of Government. The 5 member Council chooses one of its members as mayor. A County Judge and 4 commissioners perform the principal administrative and legislative functions for Dawson County. The Police Department has 21 employees, 7 vehicles, and radio system that nets with other law enforcement organizations in the area. Dawson County Sheriff's Department comprised of Sheriff and 4 deputies and there are 2 members of the Texas Department of Public Safety located in Lamesa. The Fire Department has 11 full time employees, 22 volunteer firemen, 2 fire stations, 260 fire hydrants, and 4 pumpers. Garbage and Waste disposal is city operated on a twice per week basis.
In 1970, the Dawson County work force totaled 5,665 with agriculture and agricultural industry employing the largest portion of that labor force. The largest employer is Dotty Dan Manufacturing Company, a manufacturer of children's clothing. A cotton compress, cotton oil mill, and 26 cotton gins provide major employment. Other industries include bean and pea processing, gin parts, and farm implement manufacturing and construction. Lamesa is served with full freight service by the Santa Fe Railway. Bus service includes 8 daily schedules by the Texas New Mexico Bus company. Truck service is offered by Merchants Fast Motor Lines, Curry Freight Lines and Tex Pak. The Lamesa Municipal Airport has a 4,000 foot lighted all weather runway, and a 2,300 foot all weather runway. Two banks in Lamesa have a total of $81,812,604 in deposits, and two Savings and Loan associations have a total of $42,368,221 in deposits. The Lamesa Industrial Foundation experienced more activity in 1975 than it has since incorporation. The two main projects concern the purchase of an industrial tract, and the instigation of a local college program. These projects were financed through the voluntary contritions of about $80,000.00. The foundation in 1975 purchased its first tract of land for industrial development purposes. The 50 acre site will be used partly for industrial prospecting, and partly for the use of Feather Yarn, Inc., which is expected to build their factory in 1978.
From the composition of Lamesa and Dawson County as outlined herein, interviews were held with individuals representing white (Anglo); Mexican-American; and Negro segments of the population. In the selection of persons to be interviewed, individuals representing a cross section of the population in age, sex, business interests, income and affiliation with local organizations were included. The applicant believes that the results are objective, and that the survey is a balanced, complete review of the thinking of both the leadership and general public in Lamesa, Dawson County, and adjoining counties proposed to be served by the FM station.

Lists of names of individuals interviewed, organization, interest, and affiliation are included in this exhibit.
ANALYSIS OF THE COMMUNITY

As a follow-up to the Demographic view of the community, we now are recording information on the numerous community needs and interests as indicated in the interviews conducted. The following is a statistical listing of all of the needs and areas of interest which were mentioned by persons interviewed:

1. Recreational facilities for residents, with emphasis on Youth, bowling Lanes, Community Center, Auditorium, Park Improvement
2. Diversification of Industry, new Industry, new jobs
3. Additional housing, especially housing for "middle income" residents, and upgrading of housing for lower income families
4. Local communications with people, people understanding each other, officials understanding people
5. Support of youth organizations, FFA, 4-H, Girl Scouts, Boy Scouts
6. Improve water supply, both quality, and source
7. Encourage new business in downtown area
8. Revival of morality in community & support of religious groups
9. Control Crime, improve law enforcement organizations, Eliminate conditions that encourage or breed crime.
10. Better training of youth at home, parental authority is lacking
11. Attract youth to community for careers
12. Support Agriculture because it is base of economic health, especially cotton
13. Build a centrally located fire station for complete town
14. Program to remove old buildings no longer in use, landscape city property
15. Drug Control is lacking; legislative and judicial edicts hamper
16. Street improvement, paving & repair; traffic safety
17. Finding qualified employees for jobs that are open
18. Inflation, high prices, low wages
19. Red Tape in government reporting requirements
20. Welfare abuse, programs poorly run, stamp program unfair
21. Getting people to work, attracting people who want to work, training them
22. Controlling shoplifting
23. Apathy toward crime, community problems, and projects
24. Need to improve agriculture marketing, especially cotton and grain
25. Zoning to control the growth of community & protect property values
26. Need to keep legalized liquor out of county due to problems it brings
27. Need to legalize liquor and get rid of bootlegging
28. Financial and vocational helps and aids for aged population
29. Better business Bureau for county
30. Reduce noise level in residential areas, especially at night
31. Clean up town, streets, vacant logs, and private property, develop pride in community.

33. Secure Professional people, especially medical doctors and dentists
34. Improve judicial system, make certain penalties are given for crime
35. Reduce taxes
36. Improve public education
37. Support for petroleum industry, to encouragedrilling, production
38. Control stray animals
39. Better eating places in city
40. Publicity of Community Action Council
41. Adults need to be involved in problems of schools, busing program is creating absenteeism of students, communication of students with teachers, teachers with parents is needed.

42. Improve quality of life in city and county

43. Financing public schools due to state requirements for financing

44. Cut air pollution during cotton ginning season

45. Involve Ethnic groups in civic and political life; also in schools

46. Equalization of taxes thru reapportionment of property

47. Develop new cultural programs

48. Improve Telephone service in community

49. Secure Interstate highway thru Lamesa

50. Improve ambulance service

51. Involve more citizens in political life of county

52. Senior citizen activities need to be improved

53. Cut Vandalism

54. Protection of land from wind erosion, crop covers needed, soil conservation

55. Lack of workable plan for the future of the city and county

56. Utility bills are way too high; need reduction

57. Blood pressure clinic for elderly

58. General Attitude of complacency toward local and area issues of importance

59. Head start progrm needs to be expanded

60. Need to teach social justice to young Spanish individuals

61. Public transportation needed, especially for elderly

62. Parking downtown

63. More honesty in reporting news on a national level; need informed people

64. More family type movies
"NEEDS AND INTERESTS OF THE PUBLIC WHICH THE APPLICANT BELIEVES HIS STATION WILL SERVE"

The following are itemized as the significant needs and interests of the public which the applicant has determined based upon information gained from the interviews and statements of local residents, including civic leaders, government officials, educational leaders, religious leaders, business representatives, representatives of ethnic groups, and other segments of the population. These are the needs and interests on which the applicant will concentrate in service during the coming operation. These are considered to be the needs and interests which may be met by radio service:

1. The need to develop more and better jobs, with diversification of industry, while supporting the basic industry of agriculture.
2. The Need to develop additional housing, especially housing for the "middle income" groups, and upgrading of housing for low income groups.
3. Local communications with people, people understanding each other, people understanding officials, youth understanding of adults, and elderly understanding younger members of the population.
4. Support of youth organizations, including Future Farmers Association, 4-H clubs, Boy and Girl Scouts, School groups, and overall Youth efforts in constructive programs.
4. Revival of morality in community, support of Religious organizations, improve business ethics, and build goodwill between residents of community.

5. Support efforts toward improvement of pride in community, clean up of city, encourage people to improve private property, get rid of eyesores, and thereby improve quality of life in community.

6. Help publicize Community Action Council, and other community organizations designed to improve the community.

7. Encourage involvement of adults in problems of schools, busing program, absenteeism of students, communication of students with teachers, teachers with parents, and administration with parents.

8. Support and improve senior citizen activities and facilities.

9. Improve general attitude of complacency toward local and area issues of importance.

10. Concentrate on filling obligation of complete objectivity in reporting news on local, state, national and international level so that residents will be better informed, and thereby better citizens.
- Community organizing to identify and aggregate community need to inform Spanish-speaking residents about matters of interest.
- Discussion of economic matters.
- Broadcast of television service.
- Discussion of local government programs and other youth matters.
- Discussion of local government programs before the area of housing.
- Support of senior citizens and other demographic groups.
- Expansion of local school programs.
- Inspiration talk.
- Issues & Answers.
- Party Line.
- Show & Tell.
- Report & Review.

</table>
STATEMENT REGARDING NEWS COVERAGE AND FACILITIES

A. The news director of KPET, the AM station licensed to the applicant, will become news director of the FM station when it is built. He has had wide experience in this area, and has built a very effective news organization. The Station Manager will give assistance in news coverage as he has regular contact with most news sources in the community. Other staff members will assist with news as they contact people in the area. Direct programs will be broadcast from locations of news happenings periodically.

In addition to coverage by staff members of both the AM station and the proposed FM station, efforts will be made to expand reports from leaders in Lamesa, as well as other towns in the coverage area. This type of coverage is now underway on the AM station. The news effort will include both English and Spanish language programs.

In addition, the new station will have the following facilities available for news coverage:

1. UPI news teletype service
2. Texas Weather & Agriculture teletype news service
3. Roddy Peeples Agriculture news service
4. Texas State Network news service

News tips from the general public are promoted regularly in the news operation of KPET and these sources will also be utilized in the FM station news program.

B. Approximately fifty percent (50%) of news carried on the station will be devoted to local and regional type of coverage.
POLICY REGARDING DISCUSSION OF PUBLIC AFFAIRS

A regular effort will be made to discover interest on the part of the public in various local issues, and the proposed station will make time available for discussion of these matters. Staff members will be assigned who have had training and experience in local news coverage, and thru these people as well as the management of the station, subjects of interest will be located and programs and reports will be scheduled. Various viewpoints will be included. These programs will be in addition to the regular reports of factual data, and expressions of various viewpoints, included on news programs. Subjects will be chosen in areas considered by the applicant to have merit. Editorial comment will be identified as such. The station will expand the "Voice of the People" in the area of public expression. Various objective type programs will be developed in cases where the applicant feels there is local interest and importance. The applicant believes that this coverage will be a definite expansion of local programs of public interest.

The program - LAMESANS SPEAK - developed and broadcast periodically on KPET will be broadcast also on the FM station. A variety of subjects will be covered. Topics to be covered will be chosen for local importance and interest. Topics of general interest will be selected over questions of limited concern. Only qualified, recognized and properly identified individuals and groups whose opinions will be of help to the general public will be included.
The applicant's programming plans include a heavy emphasis on News, Events, Sports, and Service features. Middle of the Road Music will be featured between the events which are essentially talk. Spanish music will be broadcast during the Spanish Language periods of the day. Approximate periods of time making up this format are as follows:

- Middle of the Road Popular Music - 48%
- Spanish Music - 14%
- Talk programs including News and Sports - 38%
- Total - 100%*

*The applicant expects to build the News and Talk Features during the initial year of broadcast of the FM Station. The first months of operation are expected to include approximately 75% music, and 25% talk programs, with the gradual increase in talk programs, and decrease in music programs.
CONTRIBUTION TO DIVERSITY OF PROGRAM SERVICE

The applicant will provide an Alternate Radio Service for a large number of residents of the Service Area. The Area is receiving regular service from KPET, 250 Watt AM station in Lamesa, however, there is reduced service at night to the outlying areas. This is due to a smaller service area on the AM station at night. The FM station will provide the First Local Service to much of the outlying area. In addition, the FM station will program a number of features which cannot be carried on the AM station due to events having conflicting schedules. For instance, on certain nights, KPET will broadcast one Ball game from a Local School, and the new FM station will broadcast a game from another local school being played at the same time. KPET is now providing a Spanish Language program. The New FM station will add additional programming directed at the Spanish speaking residents of the area. This service will be heard on a daily basis. The basic music format on the FM station will be Middle of the Road Popular music, while KPET AM broadcast Country music. Many local events will be covered even though they occur at identical times - with the AM operation covering one event, and the FM covering still a different one. In this way the total operation will be operated in the Public Interest, with innovative programming diverse in nature.
OPERATION POLICY

The applicant will rely basically on the Broadcasters Code of Ethics of the National Association of Broadcasters. Variations from the National Association of Broadcasters Code of Ethics will be necessary due to local needs and concerns discovered by the Applicant. These variations are in the following matters:

1. Tobacco advertising will be rejected.
2. The proposed station will not accept advertising for alcoholic or narcotic products.
3. A limited amount of time will be allotted for Commercial Religious Broadcasts in order to achieve a balance in this area of subject matter.
4. Maximum limitation of commercial content of programs will vary as outlined earlier in this application. This variation will be primarily during periods of political elections as explained elsewhere in this application.
ADDITIONAL PROGRAM INFORMATION

The Applicant has been the licensee of Radio Station KPET, Lamesa, Texas for the past two years. In this period of operation, numerous opportunities for simultaneous coverage of more than one local event were noted. With the addition of the FM station, the applicant can fill the needs in these matters more effectively.

In addition, the FM station will provide coverage at night beyond the present coverage of the AM station, which operates with 250 watts. This will be a new local service, not now provided, in areas beyond the present AM signal area. Numerous activities develop with evening schedules and the FM station will add much to the applicant's efforts to serve the people of Dawson County and surrounding area.

The area of coverage is basically an Agricultural area, and the importance of this area of the economy is growing. The applicant anticipates taking advantage of opportunities to give expanded coverage to farmers and ranchers in West Texas.

The needs of all segments of the Lamesa and Dawson County population will be considered. The residents of adjacent counties will be considered as well. As studies develop needs of the elderly, of the youth, of business representatives, of labor, of local minority groups, of women, and others having special problems, the applicant will attempt to give innovative coverage.
In coverage of controversial topics, the applicant will by it''s coverage, attempt to locate the most constructive answers leading to positive action. The applicant believes that the very complete and full survey recently completed, and the continuing studies to be made, will help in determining the direction of our service to the people of West Texas by means of the new FM station.

During the past year tremendous improvements have been made in the studios and Transmitter facilities of KPET. A new "News Production Facility" has been built, with new recording equipment, new news monitoring equipment, and a special studio for this work. New Audio equipment has been installed. New portable recorders have been acquired. The studios have been completely remodelled to make the work of the staff more efficient.

In addition, new staff members have been added who have improved training and capability.

These developments provide the foundation for the proposed expansion of local service by means of the proposed FM station.
The applicant believes that the financial success of Local Radio operations is closely tied to the ability of the station to serve in the public interest thru broadcasts of local and area events, local and area news, service features and related programs. Therefore, for a capsule of information describing the philosophy of the applicant in programming, we would say:

We intend to provide the best local service, constantly appealing to the better nature of the listener, thereby improving the conditions of life for listeners.

Operation of AM station KFET in Lamesa for several years has developed the realization that the proposed FM station can fill "the holes" - where the AM is unable to give complete coverage or service. We will in the future be broadcasting two different High School ball games on the same evening, we will be covering activities of one kind with the AM station, while giving an alternate local service on the FM station.

The addition of the FM station will provide much new service and an alternate local radio service overall.

We will continue efforts to discover changing needs and interests and will program to meet these needs.
RE: Application filed March 2, 1976 (FCC Form 301) for new FM station, Lamesa, Texas.

The application of KPET Radio, Inc., Lamesa, Texas, for authority to operate a new FM station in Lamesa, Texas, to operate on 100.3 MHz, with 100,000 watts power, which was filed March 2, 1976, is to advise you that the attached notice was broadcast over Radio Station KPET, Lamesa, Texas at the following times and dates:

- March 6, 1976, 9:55 AM
- March 7, 1976, 9:55 AM
- March 8, 1976, 9:35 AM
- March 9, 1976, 9:35 AM

This series of broadcast notices is in accordance with requirements of the Commission.

Sincerely,

KPET RADIO, Inc.

September 23, 1978

Secretary
Federal Communications Commission
1919 M Avenue N. W.
Washington, D. C. 20554

Dear Sir:

We have studied our first year of operation since KCOT was put on the air. We have determined that it would be in the public interest to make adjustments from our original program proposals as indicated in our letter to the Commission on September 1, 1977.

Initially we proposed to program approximately 75% Music, and 25% News, Public Affairs, Agriculture, sports, education and other programs. Our first year of operation has been fairly close to this proposal.

On the basis of the first year on the air as our basic guideline, we now will proceed with the following adjustment in our programs:

<table>
<thead>
<tr>
<th>Program</th>
<th>%</th>
<th>Time</th>
</tr>
</thead>
<tbody>
<tr>
<td>Middle of the Road Music</td>
<td>78%</td>
<td>5,987</td>
</tr>
<tr>
<td>News</td>
<td>10%</td>
<td>756 m</td>
</tr>
<tr>
<td>Public Affairs</td>
<td>2%</td>
<td>152 m</td>
</tr>
<tr>
<td>Other</td>
<td>10%</td>
<td>756 m</td>
</tr>
<tr>
<td>Total</td>
<td>100%</td>
<td></td>
</tr>
</tbody>
</table>

It is the belief of the licensee that this change from earlier proposals is in the public interest, and will provide program service desired and needed by the listening audience of our area.

We will continue to study the needs and interest of the people of our area in order to make certain that our future program efforts are in the best interest of our audience.

Sincerely,

Galen O. Gilbert

President
KPET Radio, Inc.
Licensee of KCOT
September 1, 1977

Secretary
Federal Communications Commission
1919 M Street, N. W.
Washington, D. C. 20554

Dear Sir:

In our original proposal we planned to carry 14% of our broadcast periods with Spanish music.

We have now determined that we could better serve the Spanish speaking population in our coverage area by expanding the programing designed especially for this audience on KPET, the AM station in Lamesa, licensed to KPET Radio, Inc. We have therefore changed our programming as follows:

**KCOT FORMAT**

Middle of the road popular music  62%

Talk programs, including news
sports, public affairs, agriculture, education & religion  38%

Total  100%

We will continue to study the needs and interests of the people of our coverage area in order to make certain that our efforts are in the public interest.

Sincerely,

[Signature]
