GENERAL INFORMATION

The Institute

The Institute of Radio Engineers serves those interested in radio, allied electronics, and communications fields through the presentation of technical material, and by the monthly publication of PROCEEDINGS OF THE I.R.E., a technical journal. The Institute also publishes I.R.E. Standards, a number of Professional Group Publications, as well as a Convention Record.

Membership has grown from a few dozen in 1912 to more than 35,000 in 1953. There are several grades of membership, depending on the qualifications of the applicant, with dues ranging from $5.00 per year for Students to $15.00 per year for Members, Senior Members, Fellows, and Associates of more than five years' standing.

Professional Groups

To serve more fully the many special fields of interest, Professional Groups have been formed in each of 21 technical fields on an Institute-wide basis, with membership open only to IRE members.

Group activities include the sponsoring of symposia and conferences, and the publication of PROCEEDINGS OF THE I.R.E., journals containing technical material of special interest to Group members. To support Group activities, assessment fees may be levied by the Groups on their members.

The Proceedings

The PROCEEDINGS has been published without interrup-
tion from 1913, when the first issue appeared. Over 4,700 technical contributions have been included in its pages, portraying a currently written history of developments in both theory and practice. The contents of papers are the responsibility of the authors and are not binding on the Institute or its members. All rights of republication are reserved by the Institute.

Annual subscription rates for the United States of America, its possessions, and Canada, $18.00; to college and public libraries when ordering direct, $13.50; other countries, $1.00 additional for postage.
CONTENTS OF CONVENTION RECORD OF THE I.R.E.

Session 31: Seminar—Acoustics for the Radio Engineer—II (Sponsored by the Professional Group on Audio).
50. Photographic Reproduction, B. B. Bauer ..................... 3
51. Magnetic Recording, R. W. Mayer and M. R. Cherry .......... 16
52. Studio Acoustics (Not Available), H. J. Sabine ............... 25

Session 38: Audio (Sponsored by the Professional Group on Audio).
53. Sound System for Plenary Hall of United Nations General Assembly Building, C. W. Goyder and L. L. Beranek ........ 26
54. The Development of a Variable Time Delay, K. W. Goff .......... 35
55. A Flux-Sensitive Read Magnetic Recording Playback (Abstract), D. E. Wingand . 43
56. Uniaxial Microphone (Abstract), H. F. Olson, John Preston, and J. C. Bleasy .......... 43
57. Applications of High Intensity Microphones, J. K. Hildard ........ 44

Part 4—Broadcasting and Television

1953 CONVENTION RECORD OF THE I.R.E.

Session 2: Television I

58. Theory of Synchronization Applied to NTSC Color Television, Donald Richman ........................................ 3
60. APC Color Sync for NTSC Color Television, Donald Richman ........... 13
62. Transients in Color Television, P. W. Howells .................. 24

Session 8: Television II

63. Probability Distribution Measurements of Television Signals, W. F. Schreiber ................................................. 35
64. A Precision Line Selector for Television Use, J. C. Abrahams and R. C. Thor ........................................ 45
66. Phase Measurements at Subcarrier Frequency in Color Television, A. P. Stern ........... 57
67. A Monitoring System for NTSC Color Television Signals, C. E. Page ......... 61

68. The Design of Audio Consoles for Television, R. H. Tanner .......... 66
69. Building TV Broadcast Facilities for Growth, Flexibility and Economy, A. R. Kramer and E. R. Kramer ........... 72
70. Fabulous TV Transmitting Antennas, F. G. Karr and J. G. Preston .......... 79
71. High Gain Amplifiers for High Power Television Transmitters, John Ruston .......... 86

Session 29: Symposium—Television Broadcasting and UHF (Sponsored by the Professional Group on Broadcast Transmission Systems).
73. A Flexible TV Studio Intercommunication System, R. D. Chipp and R. F. Bigwood .......... 97
75. An Experimental Study of Wave Propagation at 850 MC, Jess Epstein and D. W. Peterson .......... 124
76. High Power UHF Klystron Application, A. E. Rankin .......... 125
77. High Power UHF Klystron Amplifier Design, Norman Hirstand .......... 129

Session 35: Broadcast and Television Receivers I (Sponsored by the Professional Group on Broadcast and Television Receivers).
79. Gain Stable Mixers and Amplifiers with Current Feedback, G. E. Boggs .......... 140

Part 5—Circuit Theory

1953 CONVENTION RECORD OF THE I.R.E.

Session 3: Circuits I—Network Theory (Sponsored by the Professional Group on Circuit Theory).
91. Synthesis of Electric Filters with Arbitrary Phase Characteristics, B. J. Bennett .......... 19
93. Network Analysis with the Aid of the Matrix Generating Polynomial, Herbert Kuruss .......... 39
94. Technique Employed in the Design of Filters (Condensed Version), Milton Dishal .......... 44

Session 9: Symposium—Circuits II—Panel Discussion on Wide-Band Amplifiers (Sponsored by the Professional Group on Circuit Theory).
95. Conventional Amplifiers, W. E. Bradley .......... 48
96. Broad-band Feedback Amplifiers, H. N. Beveridge .......... 52
97. Transistor Amplifiers (Abstract), R. L. Wallace, Jr. .......... 56
98. Distributed Amplifiers, W. G. Tyler and E. H. Bradly .......... 57
99. Traveling-Wave and Related Tubes (Abstract), L. M. Field .......... 61

Session 15: Circuits III—Time Domain Networks—Delay Lines (Sponsored by the Professional Group on Circuit Theory).
100. Continuously Variable Pulse Signal Delay System, Carl Berkley .......... 62
101. General Transmission Theory of Distributed Helical Delay Lines with Bridging Capacitance, M. J. Di Toro .......... 64
102. Distributed Constant Delay Lines with Characteristic Impedances Higher than 5000 Ohms, W. S. Carley .......... 71
104. Time Domain Approximation by Use of Padé Approximants, R. D. Teasdale .......... 89
105. Frequency Transients in Idealized Linear Systems, B. Gold .......... 95

Session 21: Circuits IV—Active Networks—Transistors (Sponsored by the Professional Group on Circuit Theory).
107. The Grounded Emitter Transistor Amplifier at Carrier Frequencies, F. R. Stanfield .......... 108
108. Symmetrical Properties of Transistors and Their Application (Abstract), G. C. Sziklai .......... 118
110. Conductance Curve Design of Relaxation Circuits, K. A. Polan .......... 120
111. Transistor Relaxation Oscillators, S. I. Kramer .......... 125

Part 10—Microwaves

1953 CONVENTION RECORD OF THE I.R.E.

Session 30: Symposium—Microwaves I—Manufacture of Microwave Equipment (Sponsored by the Professional Group on Microwave Theory and Techniques).

199. How to Design Microwave Components for Ease of Assembly, Frank Neukirch | 2 |
200. The Design of Microwave Components for Production (Abstract), H. J. Ribble | 4 |
201. Fabrication of Microwave Components Employing the Dip Brazing Process (Abstract), W. J. Rudolph | 4 |
202. Electroforming of Copper, Nickel, and Other Metals, C. L. Duncan | 5 |
203. Manufacturing of Micro-Strip Printed Circuit Components (Abstract), H. F. Engemann | 7 |

Session 36: Microwaves II—Discontinuities and Transitions (Sponsored by the Professional Group of Microwave Theory and Techniques).

204. R-F Measurements on Metallic Delay Media, S. B. Cohn | 8 |
205. Impedance Measurements on a Circular-Waveguide with $TE_{m1}$ Excitation, L. S. Keingold | 17 |
206. Experimental Determination of the Properties of Microstrip Components, M. Ardis | 27 |
207. A Wideband Transition between Waveguide and Coaxial Line, H. A. Wheeler and N. A. Spencer | 38 |
208. Coax-to-Helix Transducers for Traveling-Wave Tubes, R. E. White | 42 |

Session 42: Microwaves III—Ferrites and Detectors (Sponsored by the Professional Group on Microwave Theory and Techniques).

210. Low Level Synchronous Mixing, M. E. Brodwin, C. M. Johnson, and W. M. Waters | 52 |
212. Cavities with Complex Media, A. D. Berk and Benjamin Lax | 65 |
213. Resonance in Cavities with Complex Media, Benjamin Lax and A. D. Berk | 70 |

Tolerance: 123, 124
Electronic Production Design: 124
Tube Components: 123
Tracking, Radar: 4
Angular Scintillation: 4
Target Glint: 4
Tracking Systems, CW: 2
Transformers, Millimicrosecond: 103
Transistors: 29, 61, 62, 105, 106
Antenna Pattern Build-Up: 129
Color Television: 61, 62
Frequency, in Linear Systems: 105
Junction Transistor Amplifiers: 106
Transistor Amplifiers: 97, 106, 107
Grounded-Collector: 107
Transient Analysis: 106
Transistor Circuits, Television Receivers: 109
Television: 109
Receivers: 109
Transistor Circuits: 109
Transistors: 97, 106, 107, 108, 109, 111, 112,
113, 114, 115, 116, 141, 178, 179, 180,
181, 182
Amplifiers: 97, 106, 107
 Behavior at Elevated Temperatures: 116
Computers: 141
Double-Base Diode: 112
Grounded-Collector: 107, 108
M-1768 Characteristics: 114
Measurements: 179, 180, 181, 182
Admitance Bridge: 181
Alpha Sweeper: 182
Cathode-Ray Oscilloscope: 179, 183
Pulse Techniques: 180
Metrology: 176
N-P-N Alloy Junction: 115
Conventional Record Index—9
Price List

1953 Convention Record of the I.R.E.

A limited number of copies of the Convention Record of the I.R.E., containing approximately 190 papers presented at the 1953 IRE National Convention on March 23-26, are available at the Institute of Radio Engineers, 1 East 79 Street, New York 21, N. Y. Prices of individual Parts and the subject matter of each Part are given below. To insure delivery, place your order promptly.

**CONVENTION RECORD OF THE I.R.E.**
