Current I. R. E. Standards

The first report of the Committee on Standardization (1913) will be found at the back of Volume 1. Subsequent revised reports dated 1915, 1922, 1926, 1928, 1931, 1933, 1938, and 1942 were published as separate pamphlets. Copies of those current Reports still in print are available from the Institute at the prices shown below.

Entered as second-class matter October 26, 1927, at the post office at Menasha, Wisconsin, under the Act of February 28, 1925, embodied in Paragraph 4, Section 538 of the Postal Laws and Regulations. Publication office, 450 Alnaip Street, Menasha, Wisconsin. Editorial and advertising offices, 330 West 42nd St., New York, N. Y. Subscription $10.00 per year, foreign, $11.00. This issue of the PROCEEDINGS of the I.R.E. for June, 1943, is published in two parts. The price of Part I, which contains the technical papers and related material, is $1.00 per copy; the price of Part II of this issue which includes the Cumulative Index of the PROCEEDINGS from 1913 through 1942, is $1.00 per copy.

General Information

The first issue of the Proceedings was published in 1913. Volumes 1, 2, and 3 comprise four issues each. Volume 4 through volume 14 contain six numbers each and each succeeding volume is made up of twelve issues.

Eight issues of the Proceedings of the Wireless Institute were published during 1909. The index to these PROCEEDINGS will be found at the end of the Nontechnical Index which follows. The papers are not numbered nor is there an author or subject index to these articles.

In 1939, the name of the PROCEEDINGS of the Institute of Radio Engineers was changed to the PROCEEDINGS of the I.R.E. and the size of the magazine was enlarged from six by nine inches to eight and one-half by eleven inches. The supply of back issues is not complete, but those copies which are available may be purchased directly from the Institute. A listing of back issues is given below.

All back issues of the PROCEEDINGS of the I.R.E., which are available, are priced at $1.00 per copy. Price includes postage in the United States and Canada. Postage to other countries is ten cents per copy.

A discount of 25 per cent will be allowed to members of the Institute in good standing; accredited public and college libraries will be granted a discount of 50 per cent.

### Volume 1, Number 1, January, 1913
2. Editorial Notes, Alfred N. Goldsmith ........................................ 4
5. Editorial Notes, Alfred N. Goldsmith ........................................ 13
6. Discussion, Robert H. Marriott ........................................ 14
7. Recent Developments in the Work of The Federal Telegraph Co., Lee de Forest ........................................ 18
8. Editorial Notes, Alfred N. Goldsmith ........................................ 21
10. Discussion, Henry E. Hallborg (Terminating page, 57) ........................................................................... 23

### Volume 1, Number 2, April, 1913
1. Radio Operation by Steamship Companies, Robert H. Marriott ........................................ 3
2. Discussion, Robert H. Marriott, Charles A. Le Queuse, Jr., Edward Gage, Frank Fay, Lloyd Espeutchiel, Lester Israel, Alfred N. Goldsmith, and John L. Hogan, Jr. ........................................ 8
3. The Effects of Distributed Capacity of Coils Used in Radio-Telegraphic Circuits, Frederick A. Kolster ........................................ 19
4. Discussion, Alfred N. Goldsmith, Greenleaf W. Pickard, Emi J. Simon, Frederick A. Kolster, Roy A. Weagant, Benjamin Liebowitz, H. E. Hallborg, Guy Hill, Charles A. Le Queuse, Jr., and Lester Israel (Terminating page, 43) ........................................ 27
5. The Relation Between Effective Resistance and Frequency in Radio Telegraphic Condensers, Louis W. Austin ........................................ 35
6. Discussion, A. E. Kennelly, Lloyd Espeutchiel, Lester Israel, Alfred Kuhn, and Alfred N. Goldsmith (Terminating page, 43) ........................................ 39

### Volume 1, Number 3, July, 1913
7. The Seibt Direct Indicating Wave Meter, Emi J. Simon and Alfred N. Goldsmith ........................................ 3
9. The High Power Telefunken Radio Station at Sayville, Long Island, Fritz Van Der Woude and Alfred N. Goldsmith ........................................ 23
11. The Davyday Effect in Radio Telegraphy, A. E. Kennelly ........................................ 39

### Volume 1, Number 4, December, 1913
11. The Multitone System, Hans Rein ........................................ 5
13. Some Recent Radio Sets of the Marconi Wireless Telegraph Company of America, Roy A. Weagant ........................................ 43

### Volume 2, Number 1, March, 1914
16. Radio Range Variation, Robert H. Marriott ........................................ 19
18. Dielectric Hysteresis at Radio Frequencies, E. F. W. Mayer ........................................ 59
20. The Goldschmidt System of Radio Telegraphy, Emil Mayer ........................................ 69

### Volume 2, Number 2, June, 1914
22. The Effect of a Parallel Condenser in the Receiving Antenna, Louis W. Austin ........................................ 131
23. Discussion, John Stone Stone and John L. Hogan, Jr. ........................................ 133
24. Dielectric Hysteresis at Radio Frequencies, E. F. W. Alexander ........................................ 137

### Volume 2, Number 3, September, 1914
28. The Radio Operator Problem, V. Ford Green ........................................ 195
29. Discussion, E. T. Chamberlain, R. B. Woodworth, David Sarraff, V. Ford Green, and John L. Hogan, Jr. ........................................ 211
30. The Operating Characteristics of a Three Phase 500 Cycle Quenched Spark Transmitter, Emi J. Simon and Lester L. Israel ........................................ 217
31. Discussion, John Stone Stone, Guy Hill, and John L. Hogan, Jr. ........................................ 235
33. Discussion, John Stone Stone, Frederick A. Kolster, and Louis Cohen (Terminating page, 243) ........................................ 241
