

Tracking radio stations in Canada is more difficult than in the United States. Two regulatory agencies, the Canadian Radio Television Commission (CRTC) and the Department of Communication (DOC), rather than one (the FCC) make it hard to follow technical and legal changes. There are multiple stations with the same call letters and low power chains of stations licensed to communities in the remote territories. All of this makes Canada a challenge for us. We do our best, but be patient with us. Errors and omissions are unavoidable.

Unlike our listings for the U.S., we don't try to list every Canadian station. We list all major commercial and CBC as well as campus and significant community stations. In addition, we list larger rebroadcasting facilities, which are always noted under the format with the call letters and frequency of the station they repeat. If the rebroadcaster has an office of its own, we list its contact information. If it does not have an office of its own, only the owner and the originating station's phone number are listed.

We have included personnel listings for primary commercial stations and as many CBC stations as would cooperate. For more information on the format descriptions for each station, see the **FORMAT CLASSIFICATIONS** section in the front of the book.

If you have an update, addition, or correction to our data, we would love to hear from you. You can fax us at 603-444-2872 or phone us at 603-444-5720.

POPS 2000 NOW AVAILABLE

FASTER... MORE ACCURATE RADIO COVERAGE

ComStudy 2 Mapping Software

- Fully Integrated Databases
- Automatic Interference Calculations
- Real Time 3-D Displays
- Used by the FCC
- Find Available Frequencies Automatically
- Latest FCC, TIA, and ITU Standards Built-In
- Frequency Range 20MHz to 40GHz
- Cost Effective Mapping
