FM ALLOCATIONS: DISMISSED AMENDMENTS

AR new	Imboden	add 105.7 A, dismissed
CO new	Meeker	add 94.5 A, dismissed

WASHINGTON THIS WEEK

The FCC has made its announcement of which class A FM stations will be allowed to automatically increase to the new maximum effective radiated power of 6,000 watts at 100 meters.

The Commission released two lists, the first a listing of all stations that are fully spaced under the new rules and the second a list of short spaced stations that will be grandfathered to the old standard of 3000 watts at 100 meters.

Stations will be allowed to increase their power to the new levels on or after December 1st, 1989. In order to take the power increase automatically the station must make the adjustment in power by one of the following methods:

1. Replacing a non-directional antenna with a higher gain non-directional antenna, provided the center of radiation above ground does not change more than +/- 2 meters.
2. Changing the transmitter output power.
3. Changing the length or type of the transmission line.
4. Installing or removing components in the transmission line.

Within 10 days of increasing power stations must file a FCC form 302, together with the appropriate filing fee and the supplemental exhibit addressing environmental matters.

These lists were generated from the The FCC's FM Engineering Data Base. This data is an unofficial secondary source of information and in some instances may not agree with primary sources. The FCC may order any Class A station back to its original power if need be, without affording subject stations the opportunity for hearing.

Stations within 320 kilometers of the Canadian or Mexican border do not appear on the list. Stations within the 320 km border zone must wait for agreements to be signed with Canada and Mexico before any increases can be granted.

If you would like to know if your station is on the list give us a call at (703) 684-3622. If you need a copy of the full listing from the FCC please send \$5.00 to PO Box 3568, Alexandria, VA, 22302. We will send both lists as well as the public notice.

The FCC has also opened an inquiry in response to a court decision mandating review of the policy of 24 hour a day prohibition of broadcast indecency. The policy was mandated by Congress in 1988 and stayed pending judicial review; the FCC's inquiry "focuses on Congress' primary interest in protecting children."

Issues the FCC has asked commenters to address include: how pervasive and accessible the broadcast media are in children's lives; the actual viewing and listening habits of children; the availability of indecent material for adults through non-broadcast means; and possible alternatives to the 24 ban, including 1) relegating indecent broadcasts to a time of day when children are least likely exposed; 2) program rating codes or pre-broadcast warnings; or 3) technologies that restrict access to such broadcasts.

WASHINGTON THIS WEEK

The FCC was closed on Friday, November 10 for Veterans Day.

Joe Monie was named FCC Regional Director of the Chicago Region as of Oct. 23. He rejoins the FCC after two years as Regional Manager for Digital Radio Network.

WASHINGTON THIS WEEK (Cont'd)

The FCC has affirmed a decision by the Mass Media Bureau returning the application of Taber Broadcasting Company of New Mexico for a new FM station in Maljamar NM. Taber's original application was unsigned and omitted a required certification that the public has or would receive notice of Taber's proposals.

Lauderdale-McKeehan Christian Broadcasting Corp. has been denied reconsideration of the return of its Loudon TN FM application. Its application had been returned due to an inadvertently omitted page.

The FCC has also denied a request by Double D Broadcasting for reconsideration in the Commission's decision amending the FM Table at Santa Margarita CA; and dismissed a request for review by Reimer Broadcasting concerning amendment of the FM table at Guadalupe CA.

ELSEWHERE

Westwood One has announced it will sell its one half interest in WNEW-1130 New York to Command Communications for \$15.3 million. In exchange, Westwood will buy KJQY-103.7 San Diego from Group W. Group W had originally sold its option to buy KJQY to Command Communications. As part of the WNEW deal, Command also agreed to continue its affiliation with the Westwood-owned NBC and Mutual networks and Westwood-produced talk shows such as Larry King and Talknet. Last week, Command had announced sale of KJOI Los Angeles and KHOW/KSYD Denver to Viacom Broadcasting for a cool \$101.5 million.

Two groups have filed petitions with the FCC to deny renewal of the licenses of WFMT Chicago. The NAACP has alleged "no more than token employment of blacks and other minorities" in its filings against WFMT and twelve other Illinois radio stations up for renewal on December 1. Another group, Friends of WFMT, has filed a separate petition for denial, citing a need for the station's current owner, Chicago Educational Television Association, to turn control of WFMT over to an independent board of trustees to "preserve the station's character as a fine arts radio station."

M STREET

We're faxable! We're interested in any breaking station information you might have - articles, press releases, format changes, market information, just about anything related to radio. We can be faxed material at our regular phone number: 703-684-3622. The machine will know the difference between fax and phone.

WASHINGTON THIS WEEK

In a long running licence renewal fight the Commission has granted the renewal of Metroplex Communications, Inc. to operate WHYI(FM) in Fort Lauderdale, FL. In doing so the Commission denied the competing application of Southeast Florida Broadcasting, LP for a new station. The challenge to WHYI's license was originally filled in 1987.

The FCC has denied an appeal by McCall Broadcasting, Inc. to reverse a previous order dismissing McCall's application for a new FM at Columbus, OH.

FCC broadcast station totals for October, just released show: 4,966 on AM, 5,665 on FM, and 1,797 FM translators and boosters. On the TV side they count: 671 on VHF, 765 on UHF, 602 LPTV, and 4,893 translators. These totals reflect licensed on air stations only and do not included construction permits.

CANADA

The Canadian Department of Communications has deleted CHPR(AM) on 1110 KHz, licensed to Hawkesbury, Ontario.

The CKO News Network has gone silent and is expected to return its stations licenses to the CRTC. Since the network was founded in 1976 it has lost over 40 million dollars and been through several reorganizations and service cut backs. In addition to financial problems the CRTC was constantly pressing CKO to build remaining licensed but unbuilt facilities it had promised in its original application. The stations going dark include: Halifax, Pointe Claire (Montreal), Ottawa, Trononto, Winnipeg, Edmonton, Calgary and Vancouver. All the stations with the exception of Montreal were on the FM band a fact that CKO had often mentioned to the CRTC as a limiting factor in its ability to attract listeners and advertisers to the all news service.

WASHINGTON THIS WEEK

The FCC has released a follow up notice to the Class A station upgrade list. The Commission has added 12 stations, taken 41 off the list and corrected 3 stations. They also clarified who must file the \$100 application fee, stations filing form 302 and do not require a construction permit are not required to include the filing fee. Stations that must first obtain a construction permit must include the \$100 filing fee. Stations may file form 302 without the fee with THE OFFICE OF SECRETARY, Room 222, 1919 M St. N.W., Washington, D.C., 20554. If a fee is required stations may file with the fee section in, Room L-18.

The Commission has granted Group W Radio Acquisition Company a waiver of the one-to-a-market rule. The waiver will allow Group W to purchase WMMR(FM) in Philadelphia from Sillerman-Magee Communications. Group W already owns KYW(AM) and KYW-TV in Philadelphia.

The FCC also granted a waiver of the one-to-a-market-rule to Clear Channel Television, channel 23 in Tulsa, OK. Clear Channel already owns KAKC(AM) and KMOD-FM in Tulsa.

The FCC has denied a petition to deny the transfer of WFEZ(FM) in Williston, FL, from Gulf Bay Broadcasting Co., Inc. to Bogie Broadcasting Co., Inc.

Two pirate radio stations have been shut down and fined by the FCC. In Erlanger, KY, the Detroit office of the FCC located and shut down a unlicensed FM station on 90.5 MHz. Thomas Cason was fined \$750 and surrendered the equipment to the FCC. The second station was seized by the U.S. Marshals in Brooklyn, NY. The station operated on 91.9 MHz and used the illegal call sign WJPL. The U.S. Attorney for the Eastern District of New York will bring civil action against the unnamed operator of the station.

The Commission has granted a settlement agreement between Haith Broadcasting Corp., Grand Rapids 98, Inc. and Don. H. Bardon in Grand Rapids, MI. Haith Broadcasting will be granted the construction permit for a new FM on 98.9 MHz.

More new phone numbers for the FCC. In Chicago: for the public 312-353-0195, for recordings 708-298-5171, and in San Francisco the new public number is 415-744-2722.

ELSEWHERE

The National Association of Broadcasters has set its annual convention for March 31st to April 3rd at the Georgia World Congress Center in Atlanta. The engineering conference will start on March 30th. As a public service, we present for you here the logo you'll see so much of in the coming months.
