WASHINGTON THIS WEEK

This week the FCC released an additional list of Class A FMs now eligible for automatic upgrades to 6,000 watts of power. These 97 additional stations were close enough to the Canadian border to require concurrence of the Canadian government before authorization for the upgrade could be issued. Any M Street readers interested in a copy of the list of stations involved can drop us a note (Box 3568, Alexandria VA 22302) and we'll enclose a copy with your next newsletter.

The FCC has approved a settlement agreement that will end the many years of litigation around the license renewal of WNWK-105.9 Newark NJ. The facility will be licensed to Las Americas Communications, Inc.; as part of the settlement, the FCC amended Las Americas' application to specify Jersey City NJ, which had no previously licensed stations, as its city of license.

The Commission also affirmed previous decisions denying Tri-State Broadcasting renewal of its licenses for KUKQ-1060 and KUPD-97.9 Tempe (Phoenix) AZ; and granting CWA Broadcasting, Inc.'s application for a new station on 94.3 in Cambridge MD.

ELSEWHERE

The long-ailing Financial Business Network has gone dark. FBN flagship station XEKAM-950 Tijuana (San Diego) is reportedly off the air, and the handful of other stations using FBN programming have shifted to new formats. FBN's failure leaves Business Radio Network (BRN) and Money Radio as the two remaining full time business news/feature program sources.

Contrary to rumors circulating in the industry, Seattle-based Braiker Radio Service's satellite-delivered formats are still on the air. Braiker is, however, looking for additional investment capital to help fund operations and future expansion.

NBC Radio has announced a new early morning news program. "First Light...on NBC Radio" will air from 5-6 AM (Eastern Time) weekday mornings, and will be marketed as a bridge between overnight and morning drive segments. The program is set to debut on April 2.

Two format changes listed this week include unique on-air promotions. WRLT-FM-100.1 Franklin (Nashville) debuted its eclectic "Radio Lightning" rock format by airing a weekend of the "first 100 years of recorded music." The listener who correctly identified the most songs from the weekend won a free trip anywhere in the U.S. In southwest suburban Chicago, WUEZ-104.7's announced switch to rock oldies involves a complete replication of the once-popular (1960's-70's) Top 40 format of WCFL, including music, jingles and promotions. WUEZ is also trying to obtain rights to the WCFL call letters as part of the new format.

NEW RULES PROPOSED FOR FM TRANSLATORS

The FCC has put forth a number of proposals for restructuring its FM translator rules. The Commission is proposing to revise and clarify its FM translator rules, including new rules for: ownership and financial support; methods for selecting among applicants; the definition of "major change" in translator service areas; signal delivery; use of commercial, non-commercial and auxiliary band frequencies; interface criteria; and technical requirements for translators.

The FCC will examine each of the current rules separately. The principal proposals are as follows:

Classify translators into two services. The first includes "fill-in" service within existing station coverage areas. The second category provides service to "other areas" beyond the stations coverage area.

A "fill in" service may be owned by either the primary FM station or an independent party, it may rebroadcast the signal using terrestrial microwave transmission facilities, financial support is left up to the parties.

Service to "other areas" may be owned only by independent parties, a primary station is prohibited from supporting, directly or indirectly, any commercial FM translator providing service in this area, both before and after it comes on air.

The current transmitter power output limit will be replaced with a maximum effective radiated power of 1 KW, with the additional restriction that the translators predicted 1 mV/m contour may not exceed the protected service contour of the primary station if the translator is a "fill-in". For "other areas" the 1 KW restriction applies with a restriction on the 1 MV/m contour of 16 km.

FM translators will be allowed on all 80 non-reserved channels. Specific criteria will be applied for determining predicted and actual interference.

Finally, the FCC is proposing to continue the freeze on acceptance of applications for new commercial FM translators or major changes to existing commercial translators for 60 days after the effective date for applicants to amend their applications to conform with the new rules.

The Commission is requesting comments on all aspects of these proposals. As of February 28th, the FCC reported 1,815 licensed FM translators in use.

WBAB AND WWHB ON LONG ISLAND TO SIMULCAST

The new owners of WBAB AM, Freeport, NY and WBAB-FM in Babylon NY have announced plans to simulcast the FM with their presently owned station, WWHB in Hampton Bays, NY. BAB Broadcasting Corp. is purchasing the stations from Noble Broadcast Group and hopes to complete the sale before the summer season on Long Island. Simulcasting the two stations will create a Long Island superstation covering from New York City to Montauk Point. The stations will simulcast WBAB-FM's rock format. WBAB-FM is on 102.3 MHz and WWHB is on 107.1 MHz, both stations are class A facilities and are planning to upgrade power under Docket 88-375. BAB Broadcasting has also announced plans to restore the long time WGBB calls to WBAB AM on 1240 KHz.

BRAIKER RADIO SERVICES CALLS IT QUILTS

Sunday night at 12 o'clock Pacific time, Braiker Radio Services pulled the plug on its struggling programming service. At the time of its death it was still looking for a last minute sale or financing. They had 38 affiliates on air: 17 country, 12 oldies, 4 AC and 5 for the innovative "Mega" format. By sign off all the Braiker clients we contacted had made arrangements for alternative programming..

**WASHINGTON THIS WEEK**

**"We Granted Them WHAT?"** The FCC has reversed course and vacated its previous grant for a 20,000 watt, 500 foot HAAT booster station in Jacksonville FL. The owners of WIOI-FM Brunswick GA, had been granted the booster as a critical part of efforts to market WIOI as a Jacksonville station. The approved booster would have effectively become WIOI's main facility, with studios and offices in Jacksonville.

In its decision, the FCC vacated its grant of an application for authority to construct the station, rescinded the construction permit, dismissed the CP application as "patently defective," and dismissed as moot the application for license for WIOI-FM-1. No reason was announced for the FCC's actions.

ELSEWHERE

AM and Other Subcarriers. KKGO-105.1 Los Angeles has announced plans to rebroadcast its jazz-formatted AM station KKJZ-540 Hesperia, on its FM subcarrier. KKJZ will make the subcarrier rebroadcast available by selling subcarrier converter receivers to listeners for \$150.00 each. If successful, the plan has the side benefit of being able to demonstrate to advertisers that KKJZ, a narrowly targeted station, has active listeners willing to spend money.

Two Demographics Radio Ignores: Kids With Allowances, Retirees with Paid-Up Mortgages. Investors including the President of Metroplex Communications and the former GM of KPAL (Little Rock) have launched a new children's programming network, Kid's Choice Broadcasting Network, using Metroplex's WPRD-1440 Orlando as its first full time outlet. Kid's Choice is the third group to recently announce plans for a kid's network; others are based at WWTC, Minneapolis, and Ragan Henry's KIDZ Kansas City. WBZ-1030 Boston has also announced plans for a new one-hour children's show Sunday evening. One of the strongest long-term arguments for any of these services is the need to teach a new generation of listeners to use radio - particularly AM - in an era when kids focus almost entirely on television.

A demographic that already knows how to use AM radio - older adults - received a boost this week when WKZN-870 Portland dropped its news-talk plans to pick up the "Music of Your Life" format recently abandoned by WYNZ-970. WYNZ gave up its standards format, which pulled more than double the 12+ audience in the fall 89 Arbitron of the FM's oldies format it now simulcasts; the FM format was perceived as more salable. In addition to the best ratings of any AM station in the state, WKZN also inherits an estimated 23,000 "Music of Your Life Club" members.

Another Pirate Shut Down. The FCC's Field Operations Bureau, in coordination with the Miami office, has shut down an unlicensed Florida pirate station. Eloy Escagedo of Miami was fined \$1000 for illegally operating on 7350 KHz, the station was identified as "Radio Antorcha" on the air.

FCC February Station Totals.

M STREET

M Street is proud to announce that we have entered into an agreement with PRS Corp. of New York & Hong Kong to supply station and format information for ID LOGIC(r), a system that integrates station data into radio receivers. The first receiver to use the system will be Panasonic's new CQ-ID90, a car radio that will scan by format and display each station's call letters and frequency. The CQ-ID90 model will be available in May; we hope to have a display model available at the National Association of Broadcasters convention in Atlanta next week.

M Street's entire staff will be at the NAB, and we're looking forward to meeting a number of our old friends and new clients. If you'd like to hook up with us while you're in Atlanta, call us in the next week at 703-684-3622.

WASHINGTON THIS WEEK

It Ain't Over, Even When the Fat Lady Sings. The call letter change of WKJY-1550 Parsons TN to WKJQ this week ends the latest instance where an FCC reversal caught - and cost - a broadcaster. WTBP-1550 had been granted the calls WKJY last Spring by the FCC, even though another WKJY had existed for years in Hempstead NY. The FCC misplaced a card file containing the record of the existing station.

Last week, WIOI-FM Brunswick GA was stung when the FCC reversed an earlier

WASHINGTON THIS WEEK (Cont'd)

decision allowing WIOI to place a high-power booster 60 miles away in Jacksonville FL. The booster had substantially altered WIOI's marketing and increased the station's value. Earlier this month, an FCC-approved settlement agreement allowing the contesting parties to sell to Rowland Broadcasting was reversed at the FCC's initiative - after Rowland hired staff and signed programming contracts for the new FM it had "irreversibly" been granted. These and other examples raise an interesting question: when, exactly, does an FCC decision become final?

FCC Releases Revised New Rate Card. The FCC has issued several revisions to its new fee schedule. New rates will take effect "as early as June 1." Fees not listed in the previous fee schedule include:

|  |       |
|--|-------|
| Remote control (AM)  | \$ 35 |
| Call sign modification (AM/FM/TV)                              | 55    |
| STA (other than to remain silent) (all)                        | 100   |
| Extension of time to construct or replace CP (AM/FM/TV)        | 200   |
| Petition for rulemaking for city of license or channel (FM/TV) | 1565  |
| Ownership report (AM/FM/TV)                                    | 35    |

Other fees in the new schedule were listed in the June 5, 1989 MSJ (Vol. 6, #23).

ELSEWHERE

Thomas Root, the Washington communications lawyer involved in a bizarre plane flight and shooting last summer, was indicted last week on 33 counts of fraud, filing false and altered documents, forgery and obstruction of justice in dealings with the FCC and with clients trying to obtain new Docket 80-90 FMs. Alleged incidents include double-billing clients, forging FAA clearances and letters to and from the FCC, and misrepresenting negotiations for land leases.

Atlanta's New FM? This week's rulemaking proposal to move WHMA-FM-100.5 to Sandy Springs GA is part of an elaborate plan by new WHMA-FM owner Tom Gammon to convert the station into a major Atlanta FM. The shift, if approved, moves WHMA-FM nearly 90 miles east into Atlanta; creates a new Anniston FM; limits the upgrade potential of several other Atlanta area FMs; and downgrades WSSL-FM-100.5 Greenville SC from Class C to Class C1. The uproar over WHMA-FM's potential move includes protests and outrage among local listeners upset at "losing" Anniston's only FM; reluctance to sanction the move in Fulton County, which is trying to block the efforts of Sandy Springs to incorporate; and resentment among several Atlanta FMs. Cap Cities/ABC, owner of country rival WKHX on adjacent 101.3, has pulled all business from Gammon's former company, American Media Brokers, to protest the move. While the FCC has approved moves of such distances before, they have never involved existing stations, major FM facilities or major markets; the move if approved would increase WHMA-FM's value by 400-500%.

APRIL BFM CALENDAR NOTES

Quarterly Issues/Programs Lists for Jan.-Mar. should be in stations' public files by Apr. 10. Federal taxes for stations filing calendar year individual returns are due Apr. 16. By Apr. 15, stations with tower lights must conduct and record quarterly tower light inspections. Daylight Savings Time begins April 28.
