The M Street Journal

Radio's Journal of Record

NEW YORK NASHVILLE June 3, 1998 Vol. 15 No. 22

"LOST OUR LEASE, FORCED TO MOVE!". . . You're used to seeing a sign like that on a retail storefront -- but not at the FCC. Here's the latest chapter in the tug-of-war over the forced move to The Portals: The General Services Administration informs FCC Chairman Bill Kennard that it has terminated the leases on various buildings clustered around 1919 M Street. The agency MUST move, according to the GSA. Meanwhile, over at the FCC (where nobody wants to move), a spokeswoman tells the Washington Post the Commission is "caught in a classic Catch-22." That's because (she claims) Congress hasn't appropriated the necessary funds to relocate. The government has been paying double rent for the FCC since last July. So far it's shelled out about \$14 million for the empty space at The Portals.

WHAT'S SPANISH FOR "PAYOLA"?... The illegal kind, that is -- not the recent above-board pay-for-play stuff. As many as 20 U.S. Spanish-language music stations have been served subpoenas related to a federal investigation of payola allegedly involving the Fonovisa record company. The L.A. Times' description of the alleged operation sounds like the old-fashioned kind of payola: An independent record promoter delivers actual cash in an envelope to radio stations. That monthly envelope might contain as much as \$10,000, which means radio station personnel could be facing not only payola charges, but tax evasion. Mexican media conglomerate Grupo Televisa acknowledges that its Fonovisa record division "has made certain promotional payments in apparent violation of applicable laws." Televisa apparently reported the irregularities to the DOJ in the first place and is cooperating in the investigation. The L.A. Times reports that "many of the radio stations and record distributors are in Los Angeles, sources said." But nobody's mentioned specific call letters. Fonovisa's biggest star is Enrique Iglesias, son of Julio. The paper also says it's unclear whether the payoff men knew that cash payments are illegal in the U.S., "because such transactions are legal and a common practice in Mexico."

WASHINGTON THIS WEEK

The Commission isn't giving up its EEO rules without a fight -- and that fight is taking it back to the D.C. Circuit Court of Appeals for a possible "en banc" hearing by all 11 judges. On April 14, the Commission took a crushing legal blow from a three-judge panel of the court, when it struck down as unconstitutional about 30 years of accumulated FCC policy on affirmative action. (That was Decision No. 97-1116.) Now Chairman Bill Kennard, after being on the receiving end of lobbying from civil rights leaders and probably losing some sleep caused by his own conscience, has asked for review of the decision by the full court (an "en banc" hearing). The case involves the licenses of KFUO and KFUO-FM, Clayton, MO (St. Louis), held by the Missouri Church-Lutheran Synod.

"Low Power Hockey Radio"??? M Street notes the NHL has applied for experimental licenses related to the playoffs: "Request to conduct experimental indoor arena event FM broadcasts in conjunction with National Hockey League Stanley Cup Playoffs at arenas in Washington, D.C. and/or Dallas, TX, Buffalo, NY or Detroit, MI." We also like the requested calls: "WN2XHL." These requested stations would be at 88.1 MHz.

An antitrust specialist joins the Commission as its new Director of Research, in the Office of Plans and Policy. Tom Krattenmaker is currently on leave from the William and Mary Law school (where he was most recently the dean), and worked at the FCC from 1978-1980.

WASHINGTON THIS WEEK (cont'd)

Should two local owners have "99.6%" of the local revenue? Two Commissioners take the Mass Media Bureau to task for its approval for Regent to buy four more stations in the Redding, CA market. Susan Ness and Gloria Tristani wanted the Bureau or the Commission itself to make a "more rigorous examination of the facts", in view of the evidence that Regent's eventual six-station cluster will control about 64% of the local revenue. Another Redding owner will hold the licenses for three other stations. Ness and Tristani contend that "Together, the two owners control a whopping 99.6% of the market's radio revenue." The two Commissioners specifically state that they're not rendering an opinion about the Regent transfer. But they do insist the Commission "has not fulfilled its statutory responsibility to make the appropriate inquiry and determination." (Joint Press Statement regarding the Mass Media Bureau's approval of assignment and transfer in Redding, CA)

"And don't come back..." The Commission has had it with a certain Vincent L. Hoffart, Sr. He's the petitioner who has repeatedly filed against various applications of stations in the Northwest. The FCC warned him earlier this year about abusing its processes. Now Hoffart's the subject of a new Memorandum Opinion and Order that's quite unusual: Hoffart will actually have to obtain prior approval before filing any future pleadings. Any future motion, pleading or other document Hoffart submits must have a cover page, and here's how it must begin: "Pursuant to previous findings by the FCC that Vincent L. Hoffart, Sr. has abused Commission processes." M Street can't remember anything like that in recent Commission history. (MO&O adopted May 22, released May 26)

Headlines (but no news) in last week's story that the Department of Justice had forced Sinclair to buy fewer stations in New Orleans than it had planned. Actually, it's old news that Sinclair will be dealing away three stations to Allen Shaw's Centennial: classic hits WRNO-FM (99.5 MHz), R&B oldies KMEZ, Belle Chasse, LA (102.9 MHz) and standards WBYU (1450 KHz). Sinclair did get some brownie points from the DOJ's antitrust czar, Joel Klein: Sinclair "came to us before we began our investigation. ..[and] offered to fix the competitive problems and made a serious proposal right off the bat."

CANADA THIS WEEK

Howard Stern's ratings slipped a bit in both Toronto and Montreal -- mainly among female listeners, according to the Toronto Star. Even so, the latest BBM ratings show that the very un-Canadian Stern is still tied for third in Toronto with an 8.9 share. (Stern's on rock CILQ, Toronto [107.1 MHz].) And he apparently did post gains in male demos, his target. In Howard Stern's other Canadian market, his show lost share on rock CHOM, Montreal (97.7 MHz). But M Street notes two key things about the King of All Media in Canada: He's clearly established himself as a player. And -- he's still there, despite efforts to force him out of the country.

ELSEWHERE

The giant \$2.1 billion deal between SFX Broadcasting and Hicks Muse closes -- and sets off a chain reaction that includes format changes and station spin-offs. First move had Capstar (which originally made the agreement with Bob Sillerman) swapping away 11 major-market SFX stations in Dallas, Houston, San Diego and Pittsburgh to big brother Chancellor Media. (Book value \$637.5 million.) From there: Chancellor in turn dealt modern "Planet" KKPN, Houston (102.9 MHz) to Heftel for \$54 million; as expected, Heftel promptly killed off the Planet and started doing regional Mexican in a simulcast with KLTN, Port Arthur (93.3 MHz). Also in Houston, Chancellor did a Doctor Kevorkian on standards KQUE (1230 KHz) and started airing announcements from the GM telling listeners to switch over to Chancellor's KBME (790 KHz). M Street's been wondering why Chancellor would bother to break away the former KKBQ (AM) and start doing a satellite-delivered standards format, when it was about to acquire KQUE. Now we know. KQUE was still stunting (with no new format) at the Journal's presstime. Star Media Group's Paul Leonard brokered the SFX-Capstar and Capstar-Chancellor transactions.

In addition to the May 29 closing on its SFX deal, Capstar was also racing to go public, via its 31 million-share Initial Public Offering. The IPO hit Wall Street on Wednesday, May 27 priced at \$19 per share. Since then it hasn't exactly performed like Microsoft or Dell, but it did harvest the \$680 million or so that Hicks Muse needed to complete the SFX buy. (Capstar trades under the symbol "CRB.")

CBS and Jacor finally announced some compliance-related station swaps that will satisfy various Department of Justice and FCC concerns for both groups. Jacor swaps away six stations and gets five back from CBS, in deals encompassing five

ELSEWHERE (cont'd)

markets. The specifics: CBS gets additional stations in the Twin Cities with the pickup of smooth jazz KMJZ (104.1 MHz) and R&B oldies KSGS (950 KHz), both licensed to St. Louis Park. (CBS has long owned news/talk WCCO and soft AC WLTE there). CBS also enters the Columbus market with the acquisition of three stations there from Jacor: rock WLVQ (96.3 MHz), rock WAZU, Circleville, OH (107.1 MHz) and country WHOK, Lancaster, OH (95.5 MHz). On the Jacor side of the ledger, Randy Michaels' company starts to flesh out its Bay area holdings with the pickup of modern rock KOME, San Jose (98.5 MHz) and classic rock KUFX, Fremont, CA (104.9 MHz). It beefs up its St. Louis complement with classic rock KSD (93.7 MHz) and oldies KLOU (103.3 MHz). And in Baltimore, it finds new sisters for soon-to-be-acquired country WPOC (93.1 MHz), with classic hits WOCT (104.3 MHz) and black gospel WCAO (600 KHz). M Street notes that this deal has a little something for everyone -- but maybe a bit more for Jacor.

Just moments later, Jacor says it's selling a FOURTH station in the Columbus, OH market -- this one to minority-owned Blue Chip Broadcasting. Station is modern rock WZAZ-FM, Upper Arlington, OH (98.9 MHz). Columbus is already a stronghold for Cincinnati-based Blue Chip: It owns urban WCKX (107.5 MHz) and urban AC WMXG, London, OH (106.3 MHz) in the center of the Buckeye State. And it's paying Jacor \$10.1 million to add WZAZ-FM. The Crisler Company advised Blue Chip in the deal.

Owner/syndicator Z-Spanish buys its third station in the Sacramento market: urban AC KQBR, Davis, CA (104.3 MHz). Amador Bustos says Z-Spanish will keep the format, as Z-Spanish expands focus to cover both Spanish and urban listeners in the market. "The Breeze" KQBR has done several formats and is currently in receivership. Z-Spanish is buying it for \$5.6 million. Bustos' other Sacramento stations: regional Mexican KZSA, Placerville, CA (92.1 MHz) and romantica KSQR (1240 KHz).

WNHC, New Haven (1340 KHz) is silent right now, pending a transfer out of bankruptcy to new owner Yale Broadcasting Corp. The New Haven Register says the controversy heated up when some local groups marched in support of Buckley Broadcasting's bid to buy the stand alone urban AC. (Previous owner was minority broadcaster Willis Communications, which is unrelated to group owner Willis Broadcasting.) Another piece of the controversy: Yale Broadcasting, which owns urban AC/dance WYBC, New Haven (94.3 MHz), got funding to make its winning \$775,000 bid for WNHC from SFX Broadcasting -- which has a Sales Marketing Agreement with WYBC. (SFX, of course, just sold its stations to Capstar -- it owned rock WPLR, New Haven at 99.1 MHz.)

Clear Channel mops up another station in North Carolina's Triad market of Greensboro/Winston-Salem. It's southern gospel/talk WSML, Graham, NC (1200 KHz); M Street lists the owner as Alamance Broadcasting, though Clear Channel didn't specify a seller name, price or broker. Lowry Mays' company owns country WTQR (104.1 MHz), talk WSJS (600 KHz) and modern rock WXRA (94.5 MHz) in the market. WTQR and WSJS are licensed to Winston-Salem; WXRA to Eden, NC.

Jacor-owned Premiere Radio Networks just threw some more chips on the table and is ready to play with the big-network guys like ABC and Westwood/CBS in the RADAR ratings. It's launching four new sales networks and also listing the daily Dr. Laura Schlessinger show (with 450 affiliates) in the RADAR personalities derby.

Just how big a threat IS satellite-delivered Digital Radio? Most U.S. broadcasters don't seem worried -- but CD Radio Inc., one of the two national license-holders, just announced it's doubling its channel capacity from 50 to 100 channels. (And M Street notes that while it's being talked about exclusively as an in-car listening system, there's nothing to prevent it from being used in fixed locations.) CD Radio has bought additional satellite space for an expected late-1999 launch of its new service. It's also changing launch-service providers, from Arianespace to Loral. Some of those new channels could bring additional revenue: CD Radio's David Margolies says he won't air commercials during the 24hour music formats, but doesn't promise that for the non-music channels.

Is Disney/ABC getting ready to launch a big-bucks effort to make ESPN Radio the dominant sports franchise? The Chicago Sun-Times says Disney is close to dropping \$21 million on the purchase of WMVP, Chicago (1000 KHz), with the goal of clearing ESPN Radio programming on it. M Street's own sources are confirming the story of negotiations -- and now M Street wonders if that's the first piece of a much wider effort to build a network of O&Os for ESPN Radio. Those would presumably be in addition to other (non-owned stations) that also feature ESPN. Could it be that Disney has decided to challenge syndicator/station owners like One-On-One Sports? Stay tuned.

ELSEWHERE (cont'd)

Shakeup in the syndication world, where Jones has just acquired New York-based MediaAmerica. Gary Schonfeld and Ron Hartenbaum launched MediaAmerica in 1987 to handle ad sales for radio programs produced by others. Over the years they've developed a stable of 70 shows and networks (and have also gotten into program production themselves). One of their biggest customers on the network side has been Jones International Networks -- and now Jones is buying them, for an undisclosed price. Schonfeld and Hartenbaum keep their operation in New York and take new executive positions inside Jones, reporting to Jones International President Greg Liptak. Jones Radio Network President/GM Eric Hauenstein continues in his role.

The EXCL group of Hispanic radio stations is likely due to get a new owner soon, according to the New York Daily News. The paper says bidding for parent Latin Communications Group could hit \$300 million, and Heftel is one of the four serious bidders. Another strong party: Athena Marks and the estate of her late husband Christopher Marks. They founded the EXCL radio group and stayed on when it was acquired by Latin Communications Group (which also owns three Spanish-language TV stations and New York's El Diario La Prensa newspaper).

All traffic, all the time: It's Saul Levine's answer for what to do with expanded-band KGXL, Costa Mesa (1650 KHz) soon to be KKTR, in the L.A. market. People often ask us stuff like this, so M Street will tell you that Los Angeles was the site of a PREVIOUS traffic-based radio station. That was KHJ (930 KHz), after its Boss Radio glory days and before it became the Spanish news/talk KKHJ of today. But the old KHJ "Car Radio" format flopped, and the Levine braintrust thinks they know why: It also played music along with the frequent traffic reports. Their concept for "K-Traffic" KKTR is all talk and no music. Programming actually comes from outside, courtesy of Jacor-owned Airwatch America. The station will add spots and other station business from its own studios. (KGXL had been doing standards as part of a simulcast with KGIL, Beverly Hills at 1260 KHz.)

Big music licensing fight in Puerto Rico, which is suddenly getting a lot of attention (Arbitron just made it market #11 starting with the Fall survey). This legal spat is between BMI and several music companies on one hand, and Raul Bernard and his LAMCO and ACEMLA. BMI and the others have filed a copyright infringement suit against Bernard. Among their claims: Bernard claims to hold the rights to 470 music works that are in fact represented by BMI. They also continue to claim that representatives of Bernard's businesses contacted current BMI customers (including composers) and solicited them to sign directly with ACEMLA or LAMCO.

A strike against Auntie Beeb? Yes, technicians at the BBC staged a 24-hour strike that prevented many BBC domestic news shows from being heard, and also kept some BBC World Service shows off the air. The BBC employs some 7,000 techs, and they're upset over various BBC plans -- including one to restructure its technical operations into a separate company which would also do production for other (commercial, that is) broadcasters.

Country radio Hall of Famers: The CRB announces five new inductees into the 1998 Country DJ Hall of Fame, and the list contains familiar names. They are: Bob Kingsley, Frank Page, Lee Shannon, Paul Simpkins and Marty Sullivan. Induction ceremonies are June 25 at the Renaissance Hotel Ballroom in -- where else? --Nashville.

Westwood announces the new "1998 Summer Country Concert Series", beginning with Martina McBride/Michael Peterson (July 17-19), Bryan White (July 31-August 2) and Mark Chesnutt (August 14-16).

M Street couldn't let the departure of Washington, D.C. General Manager Goff Lebhar go without a quick appreciation: He managed WWDC (1260 KHz) and WWDC-FM (101.1 MHz) for most of 20 years, and during that time helped put Howard Stern together with Robin Quivers (in 1981). He and Stern's team had some fearsome fights, but Lebhar was always a LOCAL general manager. Paul Farhi's Washington Post article (August 26, 1997) made his feelings about ownership consolidation famous: "Did [Congress] realize that half a dozen people, all males, would someday dominate what goes on the radio, who have no obligation to satisfy anyone but Wall Street? I don't think they had any idea what would happen in the radio field." Chancellor closed on WWDC/WWDC-FM last Tuesday, and Lebhar was o-u-t.

* *

The M Street Journal

Radio's Journal of Record NEW YORK • NASHVILLE June 10, 1998 Vol. 15 No. 23

AMFM GOES GLOBAL. . "Rockline" and its siblings have been gobbled up by Chancellor-owned AMFM Radio Networks. Seller is L.A.-based independent Global Satellite Networks, and David Kantor's strategy is beautiful: In one fell swoop he adds a formidable lineup of syndicated rock shows to his CHR/AC lineup of Casey Kasem shows. "Rockline" is a 90-minute weekly interview-and-music show that's a staple of many rock stations' lineup. Other Global shows: "Reelin' in the Years", "Modern Rock Live" and "Live from the Pit." Chancellor didn't reveal terms of the deal with Global.

RADIO'S ROLE MODEL - WAL-MART?... Ever think you'd hear "radio" and "Wal-Mart" in the same sentence? Other than to ask why Wal-Mart doesn't use radio very much to market itself? Capstar interim COO John Cullen explains the corporate strategy to a conference hosted by BT Alex. Brown: Capstar wants to be "the Wal-Mart of middle-market radio", because it avoids the top-30 markets and looks to build strong regional clusters of stations. Capstar's big show-and-tell item for the New York audience was the "Star System." That's the Virtual Radio computerbased system that allows one DJ to produce programming for multiple stations from one central location. Star System will also handle other station functions like traffic and billing.

WASHINGTON THIS WEEK

FCC Chairman Bill Kennard should be checking for bullet holes and bleeding after his three-hour ordeal in front of the Senate Subcommittee on Communications (Wednesday morning, June 10). Kennard went in with a list of accomplishments and goals but met a hail of fire from Senators over the implementation of Bill Clinton's Internet-for-schools proposal. All five Commissioners made the trek to the Senate as part of a hearing on "Reauthorization of the FCC" -- really a look at restructuring it. Kennard testified about recent procompetitive and streamlining moves at the Commission. Those include abolishing the Competition Division and getting along with just three Administrative Law Judges, since two have recently retired. As usual in such situations, Kennard also carried a wish list of things he wants from Congress: funding to carry out future projects. Ability to offer buyouts to FCC staff, to winnow down the payroll. And authority to dispense with prior approval for pro forma transfers of radio licenses. Kennard sounded a now-familiar theme: more Commission reliance on "selfcertification" -- licensees certifying compliance with Commission rules.

Are there 100 pirate stations? Or 1,000? The FCC's Bill Kennard tells the Senate his agency has now shut down more than 200 pirate operations. And after completing a "state-by-state inventory" of the remaining unlicensed stations, it has concluded there are only about 100 left. Kennard vowed to put those folks out of business to complete the campaign. But is that the right number of pirates? We at M Street DO keep a database of licensed U.S. (and Canadian) stations, and we do publish this weekly Journal and the "M Street Daily" fax. But NOBODY knows the true number of unlicensed radio operations, and the piratemovement people claim that it's closer to 1,000.

More expanded-band AM grants come out of the Commission, including a second one for CBS (in Charlotte) and another one for Salem (in Denver). CBS gets a 1660 KHz facility attached to black gospel WGIV, Charlotte (1600 KHz). Salem picks up a 1650 KHz facility attached to religious KRKS (990 KHz), Denver.

Most unusual: The Commission canceled one Open Meeting (first scheduled for Tuesday, June 9) and added another (for Thursday, June 11). What happened? Politics, maybe. The agenda for the June 9 meeting leaned toward Common Carrier items tied to the so-called Universal Service provision to help fund Internet access for public schools. Congress made the issue into a football, and a LATER Sunshine Notice killed the June 9 afternoon meeting and replaced it with a June 11 meeting with a more normal-looking agenda. Item #1: Easing some technical requirements for FM operations as part of the FCC's Streamlining initiative.

Not a lot of turnover in THIS FCC job: The new Chief Administrative Law Judge at the Commission is Joseph Chachkin. He's served as an ALJ since 1979, and has worked at the FCC almost continuously since 1961.

You can order new business cards for NAB attorney Jack Goodman: He's just been promoted to Senior Vice President/General Counsel, reporting to Executive VP/Law and Regulatory Policy Jeff Baumann. Goodman's first job at the NAB was in 1990, as Special Counsel.

The DOJ gets some ink about another consolidation deal that gets restructured: It finds that Capstar's proposed purchase of two Cedar Rapids FMs from KRNA, Inc. would create too much concentration -- 49% of the local market ad revenue. Capstar wanted to acquire both country KXMX, Cedar Rapids (102.9 MHz) and rock KRNA, Iowa City, IA (94.1 MHz). Instead its settlement agreement with Justice has it buying just KXMX and abandoning plans to pick up KRNA. Current Capstar stations in Cedar Rapids include soft AC KDAT (104.5 MHz).

Spreading germs? Yes, M Street just can't resist passing along the verbatim language from a filing we found for an asset purchase agreement just filed at the FCC. (We'll shield the guilty party by withholding the call letters.) Section Six says "Seller will continue to maintain the Station under the germs [sic] of the licenses..." Somebody DID catch the typo and strike through "germs" and write "terms" above it. But just in case the Health Department calls....

WASHINGTON THIS WEEK (cont'd)

More on the Jacor-Nationwide front, this time in Dallas: The FCC has cleared the way for Nationwide to acquire KEGL, Ft. Worth (97.1 MHz) by dismissing a couple of informal objections and issuing a \$2,000 Notice of Apparent Liability for a Howard Stern broadcast back in 1993. Dallasite Tom Blackwell and the "Dallas Association for Decency" objected to license renewals for KEGL based on alleged indecency and Stern's June 12, 1997 remarks about pressure groups trying to lodge complaints against him at the FCC. The Commission DID find Stern's September 30, 1993 remarks about his wife's panties to be legally indecent, and issues a \$2,000 NAL. So Nationwide can acquire rock KEGL -- and then sell it to Jacor. (FCC document disposing of the complaints is DA No. 98-1064)

CANADA THIS WEEK

Latest installment of the soap opera surrounding WIC International: The drama's almost completely over. Izzy Asper's CanWest Global failed to capture WIC. Jim Shaw's Shaw Communications DID get WIC. And now WIC publicly rebuffs CanWest's \$200 million (Canadian) offer to buy WIC's 12 radio stations. WIC President John Lacey says WIC's new radio strategy is to either acquire additional stations (now that the CRTC has relaxed local-ownership rules) or pursue joint ventures with other station owners. But the drama is not completely over: Lacey admits that results from WIC's radio business have been "disappointing."

Three resignations from the board of WIC: Michael Francis, Edmondo Giacomelli and Roderick McLennan resigned as of June 5. No immediate replacements for the trio from WIC Chairman Robert Brodie.

Fallout from proposed menage-a-trois may lead to a new Canadian duopoly. A complex deal in which CFBC and CJYC-FM in St. John, New Brunswick were to be sold by Fundy Cable, Ltd. to Maritime Broadcasting System, Ltd. and then sold immediately to Newcap, Inc. has come undone. Newcap bailed out of the arrangement as a result of unspecified contractual obligations that Fundy imposed on Maritime. Taking advantage of Canada's newly liberalized radio regulations, Maritime has asked the CRTC for permission to complete its part of the deal and retain ownership of the stations. If approval is granted the sale will create Canada's first same-language commercial radio duopoly under the new rules as oldies CFBC and rock CJYC-FM combine with Maritime's gold-based AC CIOK-FM.)

Toronto's digital dial: The Canadian Radio-television and Telecommunications Commission (CRTC) has issued frequency assignments for the new digital radio service in Toronto. The first stations approved for the new service will all broadcast using the EUREKA-147 digital audio broadcasting system. Each station will simulcast the programming of an existing AM or FM radio station along with no more than 14 hours a week of other, non-simulcast, programming. Each DAB frequency will carry up to five stations. The DAB frequencies and their simulcast stations are: 1456.304 MHz - CFNY-FM, CFTR, CHFI-FM, CHUM AM & FM; 1458.048 MHz -CFRB, CKFM-FM, CJCL, CJEZ-FM, CJRT-FM; 1461.536 MHz - CBL-FM, CBLA-FM, CJBC AM & FM; 1465.024 MHz - CHIN AM & FM, CHOG, CILQ-FM, CISS-FM. All of the stations will operate with 5,084 watts from a transmitter atop Toronto's CN Tower.

ELSEWHERE

Another Cumulus sighting -- this time in Topeka, KS (Arbitron market #180). M Street notes from the latest FCC apps that Cumulus is entering the Topeka market via the purchase of four stations from Midland Broadcasters. They are: AC KMAJ-FM (107.7 MHz). Classic rock KDVV (100.3 MHz). Standards KTOP (1490 KHz). And sports/talk KMAJ (1440 KHz). We checked Jim Duncan's new 1998 Edition of the Radio Market Guide for some revenue numbers: the Topeka market did \$7.6 million last year. The Midland quadruplets accounted for 33.9% (nearly \$2.6 million) of that.

M Street also has additional Cumulus sightings in South Carolina this week, where it's acquiring two stations licensed to Manning, SC: sports WYMB (920 KHz) and country "Wheels 92.5" WHLZ (92.5 MHz). Seller is Clarendon County Broadcasting.

Jacor doesn't actually own the Atlanta-market FM that's called "WGST-FM", the one that simulcasts its talk WGST (640 KHz). It's still not buying the station from group owner McClure -- but it does reach a new five-year LMA agreement that contains a so-called "put/call" clause allowing Jacor to purchase the station for \$31 million. WGST-FM, Canton, GA (105.7 MHz) is licensed to Cherokee Broadcasting; this deal was brokered for McClure by Questcom Brokerage's Don Bussell.

l

ELSEWHERE (cont'd) WAIK, Galesburg, IL (1590 KHz) has been sold to WPW Broadcasting, which owns country WRAM (1330 KHz) and AC WMOI (97.7 MHz), licensed to Monmouth, IL. Seller is Michael McCulloch's Northern Broadcast Group. Price is \$439,000 and Ralph Meador brokered.

as expected, consummated its \$2.6 billion acquisition of Steve Dodge's CBS. American Radio Systems (Friday, 6/5/98). Now we wait to see whether Mel Karmazin will make further station swaps or acquisitions. He says he's looking to expand in both radio and outdoor (which reports on the CBS corporate balance sheet as part of the CBS Radio division).

Trade your problems away: The DOJ doesn't like local station clusters to have more than about 40% of the market revenue, so Jacor and Hicks Muse handle their mutual DOJ-related problems by swapping stations in Cleveland and Pittsburgh. Jacor sends sports WKNR, Cleveland (1220 KHz) to Hicks Muse-owned Capstar. And Capstar sends sports WTAE, Pittsburgh (1250 KHz) to Jacor. Jacor's about to acquire significant additional properties as part of the Nationwide deal; Hicks Muse, through Chancellor and Capstar, had too much of Pittsburgh. It's structured as a tax-free like-kind exchange (but neither was releasing the value of the transaction).

Speaking of Chancellor -- It's also bringing home the Bacon. Yes, that bad pun means KEVIN Bacon, the actor whose not-so-secret ambition is to be a rock star (and who does play in his own rock band). He'll host a new two-hour weekly show for Chancellor's AMFM called "The Guitar Show with Kevin Bacon." It debuts the weekend of September 5-6 and will be produced by Ben Manilla Productions.

It's amazing -- but the "world's largest democracy" still doesn't have privately-owned radio stations. We're talking about India, which has clung to its BBCinspired system of government-owned radio outlets. (There have apparently been a few private stations granted on a case-by-case basis, and some satellite operations beam into India from neighboring countries.) That may be about to change as the Indian cabinet is reportedly ready to end the government monopoly on radio broadcasting from Indian soil. As in many other countries, the government would limit foreign ownership of radio to about 20%.

Lowry Mays has European broadcasters running scared of what Bloomberg News calls "the Clear Channel juggernaut": Now that Clear Channel's on track to acquire British-based outdoor power More Group Plc, analysts expect it to get busy and start buying radio stations in the same European markets. It's the reverse pattern from the U.S., where Lowry Mays started out owning a radio station in San Antonio, then added billboards and outdoor media more than 20 years later. This time Mays has an immediate platform of outdoor to build from. One difference is that many European governments forbid foreigners from owning a majority share of their media (same for the U.S., by the way). So Clear Channel may have to forge more of the partnerships it's already got in Australia, New Zealand and China.

Satellite-radio service CD Radio has gotten most of the ink lately, but M Street notes there are TWO national satellite-service providers racing to provide service. The other one is American Mobile Radio, and it just unveiled its brandnew senior management team. Cable and pay-per-view veteran Hugh Panero is President/CEO. More familiar names to those of us in the radio industry: Lee Abrams and Joe Dorton. Abrams is the innovative programmer who created the "Superstars" rock format in the 70s and has consulted ABC Radio Networks; he becomes Senior VP, Content and Programming for American Mobile. Dorton's career includes running the Bonneville and Gannett radio groups. He's now AMRC's VP of Advertising Sales.

If Jacor's still a player in the bidding for Talk Radio, one of the UK's three national radio licenses, it may not have Rupert Murdoch on its side. It's hard to tell just what's going on, but Murdoch's News Corp. just took a 20% stake in a bidding group led by onetime Murdoch newspaper editor Kelvin MacKenzie. (MacKenzie left the Murdoch payroll three years ago to join rival Mirror Group.) Jacor had been among the reported interested bidders, but media octopus News Corp. may now have the upper hand. British radio is just coming of age -- and one of the things it doesn't have is a Rush Limbaugh or Dr. Laura to galvanize talk radio. In its first three years, the Talk Radio station has been a disappointment for part-owner CLT-UFA. (Lehman Brothers is handling the sale of CLT-UFA's interest in the station.)

ELSEWHERE (cont'd)

He's got game (show)! Veteran air personality Chris Jagger just signed to host a new daily TV gameshow called "Change of Heart." Variety reports that he's keeping his radio job as co-host of the morning show at Dallas-market modern rock station KDGE. Jagger previously hosted another national entertainment show -- the syndicated radio program called "Lovephones" with Dr. Judy Kuriansky. Dr. Judy Kuriansky

Now that it's got 100 channels (up from 50) to fill on its satellite-radio dial card, CD Radio continues to stay busy signing up programming providers. The latest (for channels 81 and 82) is Hispanic Radio Network, which will supply "La Red Hispana" and its main Hispanic Radio Network programming.

Arbitron issues an unusual statement about the Winter survey in Raleigh-Durham. It tells subscribers that WKIX, Goldsboro, NC (96.9 MHz) and WKXU, Burlington, NC (101. MHz) were improperly shown as simulcast in the Winter book -- and that the comboing was the result of misrepresentation by owner Curtis Broadcasting. Under Arbitron policy, stations are eligible for "simulcast" listing only if there's "simultaneous transmission of both stations' broadcast content throughout the daypart during all 12 weeks of the survey." After publication of the book, Arbitron discovered that WKIX and WKXU were airing distinct commercials, morning shows and sports packages (WKXU broadcasts University of North Carolina sports).

National Public Radio said it would be opening some new news bureaus, and the first one of the wave is a Midwest bureau in Cleveland. Bureau chief is Ken Barcus.

M STREET BAZAAR. . . PEOPLE, PRODUCTS, AND PROGRAMMING

Mandated free political time? The NAB keeps saying that candidates get a better deal from stations' own debates, roundtables and forums. Toward that end, the NAB has just published a book called "Inside Debates: A Practical Guide to Sponsorship and Production." Producing a local political debate can be a minefield of potential problems, so it's nice to have some legal guidance.

Paula Cole, Sheryl Crow, Melissa Etheridge, Jewel and Sarah McLachlan -- You'll find 'em all in United Stations' new 10-part summer series focusing on "Today's Women" in music. It launches over the July 4 weekend. United Station Radio Networks: (212) 869-1111.

A commercial from your friendly publisher: M Street publishes the weekly "M Street Journal", the new "M Street Daily" fax, the comprehensive "M Street Directory" of U.S. and Canadian radio stations (8th edition, just out), and we're available to do custom database jobs of almost any description. Call us at (615) 251-1525 for more information about any of M Street's products and services.

The M Street Journal

Radio's Journal of Record

NEW YORK NASHVILLE

June 17, 1998 Vol. 15 No. 24

BUY YOUR WAY TO A BETTER SIGNAL?... Or maybe sell off some interference rights? MAJOR proposed changes to the FCC's FM and AM rules are making consulting engineers and group owners burn the midnight oil, based on a Notice of Proposed Rulemaking that includes everything from negotiated mutual interference to changing the way signal propagation is calculated. Here's an overview of proposals in MM Docket No. 98-93, by subject areas. Legalizing negotiated Interference Agreements among FM licensees (a first). Allowing the filing of up to four contingent minor change FM apps at the same time (a first). Adopting a new "Point-to-Point" signal propagation model, to do a better job of predicting FM signals. Dividing the current Class C FM stations into two subclasses (and creating a new C0 [C-Zero] class for those with lower antenna height). Extending so-called "first come/first served" procedures to AM, non-com FM and FM translator minor change apps. Expanding the definition of "minor change" in those services. And overhauling (and relaxing) standards for low power Class D FM stations. Those are the highlights of the 32-page NPRM that have some experts wondering why the FCC even tackled some of these issues in the first place. Details on key changes inside this week's M Street Journal.

BERKELEY PIRATE SUNK... Free Radio Berkeley finally loses in court -- and the FCC and the NAB probably popped a few corks to celebrate the end of four frustrating years in front of Oakland Federal Judge Claudia Wilken. She stunned everybody (except maybe Free Radio Berkeley operator Stephen Dunifer) when she refused the government's request for Summary Judgment to shut Dunifer down. The judge asked for additional briefs and now she's ruled for the Government and against Dunifer, who argued that he has a First Amendment right to broadcast low power radio. Wilken's decision turned on the fact that Dunifer never actually applied for a Class D FM license, so he has no standing. (The FCC has had a freeze on low power Class D apps since 1978.) M Street notes that Judge Wilken never actually reached Dunifer's legal arguments based on the First Amendment. But the microradio movement is far from finished, based on what M Street hears from the Bay area. At the NAB, they're practically throwing a party. The NAB's Eddie Fritts says the decision "represents a great victory for legitimate broadcasters who play by the rules. Fritts refers to Dunifer and his ilk as "broadcast bandits." (U.S. vs. Stephen Paul Dunifer, No. C 94-03542 CW)

VA new Shenandoah

add 107.1, window will be addressed by the Commission in a subsequent order

WASHINGTON THIS WEEK

Okay, time to sharpen the pencil and dig into some key areas of the FCC's Notice of Proposed Rulemaking regarding Negotiated Interference for FM stations and other technical changes: For the first time, the Commission would allow private negotiations between licensees for the purpose of improving signals. It would erect some new standards: #1 Total service gains would have to be at least five times greater than the increase in total interference. #2 Total interference received by any station couldn't exceed 5% of the area and population within its protected service contour. #3 No interference permitted within the boundaries of any affected station. And #4 Areas receiving new interference must continue to receive at least five aural services. The FCC justifies these proposed changes on the grounds of giving stations more options to relocate transmitter sites. Underlying that is the concept that licensees would take "greater or principal responsibility" for determining levels and areas of interference. In other words -- in this and other proposals, the FCC would be a less intrusive cop.

And get ready for some really complex filings, now that the FCC's proposing to allow the simultaneous filing of up to FOUR contingent change apps, after licensees may have hammered out their negotiated interference agreements. Essentially the Commission would invite stations to present a whole package of changes at once for consideration. (The negotiated interference and contingent change proposals are in Section II of NPRM.) The folks at 1919 M Street are also ready to liberalize standards for noncommercial FMs.

Today's sophisticated computer modeling programs have revolutionized the business of predicting signals, and so the FCC's NPRM suggests adopting a new "point-topoint" prediction methodology because the existing contour protection model "is not perfect." In fact, it fails to take into account some major geographical features (like mountains 25 kilometers away from the tower). The Commission's also thinking about reducing minimum separation requirements for Second and Third Adjacent FMs, and easing up on standards for stations in Puerto Rico and the Virgin Islands. And in a proposal with major implications for Class C licensees who haven't taken full advantage of their licenses, it would create a new "Class CO" [for C-Zero] standard for stations below 450 meters.

Procedural and streamlining stuff in the FCC's new NPRM: The Commission would extend so-called "first come/first served" processing now used for commercial FMs to AM, non-com FMs and FM translator minor change apps, and would expand what it considers "minor changes." It WOULD require NCE FMs to cover at least a portion of their community of license with a 60 dBu contour (there's no such requirement now). And it would give current low power Class D stations much more flexibility in locating within the FM band (without causing interference), and would revise the definition of "Class D" so it's based not on transmitter output but by predicted 60 dBu contour distances. The NPRM also contains language cleaning up various Canadian and Mexican border related issues. Those are the highlights -read the whole thing in "FCC-98-117", related to MM Docket No. 98-93.

FCC attorney Victoria Phillips gets a promotion -- she becomes Chief of the Legal Branch of the Mass Media Bureau's Policy and Rules Division.

This could be a bellwether of where the FCC will go with future decisions on cross-ownership: The FCC just granted its first PERMANENT newspaper/radio waiver in many moons, in the case of Bloomsburg, PA newspaper owner Press Enterprise and locally-owned standards WCNR, Bloomsburg (830 KHz). The paper filed last July to acquire the radio license under the "failed-station" standard, and the FCC has finally granted approval of the transfer. Sale price is \$130,000 and the deal was brokered by Ray Rosenblum.

CANADA THIS WEEK

Western Canadian group owner Okanagan Skeena is buying the 15-station Nornet group -- and acquiring some of its executives, too. Okanagan Skeena says its own holdings plus Nornet give it 31 radio licenses -- which makes it the largest holder of radio licenses in the country. Current Okanagan Skeena President/COO Bryan Edwards and VP/Finance Rod Cox have left their posts. Nornet President Hugh McKinnon will succeed Edwards as President/COO of the combined Okanagan Skeena/Nornet.

First Howard Stern crashes through the border to establish himself on radio in Toronto and Montreal. Now comes word that an arm of CHUM Ltd. will handle syndication of his new Saturday night TV show, scheduled to start late this summer. (U.S. syndication is handled by the CBS Eyemark division.)

M Street notes that Montreal has a new oldies station, as CKGM reclaims its spot on the dial (from CJAD) and returns to the format it did from 1991 through 1996. Remember those crippling icestorms that hit Canada last Winter? CKGM wound up leasing its 990 KHz facility to CJAD, and that arrangement lasted five months. Before the storm, CKGM had been doing "Talk Radio With Attitude", according to the Montreal Gazette. Now it's got the 990 KHz frequency back and it's doing oldies, starting with a 10,000-song marathon. (The station was known as "CKIS" when it was oldies.) The paper says the playlist will lean towards "vintage soul music."

ELSEWHERE

Clear Channel finally lands the Dame Media group for \$85 million worth of Clear Channel stock. That purchase has been rumored around Albany and Harrisburg for many weeks, and it's possible that Dame was holding out for either more money and/or an all-stock package. Lowry Mays usually prefers to pay cash and not dilute his stock for deals like this. 21 stations involved, in five markets (Albany, Harrisburg, Johnstown, Utica/Rome and Williamsport). Clear Channel gets an especially big haul in Harrisburg (where it owns CBS affiliate WHP-TV and LMAs UPN affiliate WLYH-TV) and Albany (where it owns Fox affiliate WXAA, Channel 23). In addition, Clear Channel provided 80% of the financing for Radio Enterprises' four stations in the Albany area; that interest is non-attributable under current FCC ownership rules.

Dame Media stations, by market -- The three stations in Albany are "River" classic hits WRVE, Schenectady (99.5 MHz); talk WGY, Schenectady (810 KHz); smooth jazz WHRL (103.1 MHz). Six stations in Harrisburg: talk WHP (580 KHz); "River" classic hits WRVV (97.3 MHz); oldies combo WWKL (1460 KHz) and WWKL-FM (99.3 MHz); "Bob" country WRBT (94.9 MHz); and standards WKBO (1230 KHz). Two stations in Johnstown: country WMTZ (96.5 MHz) and news/talk WNTJ (1490 KHz). Six stations in Utica/Rome: rock WOUR, Utica (96.9 MHz); standards WUTQ (1550 KHz); CHR WSKS, Rome (102.5 MHz); standards WRNY, Rome (1350 KHz); soft AC WRFM (93.5 MHz); and standards WADR, Remsen, NY (1480 KHz). Four stations in Williamsport: AC WKSB (102.7 MHz); talk WRAK (1400 KHz); standards WMYL, Salladasburg, PA (95.5 MHz); and talk WRKK, Hughesville, PA (1200 KHz)

So you thought Hicks Muse had its fingers in pretty much every pie? Nope: It's decided to jump into Spanish-language and ethnic media, through a new venture with TSG Capital Group. That new venture involves Hicks Muse-related Chancellor Media, Capstar and LIN Television. The first fruit of the new venture is Chancellor's 20% non-voting equity stake in Z-Spanish, the Sacramento-based station owner and program producer. They're structuring the investment so it's non-attributable to Hicks Muse under current FCC ownership regs. Z-Spanish owns 22 radio stations and creates three 24-hour Spanish music formats that are syndicated by Jones Radio Network. (One of them is "La Zeta", popular on the West coast.) Amador and John Bustos remain as principals with Z-Spanish.

And Hicks Muse's NEXT media investment could be TV -- It's hinting that its new alliance with TSG Capital is looking at "a partnership with an African-American TV industry veteran to acquire television properties." Once again - by structuring the arrangement properly, those stations wouldn't count against Hicks Muse's current holdings in LIN and its other TV group.

Say it in Spanish: "We're Number One." History was made in New York on the pages of the brand-new Phase II Arbitrends as Spanish hits WSKQ-FM (97.9 MHz) topped the 12+ standings. M Street believes that's a first for ANY Spanish-language station in the New York ratings. It's only an Arbitrends report, and Heftel's new Spanish tropical WCAA (105.9 MHz) could whittle away at WSKQ-FM's audience -- but it demonstrates how the nation's most populous market is changing. WSKQ-FM/WPAT-FM GM Carey Davis is fond of pointing out that by the year 2000, one-third of the population of the five boroughs will be Hispanic.

ELSEWHERE (cont'd)

M Street notes that Regent, run by veterans Terry Jacobs and Bill Stakelin, had enough deal closings this week to make your head spin. It closed on the 16station Park Lane Group (for \$23.5 million). It acquired the stock of Redding, CA operator Alta Broadcasting. It closed on Continental Broadcasting's Bullhead City, AZ combo of KFLG (1000 KHz) and KFLG-FM (102.7 MHz) for \$3.6 million. It closed on three Tom Gammon stations in California. And it closed on the stock merger with Faircom, Inc. Not only that, Regent landed some new investors through New York-based Waller-Sutton Media Partners. Something to look forward to: Regent intends to be traded on Nasdaq. A lot of action for a group that started making these deals as long as one full year ago.

Satellite envy? Two weeks ago satellite radio broadcaster CD Radio doubled its capacity to 100 channels of programming. Now new American Mobile Radio President/CEO Hugh Panero matches that by exercising AMRC's option to upgrade its satellites to Hughes' Max Power HS702 geostationary birds. AMRC expects to launch its new service in the year 2000.

Arbitron drops the company that has supplied its phone numbers for more than 20 years -- and it's a really important change, because phone numbers and addresses are the starting point for the entire research process. Gone is Metromail. Arbitron now believes Fairfield, CT-based Survey Sampling, Inc. can do a better job of keeping up with changing area codes and supplying addresses for non-listed households. One of Arbitron's new initiatives is to do a mailing to households before it makes the first placement call. Having better-quality lists to work from should improve consent rates. Another reason Arbitron may have switched from Metromail: SSI already has databases for Canada, Puerto Rico, the UK and Europe. And Arbitron is anxious to expand its business outside the current U.S. base.

New radio group owner in Mexico, as the government grants TV Azteca a concession to operate 10 radio stations in the central part of the country. TV Azteca is a fast-growing TV station owner, and a subsidiary of Grupo Salsa, which owns retail stores that sell consumer electronics and household furniture.

Are the Philippines the next opportunity for U.S. broadcasters? The government of President-elect Joseph Estrada is reportedly planning to auction off the four government-owned radio stations, several TV stations plus the Radio Philippines Network, seized a decade ago from former dictator Ferdinand Marcos.

Britain's getting close to a full rollout of Digital Audio Broadcasting, thanks to a new commitment from five receiver manufacturers to build units small enough to fit in a car. The BBC says Bosch/Blaupunkt, Clarion, Grundig, Kenwood and Pioneer will begin selling DAB-capable receivers small enough for a car sometime this Summer. Auntie Beeb says its digital broadcasts now cover 60% of Britain's population -- though in Eureka-147, an out-of-band system that the U.S. has rejected.

M STREET BAZAAR. . . PEOPLE, PRODUCTS, AND PROGRAMMING Syndication news: The Indy-based Bob & Tom morning show has a new marketing partner, somebody who's already in the family, Chancellor's AMFM Radio. The Bob & Tom show came into the Chancellor/Capstar family when Capstar acquired WFBQ, Indianapolis as part of the SFX deal. Indianapolis-based Laura Gonzo is handling station affiliations.

Soon you can dial up Personal Achievement Radio on your vehicle's DAB receiver -- the one that picks up satellite broadcaster CD Radio. David Margolese signs a content deal with John Douglas' Personal Achievement Radio to put the syndicated-radio "Personal Achievement" 24-hour format on Channel 95, and for Douglas to create a custom second channel just for CD Radio. Douglas produces the current radio version of PAR and ABC sells it.

Sorry to note the passing of a broadcasting pioneer: 83-year-old Martin Stone. He produced the "Howdy Doody" show (for NBC television) and "Author Meets the Critics" (on NBC, ABC and the Dumont network). In 1957 he started WVIP, Mt. Kisco, NY and ran it until it burned last year and the station went dark. WVTP part of the Herald Tribune Radio Network that included other suburban New became York stations and did a wide range of local community service programming like debates and school closings.

M STREET BAZAAR. . . PEOPLE, PRODUCTS, AND PROGRAMMING (cont'd) Dr. James Dobson, the pointman at Focus on the Family (and related radio syndication projects) was hit by a "mild stroke" and taken to a Colorado Springs hospital on Tuesday (6/16). The 62-year-old Dobson suffered a mild heart attack back in 1990.

Want to hear the William Tell Overture and thrilling tales of the Masked Man on Fans of Old Time Radio shows like The Lone Ranger, Superman and your computer? Dragnet can get instant gratification, via the web: Rightsholder and syndicator Radio Spirits, Inc. signs a deal with On-Line Entertainment Network to make more than 100 hours of vintage radio shows available on the web -- for a price. OEN calls it "On-Demand/Pay-Per-Listen", and you can check it out at www.cen.com. M Street notes that Carl Amari recently expanded his catalogue of OTR shows through a deal with Charles Michelson.

A radio horoscope show may actually be improving Israeli-Arab relations: Ibrahim Hazboun's "World of Stars" show airs on the Voice of Israel's Arabic service, and the AP reports it's highly popular in neighboring Arab countries. Only listeners in Egypt and Jordan have direct international telephone access to Israel, but some residents of Iraq, Syria and Lebanon travel to Jordan just to call him and get advice from the stars. Hazboun sticks to love, business and health -- and stays away from politics.

Westwood and MTV team up again, this time for a concert series that debuts the weekend of July 4-5 with Matchbox 20, recorded at the Hammerstein Ballroom in New York City. Future artists: Dave Matthews Band (from The Tabernacle in Atlanta) and Green Day (from The Bottom of the Hill in San Francisco).

The M Street Journal

Radio's Journal of Record NEW YORK **NASHVILLE**

June 24, 1998 Vol. 15 No. 25

HERE COMES THE JUDGE... Suddenly anti-trust isn't just a federal issue, now that the Utah Supreme Court has ruled that STATE anti-trust laws may apply to radio stations in certain situations (like ad pricing). Most licensees are just getting accustomed to dealing with Uncle Sam's friends at the Department of Justice in Washington, D.C. Now they may have to make room in the lobby for state regulators, according to The Deseret News. The paper says the state was investigating allegations of collusion against several stations in very small towns (Roosevelt and Vernal). Utah state investigators asked the stations for documents by way of CIDs -- Criminal Investigative Demands. The stations resisted the legal maneuver and got help from the Utah Radio Broadcasters Association. They won in Third District Court -- but lost at the state Supreme Court. The boundaries aren't quite clear yet: Political ad rates may be federal-only, but everyday commercial rates may not be. Joseph Evans, whose Evans Broadcasting is the licensee of KNEU/KFIX, Roosevelt, says he's "cooperated fully with the state" and has nothing to hide. But now there's a legal precedent regarding antitrust at the state level.

"YOUR MESSAGE HERE"?. . Chancellor Media's first expansion beyond radio is into the outdoor advertising industry, via the \$610 million cash acquisition of Martin Media. Chancellor is Tom Hicks' favorite child, we think -- it's the company he's chosen to be the vehicle for his international multimedia dreams. So he's buying the seventh-largest U.S. outdoor company (\$88 million estimated revenue) and trying to make it pay off through that elusive synergy with his radio stations. Privately-held Martin overlaps with Chancellor and Capstar stations in quite a few markets (like Washington, D.C., Pittsburgh, San Diego and Cincinnati). Chancellor CEO Jeff Marcus says it derives more than 40% of its revenue and cash flow from markets where Chancellor has radio properties. And there's another revenue possibility: Chancellor-owned Katz Media will get the chance to rep Martin on a national basis. Martin owns 13,000 displays in nearly 30 cities in 12 states. Current exec Tom Martin will leave after the deal closes, and Chancellor expects to use Martin Media as a platform to acquire more billboard and outdoor assets.

PROPOSED STATION TRANSFERS (cont'd)

Form 316 Transfer applications were filed in Butterfield Broadcasting from G. Smith and others to G. & C. Smith and others for Washington stations KZTA, Naches; KJOX, Selah; KREW and KZTB, Sunnyside; and KXDD, Yakima.

Fairbanks Communications also filed Form 316 Transfer appliciations for Florida Stations WFTL, Fort Lauderdale; WRMF, Palm Beach and WJNA and WRLX in West Palm Beach from B. Hilliard to J. C. Hilliard.

Journal Broadcast Group, Inc. filed Form 316 Transfer applications to Journal Broadcast Media. The transfers are contingent upon consummation from American General Media. The stations involved in Idaho are KGEM and KJOT, Boise; KCID AM and FM, Caldwell, KQXR, Payette. KSRB AM and FM in Ontario, Oregon is also included in the transfer.

Chancellor Media Corporation has filed Form 316 Transfer Application to reorganize 57 stations under new names. The stations are in the following markets: Phoenix, Los Angeles, San Francisco, Denver, Orlando, Gainesville, Minneapolis, Pittsburgh, New York, Chicago, Dallas, Houston, Philadelphia, Miami, Washington, Boston, Seattle, Medford/Ashland, and Detroit

FM ALLOCATIONS: PROPOSED AMENDMENTS

add 103.3 C, comments due Aug. 3, replies Aug. 18 WY new Hanna

FM ALLOCATIONS: DISMISSED AMENDMENTS

Potts Camp (Den.) to 95.9 C3 Saltillo, MS from Potts Camp, MS MS WCNA

WASHINGTON THIS WEEK

After 17 years the Commission inches toward killing the Personal Attack and Political Editorial rules. . .by conducting a vote which it knew would result in a 2-2 stalemate. (Ness and Tristani voting in effect to keep the rules, Powell and Furchtgott-Roth voting to scrap them. Kennard recused himself.) M Street told you last month that the D.C. Circuit Court of Appeals ruled that if the Commission actually voted there would then be an appealable record. That happened Monday (the last possible day) and now the court can take the case. (FCC 98-126) Hard to believe: The NAB filed its first petition to eliminate these two rules back in 1981. It and the RTNDA have continued pushing the repeal.

Conviction for repeated sexual abuse of children -- and subsequent misrepresentation and lack of candor about his role at the stations -- will indeed cost Michael Rice the licenses and permits of a total of seven stations in Missouri and Indiana. Rice-controlled Contemporary Media is the licensee of Terre Haute-licensed WBOW (640 KHz), WZZQ (1230 KHz) and WZZQ-FM (107.5 MHz). Contemporary Broadcasting is the licensee of KFMZ, Columbia, MO (98.3 MHz) and the permittee of KAAM, Huntsville, MO (103.5 MHz). Lake Broadcasting is the licensee of KBMX, Eldon, MO (101.9 MHz) and permittee of KFXE, Cuba, MO (102.9 MHz). Earlier this year the Commission revoked the licenses and permits of stations controlled by Rice. Now the full Commission has affirmed the revocation ruling by Administrative Law Judge Arthur Steinberg. (FCC 98-133)

How do you encourage diversity and improve the participation of minorities in broadcasting (including ownership)? The Clinton Administration is supporting a September 22 forum in Washington, D.C. that has star-quality support from Hispanic actor Jimmy Smits. One of the topics: improving access of minorities to capital for the purpose of buying radio and TV properties. The FCC's previous minority tax-certificate program is now gone, though Chairman Bill Kennard's talking about reviving it with tighter qualifications.

The NAB Board's regular Summer meeting probably doesn't have a huge agenda in terms of radio, but M Street bets the FCC's sweeping proposal to allow negotiated mutual interference by FM licensees is going to get a going-over. The NAB has been silent on the subject since the Notice of Proposed Rulemaking was issued two weeks ago (MM Docket No. 98-93). The Notice also contemplates changing the signal propagation model to a point-to-point method along with a host of other deregulatory ideas. (See the June 17 M Street Journal for more.)

Another pirate busted -- this time in the Cradle of Liberty. The Commission's Compliance and Information Bureau seized the equipment used by "West Philadelphia Pirate Radio" to broadcast the station they called "WPPR" and "Radio Mutiny." The June 22 seizure followed "numerous attempts" by the Commission to obtain a voluntary shutdown. (Report No. CIB 98-10)

WASHINGTON THIS WEEK (cont'd)

Unfinished business from the Keymarket-Sinclair deal: Sinclair gets a temporary conditional waiver of the one-to-a-market rule to acquire five radio stations in Greenville/Spartanburg, SC and one FM translator in Asheville, NC. Sinclair already owns ABC-TV affiliate WLOS, Asheville. (The radio properties include WFBC-FM, Greenville and WSPA-FM, Spartanburg.) (DA No. 98-1227)

More gains for women and minorities in broadcasting, according to the FCC's justissued annual Broadcasting and Cable Employment Report. But will the threatened elimination of the Commission's EEO rules mean those results will change next year? Hard to predict, since many companies have pledged to continue affirmative action efforts even if they're not legally required to. Let's go to the numbers: Female representation in the broadcast workforce (combined radio and TV) rose from 40.8% to 41%. Minority representation grew from 19.9% to 20.2%. In the top four categories (Managers, Professionals, Technicians and Sales Workers), women's employment was up from 34.4% to 34.9% and minority employment rose from 17.8% to 18.2%. Total employment in broadcasting grew at a 2.3% clip (despite fears of consolidation). It now stands at 149,975 (not including stations with fewer than five employees).

Checking this week's FCC Actions, M Street follows up on some interesting cases: re: WMUW, Columbus, MS (88.5 MHz) -- the Commission sends the licensee a letter (dated 6/11/98) dismissing its app for renewal of license and deletes the call sign; it says the license expired because the licensee (Board of Trustees of the State of Mississippi) failed to broadcast for 12 consecutive months (960209WC) The station told M Street their tower was down and will ask the Commission to reinstate it's license. Another license cancelled: WCNE, Batavia, OH (88.7 MHz), per letter dated 6/12/98 (890531VP). BACK on the air is KTC Broadcasting's WGNC, Gastonia, NC, doing country and sports; the FCC reinstated its application for renewal and granted its Petition for Reconsideration (950721YJ). Also back with license renewal apps reinstated are these three stations: Keystone Enterprises' WKGQ, Milledgeville, GA (1060 KHz) (951201VN). KCLT, West Helena, AR (104.9 MHz), licensed to West Helena Broadcasters (960201BD). And WGGH, Marion, IL (1150 KHz), licensed to Vine Broadcasting (960730WN).

Licensee Family Life Ministries applies to change WCIK, Bath, NY (103.1 MHz) from commercial to non-commercial status.

Six years later, the FCC lowers the amount of a Notice of Apparent Liability fine for a South Carolina station from \$3,750 to \$2,000. The morning show at WYBB, Folly Beach, SC got carried away with what they COULD say ("crap, crap, crap") and took it one level further down to the vernacular. That word you CAN'T say on the air without looking over your shoulder.

CANADA THIS WEEK

More job cuts and more pain at Harold Redekopp's CBC English Radio operation, and the unions aren't happy at all. CBC English just endured a round of staff cuts, and now The Canadian Press reports that Redekopp says there's a \$3 million (Canadian) budget shortfall that must be addressed. That means more cuts. The Canadian Press interviews Canadian Media Guild President Lise Lareau, who calls it "very bizarre" that the CBC just spotted the problem two weeks ago.

ELSEWHERE

Jacor buys another AM/FM combo along the I-5 corridor between Portland, OR and Seattle. It's the Cricket country stations called KRKT-FM, Albany, OR (99.9 MHz) and Cricket Country Classics KRKT (990 KHz). The Northwest-based Willhight rating service gave the FM a 10.0-share 12+ in its most recent survey of Corvallis-Albany. Seller in the "Cricket" deal is M3X Corporation, whose principals are Robert Esty and Gary Grossman. Price is \$3,825,000. Jacor's already contracted to acquire Corvallis-licensed oldies KLOO-FM (106.1 MHz) and news/talk/sports KLOO (1340 KHz) from Oregon Trail. Austin Walsh of Media Services Group brokered the KRKT/KRKT-FM transaction for the seller.

Sale in central Florida, South of Orlando: Casey Communications sells country WWOJ, Avon Park (99.1 MHz) and talk WWTK, Lake Placid (730 KHz) to Peter Coughlin's Cohan Radio Group. Price: \$910,000. Broker: Tampa-based Don Clark.

And would Chancellor absorb sister companies Capstar Broadcasting and TV operator LIN Broadcasting? In a heartbeat. Chancellor CEO Jeff Marcus tells the luncheon crowd at Tuesday's NationsBanc Montgomery Securities meeting that "I would love to see Capstar combine with Chancellor." Same for LIN. But only if those purchases were accretive to after-tax cash flow.

ELSEWHERE (cont'd)

Payola in the Latin music industry and radio? Latest on the developing story is the L.A. Times reporting that KLAX, Los Angeles (97.9 MHz) is one of about two dozen Southwest U.S. stations to receive a federal subpoena for documents. (The station tells the paper it's not a target of the investigation and will comply with the subpoena.) It's believed that about 18 subpoenas were also issued to people related to the record side of the investigation. This is part of the probe of Latin-music radio-records relations that started when Fonovisa parent Grupo Televisa discovered problems in the record division and reported it to the feds. The fascinating part of the latest L.A. Times story is this: Fonovisa apparently DID buy itself a great deal of radio exposure, based on chart activity. But that airplay didn't translate into retail sales at the cash register. It's gotta be in the grooves, as the old saying goes.

Athletes and people in the news complain all the time about news coverage -- but "K-Fan" in Salt Lake City continues to be the target of Utah Jazz star forward Karl Malone. One team of personalities at the all-sports KFNZ, Salt Lake (1320 KHz) has gotten Malone so riled up he's actually said "It's me or them.

It's no longer "Emmis Broadcasting", but "Emmis Communications", thanks to a shareholder vote at the downtown Indianapolis Skyline Club. And sure, Emmis is entering television and launching a new TV division with six stations, but Emmis executive Jeff Smulyan tells analysts he still wants to expand in radio both domestically and abroad. (M Street notes that Emmis has also been active in magazine publishing.)

M STREET BAZAAR. . . PEOPLE, PRODUCTS, AND PROGRAMMING Goodbye, Mancow; Hello, Bob & Tom. Chicago's still rocking after the Sun-Times breaks the story that high-spirited morning personality Mancow Muller has packed up and left his home of four years (WRCX at 103.5 MHz) to work for alternative WKQX (101.1 MHz). The move is huge both monetarily and strategically: Erich Matthew Muller had been making about \$1 million at year at Chancellor-owned WRCX. Emmis is paying him as much as \$3 million a year (for a three-year deal) to cross over to Q101. Mancow's exit from WRCX creates a morning opening, which Chancellor GM Mike Fowler immediately fills with Indianapolis-based syndicated Chancellor GM Mike Fowler immediately fills with indianapolis-based syndicated morning show Bob & Tom. They've already got about four dozen or so affiliates, and if they can make it in that Toddling Town of Chicago, their national syndication future should be even brighter. WFBQ, Indianapolis owner Capstar produces and distributes the show; Chancellor-owned AMFM Radio Networks just announced a deal to sell and help market it. As for Mancow Muller's own syndication hopes: He's entered a handful of markets (and left a couple as well). Emmis may be able to offer him a syndication future based on his success improving the ratings at WKQX, where he replaces 14th-place Wendy Snyder and Bill Leff.

Check out the station playlist online? There's a new experiment in involving Cox Radio and Cox Interactive Media that bears watching. The There's a new experiment in Tampa "WARM Interactive" website lets listeners see the CD cover of the song that's being played at the moment, click on an artist bio for more information about Celine Dion (or whomever), check out the previous 10 songs played on WWRM, Tampa (94.9 MHz), and even order the CD. Computer users can also leave comments about the song and play station contests. The technology is called Totally Interactive Radio and it's from Boston-based Agent Audio. Here's the website address: www.949online.com www.949online.com (M Street hears that WFNX, Boston is also testing the Agent Audio application at "WFNX.com")

Plug in that new Windows 98 computer from Packard Bell or NEC -- and get 35 channels of radio pre-installed! That's the marketing promise of a new campaign from Navarre Corporation's NetRadio Network, and it might not be good news for regular old local radio. The "radio" player appears right on the Windows 98 desktop.

Ready to wake up laughing to Conan O'Brien? Listeners can get a quick two-minute dose of the late-night NBC comedy host thanks to a new daily radio show. It features highlights of O'Brien's most recent opening monologue, it's a joint product of NBC Studios, Market Leader, and United Stations Radio Network, and it launches August 1. USRN: (212) 869-1111.

syndicated Judy Jarvis Show retains Winstar Affiliate Sales (WAS) to handle The affiliate sales and provide consulting services. Judy's show airs in the same noon to 3 p.m. timeslot as Rush Limbaugh, and she bills herself as "A woman with attitude." Winstar says the Judy Jarvis show now has about 40 affiliate stations.

<u>M STREET BAZAAR.</u>. PEOPLE, PRODUCTS, AND PROGRAMMING (cont'd) Gary Krantz no doubt gets a very nice going-away party after 18 years at New York-based syndicator MJI Broadcasting. He's leaving to join Chancellor Media in the newly-created role of Vice President/Programming for Music and Entertainment. He's been VP/General Manager at MJI since 1990, and now gets to preside over music-based offerings like "American Top 40 with Casey Kasem" and the just-acquired Global Satellite shows like "Rockline." Not to mention the new Hollywood Hamilton and RuPaul shows, debuting shortly.

Jack Taddeo is the latest SFX executive to take an important position inside Capstar, following Capstar's \$2.1 billion acquisition of Bob Sillerman's radio properties. Taddeo had been Senior VP of Programming for SFX, and now he takes the same position at the much larger (300+ station) Capstar Broadcasting.

New day-to-day manager at CBS News' network radio operation is Mike Freedman, who's returning to radio from his current job in academia at George Washington University. Before that he held programming jobs at CBS-owned WWJ, Detroit and other stations; Freedman also worked at UPI in the late 1980s.

Latest on "Focus On The Family"'s Dr. James Dobson -- not only did he check himself out of the hospital following that mild stroke, he actually devoted his June 24 Focus program to a report from himself and wife Shirley about the life-saving possibilities of a new drug called TPA. Dobson was unable to speak for about 12 hours following the June 16 stroke.

Bill Peterson is the new Executive VP/Director of Network Sales at syndicator One-On-One Sports. He had previously been Director/Sales at Interep's Chicago office.

Pacific Research and Engineering makes a change at the top and hires Don Naab as President. Naab had previously run Hazard Sensing Sector, a division of Kidde International. Jack Williams remains Chairman/CEO of PR&E.

Sam Zell is a famous figure on Wall Street -- but not M Street (at least, not yet). The NAB has just booked him to keynote the upcoming Radio Show in Seattle. It says he'll speak about both business in general and radio in particular. The Radio Show is venturing to Seattle for the first time ever. Dates: October 14-17.

It's Randy Michaels' turn to show up and be roasted in the good name of charity --The Jacor CEO will be the "dis" honored guest (and we quote) at the annual black-tie roast for the benefit of the John Bayliss Broadcast Foundation. Date and place: Tuesday, October 27 at Manhattan's Pierre Hotel. Contact the Bayliss Foundation at (408) 624-1536.

Here's a plug for the next Country Radio Seminar regional event: "CRS-Great Lakes" is in Cleveland, August 28-29, and it includes an opening reception at the plug for the next Country Radio Seminar regional event: "CRS-Great Rock & Roll Hall of Fame (will Elvis show up?). CRS: (615) 327-4487.

And M Street may be the first to tell you where NEXT year's NAB Radio Show will be held -- in Orlando. We just have the city, not the dates, so far. But stay tuned. It's another experiment by the NAB (like Seattle this year) to try convention locations away from the usual axis of New Orleans and Los Angeles (not that M Street has any complaints about the food in Nawlins!).

Quick commercial reminder from your sponsor: M Street can provide custom mailing lists, telemarketing lists and other database services for anyone who needs to reach radio. We've got current fax numbers, addresses and phone numbers for every station in the U.S. and Canada. M Street can help you reach radio: Just call us at (800) 248-4242.

*
