RADIO'S JOURNAL OF RECORD

January 9, 2002

Serving Radio Since 1984

Vol. 19 Issue 01

"Remember the Alamo" – In 2002, radio is on the defensive.

You don't have to be Davy Crockett to see attackers on all sides – because everybody from XM to AOL to the NFL and Congress wants a piece of radio's hide this year. From the satellite radio spots that not-so-subtly attack radio's high spot loads and lack of variety, to Time Warner's new "Radio AOL", touted in the ads for version 7.0, to those NFL.com spots that invite football fans to listen to radio pre-game on the website – it's open season on radio. Not to mention Congress, where Michigan Democrat John Conyers wants hearings

focused on "the new payola." Then there's the advertising recession – the most pressing thing on the mind of most broadcasters. Most execs would just like some hope that they can make their QI numbers. One of the new attackers is satellite radio, which is going to have its own make-or-break year in 2002 – but which reaped millions in free publicity out of the springboard of the Consumer Electronics Show in Las Vegas. What's the solution? The RAB's Gary Fries keeps saying it over and over: Be the best you can be, and be local.

M Street Format Count: classic rock, oldies and sports are the biggest gainers going into 2002.

Call them "comfort formats" – they're the ones who've added the most stations in the six months since M Street published our 10th Edition Directory. Since mid-year '01, the number of sports stations has grown by 33, from 338 to 373. Oldies is up 25 stations from mid-year – 786 to 811. Classic rock's up 24, from 338 to 362. Also gaining stations since mid-year: mainstream AC (+17). And the overall category of Spanish-language formats (+15). Okay, who's slipping? Country (down 20, to 2170). R&B oldies/rhythmic oldies (107 to 88). Soft AC (off 18, to 357).

WASHINGTON THIS WEEK	3, 17
THE TAYLOR REPORT	4
FORMAT CHANGES	5 - 7
TECHNICAL RECORD	8 - 17
TRANSACTION BRIEF	18 - 19

Country radio still rules – but. . .

Yes, country radio continues to slip in terms of number of stations. But at 2170 stations out of 10,571 operating commercial stations, it's still a fact that better than 20% of all U.S. stations program country music. M Street includes country, classic country and traditional country in our format counts – and with the recent surge of post-9/11 patriotic fervor, country radio certainly isn't going away.

The #2-most-programmed broad format is News/Talk, up 9 stations from mid-year to 1148. #3 is Oldies. #4 is mainstream AC. #5 is Spanish. Country radio seems to be under siege at its very "Mother Church", where WSM-AM, Nashville owner Gaylord has seriously considered abandoning traditional country for sports. That's angering many local country fans – and forcing Nashville to re-

examine the state of country today. The format-total figures in these stories are from the authoritative M Street Database. M Street offers custom database services for any need: (800) 248-4242.

Our roots are in broadcasting. Our skill in RF engineering is unparalleled. Our track record in tower construction and operation is unsurpassed. We build towers. You lease them. It's an experience you can rely on.

In the "Real Slim Shady" case, the FCC cancels the \$7,000 fine against Citadel's KKMKG, Pueblo.

Clearly, Chairman Powell's FCC shied away from a potential legal quagmire — because the radio edit of Eminem's "Real Slim Shady" was played literally tens of thousands of times by hundreds of U.S. stations. Last May the Commission fined Citadel's KKMKG, Pueblo \$7,000 for airing the edited radio version of the Grammy-winning "Real Slim Shady." Citadel filed a petition for reconsideration, arguing that the lyrics were social commentaries, and that the most salacious lines were edited out. Guess what? Citadel prevails. Though the original May 2001 ruling was scathing, FCC Enforcement Bureau chief David Solomon now says that on second look the sexual references are vague enough and are not meant to titillate. The Bureau rescinds the fine against KKMKG.

But wait: the FCC refuses to cancel Q101's indecency fine for Mancow Muller.

The decision came the same day as the Eminem ruling from the same FCC Enforcement Bureau — But not only does David Solomon reject Emmis' challenge of a \$14,000 indecency fine against WKQX, Chicago. He upholds the April 6, 2001 fine even though the complainant couldn't produce either a tape or a good transcript. So Mancow's May 15, 2000 interviews with three women about their preferences in fellatio, and his March 20, 2000 discussion with a female porn star about "fisting", remain indecent, in the FCC's eyes — despite the Eminem turnabout. So what the @\$\$%# is going on at the FCC? Democratic Commissioner Michael Copps said he believes the Eminem case was too controversial for the Enforcement Bureau. He'd like such reviews of staff decisions to go to the 8th Floor and the Commissioners.

Chairman Powell is pushing toward more deregulation by guiding the Commission to revise the Broadcast Attribution Rule for ownership.

Technically, the FCC's 3-1 decision reinstates the former single-majority shareholder rule — which says one company can own up to 49.9% of another broadcast outlet in certain situations without impacting ownership limits. While its biggest impact will be on TV networks bumping against the 35% national ownership cap, the decision may have applications for radio. It follows a D.C.

Circuit Court of Appeals ruling from last March, which struck down an FCC move to end the single-majority-shareholder exemption for cable companies. The lone "no" vote at the FCC came from Democrat Copps — no surprise. Copps said the relaxed rule should only apply to cable companies — not over-the-air broadcasters.

No doubt where Commissioner Martin stands on further ownership consolidation — he's "pro."

Martin believes consolidation produces diversity in programming, and argues that the FCC should reverse its current thinking and presume that a merger is in the public interest. "Evidence suggests consolidation actually enhances program diversity by encouraging owners to create programming that targets niche markets, rather than producing bland programming that has the greatest chance of capturing the greatest number of viewers or listeners." If there were any doubts on where Republican Commissioner Kevin Martin stands on media consolidation, he put many questions to rest during a speech at the D.C.-based Media Institute. He also believes the Commission has been wasting too much time looking at anti-trust implications of deals, particularly when the DOJ or the FTC have signed off on a merger.

Michigan Dem John Conyers is worried about payola: "The FCC seems more concerned about bad lyrics than bribes."

The ranking minority member of the House Judiciary Committee tells the L.A. Times he's ready to do something about it — he's demanding Congressional hearings on allegations of payola. Why? Because (he says) the Commission isn't acting: "The FCC has imposed only one payola fine on a major radio group and seems to have no problem with the U.S. record labels" paying out an estimated \$100 million-plus a year to influence airplay on stations. Conyers says the hearings could focus on the "new forms of payola."

The details of the FCC's new EEO proposal may trigger a backlash with broadcaster groups.

They say the devil is in the details — and some features of the plan just made public will give

continued on page 17 ►

Good riddance to 2001: Jim Duncan believes 2001 revenues dropped 7% to 8%, twice the decline in 1991.

Jim believes 2001 shows the worst year-to-year drop for radio in over 40 years. A 7% decline for '01 would mean radio revenues sank from \$17,124,459,000 in 2000 to \$15,925,747,000 in 2001. Radio's last "down" year was 1991, when revs were off 3.9% from 1990. Duncan says radio has only experienced three such years: 1961 (off just 0.5%), 1991. And 2001. Guess we should beware of years ending in "01", right?

Duncan says radio revs might dip again in 2002.

Looking at the history, the recovery from 1991 was a small 3% gain in 1992 — and Jim says we're in a deeper hole now than in '91: "My prediction is that we will end 2002 with either no revenue growth or a drop of no more than 3%. The best-case scenario would be an end to the recession by the third quarter, and some real economic growth in the second half of 2002." How about cash flow? "I expect that radio cash flows will grow by 2% to 5%, enabled by the salary cuts and layoffs that companies are putting into effect."

Mel Karmazin and Farid Suleman must really love baseball.

Viacom/Infinity's making major commitments for the New York Yankees (on formerly all-news WCBS at 880). Los Angeles Dodgers (on all-news KFWB). And in the Bay Area, for the Oakland A's, who return to KFRC, San Francisco (610), after three seasons at Clear Channel's KABL (960). Infinity was already the largest rightsholder for NFL play-by-play (by far). Now it's catching up in major league baseball.

Jones is dropping its 24-hour Rhythmic Oldies format.

The syndicated format didn't quite make it to its one-year anniversary, but there's just not enough business there for Jones to justify

New formats to watch (or format variations, anyway).

First, we'd observe that Cox Radio's new Miami "Party" format isn't the revolutionary techno-dance format that some people outside the market think it is. But it IS something to watch, especially in Hispanic-flavored markets. Cox knocked classical music off WTMI (93.1) at year-end in favor of a local club-influenced "Party" dance-CHR format that we'll be monitoring closely. The second format change to watch is on the other side of the U.S. — in San Francisco, where Infinity abandoned country on KYCY (93.3) in favor of a rhythmic AC experiment named "The Wave." It's unrelated to Infinity's Los Angeles "Wave", which is a smooth jazz outlet. This one debuted on New Year's Eve playing these songs in the first half hour: Bob Marley's "Roots Rock Reggae." Aaliyah's "Rock the Boat." Eric Clapton's "Change the World." Marvin Gaye's "What's Goin' On." Shaggy's "Angel." Santana's "Maria Maria." Cheryl Lynn's "Got To Be Real." And Men At Work's "Down Under." Infinity's slogan is "Music That Moves The World." Infinity's applied for new calls of KKWV for the former KYCY. ■

keeping the format up — only 11 affiliates by the end of 2001. And Jones exec Phil Barry tells M Street "rhythmic oldies is a format that just isn't growing." Meanwhile Jones — like all syndicators — is looking for fresh opportunities. It still syndicates nine 24-hour formats: Adult Contemporary, Adult Hit Radio, CD Country, Classic Hit Country, Good Time Oldies, Music Of Your Life, Rock Classics, Smooth Jazz, and U.S. Country.

September 11 didn't produce a big bump in radio listening in New York.

In fact, overall radio usage was flat from the previous Fall. We've been saying 9/11 was much more of a TV event, and even the Arbitron execs say that all 33 TV sets in its Columbia, MD facility were on and had staffers glued to the tube. Now we've got some hard numbers from the Fall 2001 Arbitron, and they don't show any sustained boost for radio. From Fall 2000 to Fall 2001, the New York-market AQH rating was absolutely unchanged — 16.7 to 16.7. The Cume Rating was a bit higher, up from 94.3 to 95.0. But Time Spent Listening dropped from 22 hours 15 minutes to 22 hours.

In 2002, groups still face painful choices on streaming.

Entercom quit streaming some of its stations on December 31, based on costs and small audience. One of the newly-absent stations is WMMM-FM in Madison, WI. PD Tom Teuber tells website visitors it's a stark matter of priorities: "The time and resources we have been spending on making [the Triple M World Service] work take away from our real job, which is to make the best radio station we know how to make, for the more than 50,000 people in Madison who listen on FM."

Veteran journalist Frank Saxe joins M Street.

Frank's another M Streeter who has both done radio (as a journalist in Rochester, Albany and New York Capitol Bureau Reporter for WCBS). And also covered the radio industry as a journalist (for RBR, Billboard Airplay Monitor, and Billboard itself, as Billboard's Radio/Programming Editor). Frank — who brings both his talent and well-earned industry respect — will help us continue to grow, and bring you more of the breaking news and trends you count on from M Street. You can reach him at "Frank@MStreet.net." ■

WASHINGTON THIS WEEK

continued from page 3 ▼

the NAB Radio Board plenty to jaw about at its Winter Board meeting in Palm Beach. The FCC would require the annual report on EEO efforts to go in the public file — and on the station's website. Stations would be ordered to list all full-time jobs filled during the preceding year, plus recruitment sources, and the contact person and phone number of each. The FCC's even thinking about mandating disclosure of recruitment sources of all interviewees and hires — not just the job. In any case, there would be more record-keeping required: Any station with five or more full-time employees would have to forward job listings to any organization that requests them. A second part of the plan would require broad, non-specific outreach — participation in job fairs, internships, etc. The FCC would do mid-term license reviews on all stations with ten

or more employees, and it would also conduct random audits.

XM and Sirius are fighting for their terrestrial repeaters, facing challenges on technical and competitive grounds.

#1, the NAB is asking the FCC to keep the lid on the terrestrial repeaters operated by XM and Sirius — fearing that down the road they'll use them to originate local programming and/or commercials, changing the strictly "national" nature of the two satellite radio services. #2, wireless companies like Verizon Wireless and BellSouth are asking the FCC to require XM and Sirius to use less-powerful repeaters, to avoid interference with their own current and future services. They're asking the FCC to limit XM and Sirius to a maximum of 2,000 watts of power by 2006. Both FCC filings ask the Commission to protect existing services in the 2 GHz band

— and the NAB wants the services to disclose the location and power level of the repeaters.

Radio groups strike a deal with the record industry over streaming fees.

In a filing with the U.S. Copyright Office, broadcasters and the Recording Industry Association of America (RIAA) say they've reached a "contingent agreement" on the royalty fees broadcasters would have to pay for streaming music on the Web. An arbitration panel will resolve the remaining issues. It's unclear what impact this settlement may have on the NAB's appeal of a federal court ruling, which found that the Copyright Office can force radio to pay royalties for streaming. Bonneville, Cox Radio, Emmis, Entercom, Infinity and Susquehanna are leading that legal charge in appeals court. Those same groups have also signed on to the proposed RIAA agreement, as did AFTRA, the American Federation of Musicians for the U.S. and Canada, and the Association for Independent Music, representing independent record labels. ■

SYSTEMS

(856) 467-8000 • www.radiosystems.com

The following items are based on recent, noteworthy ownership-transfer applications filed with the FCC. The information is based on FCC contracts filed with the Commission and made public within the last few weeks. Market and revenue information is based on data culled from Duncan's American Radio and from M Street's own databases. When known, broker notices are included. Fax releases to Tom Taylor, (609) 883-5696.

San Jose/San Francisco, CA

Hispanic Broadcasting pays \$58M for "stick" KARA. Now we know why Bob Kieve whistled when he saw HBC's unsolicited offer several months ago. On December 3, Kieve said that he and Mac Tichenor were working on a definitive agreement — and now they've announced it. HBC gets a nice Class B signal in the Bay Area for its \$58M, and a chance to launch a new Spanish-language format after it takes over AC KARA (105.7). Compare the \$58M that HBC's paying for a radio "stick" with the \$230M that NBC is paying to acquire KNTV television from Granite. Star Media's Peter Handy handled brokerage for HBC, and MVP's Elliot Evers for seller Empire.

Dallas-Ft. Worth, TX

Infinity deals "Heaven 970" KHVN plus its expanded-band license to Jack Mortenson for \$4.5M. Infinity thought it had divested this future AM combo last year, to the local African-American Trumpet Broadcasting. But that deal failed to close. Infinity needed to spin a Dallas station because of the added TV outlet from the Viacom-CBS merger. Now it's found Mortenson as a buyer for black gospel KHVN, Ft. Worth (970) and its expanded-band allocation for 1630 KHz, named KNAX. In the Metroplex, Mortenson owns "Great Gospel Radio" KGGR (1040) and Spanish religion "Radio Vida" KTNO, Denton (1440). Brokers: John Pierce and Bill Schutz.

Nashville, TN

Nashville Public Radio will pass on buying WNSG (1240) from Jack Mortenson. Turns out Rob Gordon's group is buying one AM in Nashville — not two. It won't go through with a previously-filed deal to buy Mortenson's WNSG for \$2.5M. But it

will proceed with the \$3M purchase of Bill Barry's WKDA (1430) — which has its own towers and 10 acres of land. The Tennessean reports that Gordon "experienced sticker shock" when he saw the \$3M pricetag. But he expects that he'll only owe NPR another \$35,000 a year for programming — on top of the \$430,000 Nashville Public Radio shells out now for WPLN (90.3) and its sisters.

Washington, D.C.

Mega Communications sells WPLC, Silver Spring, MD (1050) to Arthur Liu for \$3M. That gives Liu's Multicultural Broadcasting four AMs in the greater D.C. area, including WKDM (1600), WKDV (1460) and WZHF (1390). WPLC's got 1-kw days, but just 44-watts at night. It's doing regional Mexican for Mega.

Holbrook, AZ

Henry Ash's Petracom buys KDJI (1270) and country "Z92" KZUA (92.1). Seller is Roy Roberts' Navajo Broadcasting Company, and the real estate here is Holbrook, along the I-40 corridor east of Flagstaff. KDJI had been doing sports until recently and is reportedly mostly oldies now, with 5-kw day, 130-w night. KZUA is a class C1 at 92.1. Broker: Jim Hoffman of Explorer Communications.

Tampa Bay, FL

Station owner and broker Dave Wagenvoord buys two AMs in separate deals — #1, he acquires talker WDCF, Dade City, FL (1350) from Collins Communications. WDCF's got 1-kw day, 500-watts night (directional nights). #2, Wagenvoord buys co-located talk WZHR, Zephyrhills, FL (1400) from Zephyr Broadcasting. WZHR's technical facility is 1-kw fulltime, non-directional.

New Orleans, LA

Chris Devine and Bruce Buzil sell their brand-new New Orleans FM to Steve Hegwood, for \$8.5M. The deal for urban KNOU is between JP Broadcasting (Devine and Buzil) and Steve Hegwood's On Top Communications. Hegwood is the former Radio One programming chief who left to assemble his own group. The station he's adding in the Big Easy is KNOU, a Class C2 FM at 104.5 licensed to Empire, LA. Devine and Buzil cash out nicely: they bought KNOU in December 2000 for \$3.5M. Brokers: Media Services Group (Greg Merrill, Eddie Esserman and George Reed) for seller JP.

Louisville, KY

ABC pays nearly \$2M to put Radio Disney into the Louisville market. Disney/ABC demonstrates again that it's deeply committed to Radio Disney (ditto for ESPN Radio). It's paying Word Broadcasting Network \$1,922,000 for an AM that's currently doing Christian and talk programming. But WJIE, Newburg, KY (680) will shortly change over to Radio Disney's 24-hour kids network — making Louisville the 49th U.S. market for Radio Disney. WJIE's technical facility is 1-kw day (2 towers) and 450-watts night (4 towers), DA-2. Seller Word Broadcasting apparently continues programming Louisville non-com Christian WJIE-FM (88.5).

Kansas City

KCWJ — which Infinity once owned and divested — now moves to another ownership situation. Current GM and partner Nick Marchi sells out to his majority partner, D. T. Stayton. Stayton pays \$922,000 cash for Marchi's stake in contemporary Christian/religion KCWJ, Blue Springs, MO (1030). KCWJ's got 1-

kw day, 500-watts night, DA-2. Broker: John Pierce, of KY-based John Pierce & Co.

Pecos, TX

Not far from its Midland-Odessa cluster, Cumulus pays \$1.3M for traditional country KKLY, a class C1 at 97.3 licensed to Pecos. Seller is Emily Hughes, and Ron Kempff of Tampa-based Kempff Communications was the broker for "Pure Country" KKLY. Keep your eye on this one: Lew Dickey's earning a reputation for move-ins, and he must have 1,300,000 good reasons for buying KKLY.

Western NC

Ardell Sink breaks up a simulcast by selling two AMs to separate buyers. Deal #1 is for adult standards WISE, Asheville (1310), which goes for \$1.7M. Buyer is Asheville [sic] Radio Partners, a group led by frequent station trader Ed Seeger. Sink is selling the market's onetime top 40 leader for better than 2-1/2 times its Duncan-estimated 2000 revenue. WISE has 5-kw day, 1-kw nights. Brokers: Greg Guy of Patrick Communications for seller Ardell Sink, and David Chandler of American Media Services for the buyer. Ardell Sink's second deal is for adult standards WTZQ, Hendersonville (1600), which sells for \$750,000. Buyer on this top-end-of-the-dial daytimer is Houston Broadcasting (Randy Houston). WTZQ has 1-kw day and just 12-watts at night. Broker: Greg Guy of Patrick Communications. The sale of WISE and WTZQ probably ends their

simulcast. Keep an eye on Ardell Sink's remaining AMs in his stomping grounds around Asheville: Country "K94" WKYK, Burnsville has a strong signal at 940. Sink also retains WTOE, Spruce Pine (1470).

Bridgeton, NJ

The \$20 million mystery buyer of south Jersey's WSNJ-FM is a group led by noted move-in specialist Ed Seeger. We've known that 82-year-old owner Ed Bold was selling both WSNJ (1240) and WSNJ-FM (107.7) for \$20 million, based on local reports in the Bridgeton, NJ News – but only now can will fill in the blank about the identity of the buyer. WSNJ-FM is a Class B, and we'll be watching to see if Seeger, plus partners Andrew Guest and James Fort try to swing it west toward Philly – or maybe Wilmington, DE.

Eastern Long Island, NY

Veteran executive search consultant Joe Sullivan sells the CP for the future WCSO, a new class A at 92.9 licensed to Southampton, to Peter Ottmar's AAA Entertainment. In addition to the \$500,000 purchase price, Ottmar agrees to pay up to \$100,000 to reimburse Sullivan's Peconic Bay Broadcasting for its settlement and other costs. AAA tells the FCC it will have interests in local stations WEHM, WBEA and WBAZ, as well as WCSO, and says its co-owned WMOS doesn't figure into the local market calculation because of signal coverage.

Springfield, MA

Antonio and Helena Gois buy Spanish tropical WSPR (1270) to complement their tropical and southern gospel WACM (1490). Seller in the WSPR deal is Edmund Dinis, and "Radio Universal" WSPR has 5-kw day, 1-kw night, DA-2. Broker: Robert Maccini of Media Services Group, for the seller.

Waynesburg, PA

Along I-79 between Pittsburgh and Morgantown, Robert Stevens buys simulcast country WANB-AM/FM. This \$850,000 acquisition doubles the size of Stevens' Broadcast Communications, which now has WKHB, Irwin, PA and WKTW, Jeannette, PA. Of the stations it's buying, WANB is a 1-kw daytimer at 1580, and WANB-FM is a class A at 103.1. Seller is Joseph Hennessey of Longmeadow, MA.

Lorain, OH

Vernon Baldwin sells a station outside Cleveland, and it's WDLW, Lorain, which has been doing Spanish tropical music in an LMA with Latina Music Group. However — the buyer is not the party who's been LMAing it. The buyer turns out to be Douglas Wilber, who owns country WOBL, Oberlin, OH (1320). The station he's acquiring is WDLW, which has 500-watts day and 57-watts night. Wilber put 5% down on the \$250,000 purchase price. ■

Media Services Group is one of the nation's largest media brokerage firms. We provide in-depth industry knowledge and market expertise in station sales, mergers, acquisitions, valuations, and financing.

Our Secret is Behind the Scenes!

- Integrated platform concept
- Fiber optic networking
- Any audio source, anywhere

KLOTZ DIGITAL's unique VADIS Platform provides the perfect solution for facilities searching for the ultimate in digital audio integration. From single studio build-outs to new mega-facility operations, KLOTZ DIGITAL provides a cost effective and time saving option to traditional analog and digital facility installations. *Our secret is behind the scenes.* Fiber optic based, the VADIS Platform integrates all audio functions, combining operator tasks, reducing the need for

traditional wiring, and paving the way for effortless future expansion. And, the elimination of a central router means distribution of "any audio source anywhere at any time!"

Compare the costs for yourself. When it comes to savings, quality and performance...nobody even comes close. That's why the most sophisticated and technologically advanced facilities throughout the world choose KLOTZ DIGITAL.

M Street Journal

RADIO'S JOURNAL OF RECORD

January 23, 2002

Serving Radio Since 1984

Vol. 19 Issue 02

What's in a name? Ask the groups who own "Kiss" and "K-Rock"

And more importantly – if you want to use a popular station name or slogan yourself, it's crucial to check that some large group doesn't claim trademark or other protection for it already. That's because a new M Street research study finds groups are stealthily protecting station names, etc. at a record pace. Some highlights from our research: Despite all the Clear Channel headlines over "Kiss",

Infinity is by far the largest holder of service marks and trademarks in radio. We counted several hundred Infinity has either registered, or applied for, at the federal Patent & Trademark Office. They include: *K-Rock, Wave, 80s and More, 80s and Beyond, Cruisin' Oldies, Heaven, K-Lite, Saturday Night Dance Party, At-Work Payoff, The Station You Sing Along To, Now Give Me My Money, The Talk That Rocks, and Your Planet.* Cox Radio has filed for, or owns, 75

service marks. Clear Channel holds or has applied for 68 trademarks. Among them: the familiar *Kiss-FM, The Beat, Kissin' Country, 80s/90s/Now, Interactive Lunch, Trip A Day, and Jingle Ball.* Interestingly, CC has allowed the *Jammin' Oldies* trademark to expire. Citadel owns 36 trademarks, including *Cat Country, Kat Country, K-Bull, The Bull, Loud, Ask an Expert, Freshtrax, Airbound, and Music City 103.3.* How can you find out about trademark ownership? The U.S. Copyright Office has a database, at <http://tess.uspto.gov>. And remember we're talking here just about federal trademarks – there's also protection at the state level, which is a whole other story.

TRANSACTION BRIEF	15

Roll tape! – Or is that actually rope to hang yourself with?

FCC Commissioner Mike Copps' decency crusade includes a strong pitch for broadcasters to voluntarily aircheck themselves – and Disney's Michael Eisner became the first to publicly sign up. This will be something novel for Disney-owned rocker KQRS, Minneapolis, which has experienced lots of controversy lately,

including a long-running battle with local Hmong ethnic minority activists and (who else?) Minnesota Gov. Jesse Ventura. Other groups we've heard from, like Clear Channel and Emmis, aren't falling into line behind ABC. And M Street observes that somebody else hasn't joined the Copps Brigade: FCC Chairman Michael Powell. He's been

notably silent during this little uproar. Once again, it appears that it's the Democratic activist on the Commission who's banging the pots and pans about indecency: first Gloria Tristani, now Michael Copps. Both want to relax the usual standards for evidence (tape or transcript), making it easier for complainants to spark an investigation of a licensee.

Tune into our experience.

Our roots are in broadcasting. Our skill in RF engineering is unparalleled. Our track record in tower construction and operation is unsurpassed. We build towers. You lease them. It's an experience you can rely on.

To find out more about American Tower, call our broadcast development and sales office at 781.355.2005, fax us at 781.329.2096 or visit us at www.american-tower.com.

What do you call it when you...

Save Money and Make Money?

"Perfect"

We've saved money for hundreds
of broadcasters worldwide.

We can help you, too.

Our tools are designed to streamline your
Web processes while empowering your people.

In just 15 minutes, we can show you.

Hundreds of potential new licenses remain in limbo because of the courts' NPR decision, and the FCC will propose a way out in February.

When a federal court ruled that the FCC couldn't use auctions to resolve competing applications where both commercial and non-commercial applicants were vying for the same frequency — it transported hundreds of future new signals into never-never land. Now Mass Media Bureau Chief Roy Stewart says the Bureau's been working on a draft proceeding to resolve the issue. We should know what they're proposing at the FCC's February 14 monthly meeting, when the Bureau is expected to ask the full Commission to launch a Notice of Proposed Rulemaking on its plan. M Street's been saying that given the squeeze put on this issue by Congress (which thought it was protecting non-com operators) — there isn't any easy answer to the impasse. Don't be surprised if this solution, too, winds up in court.

FCC formally relocates the Mass Media Bureau inside the new "Media Bureau."

Ken Ferree is the new boss of longtime MMB chief Roy Stewart — but Chairman Powell literally led a standing ovation at the January monthly meeting for popular 36-year employee Stewart. The Commission voted to give the super-sized Media Bureau certain functions previously held by both the Mass Media Bureau and the Cable Bureau — such as oversight of radio, TV, cable, and satellite service. Ferree, the chief of the Cable Services Bureau, will head the new Media Bureau. The FCC employees' union has approved the reorganization, which will take effect once Congress has been given the required notification.

Bush ran into a brick wall on changing merger-review policy.

It was a cinch that Democratic Senator Fritz Hollings would raise his blood pressure over the press reports, but even House Republicans were upset with Bush's plan to change merger

reviews by allocating them — by industry — to either the Department of Justice or the Federal Trade Commission. The Bush White House — friendly to deregulation — was literally minutes away from announcing the new division. But the announcement never came.

Not only did Democratic FTC Commissioner Mozelle Thompson and Democratic Senator Fritz Hollings feel left out of the loop — so did House

Republican policymaker Billy Tauzin. Bush would've delegated all media industry merger reviews, including radio, to Justice. FTC Chairman Tim Muris and DOJ antitrust head Charles James reportedly midwived the new plan, which Bush has retreated from. We hear the administration is now consulting with Congress and holding some quiet meetings.

Florida broadcasters launch a ferocious "Ax The Tax" statewide ad campaign.

Florida Broadcasters Association president Pat Roberts told a Tallahassee press conference "There won't be anybody in Florida who doesn't know about this tax proposal" after the radio and TV ads kick in, and he's got that 100% right — which shows

FLORIDA ASSOCIATION OF BROADCASTERS INC.

the concentrated power of broadcasters, when they choose to exercise it in a coordinated fashion. Florida Senate President John McKay wants to reinstate the 4% advertising tax that was knocked off in 1987, as part of a larger tax on various services. FBA will spend as much as \$600,000 to buy air time, but a number of radio and TV operators are pledging to run the ad in unsold inventory.

cont. on page 14 >

The "9/11 Effect" conferred gains on some lucky stations with "the news image" – but it turns out that some were non-coms.

Sure, all-newsers WINS and WCBS had robust showings in New York – but it's hard to see the boost to commercial radio listening in Chicago or L.A. And in some markets, the thirst for information about the World Trade Center and Pentagon attacks, anthrax and Afghanistan led listeners to non-commercial news/talk stations. In San Francisco, KQED-FM (88.5) zoomed to a 4.4 12+ total week – literally #5 in the market, behind KGO, KSFO, KCBS and KOIT. (In fact KQED was the second-highest-rated FM in the Bay Area, just a tick behind soft AC KOIT.) Boston is another market where the info-heavy non-com (WBUR-FM) posted impressive numbers in the Fall. Analysis of the Fall Arbitrons continues to show that the visually-powerful events of 9/11 did far more for TV than radio.

The Fall Arbitrons, so far — ACs are doing better than expected, even if they weren't all-Christmas.

A ARBITRON

What's going on with this big AC book? Programming consultant Alex DeMers says he's finding that "listeners are using terms like 'comfortable', 'easy', 'familiar', 'relaxing' and 'comforting' to describe the kind of radio they were seeking out." He says "it's almost a companionship thing", in the wake of 9/11, the anthrax scare and Afghanistan. And how about country radio? It got a huge lift from the 1990-91 Persian Gulf War – but so far we haven't seen a similar wave kick in from Afghanistan. One

country consultant tells M Street the boost may come in 2003, not Fall '02.

An FM station — Clear Channel's AC "Lite 106.7" — is finally the top biller in New York.

It took years, but Miller Kaplan says WLTW was able to claw its way in front of WFAN in '01.

106.7
Litelfm

WLTW totaled \$56M in revenue, which was down \$4M from 2000, but still good enough to rank number one in a market which got clobbered by the ad slowdown and then 9/11. Infinity's sports "Fan" came in second, with \$51M, down \$11M over the previous year. Infinity's all-news WINS came in third, up one rank from last year though its revenues fell \$7.4M to \$49.6M. The figures are from Miller, Kaplan & Arase and were reported in Crain's New York Business. Last year's number two biller, Infinity modern rocker WXRK, fell to number four. K-Rock, which gets a significant portion of its billing from Howard Stern, saw its revenues plummet \$17M, to \$44M.

Collective contesting is back, for a rare appearance in a Winter Arbitron.

It may be "just a Winter book" but... "The Million Dollar Cash Register" is ringing at Infinity's W H O K , Columbus.

★ 95.5
NEW COUNTRY

And listeners to CC rocker WZZO, Allentown (among other stations) had a chance at winning one of 20 "SuperBowl Trips with a Centerfold." And at Clear Channel's Alice in Detroit, there was a "his and

hers" prize package of a SuperBowl trip and a "slumber

party cruise for women only" to the Bahamas (with the chance to win \$500,000 on the boat). All the online contest descriptions we've seen disclose that the listener is competing "nationwide" and "multi-city." America seems to be "over" the tragedy of September 11, and one researcher says that shift had taken place by December. But the surprise is that this new wave of collective contesting is happening not during a more important Spring or Fall Arbitron, but the less-important Winter book.

It was a battle, but WSM-AM stays country.

Owner Gaylord Entertainment swears traditional country WSM, Nashville (650) lost \$1.5 million last year, but after enduring a withering storm of criticism, pledged to keep it country, instead of flipping it to sports. Another thing:

Gaylord must figure out syndication plans for the WSM-based

Grand Ole Opry. Colin Reed wants to expand the Grand Ole Opry brand and explore syndication — something all previous owners of WSM have resisted. Gaylord acquired WSM and the Opry in 1983, and it continued the reluctance of other owners to syndicate some or all of the weekend traditional country radio show. The thinking was that WSM's booming 50-kw signal covered enough potential listeners all by itself. That maintained the mystique of WSM and the Opry — but has limited the growth of the franchise.

THE ISSUES, THE PEOPLE, THE TECHNOLOGY

Can you afford NOT to be there?

Referred to by *Advertising Age* as the advertising industry's soft-spoken visionary, DDB Worldwide Communications Group Chairman, **Keith Reinhard**, thinks Radio delivers more personal, more precise images than any other advertising medium. He will first inspire you and then challenge you as he illustrates his keys of advertising at The NAB Radio Luncheon, Tuesday, April 9. **Dick Orkin**, from The Radio Ranch, will be inducted into the NAB Broadcasting Hall of Fame.

See you at the RAB. . .

Yes, it's getting to be convention season – and we hope the industry feels confident enough to do some traveling, whether it's to Orlando, Nashville or Las Vegas (and this fall, Seattle). If you're at the **RAB meeting in Orlando (February 7-10)**, **M Street will be there on the exhibit floor. We'll also be covering the CRS in Nashville and the spring NAB Show.** But the question on everybody's lips is: How will the ad crunch and consolidation affect convention attendance?

▼ *cont. from page 3*

The latest on DAB: iBiquity names its first six markets, and submits digital AM for evaluation.

iBiquity's 2002 launch plan targets New York,

Los Angeles, Chicago, San Francisco, Seattle, and Miami. After that, in 2003, come Atlanta, Boston, Dallas, Denver, and Detroit. Broadcasters already on board with investments in iBiquity: ABC, Bonneville, Beasley, Clear Channel, Cox Radio, Hispanic Broadcasting, Infinity, and Susquehanna. But so far we've been talking about just one-half of the spectrum: In-band, on-channel Digital Audio Broadcasting for FM. As for the more problematic AM, iBiquity has just turned in its engineering results to the National Radio Systems Committee. It conducted field tests at three commercial and one experimental AM station. Last November the NRSC endorsed iBiquity's FM IBOC system, and iBiquity CEO Bob Struble is still predicting digital radio will become a reality in 2002.

NAB says despite losing Infinity, radio membership is at a record level.

From the recent NAB Winter Board meetings in Palm Beach, FL: NAB CFO Ken Almgren admits the association has

suffered from the financial challenges of its radio and TV members. But at the radio level, NAB Executive VP

John David says the new groups who've been joining offset the loss of

Infinity. The Infinity radio group was an innocent bystander in the TV-driven scrap between parent Viacom and the NAB. M Street notes that while the number of radio members may be at an all-time high, the association likely doesn't derive as much in dues from the new groups as it did from big-market player Infinity.

Marconi winners can now "thank the Academy"...

No more "campaigning" and "block voting" for the

NAB Marconi awards, because now the "academy" will choose, not a blanket collection of GMs and PDs. This is getting to be like the Oscars: An "academy" of voters — who won't be publicly identified — will select each year's Marconi winners. Up until this year the voting was done by GMs and PDs at NAB member stations. Starting with this year's Radio Show

in Seattle, the selection of the annual award winners will be done by an "academy" of radio professionals. They'll include current GMs and PDs, but also owners and consultants, plus former radio execs. And all of them remain anonymous. The electioneering by Marconi nominees has grown from a few trade-pub ads 10 years ago to very sophisticated e-mail campaigns and even giveaway items.

The Supreme Court hammers the final nail in the coffin for the FCC's second set of EEO rules.

The high court refused to review the D.C. Circuit Court of Appeals ruling, which said that part of former Chairman Kennard's EEO outreach rules amounted to constitutionally unacceptable quotas. Nearly three dozen civil rights groups asked the Supreme Court to take the case. The FCC has already begun its third attempt at establishing EEO rules, focusing on an outreach track that the appeals court didn't throw out. The FCC is collecting comments until March 15 on the Notice of Proposed Rulemaking. NAB opposed the appeal, but it says it will work with the Commission on writing the third set.

TRANSACTION BRIEF

The following items are based on recent, noteworthy ownership-transfer applications filed with the FCC. The information is based on FCC contracts filed with the Commission and made public within the last few weeks. Market and revenue information is based on data culled from Duncan's American Radio and from M Street's own databases. When known, broker notices are included. Fax releases to Tom Taylor, (609) 883-5696.

Bismarck, ND

Years after the Bill Kennard FCC put tracer bullets on its agreement to sell stations to Cumulus, Anderson Broadcasting tries again, with a new buyer. In December 2000, outgoing Chairman Kennard took the unusual step of "designating for hearing" Cumulus Broadcasting's deal to buy Anderson's talk/sports **KXMR** (710), traditional country **KBMR** (1130), **AC KSSS** (101.5), and country **KQDY** (94.5). It was Kennard's way of protesting what he deemed to be over-consolidation. The delay prompted Cumulus to exit the contract, even though it had been LMAing the cluster for two years. The LMA was dissolved in February '01 when Anderson regained control of the stations. Finally, the Andersons have a new deal, with a group led by market vets Bob Denver and Terry Fleck, and bankrolled by former Bismarck owner Jim Ingstad. Dennis Anderson says Clear Channel had been interested in buying the cluster, but he wanted to be sure he would have no delay at the FCC this time — so he sold to a group with no stations in the market.

Memphis, TN

For \$100,000 plus the cost of building out **WKBJ**'s upgrade, buyer F.W. Robbert Broadcasting gets a new Memphis AM move-in — at least in the

daytime. The buyer will eventually have a solid daytime AM signal at 1600 KHz, with a bump up from 2,500 watts days to 5,000 watts, non-directional. **WKBJ** is now licensed to Milan, TN, east of Memphis, and will re-license to Lakeland. Its purchase returns F.W. Robbert to the Memphis market after more than a decade, since Robbert once owned **WMQM** (1480) there. It now owns **WITA**, Knoxville (1490) and **WVOG**, New Orleans (600), and we'd expect the company to do religion and brokered programming in Memphis. Seller in the **WKBJ** deal is Milan Broadcasting.

South Bend, IN

Art Angotti's Artistic Media tacks on two more stations to its existing cluster of **CHR WNDV-AM/FM**, standards **WHLY** and classic country **WJVA**. Deal #1, contemporary Christian **WGTC**, New Carlisle, IN, a class A at 102.3. Seller is Summit Radio, and Artistic Media pays \$1.5M. Deal #2, classic rock **WZOW**, Goshen, a class A at 97.7. Seller is Van Hawke Communications, and the price is \$925,000.

Harrisonburg / Winchester, VA

For \$675,000, country **WSVG** (790) and "G96" country **WSIG-FM** (96.9) go from Richard Judy's Shenandoah

County Broadcasting to Shenandoah Valley Television, LLC. The buyers are **WBOP** owner Peter Lechman and **WBOP** GM Tom Manley. **WSVG** has 1-kw day, 40-watts night, and **WSIG-FM** is currently a class A — but has an app to upgrade. They're both licensed to Mt. Jackson, VA.

Fairbury, IL (outside Peoria)

Peter Ottmar's AAA Entertainment adds to its regional holdings with the \$1.7M pickup of rocker "The Buzz" **WBZM**, a class B1 at 107.7. Seller is Rainbow Radio of Livingston County, which is associated with Bud Walters' Cromwell Group. Brokers: George Reed and Robert Maccini of Media Services Group, for seller Rainbow Radio of Livingston County.

Coastal Maine

Clear Channel comes back to buy a third Maine station from Charles Hutchins. It's classic hits **WQSS**, a class B at 102.5 licensed to picturesque tourist destination Camden. Last year CC agreed to pay \$3,750,000 for Hutchins' Bangor-market standards **WABI** (910) and **CHR WWBX** (97.1). This time it's paying Hutchins' Gopher Hill Communications \$1,720,000 for **WQSS**.

Media Services Group is one of the nation's largest media brokerage firms. We provide in-depth industry knowledge and market expertise in station sales, mergers, acquisitions, valuations, and financing.

Our Secret is Behind the Scenes!

KLOTZ DIGITAL's unique VADIS Platform provides the perfect solution for facilities searching for the ultimate in digital audio integration. From single studio build-outs to new mega-facility operations, KLOTZ DIGITAL provides a cost effective and time saving option to traditional analog and digital facility installations. *Our secret is behind the scenes.* Fiber optic based, the VADIS Platform integrates all audio functions, combining operator tasks, reducing the need for

traditional wiring, and paving the way for effortless future expansion. And, the elimination of a central router means distribution of "any audio source anywhere at any time!"

Compare the costs for yourself. When it comes to savings, quality and performance...nobody even comes close. That's why the most sophisticated and technologically advanced facilities throughout the world choose KLOTZ DIGITAL.
