As the year draws to a close we look forward to sharing the holidays with friends and family. Here in the mountains we have watched the green leaves of spring and summer take on their fall grandeur of gold and red, finally falling into a soft carpet on the forest floor awaiting its first mantle of snow.

On the scanner scene we have witnessed the emergence of new laws and new equipment, and the fading of old laws and old equipment. With the outlawing of cellular-capable scanners, we anticipate a vigorous market in such scanners over the next few months while they are still lawful to manufacture and import.

On the shortwave scene several new receivers are quietly emerging while prices continue to climb on Japanese manufactured equipment. The Grove SW-100 was delayed due to circumstances beyond our control and now is expected to be in production late this spring. The SDU-100 should be available in January.

While general economic conditions show little improvement, we are pleased to report record high sales. We hope that your endorsement of Grove products and services means that we are fulfilling your expectations. Please let us know if we ever fail to please you; we will address that deficiency immediately.

I hope that the holidays are kind to you and that the new year brings you continued good health, happiness and prosperity.

Bob

**Grove’s**

**Customer Satisfaction Guarantee**

**RETURN AUTHORIZATIONS**

"I THOUGHT I WOULD LIKE IT, BUT I DON’T" — Simply call our toll-free line (1-800-438-8155) within 30 days of shipping date and request a return authorization number. Place the RA number prominently on the outside of the shipping carton to expedite your return. Upon receipt of the product in original packaging and new condition (please be sure to double box items which were shipped to you in that form, wrap items so no scratching or rubbing occurs, and don’t put tape or write on the outside of display box); we will refund your money, less shipping, or give you credit toward another product—your choice. Any product returned in not-as-new condition will be assessed a fair refurbishing charge. Be sure to include the authorization number as a 10% restocking charge must be assessed for products returned without authorization. Special order items cannot be returned.

"I RECEIVED A DAMAGED PACKAGE" — If you see that the package is damaged when delivered, ask the UPS driver to wait while you open the box and inspect the contents. If it is damaged, refuse the package and call us on our toll-free line (1-800-438-8155) to advise of the problem. If the package is left on your doorstep and you discover that it is damaged, call your local UPS office and ask them to pick it up. Be sure to keep the packing box. Then call us and we will see that a replacement is shipped.

**DEFECTIVE MERCHANDISE**

If any merchandise proves to be defective within thirty days of shipping, call our toll-free line (1-800-438-8155) to receive a return authorization number. We will issue a call tag for UPS to pick up the package from your address at no cost to you. If you return via another method (e.g. UPS Red, Federal Express) — only UPS ground charges will be refunded. When we receive the unit here we will check it out, and if it is defective we will replace it with a new unit at no cost to you. If the unit is not defective, we will call to give you the choice of a refund or return of the equipment with an explanation as to why you may have thought it was defective. If merchandise becomes defective after thirty days, please see the individual warranties below.

**CHANGES IN PRICES, SPECIFICATIONS AND AVAILABILITY**

If there is a price increase over $10 from the amount you have shown on your order, you will be notified before shipment. If the increase is under $10, you will be sent a statement of amount due with your merchandise. If there is a price decrease you will be sent a refund check.

Specifications are subject to change without notice. Manufacturers frequently make minor changes during production to improve performance.

Due to demand and availability, we occasionally have to drop a product from our catalog. All available items on your order will be shipped and a refund will be sent for the item which is no longer available. If the discontinued item is tied in with other equipment you have ordered, we will contact you to be sure you want the order shipped.

**ANY QUESTIONS?**

If you require additional technical information on our products, call 704-837-7081 or send questions along with a self-addressed stamped envelope, and we will be happy to reply. Questions regarding shipping methods, accounts, etc., call 704-837-9200.

**Manufacturers’ Warranties**

**GROVE ENTERPRISES, INC.**

All equipment manufactured by Grove Enterprises, Inc. is warranted against manufacturing defects for a period of one year under normal use by the purchaser, providing that no modifications or field repairs have been attempted.

If any equipment should fail after the initial thirty day warranty (above) Grove shall repair or replace that defective equipment upon its postpaid return. Please call our toll-free number (1-800-438-8155) to receive a return authorization number. The use of this number will expedite its repair and should appear in bold letters as “RA 111” on the outside of the package. The warranty does not cover hazard to person or associated equipment or property. Your warranty is considered to be in effect from the date of shipment to you. Violations of the warranty clause will automatically void the warranty and services or repairs will be charged to the owner.

Service outside of the one year warranty will be charged at the cost of parts, labor, and return shipping. Payment for repairs must be received before the repaired unit can be returned.

**WARRANTIES BY ICOM, UNIDEN, KENWOOD, ETC.**

If any equipment should fail after the initial thirty day warranty (above), check your service manual for the repair center nearest you or call our toll-free line (1-800-438-8155) for the name, address, and phone number of the service center nearest you.
Choosing a Shortwave Receiver

Choosing a shortwave receiver for your personal use is a lot like choosing a car. You must first decide what basic service you need, then shop for the best buy.

Looking for a good portable? The Sony ICF2010 is the best choice. Featuring keyboard entry of frequencies as well as a tuning dial, the radio offers sensitivity and a choice of wide or narrow selectivity. In addition to 150 kHz-30MHz continuous coverage, the 2010 also offers 118-136 MHz aircraft and 88-108 MHz FM broadcast reception.

The 2010's synchronous detection enhances shortwave reception; single sideband signals are also quite satisfactory. Battery life is much improved over its predecessors and it comes with an AC adaptor. Additional features are found on the new upgraded model SW77, listed in this catalog.

For low cost at reasonable performance, try the Sangean ATS-803A. Continuous 150 kHz-30 MHz AM and SSB reception are offered along with FM broadcast and wide or narrow selectivity. An AC adaptor is included.

If you want pocket portability, forget high quality; the two don't mix. The characteristics of greatest importance to listeners are those which are most commonly compromised in low-cost radios: frequency stability, dial accuracy, selectivity and overload immunity.

The Grove TUN3 and TUN4 preselectors will reduce or eliminate overload interference on low cost receivers which suffer from poor dynamic range, and are equipped with connectors for an external antenna.

For the serious listener, the new Grove SW-100, Drake R8, ICOM R71A, Kenwood R5000 and JRC NRD535 head the list.

SHORTWAVE ANTENNAS AND ACCESSORIES

While it is true that any length of wire will pick up signals, a well planned antenna installation will pick them up better. The greatest efficiency of an antenna occurs when its electrical length matches that of the incoming radio wave (resonance). For a given length only occurs at one frequency and related multiples. It is the job of the antenna designer to come up with the best combination of characteristics for wide frequency coverage.

The "bigger the better" concept has its limitations. Once an antenna is large enough to hear signals above the noise generated by the receiver's own circuitry, further strength is unnecessary. For most applications 20-75 feet is plenty long enough; in fact, doubling the length of a matched antenna will improve signals by only 3 decibels—half an S unit and barely discernible.

Impedance matching (standing wave ratio-SWR) may be important for transmitting, but is of virtually no concern in receiving. While a perfect match between an antenna and receiver will deliver the greatest signal strength, the background atmospheric noise (hiss and static) will increase proportionately. The net result will be a high-S meter reading, but no better signal readability above the noise.

A wire antenna may be thick or thin, made of any metal, insulated or uninsulated, stranded or solid; it will hear all signals the same. Choose your wire for strength, solderability and corrosion resistance.

An antenna should be as high as possible and away from large metal surfaces and electrical power lines to avoid electrical noise pickup and shock hazard. Indoor antennas often pick up noise from household appliances, although loop antennas may be rotated for minimum interference.

RECOMMENDED ANTENNAS

For shortwave reception, it's hard to beat an elevated dipole. In actual field tests the low-cost Grove Skywire (ANT-2) repeatedly equaled or outperformed any other receiving antenna on the market including expensive trap dipoles.

Trap dipoles are designed to work best on certain ranges like the broadcast or ham bands, often compromising the remaining frequency ranges. Why buy a general coverage receiver, then reduce its capability with a frequency restricting antenna?

For medium and longwave reception, the operator may wish to disconnect the ground side of the fedline, thus allowing the feedline to become part of the antenna for added length and improved low frequency signal strengths.

Directional antennas concentrate incoming signals ("gain") from one direction while rejecting interfering signals from other directions.

The large capture area (aperture) of a big antenna overcomes poor sensitivity in old receivers by providing stronger signals, but modern receivers have excellent sensitivity and require smaller antennas.

Active antennas are nothing more than short vertical elements attached to an amplifier to approximate the signal levels delivered by a full-size antenna. Untuned amplifiers are vulnerable to strong signal overload because of limited dynamic range. This produces gain compression (apparent lack of sensitivity) and intermodulation ("intermod")—the mixing of signal frequencies heard as spurious signals throughout the listening range.

Some active antennas, including the Grove Hidden Antenna system, overcome this shortcoming by including a preselector which selects the desired frequency and attenuates all others.

Because of their indoor location, complexity, vulnerabilities and cost, active antennas should be chosen only when adequate outdoor antennas are not possible.

If an antenna intercepts enough signal voltage to overcome losses and noise in the receiver, no amount of amplification will make the signal easier to copy, just louder—along with louder background noise.

FEEDLINE

A wire run from your receiver to a nearby tree may produce excellent reception, but it is susceptible to electrical noise pickup from nearby appliances; use coaxial cable for your antenna lead-in. For reception below 30 MHz, virtually any well-shielded coax like RG-58/U, RG-59/U, RG-6/U or RG-8/U is satisfactory for runs up to at least 100 feet.

PRESELECTORS

A passive (unamplified) preselector like the Grove TUN-3 MiniTuner can be thought of as a frequency-adjustable gate for radio signals; its purpose is to pass desired signal frequencies while rejecting all others. Installed between the antenna line and receiver, it eliminates intermodulation, image interference and desensitization caused by strong signals in economy receivers. It is not an impedance matching device nor preamplifier, so it won't make received signals stronger.

In contrast, an amplified preselector like the Grove TUN4 not only passes those desired signals, but amplifies them as well, often improving reception when the antenna is small or indoors.
GROUNDS

A connection to an earth ground rarely makes signals stronger, but will lessen the hazard of electrical shock and may reduce electrical line noise interference or AC hum on received signals.

An effective ground consists of a short length of heavy gauge wire (or coax cable shield) connected to a single metal pipe or rod driven at least eight feet into moist soil. Dry soil or sand is worthless as a ground. A metal (not PVC) cold water pipe may work, but hot water pipes are usually caulked at the water heater, electrically insulating them. As a last resort, connect your ground wire to the screw holding on the wall plate over the AC outlet.

Equipment chassis should be commonly grounded to a single metal pipe or rod driven at least eight feet into moist soil. Dry soil or sand is worthless as a ground. A metal (not PVC) cold water pipe may work, but hot water pipes are usually caulked at the water heater, electrically insulating them. As a last resort, connect your ground wire to the screw holding on the wall plate over the AC outlet.

The old-fashioned gap-type lightning arrestors so common during the vacuum tube era are no longer adequate; transistors burn out on voltages much lower than an air gap can protect. Ofing much better protection are the new gas-charge types such as the Grove LA1 and Alpha Delta TransiTrap.

While nothing can guarantee protection from a direct lightning strike (always disconnect your antenna from your equipment during storm season), these devices will harmlessly short-circuit any voltages induced on the antenna by close strikes.

The Top 100 SW Frequencies

An introduction to shortwave listening from Grove Enterprises and Monitoring Times.

Nowhere in the radio spectrum is found as much intrigue as on shortwave. The following frequencies (in kHz) list voice utilities (two-way communications) using upper side-band (USB) and AM broadcasters best heard in the early evening hours.

The Grove SW-100
Full-Featured General Coverage Receiver

Built to exacting government surveillance standards, the SW100 professional grade receiver offers premium features at affordable cost.

Secured in a compact, all-metal enclosure, the lightweight SW100 tunes from 10 kHz through 32 MHz (1000 MHz with optional converter under development) and offers 1000 memory locations. Precise 10 Hz frequency readout on a large backlit LCD; receives all modes including AM, USB, LSB and narrowband FMI! Even RTTY, FAX, packet and other digital modes with external decoder.

Advanced synchronous detection reduces fading and distortion on distant AM stations while allowing the passband to be tuned for optimum reception.

Up-conversion and wide dynamic range virtually eliminate images and intermod. Crystal and multi-element piezofilters assure optimum reception under brutal interference conditions.

Enjoy unexcelled sound from a tone equalized, full-fidelity, 4" top-mounted speaker, while a sensitive, all-mode squelch removes irritating background noise between signals. Annoying tones and whistles are sliced out with a 40 dB notch filter, and a low-distortion pulse noise limiter suppresses electrical interference.

Read signal strengths accurately in S units and microvolts; a center tuning indicator assures precise frequency adjustment. Tape recorder control allows recording of your favorite programs; an RS232C computer interface is available.

SPECIFICATIONS
Frequency Range: 10 kHz-32 MHz
Memory: 1000 channels (100 banks of 10) store frequency, mode, selectivity, channel number, lockout
Scan: 20 channels per second (minimum) with 2 second delay; A/B VFO automatically follows dual-frequency communications
Frequency Readout Accuracy: 10 Hz (5 decimal places)
Center Frequency Tuning Indicator: LCD
Frequency Accuracy: +/- 5 ppm
Sensitivity: (10 dB SINAD SSB, 50 ohms): 0.5 microvolts (8 dB) or better
Dynamic Range: 80 dB min.
Intermodulation (3rd Order Intercept Point): +15 dBm min.
Image/IF Rejection: 90 dB min.
Selectivity: (2:1 shape factor, -6/-60 dB):
AM/SSB wide 8.0 kHz, medium 3.0 kHz, narrow 2.4 kHz, sharp 1.0 kHz (optional); FM narrow 15 kHz, sharp 6.0 kHz
Tuning Steps: AM 100/1000 Hz, AM synch/SSB 10/100 Hz, NFM 2.5/12.5 kHz, plus user defined 10 Hz-1000 kHz
Conversion Scheme: Up-converted double superheterodyne (45 MHz, 455 kHz)
AGC: 10 mS attack, 10 mS AM/FM decay, 500 mS SSB decay
Receiving Modes: AM, AM synch, USB, LSB, NBFM
Noise Limiter: Low distortion pulse clipping
Overload Protection: Induced lightning and signal overload
Tone control: Bass/treble adjust
S Meter: D'Arsonval movement registers S units and microvolts
Display: Backlit LCD

Notch Filter: Suppresses 450-5200 Hz tone interference 40 dB
Squelch: Signal activated, all modes
IF Output: 45 MHz for Spectrum Display Unit
Power Requirement: 12 VDC @ 1 A; 120 VAC adapter included
Recorder Activator: Sinks 12 VDC @ 1 A
Record Output: 500 mV @ 1000 ohms
Audio: 4 watts @ less than 10% THD into 4 ohms
Internal speaker: Top mounted, 4" full fidelity
Earphone Jack: 1/4", 4-16 ohm, anti-blast protected
External speaker jack: 1/8"
Dimensions: 4"H x 10"W x 8"D; rack mountable
Weight: 5.5 lbs
Warranty: One year

New from Grove! Designed and manufactured in the USA!

Grove SDU-100 Spectrum Display Unit

Turn your Icom R7000, R7100, R9000 or Grove SW-100 into a powerful spectrum analyzer! Plugs into any receiver or transceiver that has an IF output jack!

Enjoy the high-tech advantage of counte rsurveillance professionals who depend upon spectrum analyzers to find eavesdropping transmitters ("bugs").

As the "spikes" appear on the screen you can tune them in quickly; no need to wait for the slow, hit-and-miss search of a scanner.

Your receiver's tuned signal is the center of the screen, with up to 10 MHz (or as narrow as 100 kHz) of spectrum displayed simultaneously! Nail those unknowns as soon as they transmit!

Ideal for locating jammers, identifying sources of radio interference, studying signal propagation, testing antennas, aligning receivers and transmitters, and much more!

Connect the SDU-100 to any TTL monochrome monitor, or order the matching VID-100 9" CRT monitor. 12 VDC powered for mobile or field environment; AC adaptor included (the VID-100 is AC powered).

The SDU-100 is configured to operate with a variety of receiver intermediate frequencies (IFs), including 8.8, 10.7, 21.4, 45 and 70 MHz. This must be specified at the time of order.

Order Today!

SDU-100  Spectrum Display Unit  $499.95
VID-100  9" CRT Monitor  $149.95

Order both for  $599.95

NOTE: Demand for this spectrum display system, due for release in January, is expected to be heavy. Reserve orders are being taken now.

From R.L. Drake —

**The R8 Communications Receiver!**

It has been nearly a decade since this respected American company withdrew from manufacturing communications equipment; now they have returned better than ever!

The exciting new R8 general coverage communications receiver offers outstanding 100 kHz-30 MHz performance at a competitive cost. Four voice-bandwidth filters combined with excellent audio design make international broadcast listening as well as utilities monitoring a pleasure.

Synchronous detection reduces fading and distortion while passband tuning rejects adjacent frequency interference. Ideal for AM, SSB, RTTY, CW reception.

Optional converter allows AM/FM reception 35-55, 108-174 MHz, while a built-in microprocessor/controller offers RS232 computer control and multiple-function scanning.

Dual VFOs, switchable preamp/attenuator, dual-time zone clock timer, switchable antenna inputs, universal power supply and more combine to make this new receiver an outstanding value.

**Specifications**

- Frequency range: 100 kHz - 30 MHz (35-55/108-174 MHz with optional converter)
- Keypad frequency entry: Yes
- Tuning steps: 10 kHz (10 kHz/50 Hz)
- AFT (fine tuning) not required
- Display: Solid state LCD
- Dimmer: Yes
- Type of tuning recommended: International broadcast and utilities
- Receiving modes: AM, narrow FM, USB, LSB, RTTY, CW, synchronous AM
- Memory: 100 channels
- Bank: 10
- Lockout: No
- Priority: No
- Search: No

- Delay: Yes
- Squelch: Yes
- Clock: Dual time zone
- Audio output power: 2.5 W @ 4 ohms for 10% THD
- Record audio output: Yes
- Recorder activation: No
- S meter: Analog
- Computer interface: RS232
- Conversion scheme: Double up-conversion
- Sensitivity: 0.5 uV 1.5-30 MHz (0.25 uV 5-30 MHz with preamp), 1 uV 100 kHz-1.5 MHz
- Selectable preemphasis: Yes
- Selectable attenuation: Yes
- Selectivity: 60 dB
- (1-60 dB, 0.1 dB steps) 6/ 2.5 kHz (2.5 kHz 50 Hz (51) 100 kHz-1.5 MHz
- Image rejection: greater than 800 dB 1.5-30 MHz, greater than 60 dB 100 kHz-1.5 MHz

**Accessories:**

- ACC43 VHF Converter $199.95
- ACC49 External Speaker $48.95 plus $6 UPS
- ACC67 Service Manual $39.95
- ACC77 PC Software $58.95
- Installation fee $20

**Specifications**

- Frequency range: 100 kHz - 30 MHz
- Keypad frequency entry: Yes
- Tuning steps: 10 kHz/50 Hz
- AFT (fine tuning) not required
- Display: Fluorescent
- Dimmer: Yes
- Type of tuning recommended: Domestic and international broadcasting; two way SSB/CW/RTTY
- Receiving modes: AM, USB, LSB, narrow FM, RTTY, CW
- Memory: 100 channels
- Scan: Yes, programmable
- Banks: 10
- Lockout: Yes
- Priority: No
- Search: Yes
- Clock: 24 hour, dual function with timer
- Audio output power: 1.5 watts
- Record output: Yes, no activator
- S meter: Analog
- Computer interface: Optional
- Conversion scheme: Double up-conversion: 50 kHz/800 Hz
- Sensitivity: 0.5 uV 1-30 kHz, 25 W (50) 0-1600 kHz 4 uV
- 150-500 kHz 1 uV
- Selectable preemphasis: Yes
- Selectable attenuation: 10 dB/30 dB
- Selectivity: 60 dB
- (4-600 kHz) AM 6 dB, 2.5 kHz 50 Hz (51) 100 kHz-30 MHz
- Image rejection: 50 dB
- Frequency stability: +/- 1 ppm at 10° C
- Selectable AGC: Slight/fast
- Dynamic range: 80 dB @ 20 kHz spacing
- Passband tuning: +/- 3 kHz
- Noise blanker/filter: Dual
- Adjustable notch filter: 50-500 Hz, 40 dB
- Tone control: Yes
- Antenna connector: Dual, switched
- Dimensions: 15x17 x 5.144 x 13"D
- Weight: 13 lbs.
- Payable requirements: 100/200/240 VAC, 50/60 Hz; 11.16 VDC @ 2A
- Warranty: 1 year

**Kenwood R-5000**

This extraordinary communications receiver has built-in modes for AM, FM, USB, LSB, CW, FM and FSK (RTTY). 100 memory channels store frequency, mode, and antenna selection (two inputs); 10 Hz tuning accuracy. Non-volatile memory retains functions even if long-life lithium battery fails.

Filters are provided for 6 kHz AM, 2.5 kHz SSB; you can add up to two more (one each: CW, SSB or AM). Excellent audio quality for broadcast monitoring.

**Order RCV7**

Headphones now available—see page 28
JRC NRD-535D

The top of the line has a new leader! Japan Radio Company, manufacturer of the coveted NRD series of professional communications receivers, has just introduced an advanced receiver design with superb performance features.

Offering continuous frequency coverage of 90 kHz through 30 MHz and reception modes for AM, USB, LSB, CW, RTTY, FAX and narrowband FM, frequency is displayed to 10 Hz accuracy on a giant, brightness-adjustable fluorescent display; tuning resolution is an incredible 1 Hz at a drift-free +/- 2 parts per million!

JRC's remarkable new continuously-variable passband filter allows the user to custom-select the exact filter bandwidth he wants, from 0.5-5.8 kHz, to reduce or eliminate adjacent channel interference with minimum impact on the fidelity of the desired signal. Exalted carrier selectable sideband (ECSS) permits additional clarity of reception on AM international broadcasters who are plagued by adjacent-frequency interference.

Four filter bandwidths may be selected for any mode (except NBFM which is 12 kHz). The dual noise blanker is extremely effective in reducing or eliminating aggravating impulse noise like ignition noise and the woodpecker.

Comfortable, effective listening is enhanced by the array of front panel controls like squelch, AF and RF gain controls, tone control, and AGC timing. A powerful 24-hour clock-timer can be pre-adjusted for frequency, mode and on/off time, and even includes a record activator so you can automatically listen to or record a transmission of interest. A built-in RS232 interface allows your computer to control virtually every function of this remarkable receiver for even greater listening power.

**Conversion schemes:**
- Tripple up-conversion (70.45 MHz/455.97 kHz)
- Bandpass for SSB, USB, LSB
- Selectable AGC
- Selectable attenuator: 20 dB
- Selectivity: (46-60 dB) AUX 12/24 kHz, WIDE 6/15 kHz, INTER 2/6 kHz, NARR 1/3 kHz, FM 12 kHz, continuously adjustable 0.5-5.8 kHz
- Image rejection: 70 dB
- Frequency stability: +/- 2 ppm after one-hour warmup
- Selectable AGC: Fast/slow/off
- Dynamic range: 106 dB @ 300 Hz BW
- Passband tuning: +/-1 kHz
- Noise blanker/filter: Dual wide
- Adjustable notch filter: -30 dB
- Tone control: Yes
- Antenna connector: SO-239 (UHF)
- Auxiliary connector: No
- Dimensions: 12"W x 5.5"H x 11.5"D
- Weight: 20 lbs.
- Power requirements: 120/240 VAC @ 50/60 Hz, 12 VDC 2 A
- Warranty: One year
- Accessories Included: None

- ACC29 CGD-135 High stability (+/-0.5 PPM) crystal oscillator: $79.95
- Upgrade and filter installation fee: $20 any quantity

**Special closeout price from Grove while quantities last!**

**JRC NRD-525**

Eventually, a receiver is going to be discontinued. Now you can get this remarkable receiver at a greatly reduced price.

Two hundred memory channels store your choice of frequencies from the continuous 90 kHz-34 MHz tuning range, in any mode — AM, FM, USB, LSB, RTTY, CW and FAX. Memory channels may be scanned or searched, each channel storing such information as frequency, mode, bandwidth, AGC timing, and attenuation setting.

Frequencies may be keyboard entered and dial selected. Factory selectivities are 12, 4 and 2 kHz; two more may be added in any mode. A double super-heterodyne circuit (70.45 MHz/455 kHz) features up-conversion for minimum image response, and wide dynamic range (greater than 100 dB assures excellent intermod immunity). IF and image rejection are typically 70 dB or more. High sensitivity (0.5 uV SSB) catches the weakest signals.

Passband tuning and a notch filter allow precise targeting of signal interference while an effective noise blanker permits rejection of pulse noise. Tone control, BFO, RTT, squelch, RF gain, step tuning, 24 hour clock timer with record activator and computer compatibility make this a remarkable receiver.

Philips DC-777 Mobile AM/FM/Shortwave Radio

For those mobile shortwave listeners who want it all—FM stereo, local AM medium wave and international broadcasting, the DC-777 even includes a stereo cassette player so you can hear your favorite tapes when listening conditions aren't the best. Twenty memory channels with autosearch, a brilliantly-backlighted LCD frequency display, crisp stereo FM, compact in-dash mounting, digital frequency entry—just a few of the advanced features which are found on this high quality, multiband auto radio. DIN mounting bracket included for imported vehicles.

Order RCV12 Only $389.95

The Sony ICF-SW77

For those who have been looking for the next step up, it's here! The new Sony ICF-SW77 has all of the features of the popular ICF-2010 (except air band), plus:

- Front panel tuning dial
- Separate bass and treble controls
- 162 non-volatile memory channels
- Stereo FM (headphones)
- Station name display
- 50 Hz fine tuning steps
- Broadcasting time display
- 24 hour/local time clock
- 5-event timer

SONY ICF-2010

The World's Most Popular Radio!

This is the full-featured portable for the serious shortwave listener. Synchronous detection allows interference-free reception on many stations difficult to hear on other radios. Narrow/wide selectivity switching; clock/timer allows up to 4 automatic on/off cycles per day for frequencies and times of your choice; 10-step LED signal strength meter, audio tone selection for speech or music; and 10 station direct-access keyboard combine to make this Sony product a remarkable value for beginners or seasoned SWL's.

The New SW7600 - A Potent Portable from Sony

It was inevitable. The early models ICF 2002 and 2003 have been replaced by a tiny marvel with AM, SSB, and even FM stereo coverage! Measuring just over 7 inches wide and weighing 22 ounces, the SW7600 is loaded with features! DX/local switch reduces “pumping” on strong SSB signals; power switch lock prevents accidental battery depletion during transport. Continuous 150 kHz-29.995 MHz frequency coverage plus 87.6-108 MHz FM headphone stereo (headphones included!), pushbutton tuning, tone control, external antenna jack, clock timer with sleep function, tilt bracket, keyboard lock, direct-entry keypad and ten scannable memory channels keynote the high-tech features of this potent portable!

Sony ICF-SW1S

James Bond fans will love it and so will discriminating worldband listeners who want compact convenience. The SW1S is hardly larger than a cassette tape and weighs a mere 7-1/2 ozs., yet it incredibly boasts a LCD digital frequency readout, 150 kHz-30 MHz AM frequency coverage in 5 kHz increments, 24 hour digital clock/ timer, keypad tuning, and ten scannable memory channels!

But that’s not all. It comes equipped with FM stereo reception (and teeny earphones to boot!), and a universal 100-240 volt automatically-adjusted AC power supply with worldwide adaptor plug.

Yet there’s much more. Tucked into the compact carrying case is a sophisticated active antenna designed to provide worldwide reception anywhere without the need of a cumbersome outside antenna! And if you do have room for a wire antenna, simply reel it out of its retractable capsule accessory.

Universal M8000 Multimode Decoder

Now, the most advanced data reader/decoder ever produced! Nothing could be simpler: plug the new M8000 into your receiver’s or scanner’s speaker or earphone jack, connect a printer or VGA color monitor, and copy Morse code, RTTY, ASCII, TOR (FEC and ARQ), packet, FDM, Russian Cyrillic, bit inversion, facsimile and even piccolo--all off the air! The M8000 will even automatically tune its filters!

Ideal for testing data transmissions--reads digital pager transmissions (GOLAY and POCSAG) when connected to any scanner (unlawful for unauthorized listening!). Print squelch prevents noise from generating garbled messages, while internal displays alert you to baud rates, control characters, tuning graphs and other information, all in 16 vibrant colors!

Operates on 120 or 240 VAC, 50/60 Hz, and measures 16-3/8"W x 3-1/2"H x 12-3/4"D. Truly a remarkable monitoring accessory for the serious utilities enthusiast.

**Specifications**

**Reception Modes:**
- Morse (5-120 WPM)
- RTTY (45/50/57/75/100 baud and 20-250 baud non-standard)
- ASCII (75/110/150/2400/4800/9600/19200/38400 baud)
- SITOR (A/B) AMTOR B/ARQ/ARQ (1/2/4/8/32/128 Kbps)
- FDM
- TDM/ARO
- ASCII (75/110/150/300/600/1200/1800 baud)
- RTTY
- Morse
- Cyrillic (Russian third special characters)
- Piccolo

MFJ-1278

All-Mode Digital Decoder For Your Computer!

If you have an IBM compatible computer (Mac and Commodore adaptors available) and a shortwave receiver or transceiver, you can now display radioteletype messages, bit inversion RTTY, packet communications (military, commercial and amateur), news and weather facsimile photos and maps, AMTOR and SITOR messages, Morse code, Navtex alerts, ASCII text, even amateur slow-scan television! Top-rated demodulator in independent tests.

Multi-level display gives sharp newsphoto and SSTV imaging! LED all-mode tuning meter makes perfect signal adjustment a snap, and an automatic signal identification circuit selects the mode for you! If you are a licensed amateur, the MFJ-1278 can be used for transmitting as well! Let us know what model transceiver you have, and we’ll provide the interface cable (see list below)!

Hams can use the personal mailbox soft-partitioned memory for electronic messages.

Includes port for Epson or IBM compatible printer. Full-color SSTV is displayed on your color monitor with the optional MFJ-1289 terminal software. Comes with 32K RAM, 2 host mode, KISS interface for TCP/IP/MSYS, independent transmit level for each port, random code generator, lithium battery backup, RS-232 and TTL serial ports, socketed ICs, tuneup command, peripheral I/O port, automatic serial numbering, programmable message memories, dual radio ports for HF and VHF, CW paddle jack, audio amplifier and monitor speaker for signals and sidetones, packet connect bell, full operation manual. As if this weren’t enough, each 1278 is accompanied by a coupon entitling the owner to one free upgrade in the future!

The MFJ-1278 alone prints out SSTV and FAX, but requires the MFJ-1289 MultiCom enhancement package to display on screen. This powerful IBM compatible software provides high-resolution FAX imaging, macro keys for instant mode changes without having to reset parameters, and an alarm for detecting key letters, words or phrases. For transmitting, many additional features are provided.

Measures only 9-1/2"W x 1-1/2"H x 9-1/2"D. Powered directly from 120 VAC/60 Hz, or 12 VDC.

**Order DEM8**

Grove's Indoor SWL Antenna System

Your key to exciting shortwave reception without an outside antenna!

Here's the apartment dweller's dream—a high performance, amplified indoor antenna system for general coverage shortwave and medium wave monitoring. This thin profile, flexible wire antenna can be inconspicuously run along molding, out a window to a tree, even under a rug. And when connected to the powerful TUN-4 signal booster, you have instant coverage from 100 kHz to 30 MHz!

Yes, global short wave reception will be at your fingertips, and you can operate two radios at one time!

The powerful TUN-4 MiniTuner Plus can be used with any indoor or outdoor antenna to improve received signal strengths enormously. Just a few feet of wire or your present indoor shortwave antenna will give exciting new depth to your listening pleasure!

Easy to use and extremely flexible, the TUN-4 has a built-in, solid-state booster amplifier to give additional strength to all received signals from 100 kHz through 30 MHz, broadcasters and utilities stations. Wall adaptor (120VAC/12VDC) included.

WHAT YOU NEED TO ORDER:

TUN-4 MiniTuner Plus $99.95 plus $5 UPS shipping
ANT6 Hidden Antenna (see pg. 22) $19.95 plus $3.75 UPS shipping
CKSW Accessory kit $12.95 plus $3 shipping

Shipping charges for system ordered together: $7 UPS; $11 UPS 2nd Day Air; $8 US Priority Mail; $15 Canadian UPS; $13 Canadian Air Parcel Post

Grove's Outdoor SWL Antenna System

A high performance, low cost shortwave/longwave dipole designed for total 100 kHz-30MHz coverage without the gaps found in more expensive trap antennas.

Modeled after the famous Grove all-band transmitting dipole, the 66-foot SKYWIRE is off-center fed, designed specifically for serious SWL's... Includes pre-measured stranded copper antenna wire, porcelain and insulators, custom center insulator for your PL-259 coax connection, and full instructions.

Then add the Grove MiniTuner to your outdoor shortwave antenna will allow signal peaking to perfection as well as eliminate intermodulation on your general coverage receiver. Comes equipped with standard UHF (PL-259) connectors.

WHAT YOU NEED TO ORDER:

TUN-3 MiniTuner $49.95 plus $4 shipping
ANT-2 Skywire antenna (See pg. 14 for specs) $29.95 plus $3.75 shipping
CB 50 $19.95 or CB100 $29.95 (See page 26)
CKSW Accessory Kit $12.95 plus $3 UPS shipping

Shipping charges for system ordered together: $8.00 UPS; $12 UPS 2nd Day Air; $8 US Priority Mail; $13.50 Canadian UPS; $16 Canadian Air Parcel Post

Order Line — 1-800-438-8155
**MFJ 752C Signal Enhancer II**

Reduce interference and enhance sound with the latest all-mode, dual, tunable filter. Connect between your receiver's or scanner's external speaker jack and an external speaker or headset, then tune the two filters to peak or notch audio signals.

Remove annoying whistles with the 70 dB notch filter. Set audio bandwidths from a sharp 40 Hz to full range sound. Suppress static crashes and impulse noise with the ANL clipper.

External speaker, headphones and AC power supply required.

Order FTR1 $94.95

- $5 UPS Shipping; $8 UPS 2nd Day
- $7.50 US Priority Mail; $11 Canadian Air PP
- $10 Canadian UPS

**ACCESSORY:** ACC95 AC Power Supply $9.95

**The Grove Skywire Antenna**

Now with improved waterproof feedline connector at no extra charge!

**Skywire**

High performance and lowest cost—an unbeatable combination! Why restrict your frequency coverage with the gaps found in expensive trap dipoles or unpredictable random wire when you can get unsurpassed full-frequency reception with the Grove Skywire?

Comes assembled with SO-239 UHF female connector ready for your PL-259 (UHF male) equipped coaxial cable (50 or 75 ohm); includes two professional porcelain end insulators and complete instructions.

**Only**

Order ANT 2 $29.95

- $3.75 UPS; $6 UPS 2nd Day
- $4.50 Priority Mail
- $6.50 Canadian Air PP
- $8 Canadian UPS

**SPECIFICATIONS**

- Length: 66 feet
- Feedpoint Impedance: 50 or 75 ohm (nominal)
- Feedpoint location: 22 feet from end
- Elements: 18 AWG (16 x 30) bare stranded copper
- Connector housing: Heavy duty black phenolic

**Portable Shortwave Reel Antenna**

Have you ever been in a situation with your shortwave portable where you just know a few extra feet of antenna would bring in that weak station? This new reel antenna is the answer!

23 feet of insulated wire rolls up by a finger spool into a pocketable package for convenient storage; clip it to your whip antenna and reel out whatever length you need for signal improvement!

**Only**

Order ANT 15 $8.95

- $3.75 UPS; $6.50 UPS 2nd Day
- $6.50 Canadian Air PP
- $8 Canadian UPS

**Lightning/EMP Protector for Scanners and Shortwave Receivers**

While nothing can withstand a direct lightning hit, the new Grove LA-1 connects between your antenna cable and radio to prevent induced voltages from nearby lightning strokes, high-powered transmitters, and other massive energy surges from burning out your equipment.

Not a flimsy spark gap or simple diode shunt, the Grove LA-1 uses state-of-the-art gas discharge technology, proven in government tests to be the best deterrent against lightning and electromagnetic pulse (EMP) surges.

Responds in one ten-millionth of a second to short-circuit bursts of 250,000 volts at currents of 5000 amps, while allowing normal signal voltages (and even control voltages up to 10,000 volts AC or DC) to pass undisturbed! Extremely low signal loss—0.2 dB at 1500 MHz! Ideal for protecting scanners, shortwave receivers, CB equipment, VCRs, TVs, satellite receivers, FM stereo systems and more.

The tiny protector measures only 3/4" x 1-1/2"L and comes equipped with standard F connectors for home entertainment equipment and Grove accessories. Adaptors are available as shown below.

- LA1F (equipped with F connectors) $19.95
- LA1B (equipped with BNC connectors) $24.95
- LA1P (equipped with PL-259 UHF connectors) $24.95
- LA1M (equipped with Motorola connectors) $29.95

- $3 UPS; $5.50 UPS 2nd Day
- $6 Canadian APP; $8 Canadian UPS

*Will not prevent AC power line surges; such protectors are available from Radio Shack, computer stores, and most department stores.*
Choosing a Scanner

Copyright 1992 by Grove Enterprises Inc.
P.O. Box 98, Brasstown, NC 28902 (Phone 704-837-9200)

Caveat: ECPA '86

The Electronic Communications Privacy Act of 1986 forbids the monitoring of certain services receivable on scanners. Although there is no evidence at present that the new law is being enforced, violations are punishable by fine and/or imprisonment. The following list is included as a guide only and Grove Enterprises assumes no liability for its accuracy or interpretation.

The law forbids monitoring: 1. Encrypted or scrambled signals; 2. PTT subsidiary carrier authorization (SCA); 3. Mobile telephones or voice paging; 4. Remote broadcast or studio/transmitter links.

You may monitor any other transmission "readily accessible to the public including public safety, federal and military, aircraft and maritime, amateur and CB, business and industrial, private land mobile, cordless telephones, and any interference-causing protected transmission long enough to identify its source.

The consumer electronics marketplace bulges with products competing for your dollar. By following a few simple rules you will make the right choice in buying that new scanner.

FREQUENCY RANGE

The most common frequency ranges monitored by scanner enthusiasts are: 30-50 MHz (VHF low band), 144-174 MHz (VHF high band) and 450-512 MHz (UHF). Most scanners now include the 406-420 MHz federal government land mobile and 420-450 MHz amateur band as well. These bands all utilize narrow band FM for communications.

The civilian VHF aircraft band (118-136 MHz, AM mode) provides another interesting target for monitoring as does the emerging 806-960 MHz band, sometimes called the cellular band or microwave mobile (806-960 MHz), now in use in all major metropolitan areas. Very few receivers include the military UHF aircraft band (225-400 MHz, AM mode).

The prospective scanner buyer should decide which of these aspects of listening are of greatest interest before purchasing a radio.

PROGRAMMABLE OR CRYSTAL?

Stay away from crystal type scanners unless you won't be changing frequencies. For the majority of listeners, keyboard programmable scanners are the way to go—no question about it.

MOBILE, BASE, OR HAND HELD?

Scanners come in a variety of models to meet the particular needs of the listener. Do a lot of driving? Install a mobile unit. Constantly in and out of the car, office or home? You may prefer a hand-held. Do most of your listening in the office of home? A base unit would be more practical.

Many models are capable of more than one application, accepting power from AC mains as well as mobile battery supply. AC wall adaptors charge batteries in hand-helds and power the scanner when plugged in.

Most hand-held scanners have small speakers which do not compete well in a noisy environment; an earphone or external speaker will solve that problem.

TECHNICAL SPECIFICATIONS

The terminology used to rate a scanner's performance may be explained simply.

Sensitivity refers to the weakest signal voltage that the radio will respond to readable; the lower the number, the better. Good sensitivity is about 0.5 microvolts.

Selectivity is the radio's ability to reject adjacent frequency interference; the sharper, the better, especially in urban areas. Average selectivity for a scanner would be about 30 kHz (sometimes stated as +/− 15 kHz) at -50 dB.

Dynamic range is the ability of a scanner to handle extremely strong as well as extremely weak signals. Since none of them does it very well, this specification is never given.

Intermodulation ("intermod") is an internally-generated interference produced when strong signals mix together, producing spurious signals. It is often recognizable because of its distorted contents from two or more signals. Intermod results from inadequate dynamic range.

Images are produced in every receiver. They are recognizable as a duplicate of the legitimate signal, offset by 21.4, 21.6 or 21.7 MHz (twice the intermediate frequency—IF—from the actual frequency, depending upon the scanner. With up-conversion design, image frequencies fall outside the tuning range and aren't a problem.

WHICH SCANNER IS THE BEST?

Like answering "Which car is the best?", we must list qualifications. At the present time, programmable scanners are available from Uniden, ICOM, AOR, Radio Shack, and Cobra. Additionally, the Yaesu FRG-9600, Kenwood RZ-1, and ICOM R-1, R-100, R-7000 and R-9000 offer VHF/UHF coverage and scannable memories.

Most popular scanners have excellent sensitivity and reasonable selectivity (reject adjacent channel interference), but suffer from intermodulation and image interference from strong signal overload, especially when used with an outdoor antenna.

The PRO-2006 is more immune to interference from intermodulation and images, making it an excellent choice for strong or weak signal areas like large cities. In comparison, while the Bearcat BC76XLT and BC800XLT have superb sensitivity, they are easily overloaded by strong signals; use them in rural or deep suburban locations, or with their own attachable whip antennas in the city.

SCANNER ANTENNAS

HAND-HELD - The whip antenna included with your scanner is fine for local reception of strong signals, but if you are interested in reaching out further, a larger external antenna is necessary. The Grove ANT-8 adjustable whip will increase range on any hand-held scanner or transceiver equipped with a BNC connector (not screwthread).

Hand-held radios may also be connected to mobile and rooftop base antennas as well, provided they are equipped with BNC connectors.

MOBILE - Inside a vehicle, a scanner's

Order Line — 1-800-439-8155
attachable whip is shielded by the vehicle body and an external antennas is recommended. A rooftop location is ideal, providing uniform response in all directions. Mounted elsewhere (fender, trunk, bumper), the pattern will favor the direction of the car body.

The short length and low height of mobile antennas limit their distance, and loading coils restrict their frequency range. 800 MHz coverage is more by accident than design. The mobile scanning enthusiast must be content with local listening.

Mobile scanner antennas like the popular Grove ANT4 come equipped with a Motorola plug or BNC connector and have strong magnetic bases which will not come loose at normal road speeds.

Amplified antennas like the Diamond D505 offer much greater range, but may overload and cause intermod in strong signal areas.

If an outside antenna is undesirable, the car's existing AM/FM antenna may be used with a multicoupler like the Grove ANT-63 with some compromise in signal strengths. In weak signal areas, a preamplifier like the Grove PRE-4 will boost reception range.

BASE - Many discones advertise 25-1300 (or higher) MHz response. While it is true that any antenna will get some signals at virtually any frequency, most discones have poor response below 100 MHz and erratic response above that.

Several discones are extremely well constructed including the Diamond D-120. It is an excellent, omnidirectional, VHF/UHF transmitting antenna and performs well for local reception.

Most low-cost base antennas work well for local coverage (25-50 miles distance). Remember, the smaller the dimensions of the antenna, the poorer it will perform on low band (30-50 MHz).

The best nondirectional, all band scanner antennas on the market are the Antennacraft ANT-7 Scantenna, sold by Grove, and the Channel Master 5094A MoniTenna available from Channel Master.

An “omnidirectional” antenna mounted within a couple of feet of a metal mast or another antenna becomes directional due to signal reflection. In this case, turn the mast or antenna while listening to signals of interest to determine the best overall position, then tighten it down.

For extended range, a directional antenna like the new Grove Scanner Beam, used with an inexpensive TV rotator, offers gain in its forward direction while receiving local signals all around. VHF and UHF reception in excess of 100 miles under favorable conditions are possible.

**COAXIAL CABLE**

At VHF/UHF frequencies, common CB-type RG-58/U coax will actually absorb signals. We recommend low-loss RG-6/U like the Grove CB-50 and CB-100 cables with custom connectors. It offers 100% shielding, small diameter, flexibility and low cost.

For the lowest possible losses, especially in runs in excess of 100 feet, use Belden 9913 or RG-11/U mini. These cables and connectors are available from some electronics distributors and TV and video accessory outlets.

Don't be concerned with impedance; although your scanner is designed to work with 50 ohm cable, no antenna made maintains a constant impedance over the wide frequency range of modern scanners. You want low loss and 100% (or close to it) shielding.

**PREAMPLIFIERS**

One of the most misunderstood accessories is the preamplifier. Its purpose is to boost weak signals which would remain unheard on a receiver without it. To do this it needs to have a very low noise figure, but very little gain.

Antenna-mounted preamplifiers are especially helpful in overcoming losses in long coaxial cables (over 100 feet and above 400 MHz).

Wideband (untuned) preamplifiers like the Grove PRE-4 work well in low-signal-strength environments, but when used with outside antennas in a metropolitan area they saturate easily, causing desensitization (signals are weaker than before) and generate intermodulation (spurious signals) as well.

**FILTERS AND ATTENUATORS**

One of the most common causes of interference is strong signal overload. An attenuator reduces all signals, regardless of frequency, by the same amount; band-reject (stop-band) filters and wave traps remove a specific swath of spectrum; low-pass filters cut off all signals above a certain frequency; high-pass filters cut off all frequencies below a certain frequency; and notch filters attempt to remove one specific frequency.

The Grove FTR-5 is a combination filter designed to reduce interference from shortwave, AM, TV and FM broadcast stations, a common problem, as well as any one user-selected signal in the 100-174 MHz range.

**A Scanner Sampler**

The spectrum above 30 MHz is saturated with two-way intrigue — air to ground, ship to shore, military and federal government, public safety, hams, businesses, trains — if you know where to look.
ICOM R7100

VHF/UHF Communications Receiver

ICOM has done it again! They took the most popular features of the legend R7000, added a few features that listeners wanted, and released this new, compact receiver.

The R7100 offers continuous frequency coverage (no gaps) from 25 to 2000 MHz on a brilliant LCD readout, selectable tuning steps, USB/LSB/AM/FM modes with wide and narrow selectivity switching.

900 scannable memory locations store frequency, channel number, mode and search steps, ten search banks with memory channel lockout, 5 or 12 channel-per-second scan speed and scan-resume delay are also found on this model.

High sensitivity and stable SSB reception are additional perks, as are sensitive, all-mode squelch and easy pushbutton function selection.

SPECIFICATIONS

- Frequency range: 25-2000 MHz
- Keypad frequency entry: Yes
- Tuning steps: 100 Hz, 1.5/10/12.5/25/50/100 kHz, 1 MHz
- RT (finetuning): No
- Display: LCD
- Dimmer: Yes, with 2 steps
- Type of listening recommended: Utility monitoring
- Receiving modes: AM, WAM, FM, WFM, NFM, USB, SSB
- Memory: 900 channels
- Scan: 5/12 choices
- Banks: 9
- Lockout: Yes
- Priority: Yes
- Search: Yes
- Delay: 0/0.5/10 seconds; infinite
- Squelch: Yes, with 2 steps
- Clock: Yes
- Audio output power: 2 W @ 10% THD
- Record output: Yes
- Recorder activation: Yes
- S meter: Analog
- Computer interface: Optional
- Conversion scheme: Triple up-conversion under (778.7 or 286.7, 10.7 MHz; 455 kHz)
- Sensitivity: 0.35 mV NFM
- Selectable preemphasis: No
- Selectable attenuator: Yes
- Selectivity: @ 4 dB: 2.4 kHz SSB, 6 kHz AM/NFM, 15 kHz AM/FM
- Selectivity: @ 6 dB: 2.4 kHz SSB, 6 kHz AM/NFM, 15 kHz AM/FM
- Selectivity: @ 18 dB: 2.4 kHz SSB, 6 kHz AM/NFM, 15 kHz AM/FM
- Selective squelch: Yes
- Dynamic range: 100 dB
- Frequency stability: ± 0.02 ppm 1300 MHz, ± 0.03 ppm 25 -1000 MHz, ± 0.05 ppm 1000 -2000 MHz
- Selectable AGC: No
- Dynamic range: Unknown
- Peakband tuning: No
- Noise blanker/filter: ANC
- Tone Control: No
- Antenna connector: N female
- Auxiliary connector: Yes
- Dimensions: 9-1/2"W x 3-3/4"H x 9-1/2"D
- Weight: 13 lbs
- Power requirements: 10.7 VDC, 117/240 VAC
- Warranty: One year
- Accessories included: Plugs, fuses, DC cord, spare screws

OPTIONAL ACCESSORIES

(*Call for price and availability)

- Remote control
- ACC36 UT36 Voice Synthesizer $35.95
- ACC71 SP20 Speaker $144.95
- ACC72 TVR7100 Video Adaptor $209.95
- ACC74 CT17 Computer Interface $95.95
- ACC78 Service Manual $25
- ACC83 MB5 Mounting Bracket $25.95
- ANT8N 46" Extendable Ship Antenna $23.95

ICOM R7000

Continuous Coverage VHF/UHF Receiver!

Used by government and military agencies worldwide, the ICOM R7000 provides total spectrum 25-1000 (triple conversion) and 1025-2000 (quadruple conversion) MHz frequency coverage with 100 Hz fluorescent readout accuracy! Add to this enormous tuning range 99 memory channels with priority function, keyboard entry or dial tuning, FM/AM/SSB modes, five tuning speeds, S-meter/center tuning meter, 2.5/9/15/150 kHz filter selection, noise blanker, internal speaker with 2.5 watts of audio power, spurious signal suppression greater than 60 dB, high sensitivity, and programmable scanning with auto-write memory, and you have the most advanced scanner receiver ever designed for the serious VHF/UHF listener.

Order SCN4

$1158.95
ICOM R1 General Coverage Pocket Scanner

Imagine, a shortwave and VHF/UHF scanner with continuous 100 kHz-1300 MHz (no gaps!) frequency coverage that fits in your shirt pocket! You select the mode—AM, FM wide or narrow—and install up to 100 of your favorite shortwave and scanner frequencies into memory. An edge-lit LCD shows frequency, memory channel, and other settings as well.

Less than 2" wide, the R1 scans, searches and autoloads, has knob tuning, a signal strength indicator, and even a 24-hour clock timer! This high-sensitivity scanner comes with flex whip, rechargeable battery, AC wall charger/adaptor and belt clip.

**Order SCN13 Only $449.95**

Uniden Bearcat BC855XLT

Don't be fooled by its low price. The BC855XLT is a low-profile, desktop scanner with outstanding performance. Offering a frequency range of 29-54, 108-174, 406-512 and 806-956 MHz (less cellular, restorable), this sleekly-designed scanner includes 50 memory channels, individual channel lockout and delay, automatic squelch, priority, a non-volatile memory and powerful, crisp 1.3 watt audio!

All land mobile public service bands, civilian aircraft band, instant weather channel access are yours, and its BNC jack accommodates a snap-on whip (provided) or your external antenna. A 12-volt AC wall adapter is included.

Professional Wideband Discone

Best Discone on the Market for VHF/UHF Receivers

The discone antenna is used by government and military agencies worldwide because of its recognized high performance, wide bandwidth characteristics. Now Diamond offers a professional grade discone at a popular price.

Designed for use with wide-frequency coverage VHF/UHF scanners and receivers, the Diamond D130J discone consists of 16 rugged, stainless steel elements and is capable of transmitting up to 200 watts in the amateur 50, 144, 220, 432, 900, and 1200 MHz bands.

SCANNER ANTENNAS
EXCLUSIVELY FROM GROVE!

Designed for Today's Wide Frequency Coverage Mobile Scanners!

For years, mobile scanning enthusiasts have had to settle for compromised reception from antennas designed long ago for limited coverage scanners. Now, Grove offers the first high-performance mobile antenna designed in our labs for new, wide-frequency-coverage scanners.

Utilizing Grove's exclusive bifilar helix construction, this sleek, black, 24" fiberglass whip, mounted on a strong magnetic base, assures premium signal reception on 30-50 MHz low band, 88-108 MHz FM broadcast, 118-136 MHz aircraft, 406-512 MHz UHF land mobile and 806-960 MHz microwave mobile.

Tested to withstand interstate highway speed and equipped with 12 feet of coaxial cable with Motorola and BNC connector, the ANT-4 will perform where others fail.

Extend the Reception Range Of Your Handheld Radio!

Today's hand-held VHF/UHF scanners and handie-talkies from Bearcat, Regency, Cobra, Radio Shack, ICOM, Yaesu, and Kenwood have excellent sensitivity and talk power, but their range is reduced by their short "rubber ducky" antennas. Grove has the solution!

Just replace that inefficient flex antenna with our universal full-length whip—and stand back! Extendable from 7 to 46 inches, the ANT-8 is made of chrome-plated brass and equipped with a standard BNC base. Transmits on 45-960 MHz; receives 25-1300 MHz.

If your interest doesn't include 30-50 MHz low band, choose our new ANT-19 with its full adjustability from 4"-18" (transmits and receives from 144-960 MHz).

Order ANT-8  (7"-46")  $16.95
ANT-19  (4"-18")  $12.95
ANT-8B  (w/right-angle BNC adaptor)  $21.95
ANT-8N  (w/right-angle N adaptor)  $23.95

SCANNER ANTENNA SYSTEMS

Grove's Outdoor Scanner Antenna System

Start with our Scantenna or Scanner Beam then add our PRE-4 Wideband Preamplifier

The PRE 4 Power Ant has taken all the best from its successful predecessors and combined them into one powerful signal booster for scanners, even TV and FM stereos! Equipped with a high gain, low noise, solid state amplifier stage, the PRE-4's front panel control allows custom selection of up to 20 dB of amplification! The weatherproof remote booster module may be attached at the antenna for maximum effectiveness to overcome coax cable losses, or may be mounted on the back of the control box for convenience. Power is supplied to the remote module through your coax.

Two output connectors are provided allowing you to use two scanners on one antenna at the same time! All connectors are type F for maximum signal transfer. 120VAC/12VDC wall adaptor included.

WHAT YOU NEED TO ORDER:

ANT 7 Scantenna (see page 23) $39.95

or

Metro West
Long-Life Battery Pack
for BC200XLT, BC205XLT, and BC100XLT

Over the years, MetroWest has introduced a number of innovative accessories for hand-held scanners, but none is more welcome than their new, double-life battery pack for the popular Uniden BC200XLT hand-held scanner.

The “Pro-Pack 1200” is numbered for its 1200 mAH charge capacity, twice that of the BP200 which comes with the BC200XLT from Uniden. The replacement look-alike slips right on the scanner to replace the original.

About 1/4” taller and slightly fatter than the Uniden pack, the Pro-Pack 1200 does not allow the top strap of the Uniden case to button over the top as it did before, but is still may wrap around the front or back securely.

Because the charger jack on the battery pack had to be relocated due to battery density, the scanner must be removed from its holster before it can be recharged. The user may wish to punch a second hole at the new location for plug-in convenience. An AC wall adaptor/charger is included.

Order ACC16 Only $65.95

Metro West Pro-Charge 7
Drop-In Charger for the Metrowest Battery!

Charge your high-capacity Metrowest battery like the pros with this drop-in charger (not for original Bearcat battery pack). Automatic circuit provides a full charge in just seven hours, yet prevents overcharging! Powered by your 12 VDC wall adaptor or from the Grove ACC23 cigarette lighter cord.

Lightweight (8 oz.) and compact (3-1/4” x 4-1/2” x 1-3/4”); two-color LED indicator shows charge status.

Order ACC 70 Only $36.95

Rechargeable AA Nicad Batteries
(500 milliamp)

For use with the PRO-43 as well as other handheld scanners.

Grove Discount Price $1.95/ea

Back by popular demand!

Universal Power Supply/Charger

Our universal AC adaptor is especially rugged, capable of switching to your choice of 3, 4.5, 6, 7.5, 9 or 12 volts DC at a current of 500 milliamps (1/2 amp)! Another switch lets you choose + or - polarity.

An array of plugs on its interconnect cord assures proper mating to any electronic accessory. Plugs into standard house current (120 VAC, 60 Hz).

Order ACC20 A $15 dollar value for Only $9.95

Check the electromagnetic radiation levels in your environment!

ELF Radiation Detector

By special arrangement with the manufacturer, Grove brings you this sensitive, dependable ELF (extremely low frequency) exposure meter to arm you against the hazards of electromagnetic radiation.

Not limited to just 60 Hz like competing narrow-frequency units, this meter measures from 30-300 Hz to detect harmonic radiation from power lines and other sources.

Simply switch this pocket instrument on and read instantly the radiation from computers, radios, home stereo and video systems, appliances, power lines, electric blankets and more. Standard 9-volt battery included.

Choose from low-level GSM2 (0.1-199.9 milligauss) or standard GSM3 (1-1999 milligauss), only $99.95 each including vinyl zipper pouch and informative instructions.

Order GSM2 $99.95/each
Order GSM3 $99.95/each

plus $3.75 UPS; $6 UPS 2nd Day Air;

**ACCESSORIES**

**Frequency Counter Facts**

Frequency counters are among the most useful of all laboratory instruments, but their limitations as well as their advantages must be understood. Since they are broadband devices (untuned), they respond to all signals strong enough to be registered. If two or more signals are present at the same time, they will be measured at the same time—in a meaningless readout.

For this reason, in populated areas it is best to use a frequency counter with a short antenna located close to the source of signal to be measured; this way, only the desired signal frequency will be shown. A longer antenna may be used out in the country to measure a signal perhaps hundreds of feet away.

Now, use your Opto frequency counter to find the frequencies of public safety and business walkie talkies, cordless telephones, CB and ham transceivers, government and military transmitters, baby monitors, hidden bugs and wireless intercoms—anything radiating a steady signal in the frequency range of the frequency counter!

---

**Optoelectronics Pocket Frequency Counters**

We have added the necessary options and discounted the total for your best value!

Ideal for calibrating signal generators, transmitters, for countermeasures applications, and for determining the unknown frequencies of transmitters, walkie-talkies, mobile radios, base stations, cordless phones, ham and CB radios, radio control units and other signal emitters.

These tiny, precision instruments offer outstanding sensitivity and TCXO (temperature compensated crystal oscillator) accuracy of 1 part per million. All prices include rechargeable battery pack and AC wall charger/adaptor, but not antennas (available from the list of accessories below). Units operate for several hours on a fresh charge, or continuously with the wall adaptor.

The effective range of these frequency counters varies from about one foot (cordless phones) up to 75 feet or more for more powerful transmitters.

For casual applications such as reading the frequencies of nearby transmitters, select the new 2300. Measuring a scan 3-1/2"W x 3-3/4"H x 1"D and weighing about nine ounces, it offers 1-2400 MHz frequency range, 8 LED readout and VHF/UHF sensitivity of 3 millivolts (3 mV).

**Model #2300**
Order CTR 4 only
**$125.95**

Or, look at the advanced features of the new, premium 3000: Ten-digit LCD readout, optional backlite for clear high-time viewing; total-spectrum 10 Hz-3000 MHz frequency range—from sub-audible through microwave! 1 mV typical sensitivity; 16-segment LCD signal-strength bargraph for tuning nearby transmitters or tracking hidden transmitters; even lab measurement capability of period, time interval and ratio are included at no extra cost.

For surveillance applications ("sweeping" rooms for hidden bugs), an optional audible tone alerts you to the presence of an unseen transmitter, changing its pitch as you approach its hidden location without having to see the bargraph! A powerful pocket package at its advertised $450, and an incredible value at Grove’s price of only $335.95!

**Model #3000**
Order CTR 6 only
**$349.95**

Optional backlite $64.95 and sweep tone

30
SCANNER FILTER

Years ago, our first scanner filter allowed the listener to reject any signal in the VHF high band which was causing overload problems. It was a step in the right direction.

But interference problems are far more severe now, with multiple sources disrupting listening. A simple notch filter is no longer the answer. Enter, the new Grove FTR-5 Scanverter Filter! Ideal for use with outside antennas and with signal boosters (preamplifiers)—anytime interference is troublesome.

An adjustable 100-220 MHz 30 dB notch filter allows you to reduce or eliminate single-frequency interference from aircraft, mobile telephone repeaters, paging signals, NOAA weather stations, nearby amateur or other repeaters.

High-Q microstrip circuitry features custom-wound inductors for deep interference rejection. A rugged weatherproof enclosure allows masthead mounting. Standard F connectors are provided for convenient interconnection with other adaptors or accessories.

A diode shunt array protects your scanner from nearby lightning strokes and high-powered transmitters. A high-pass filter removes shortwave feedthrough, while band-reject filters remove FM and TV broadcast interference automatically.

Nothing has been overlooked in this state-of-the-art 30-2000 MHz filter. Full instructions included.

SPECIFICATIONS

Passes: 30-50, 115-174, 225-1500 MHz
Rejects: 0-35, 50-118, 174-225 MHz
Frequency Range: 30-2000 MHz (nom.)
Insertion Loss: less than 3dB
Dimension: 6"L x 1-1/8"D
Weight: 3 ounces

Hear Shortwave on Your Scanner!

How would you like to hear the 4-22 MHz worldwide shortwave stations on your scanner? If you presently have aircraft band coverage, the world is yours with the new CVR1 Scanverter module from Grove Enterprises! We even provide the antenna!

Not a kit, the Grove Scanverter module comes fully assembled and tested! Simply attach a 9 volt battery (not included) and listen to BBC, Radio Moscow, the Voice of America, even time and propagation alerts from WWV and CHU! And if your scanner covers 115-141 MHz (AM mode), you can hear your local AM broadcasters and even CB!

The Grove shortwave Scanverter connected to your scanner unleashes global listening power! A quick glance at your conversion chart tells you where to tune in signals and how to interpret your scanner’s frequency readout for shortwave.

The CVR1 Shortwave Scanverter module comes complete with antenna and interconnect cable which plugs into your antenna jack (cabinet not included.) Tell us your scanner model when you order.

Order CVR1 Only $39.95

ACCESSORIES

GRE Super Amplifier

Would you like more range out of your hand-held scanner? Try the new GRE Super Amplifier with built-in battery and 20 dB (adjustable) gain from 100-1000 MHz!

BNC connectors allow the Super Amplifier to be mounted between the scanner and rubber ducky antenna; a bypass switch permits the unit to be disabled without having to remove it.

A 9-volt alkaline battery (not supplied) will provide up to 24 hours of continuous operation; a convenient external power jack permits the unit to be used continuously from a 9 VDC wall adaptor (not supplied).

Order PRE1 Grove price only $54.95

Retails for $69

RECEIVE CONTINUOUS 810-912 MHz ON YOUR PROGRAMMABLE SCANNER

GRE SUPER CONVERTERS

Looking for the best way to get uninterrupted 810-912 MHz coverage on your hand-held or desktop scanner? Whether your scanner doesn’t have that range now, or is one of the models with certain 800 MHz frequencies factory-censored, these high-sensitivity converters from GRE will fill in the gap!

Simply install a nine-volt battery (not supplied); BNC connectors are provided to interconnect with your scanner. Use an 800 MHz-capable external antenna or attach a whip adjusted to about 4" (or 12" for gain) like the Grove ANT-19 ($12.95) or ANT-8 ($16.95). When you tune 410-512 MHz on your scanner, you will be receiving 810-912 MHz! Just add 400 to the frequency displayed on your scanner, and you’ll know your receive frequency when the scanner is switched on. A handy bypass switch allows you to restore normal operation of your scanner without having to remove the converter.

Factory price $94

24-Hour Studio Clock
For the "Professional Touch"

Nothing lends an air of authority in a radio station like the clock on the studio wall. It is traditional, recognizable, functional, and now, with a modern precision quartz movement, accurate to 1/2 second per day.

This studio clock from Grove Enterprises is a professional 13" Seth Thomas, featuring a 24-hour movement with bold, black numerals and a red sweep-second hand.

A convenient set knob allows precise set-up at installation; add an inexpensive alkaline AA cell (not included) and you have at least a year of unattended, accurate time — even during power outages.

Order CLK1 Only $29.95

MFJ Dual Digital Clock

This compact digital timepiece features two large LCD quartz movements to provide accurate 24 hour UTC radio time as well as local time. Mounted in a rugged extruded aluminum frame with a handsome brushed accent, the clock features high-contrast, 5/8 inch numerals, easy to see anywhere in your radio room.

Powered by a long-life battery, the clock may be switched to show seconds as well. Measuring a scant 4-1/2"W x 2"H, the MFJ108B dual time clock can easily fit on any radio desk and provide valuable time information instantly.

Order CLK2 Only $19.95

MFJ World Map Clock

This new desk digital world map/clock adds a touch of golden elegance to your radio room. Time zones are available at the touch of a button, and the day of the week, date, and local 12 or 24 hour time with one second per day accuracy are also displayed in large LCD characters.

Key cities across the globe are highlighted to make identification easier and an alarm tone can be set to alert you to any particular time. The MFJ-112 measures 4" H x 3-1/2" W and battery is included.

Order CLK4 Only $24.95

Color Wall Chart of the Radio Spectrum

For years, our customers have asked us for a useful, informative, and accurate wall chart showing details of the radio spectrum. Now Grove offers this incredible 50" x 32", full-color, fold-out wall chart of the United States radio spectrum!

Printed on heavy gloss paper, the chart of the spectrum shows both government and non-government frequency allocations from 3 kHz through 300,000 MHz (300 GHz)—the entire radio spectrum!

28 services are shown in separate colors: land mobile, aeronautical, maritime, space, fixed, amateur, radio and TV broadcasting and more. No other low-cost publication provides so much band allocation detail at a glance as this handsome, professional wall chart.

Order CHT 1 Only $9.95

**Federal Frequency Assignment Master File**

224 controversial pages provide the most comprehensive look at federal government frequencies in print. Over 100 agencies, from the Central Intelligence Agency to the National Security Agency are listed; scanner and shortwave as well. No matter where you're located, you'll hear many of these frequencies in use. Alphabetized by department and agency and their locations, then listed in frequency order, this compendium is the most authoritative reference for armchair monitoring of 'forbidden' frequencies we've ever seen!

**Scanner and Shortwave Answer Book**

What is the best antenna for your requirements? When do you need a preselector rather than a preamp? What is the difference between "meter band," megahertz" and "kilohertz"? How can you determine the source of electrical interference and cure it? These are samples of the hundreds of questions expertly answered by Bob Grove's guide to monitoring. If you have questions about listening and equipment, chances are you'll find the answers here!

Librally illustrated and professionally printed. Affordably priced for hobbyists, new and experienced. Take advantage of this limited reference edition while supplies last!

**Official Aeronautical Frequency Directory**

By Robert A. Coburn

This second edition features 430 pages of listings of HF, VHF and UHF air-to-air, air-to-ground and ground utilities frequencies used by civilian, government and military agencies across the country. FAA, CAP, military, aeronautical telephone, flight support, airport communications—they're all here!

Arranged alphabetically by state, lists include service, name, location, call sign, frequency and use. Tables include allocations, voice designators and more.

**Air Scan**

By Tom Kneitel

This fifth edition of the exhaustive frequency directory for aircraft monitoring enthusiasts includes 2-30 MHz shortwave SSB as well as VHF-AM/FM and UHF-FM for all 50 states and Canada.

Military and federal tactical frequencies, light service stations, NASA support frequencies, conservation agencies, even air show frequencies! Public safety agencies employing air-to-air and air-to-ground communications are provided as well throughout the VHF low, high, and UHF bands.

**Top Secret Registry**

By Tom Kneitel

The book that made headline news when a copy was uncovered during an organized crime raid. This 7th Edition concentrates on VHF and UHF scanner frequency ranges, agencies include Secret Service, Customs, DEA, CIA, NSA, White House, Border Patrol, ATF, and dozens of other government bureaus who would prefer not to have their communications frequencies published.

**Sports & Entertainment Frequency Directory**

By Bob Grove

This second edition helps you listen to drivers and pit crews at the auto races, boat race communications, air show stunt coordination, gambling casino management and security, Disney attractions, parade floats, amusement parks, wireless mikes, sports reporters, and much more.

Over 2000 frequencies for sports events, tourist attractions, stadiums and arenas, and even fast food restaurant chains! Handy 4" x 5".

**Monitoring the Military**

By Daryll Symington

Over 10,000 VHF/UHF frequencies for nearly 400 military bases throughout the U.S., plus an extensive list of radio call sign and identifiers, make this brand new publication a hot reference for the scanner listener! Frequency listings for 30-50, 118-174, and 225-420 MHz are included for air tactical and refueling operations, military police, base security, paging, medical, disaster, fire/crash, command posts, commanders' nets, maintenance, and more.

**Listener's Lawbook**

By Frank Terranella

Attorney Frank Terranella, whose specialty is radio law, has collected all of the monitoring laws across America, state by state (as applicable), and includes a thorough discussion of the 1994 Communications Act, the 1986 Electronic Communications Privacy Act, and even the FCC proposal to remove all police, fire, and medical channels from radio!

48 pages, 8-1/2" x 11".

FCC Database ON DISK! **Version 2.0**

No need for the slow, tedious process of searching through multiple microfiche for the frequency you want. Now, with the aid of the Grove Frequency Retrieval Program, you can find all the information you need with minimal effort. Let your computer do the work for you!

All you need is an IBM compatible computer, 512K of RAM, any type of monitor, a 5.25" or 3.5" high density drive, and a hard drive.

Now that Grove has taken the work out of searching for the records you want, you can concentrate on getting the printouts and files that you've always needed! With the ability to search by licensee, state, frequency, callsign, service, city or event, you can get the exact combination of information you want.

The FCC Database on Disk includes the following services:
- Broadcasting
- Radio Common Carrier
- Experimental
- Private
- Cable
- Land Mobile
- Industrial
- Business
- Public Safety (police, fire medical)
- Land Transportation
- Specialized Mobile Radio
- Aviation Ground Stations
- Marine Coastal Stations

Available on 5.25" (1.2MB) and 3.5" (1.44MB) High Density Disks.

ONLY $59.95* for the program AND one state! ($49.95 for each additional state)

**CALL TODAY!**

**Special Holiday Sale**

**on “Near-Perfect” Items!**

Join the thousands of others who enhance their enjoyment of radio monitoring...
Subscribe to Monitoring Times!

Every month Monitoring Times brings everything you need to know to make world band listening even more rewarding: the latest information on international broadcasting schedules, frequency listings, station profiles, program commentary, personality interviews, international DX reports, propagation charts, reviews of world band radio products, and tips on how to hear the rare stations.

But Monitoring Times doesn’t stop there. It also keeps you up to date on what’s happening on the airwaves between the international broadcasting bands: information on government, military, police and fire networks; action on the ham bands; and tips on monitoring everything from air-to-ground and ship-to-shore signals to radioteletype, facsimile and space communications.

Jammed with up-to-date information and concisely written by the top writers in the field, Monitoring Times belongs next to your receiver.

Order your subscription today before another issue goes by.

TO SPEED YOUR ORDER FOLLOW THESE SIMPLE STEPS

MAIL ORDER
1. Fill out the order blank and send a check, bank or postal money order, or your complete charge card information (see #3 below) to Grove Enterprises, P.O. Box 98, Brasstown, N.C. 28902.
2. DO NOT SEND CASH OR STAMPS/COD is available for $5 per package via UPS Ground only (no COD's through Post Office or via UPS Red or Blue Label). Cash, certified check or money order required at time of COD delivery.

PHONE ORDERS
1. Have your order form filled out and your charge card in front of you.
2. Call our desk toll free, 1-800-438-8155
   Hawaii, Alaska, foreign countries call 1-704-837-9200 (no collect calls please).
3. Give the secretary your name, shipping address for UPS delivery (and mailing address if different from shipping address), what you wish to order, your charge card number and the expiration date. IF THIS IS YOUR FIRST ORDER we must have the name and location of the bank which issued your card and the address shown on your charge card records. If this is not possible, we will require a money order or certified check before the item can be shipped. (This method is necessary to eliminate fraudulent use of credit cards).

SPECIAL SHIPPING INFORMATION
All Hawaii shipments via UPS must go Blue Label (ask for charges). Blue Label and Next Day Air available from UPS. Express and Priority Mail available from the U.S. Post Office. Call or write for charges.

PURCHASE ORDERS
Written purchase orders will be accepted from city, state and federal agencies and institutions. Terms are net 10—1%/10 over 30. Special sale prices are not honored on open accounts.

DELIVERY SCHEDULE
We ship within one working day upon RECEIPT OF YOUR ORDER unless you are notified of a delay. UPS shipments should arrive within 5 working days; U.S. Post Office shipments within 10 working days (bookrate can take as much as four weeks). These are maximum delivery times; if you do not receive your order within these time frames, call us so we can place a tracer on your order.

FOREIGN SHIPMENTS
Write or call, telling us what you want and how you want it shipped (surface or air parcel post; shipments can be made by air freight or UPS to Canada and some European countries). Please note—orders to some countries cannot be insured by the Post Office. We do not assume any responsibility for losses other than proof of shipment. PAYMENT BY INTERNATIONAL MONEY ORDER OR BY A BANK DRAFT DRAWN IN U.S. CURRENCY. SORRY, NO COD's TO APOs, FPOs OR OUTSIDE U.S.A.

NO STAMPS PLEASE

Based upon the Supreme Court rulings of McLeod vs. Dillworth (1944), Bellas Hess (1967) and the proposed Brooks legislation (H.R. 2230), effective September 1, 1990, Grove Enterprises will no longer collect sales or use taxes apparently invalidly levied by states against residents when they purchase from us in North Carolina. We have neither economic presence nor nexus in these states (with the exception of Georgia) as established by the U.S. Supreme Court.
Happy Holidays
from Grove Enterprises!
