# March Meeting

DATE: March 12th  
TIME: 10:00 AM  
PLACE: Buena Vista Club House  
ADDRESS: 16th & Jackson Streets  
Oregon City, Oregon

**A**

It's as simple as A,B,C ! That's what "show & tell" is this month. At the February meeting, the membership decided to get back to basics and start at the begining of the alphabet. Bring those favorite sets with names that begin with A,B, or C to the March meeting and show them off. Better yet, Bring a friend !

**B**

**C**

**C**

Last meeting there was free "giveaways" in the form of literature from the 50's and 60's. You never know what will come to a meeting if you don't !

## RADIO SCHOOL

All our graduates are placed.  
Shortage still exists. Wages going up.

# ATMOSPHERICA

By J

*The Bundle from Britain*

Sing a song of O-1-As,  
Praises be on high--  
Here's to another cheery find,  
A classic English Pye.

When the Pye was opened,  
No valves came in sight,  
Instead were vacant sockets,  
It was a sorry plight!

I had some O-1-As, by gosh,  
I'd slip them into it,  
But what I had'nt figured on  
Was, the sockets would'nt fit.

So I took some likely "Duds",  
Cut all of the pins but one,  
Stuck them into the Pye and said,  
It's a sticky problem done!

In Grants Pass town I looked around,  
And peddled that sickly Pye  
For eighty bucks and some to boot,  
To a wisenheimer guy!

\*\* \*\* \*

*Dedicated to some of the slower thinkers---*

There was a little Dachshund once,  
So long, he had no notion  
The time it took to notify  
His tail of his emotion!  
And thus it was, that while his eyes  
Were filled with woe and sadness,  
His little tail kept wagging on,  
Because of prior gladness!

# Thomas A. Edison

## A TRIBUTE

A "born inventor" if ever there was, Thomas Alva Edison was known as the "boy wonder of electricity" almost before he was old enough to vote. Often in the early days he endangered his scant livelihood for the pure joy of working out his ideas. After he had found success and fortune, the irresistible interest of his work kept him at it for long untiring hours, often for days and nights together without sleep.

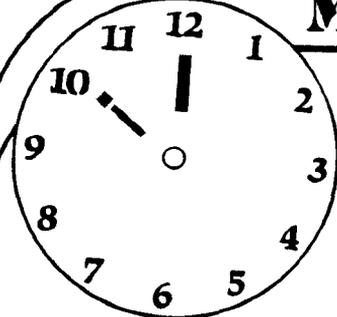

It was said of him that he "kept the path to the patent office hot", for his patents in the United States alone number more than 1,000. No other man has done half so much to apply scientific discovery to everyday life.

There is not an electrical instrument or electrical process now in use," it has been said, "but bears the mark of some great change wrought by this most ingenious of Americans." His life may well be an inspiration to any boy who wants to attain the success of honored, useful, happy manhood.

Last February 11th, marked the 136th anniversary of Edison's Birth. I can only believe that he would still be tinkering with wireless and ways to improve it were he alive today.

Ed.

# Meeting Minutes

The NWVRS regular monthly meeting was held on Saturday, February 12, 1983 at the Buena Vista Club House. President Jerry Talbott presided. Minutes of January 8 were read, corrections noted,

and approved. The Treasurer's report was read and accepted.

GOOD & WELFARE: It was reported that Alan Shadduck was recuperating from a recent operation. We wish him a speedy recovery.

OLD BUSINESS: Discussion was held regarding name badges. Dick Howard moved to authorize expenditure of club funds to purchase a template after getting three quotations and with assurance the template would be retained by NWVRS. Tom James seconded the motion and it carried.

Jerry Talbott stated that money must accompany all orders for the club jackets.

Dick Karman suggested that we proceed with selection of a name for the club radio project. Some suggestions were offered among which was the Power Supply's entry of "Atmospherica". Dick Karman moved, Jim Mason seconded, that "Atmospherica" be adopted. It was accepted by vote of members present.

NEW BUSINESS: Dick Howard moved that we dispense with reading of the minutes of the previous meeting in their entirety since they were published monthly in the Call Letter. Additions or corrections would be brought up and acted upon in meeting. Don Copeland seconded and the motion carried.

## Meeting Minutes

Larry Callahan presented a resolution which follows: "Be it resolved that the Northwest Vintage Radio Society requests the Oregon TV and Radio Licensing Board to allow servicing of vintage electronic equipment without a license. Be it further resolved that the Northwest Vintage Radio Society requests the Oregon State Legislature, if necessary, to amend 702.010 - 702.990 to provide this request".

After discussion Larry moved that the resolution be adopted and necessary contacts made to effect amendment. Don Iverson seconded and the motion carried.

Jerry Talbott reminded members of the KGW tour on February 22.

Show 'n Tell for March 12th meeting will be radios whose names begin with the letters A, B and C.

The meeting adjourned at 11:40 A.M.

Hugh Ranken,  
Secretary

### **Make a Date**

THE NORTHWEST VINTAGE RADIO  
SPRING SWAP MEET HAS BEEN  
SCHEDULED DIRECTLY FOLLOWING  
THE MAY MEMBERSHIP MEETING  
AT THE BUENA VISTA CLUB IN  
OREGON CITY.

SO, MAKE A DATE !!

NOTE THAT IT'S NOT GOING TO  
CONFLICT WITH THE AUTO SWAP  
MEET IN APRIL.

## DOES IT PAY TO BE IGNORANT ??

It pays to be ignorant, radio's lamebrained answer to the intellectual quiz, was first heard on WOR-Mutual June 25, 1942. In the field of caveman humor, this program was a classic feast of the absurd. Many questions were asked, but few were answered. It pays to be ignorant was radio satire, pure and simple, of such intellectual quiz shows as Information Please or the Quiz Kids, where radio genius "experts" gave Mr. & Mrs. America a national inferiority complex.

The show was created by Bob Howell, who in 1941 was on the staff of WELI, New Haven, Connecticut. He met up and married Ruth Howard and together they composed a show called the Crazy Quiz.

The Panel was made up of three maniacs: George Shelton, a long time vaudevillian; Harry McNaughton, a Britisher who gained much fame from his part of Bill Baker's butler "Bottle"; and Lulu McConnell, who was billed as the dame with the sawblade voice. Between them there was not a sane moment during the thirty minute show. Insults were fired at nearly every American institution of the day and them some, not to mention each other.

It ran as a Monday-night sustainer until 1944 when it was picked up by CBS for Philip Morris. After four years on Friday nights it was changed to Sunday night for its final season (1948-49).

To hear it is to appreciate it !

# Pages from the Past

As wireless dots and dashes now encircle all the Earth, it is a matter of pride for the Pacific Coast and especially for Seattle, that right here in this city has been developed one of the foremost commercial wireless equipments of the day; a line of high class, high efficiency instruments now installed at the rate of fifty ships a year.

This wireless concern is a Kilbourne and Clark Manufacturing Company, occupying the second floor of the Polson Building at 71 Columbia Street. Besides ships, Kilbourne And Clark equipment is used by the Australian Government Post Office to communicate with nearby islands.

The fact that the Edith, Mariposa, Dora, and some fifty other vessels were of one company emphasizes the service of Kilbourne And Clark for it is different than the Marconi Company. Kilbourne And Clark sells it's apparatus outright and the operators are employed by the steamship company.

This means much for the companies; one firm saved \$25,400 this way, and to the men it means a better and more secure standing in the ship's company, better pay, and opportunities for advancement as a ship's officer. Wireless messages are relayed between Kilbourne And Clark ships free of charge and the owners of the ship receive their pro rata on pay services.

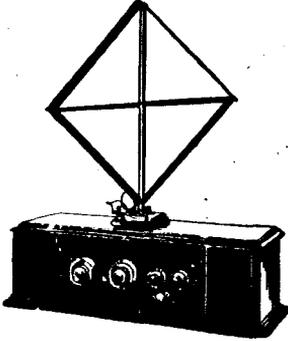

The Kilbourne And Clark Manufacturing Co. is today, the leading independent factor in the marine wireless world. It is preparing to enter all other fields with the same aggressiveness. The practical utility of it's instruments as indicated by every test, places the Seattle institution in the forefront of wireless, and marks Seattle the second city in the American Wireless world.

From "wireless Up To Date", The Oregon Historical Society Scrapbook #66, Page 227, January 1916. //

# Ole!

by

T.J.

It's been a dreary year so far, weatherwise, and to a degree with some of the collectors. However some of our members did find a silver lining to the cloudy days:

- Bill DeVey: Rounded up a General Electric console from Boston. With 8 octals, will be OK for restoration. He managed to get it back on the plane with him, no easy feat in itself!
- Jim Mason: Laid hands on a Heraldryne--"the Ideal Family Set". uses 5 UV-01's and "spiderweb" coils. Says it's in fine shape for it's age.
- Bob Bissell: Acquired a bunch of old "Popular Mechanics" magazines, dating from 1905 to present. Not complete but comprehensive--many old radio circuits and advertisements.
- Jerry Talbott: Sear's #1704 (1933) table set; Knight (Sonora) KB75 (1934) battery portable.
- Don Iverson: An Aerola Sr., (always a good catch); A Welsh 501 and Myers RAC3, (why doesn't someone come up with a set using such tubes?) Lab. type potentiometer used with Wheatstone bridge, also the bridge. Don says the galvanometer that went with this set was sold before he got to it. Tough!
- Jim Mason: I forgot to mention Jim's Horse Radio above, I have one in the shop right now although it's spelled "hoarse" radio!
- Yrs. Trly.: General Electric tube checker in fine condition; General Electric vacuum-tube voltmeter with bum meter, otherwise mint; Many old radio parts and useful service items as well as some unidentified electronic gear; Philco #57 midget tombstone, wood box super with only 4 tubes--good condition. Complete QST from 1940 to 1941. Will donate to Club Library unless someone wants them.

AMPLION

Junior DeLuxe

\$26.00  
List

The Uncanny Amplion A  
"Human" Loudspeaker

You can scarce believe your ears when you first hear the Amplion Loudspeaker.

The clearness, softness and rich tone-quality with which it reproduces voice and music are so real as to be uncanny. You get a new thrill from radio. Delicious "chills" course up and down your spine, as they do when you listen to some master of voice or instrument face-to-face.

American Engineers who have tested the Amplion are unanimous in their opinion that for true reproduction and volume it is the best loudspeaker yet produced.

The Amplion is not a head receiver fitted with a horn, but the adaption for Radio of an electro-magnetic—and acoustic instrument which for thirty years has been successfully used in all parts of the world.

Ask your dealer to let you hear the wonderful "AMPLION" Loudspeaker. Send for illustrated folder.
