The Story of the Goldbergs

How to Improve Your Set

No. 56

N. S. E.

RADIO THEORY AND MODERN PRACTICE

A New Book in Simple Terms
Profusely Illustrated

With chapters on Radio Principles, Vacuum Tubes, Receiver Circuits with diagrams of many of the best-known sets, Short Waves, Aerials, Loud Speakers, Radio Troubles, Radio Instruments, Broadcasting Transmitters, Television, etc.

224 pages, printed in large type, bound in flexible cloth, every point illustrated with drawing or diagram.

Price, \$1.00, postpaid

RADEX Radio Map of North America

The size of twelve pages of RADEX, in two colors, with all the locations of broadcasting stations in every country in North America. Time zones accurately shown. Scale for quickly measuring distance to any station.

The first *real* radio map ever published.

Price, 25 cents, postpaid

Headphone Adapter for Modern A. C. Sets

Permits the use of the radio at night when others want to sleep and brings in those tantalizing DX stations that can't quite be brought out on the loud speaker

Requires no risky changes in the wiring. Simply remove the last tube before the speaker and insert adapter in the socket. This cuts out power stage and reduces volume to comfortable point. If last stage is in push-pull, remove both tubes and place adapter in either socket.

*Can be used with any set using
four-prong tubes in last stage*

Price, \$1.50, postpaid

For five-prong tubes (Pentode) an extra adapter is required—price, \$1.00 or \$2.50 complete.

I. C. A. PHONES

Complete with Head Bands

Specially made of lightweight material and give true reproduction of the broadcast signals. They are made of molded bakelite and lightweight nickle-plated metal. Extremely sensitive and reproduce the faintest signals.

2000 ohms.

Price, \$2.75, postpaid

Leatherette Cover

For Your RADEX

A new cover just received. Most beautiful we have ever used. A rich brown trimmed in gold. Large pockets into which the covers of your latest RADEX are easily slipped. Matches the beauty of your set, protects your book and gives solid backing for making entries.

You'll be delighted with this cover

Price, 50 cents, postpaid

Tuning THRILLS Outside the B. C. Band

THE mid-winter season is at hand, and many nights bring excellent radio reception which provides the real radio enthusiast with unending thrills as station after station is brought in from afar. The winter months are best for radio reception; the cold, clear atmosphere, and the crisp darkness of long nights, seem to carry the weakest signals thousands of miles without appreciable loss of energy.

Science is unable to determine why radio is best during wintry weather. But it is obvious, even to the most casual radio fan, that reception is best when the air is clear and cool. Radio scientists know that such weather breeds little of the static and blanketing effects so common in summer. But fading, that great unknown natural phenomenon, is present at all seasons, and must be considered a necessary evil.

When the weather is cold, and temperatures drop far below the freezing point over much of the country, clear skies filled with myriads of twinkling stars indicate an absence of an absorbing atmospheric blanket between us and the outer region where the Heaviside Layer surrounds the earth. It is certain to be a wonderful night for DX reception, and stations thousands of miles away will roll in with astonishing clearness. If the night could be long enough, and station announcers would only speak more frequently, we could greet the dawn with an imposing list of call letters. But, always, when the gray morning appears, the fascinating signals, like mysterious Arabs, fold their tents and silently fade away!

Static and Weather

Cold and clear weather does not always mean good reception; it may bring a night of severe static, which, to the student of radio-weather, means that the following morning will dawn dreary and cloudy with a promise of snow. Static, then, on good nights presages stormy weather. And, conversely, static-free nights, observed toward the close of stormy weather, indicates the coming of colder and clearing weather with

Winter Brings Them Says B. Francis Dashiell

excellent radio reception prevailing during the following nights. One need not be an expert to understand the subtle hints thrown out by winter weather in order to prepare for DX conditions.

"Fair and Colder Tonight," says the forecast in your morning paper. So, why not get ready to tour the world after the winter sun disappears beneath the western horizon? Thrills abound in the ether. To get the most enjoyment let us DX on all the waves, for it must be remembered that the entertainment broadcast band embraces but a tiny portion of the wave channels used for radio. But, are you prepared to take advantage of the wonderful radio opportunities offered you from every civilized region of the world?

Above and Below the B. C. Band

Let us start from the beginning of practical wave bands. At the bottom of the scale we shall find the ultra-short waves, and only a few stations are listed at 15 meters or less. They are hard to get, for one must possess a remarkable short-wave set and much patience in order to tune in these frequencies. Stations sit on a razor-blade edge, and we find the same situation exists as we go on up toward the higher waves. The higher we go into the broadcasting bands, or toward the lower frequencies, the less selective we shall find our sets becoming.

When we step out into the short waves we need a good short wave receiver. It may be a complete and separate unit built especially for the purpose. Or it may be an adapter that takes the place of the radio frequency circuit in any tuned set. This system enables us to tune to the short waves, and then pass the detected signals into and through the audio-amplifying system and speaker of the broadcast receiver. If we use a superheterodyne receiver we can procure a short wave converter that attaches to the aerial and ground ter-

minals of the set. This is a simple device, for it really is a small oscillator that takes the short wave signal and "beats" it against the intermediate frequency of the superheterodyne so that the resulting frequency will pass through the receiver. The superheterodyne should be set approximately at about 1,000 kilocycles, or 300 meters, and the tuning is accomplished by the single dial of the separate converter. It is a simple device, remarkably efficient, and should have been discovered years ago. It will do more than any other thing to encourage the reception of short waves by average broadcast listeners.

The short waves offer much fascination; they carry far with little input power, and are used for all long distance transmission during daylight hours en-

What exists above this limit? Thousands of radio listeners have asked this question. There are stations transmitting on waves as long as 20,000 meters, or about 12 miles, with a frequency as low as 1500 cycles a second! True, most of the longer wave stations operate in code, for voice modulation of carrier waves is impossible at such low frequencies—often below the range of audible sounds.

When we leave the broadcast channel we come across the vital safety or emergency wave bands—600 meters, on which thrilling S. O. S. signals flash across the seas bringing help to vessels in danger, and which still all adjacent and interfering entertainment broadcasts to the wonderment of an unenlightened radio public. Then we find the aircraft broadcasts, with exciting plane movements

The very first picture of the Mills Brothers, whose story was in the December RADEX. So perfectly do they simulate brass instruments that even expert musicians have been fooled. Left to right: Herbert, 19, Donald, 17, John, 21, and Harry, 18. Over the CBS at 9:00 p.m. EST, Mondays and Thursdays.

countered around the world. As we tune on through the short wave band we encounter amateur stations conversing with each other across the country, we hear the whine of television, there is a maze of police stations with their exciting messages of adventure, and, at 200 meters, or 1500 kilocycles, we emerge into the entertainment broadcast band. Here there is congestion, and stations are crowded together on the dial. But as we go still higher into the waves, toward the 550 meter limit the tuning becomes broader, and stations do not appear so closely crowded on the dial. At 550 meters, or 540 kilocycles, we leave the limits of the dial, after the last available station is tuned in.

and weather advices from airway stations to planes in flight. These are in voice. Radio beacon and compass stations maintained for the benefit of ocean and aerial navigation keep up their ceaseless buzzing of characteristic signals.

Still higher in the wave length scale are the ship and shore radio stations working in code, using tube, arc and spark transmitters, no two of which sound exactly alike. The great flute-like arcs of the few remaining great stations of this type scattered over the globe hold the fascinated attention of the listener, although he cannot read a bit of code. And, late at night, comes the crashing of NSS and WCC, with their hours of

(Continued on page 27)

MORE RADIO CROSS CALLS

Here Are Three New Puzzles

THOSE December puzzles certainly helped to "save the surplus" of RADEX premiums. There were only a very few who were fortunate enough to send correct solutions to all three problems. Although one of these was perhaps the most difficult we have ever published, oddly enough more puzzlers failed on the simplest one of all. KYW was the call in No. 2 on which most of our readers stumbled and fell.

The "problem of the Five C's" was the one that called for the greatest patience and perseverance. "No. 3 sure was a tough proposition," comments Fred Wakerell, 380 Slater Street, Ottawa, Ont. "I gave it up three times but was ashamed to admit defeat so dug in again. Time certainly flies when you are trying to solve Mr. Johnson's puzzles." Mr. Wakerell was one who lost out because of KYW. "Mr. Johnson had me 'bow-legged' for three hours looking for the combination to his puzzle," says Edwin M. Prosser, 84 Saratoga Avenue, Brooklyn, N. Y. "This last puzzle was the best one that has appeared for a long while," comments Bernard P. Grebe, 732 Madison Ave., Reading, Pa. "Let's have more like it."

In answer to Mr. Grebe's plea, Forrest Moore, Denver, Colo., submits a problem this month of which he says. "Here is a crossword puzzle which I have worked out which you may be able to use. I spent quite a lot of time on this and believe that it is solvable only one way without more information than 'The Four C's'."

Answer for January

Following is the correct solution for No. 1:

WWWWWCW
NEBRASKA
AABDLFCC
COLORADO

The Elimination Problem, No. 2, looked like an almost endless job, but

with a little brain work, it was actually solvable in a very few minutes. How many went at it in this way: First, make a list of those letters which appeared twice and three times. Those that must be eliminated are obviously those calls which have two or more letters alike that do not appear in the list. In the sentence given the letters not duplicated are d, g, h, i, j, m, p, q, s, t, v, x, y, z. Therefore the calls which cannot be made out of the letters of the sentence are 22 in number: CJCJ CMCM KGFG KGGC KGGF KGGM KMMJ KPPC KTAT KWJJ WDOJ WHDH WJJD WMMN WPAP WSJS WSVS WWSW XEX XFX HHK and T14NRH.

The cross-call puzzle by Mr. Raba was solved as follows:

Horizontal

3 KOA, 4 KEX, 6 KWLC, 8 WFBE, 9 WIBO, 10 KOH, 11 SCT, 12 WGL, 14 XEK, 15 WOW, 16 OAX, 18 XFI, 19 WKBF, 21 KFI, 22 WIP, 23 CMJC, 25 KSL, 27 WRR, 28 KTM, 29 WOR, 30 KQW, 31 KGA, 33 WOV, 34 WRAK, 35 WCKY, 37 WDEL, 38 KGY, 39 WJZ.

The February Problems

(See page 16 for No. 1 blank)

No. 1 is that by Mr. Moore above referred to, which he thinks can be solved without a key. No. 2 was designed by Reggie Ogan, Carpenteria, Calif. The problem is to change Leaf to Stem, Stem to Limb and Limb back to Leaf by filling in nine station calls. Only two of the letters in any one line may be used in the next. Thus LEAF might be changed to WDAF and so on. Here is the puzzle:

L	E	A	F	S	T	E	M	L	I	M	B
□	□	□	□	□	□	□	□	□	□	□	□
□	□	□	□	□	□	□	□	□	□	□	□
□	□	□	□	□	□	□	□	□	□	□	□
S	T	E	M	L	I	M	B	L	E	A	F

No. 3 is another cross-call. We have had so many requests for more of these puzzles from our crossword addicts, that we are using this symmetrical puzzle designed by Maurice Sylvan, Chicago, Ill. Most of the descriptions are Mr.

Sylvan's original own.

Across

- 1- 4--First three letters give another station in same state.
- 5- 8--First two letters are like last two.
- 9- 12--First three letters are S. C. station.
- 13-166--Owner's initials are H. H. H.
- 17- 19--A newspaper station.
- 20- 23--Reverse. In M-22.
- 24- 26--On 1310.
- 27- 30--Reverse. Where groceries are sold.
- 31- 34--Inserting A after each of last three letters spells a sleeping garment.
- 35- 38--Last three letters reversed is a chain system.
- 39- 42--What city bans drugs?
- 43- 45--Reverse. A MST station sharing with a PST.
- 46- 47--Middle letters of five stations.
- 48- 50--First letter repeated at end makes Pa. station.
- 51-54--Reverse. First in Frisco.
- 55- 58--Mass. station on till 2 a.m., EST.
- 59- 62--First three letters is a station in Omaha.
- 63- 66--On 1370.
- 67- 70--College for Women.
- 71- 74--Reverse. Three countries on this wave.
- 75- 78--A radio manufacturer.
- 79- 82--In a steel city.
- 83- 86--Only chain station in the state.
- 87- 90--Reverse. On 1200.
- 91- 93--One of three CBS stations on this wave.
- 94- 95--Last letters of a Tennessee station.
- 96- 98--Middle letter repeated makes station in Nebraska.
- 99-102--Reverse. Holt-Rowe.
- 103-106--Chicago's only Sunday station.
- 107-110--On 1500.
- 111-114--The city's name begins with a bright color.
- 115-117--The home of RADEX.
- 117-119--The same station either way.
- 119-122--Owned by "Kill Worry; Keep Health."
- 122-124--Reverse. Voice of the Rockies.
- 125-128--Material used by city's principal industry.
- 129-132--Cuban station owned by an American.
- 133-136--A good station for a laundry.
- 137-140--Reverse. Where flour is made.

Down

- 1- 33--A Pacific station with last two letters alike.
- 2- 34--All letters are first four of city.
- 3- 21--In Clarinda.
- 4- 35--Contained in "Crown."
- 5- 38--This station has three calls.
- 6- 26--In Washington.
- 7- 39--Reverse. Mrs. Ippy.
- 8- 40--Define barrell then reverse it.
- 17- 51--Four A's in this state.
- 18- 52--Owned by sister station.
- 23- 56--Shares time with station in same city.
- 24- 57--A university station.
- 29- 61--Reverse. On 1310.
- 30- 62--About the center of Florida.
- 45- 71--On 1200.
- 48- 70--Add the middle letter and get another station.

- 54- 82--California station with permit to move.
- 55- 83--Reverse. Last three letters reversed are another station.
- 58- 86--North America's most powerful is on this wave.
- 59- 87--Also in a steel city.
- 65- 73--Last letters of an Indianapolis station.
- 68- 76--Last letters of a Yonkers station.
- 70- 96--On Lake Erie.
- 79-111--Only NBC station on this wave.
- 80-112--Reverse. Daytime on cleared wave.
- 81-101--Pickwick.
- 84-117--Reverse. Owned by California newspaper. (Deleted June, 1931.)
- 85-118--Reverse. Eight stations on this wave with same power.
- 89-123--In city with same name as an automobile.
- 90-124--Shares time with 29-61.
- 102-134--The city owns it.
- 103-136--A Boston daylight.
- 106-137--Canadian owned by a doctor.
- 107-139--Station reversed defines masticate.
- 108-140--Reverse. Last three are first three of city.
- 113-133--Reverse. Shares with "Hello World."
- 115-135--In a state capital.
- 120-138--Reverse Tennessee and get Cuba.

All of the calls used in these puzzles, unless otherwise specified, will be found in the January RADEX, but may or may not appear in this issue. Get the correct answers to all three problems to us before February 20th and receive either the March RADEX or the map. Subscriptions will be extended when request is made.

Next month Susie Sexton will tell you about Colonel Stoopnagle and Budd.

"Yoo Hoo, Mrs. Bloom; Lissen Darling"

The Goldbergs by
Susie Sexton

JAKE GOLDBERG, of Radio's "The Rise of the Goldbergs," got his start in life as a pants presser on Hester Street, the Bowery's push-cart boulevard. But for the real Jake opportunity's door was first opened out in Cleveland, Ohio, many years ago by none other than Harry Bernstein, the Jewish Czar of Orange Street.

Obviously Jake was excited as he stepped off the elevator into the mellow lamplight of the National Broadcasting offices in New York. Mollie was late. Those tickets for her Thanksgiving neighborhood party weren't ready yet.

"What would you say if I told you I got my first start on the stage out in Cleveland when I was only about sixteen?" he asked, eyes twinkling, face beaming. Radio listeners imagine he is a tall man because his voice sounds big on the air. In reality he is rather short with the slightly portly figure suitable to father roles.

"When I was only a youngster," he went on. "Bernstein built his own theatre for a stock company to produce Jewish plays. And because Orange Street had a large Italian neighborhood then and I had picked up their language in San Francisco, he engaged me to do Italian sketches. At seventeen I played an old man of eighty-eight. One week I was a woman, another a boy, now a gunman and then again a Jewish character.

Maybe you have suspected that Jake isn't "Jake" except before the microphone. To the NBC officials and on the programs of "Wonder Boy," now playing on Broadway, he is James R. Waters. And that isn't his real name either. He was born James Rosewater back in Austria-Hungary something like fifty years ago.

"How did you happen to change your name?" I asked.

"When I began to appear in American plays the managers told me Rosewater would never do," he said. "So I made two words of Rosewater and shortened the first into the initial R making it James R. Waters. My family left the old country when I was still very young and went to San Francisco. But they did not like it. On their way home they stopped in Cleveland leaving me with relatives when I was about ten. I sold papers, sang in church choirs, played the violin, and did anything else to make a living."

His eyes wandered down the hall.

"Mollie, come here," he called. An attractive, smartly-dressed young woman, wrapped in furs as luxurious as those of a movie star, came in. It was Miss Gertrude Berg, author and originator of "The Rise of the Goldbergs," also historian of their passage from the Bowery to the Bronx via Park Avenue. Mollie is taller than Jake, has large, dark eyes, thick, dark braids wound twice around her head, a low voice and shy manner.

"How do you make Mollie seem so real on the air," I asked. "Did you take the character from life?"

"Yes," she answered, "Mollie is really my grandmother, Mrs. Jeannette Netter, a Russian. She was the sweetest woman I have ever known. As a child I adored her and tried to act like her in everything. About ten years ago I thought of putting her into my work."

"Was it hard at first?" I asked.

how they talked and acted, eh? I had played Jewish characters all my life—in stock, in the Yiddish theatres, five years with 'Abie's Irish Rose,' eight around the world as Abe in 'Potash and Perlmutter,' and a long world tour in 'Friendly Enemies.'"

"But Jake was different. Men in the cloak and suit business have their own mannerisms. All of them shout at the top of their lungs at everybody and

Here we have the Goldberg Family in one of their interesting and inimitable sketches of Jewish family life. On the NBC - W E A F chain every day except Sunday at 8:45 p.m. EST.

"Very," said Mollie, with her quiet smile. "I was born in New York and have always lived here. As a small girl I wrote poems and essays. Later I translated plays for the Yiddish Theatre. Then I wrote the first Goldberg sketches. No one would consider them until NBC took them for a tryout. At first we broadcast once a week. But later they became so popular that Pepsodent bought them for a nightly program.

"And how about Jake," said I. "Was Jake modelled from real life?"

"It was very hard to find a good Jake," said Mollie. "We tried many actors, but none of them had the right voice until I discovered Mr. Waters playing in Richard Bennett's 'Jarnegan' as Papa Isaacs."

"And Mollie," Jake broke in, "do you remember how I went down to all the cloak and suit houses to discover

everything in their place of business. They stand back with their fingers in the side of their mouths when watching a model try on a garment. When such a man gets home, some woman—his wife, of course—is always getting the best of him without raising her voice at all. He always thinks he has his own way, but he never does. Just like Mollie and Jake, eh, Mollie?"

Mollie nodded.

Then I discovered a few things about Jake and Mollie off the air. Mollie is married to a sugar engineer and has two children of her own. She is an excellent musician and paints for amusement. "The Rise of the Goldbergs" is always written for two weeks in advance. All the family rehearse each day from five in the afternoon until the sketch goes on the air.

(Continued on page 28)

Here's HELP in TIME OF TROUBLE

Too Much Volume

My R. C. A. Victor receiver, using the new two-volt tubes and Aircell battery, is too loud and cannot be tuned down to a softer tone without becoming muffled or blurred. What have you to suggest?

It seems that the arrangement for volume control has become defective. It is suggested that your service man examine the device and make such repairs or replacements necessary. At the same time we think it best to have the tubes tested, for, while they are new, it is possible that one or more are defective.

Using Phonograph Pick-Up for Amplifier

I built a two-tube short-wave receiver and connected the audio output to the studs of the phonograph pick-up input of my Victor receiver, but the results were unsatisfactory. Why can't I use the phonograph amplifier in this way instead of going to the trouble of removing the detector tube and plugging in an adaptor?

The output of your little short-wave receiver, while ample for headphones, is far from sufficient to operate the input circuit designed for magnetic pick-up from phonograph records. If you add about two stages of audio amplification to your short-wave receiver, there will then be enough input voltage to operate the audio stage of the Victor speaker circuit. But, then, you can operate a battery speaker direct from the short-wave set and it would be unnecessary to use the radio speaker. The use of the phonograph input circuit is not satisfactory when using a short-wave adaptor set. We do not think it practicable to present a circuit designed for this particular instance as so few of our readers are in a position to use such a short-wave system, and the appeal would be limited. Furthermore, we do not believe the best results would be obtained when using this method.

Relative Merits of Tubes

What make of tube is the best to use? I understand that one certain make is a better oscillator than all others.

How to Improve Your Radio Set

Of course, it should be obvious that we cannot attempt to decide upon the merits of the several makes of tubes. We have made no performance tests, but, like most people, we can have our opinions. There is very little difference between the standard makes of tubes, but all manufacturers have certain claims of excellence which they like to set forth. These tubes are made under specifications laid down by the tube makers' associations, and no two vary in essential arrangements. This alone makes it difficult to decide between two types of tubes. However, some peculiar characteristics, and the fact that better material and workmanship may be used by one maker, naturally gives some few tubes a higher rating of apparent efficiency.

Variable-Mu's in Majestic Receiver

I have a Majestic, Model 50, which requires a complete replacement of tubes. Can I use the -35s in place of the -24s?

This receiver uses a double volume control, across the aerial and ground, and also to the cathodes of the first radio frequency tube and the first detector. For this reason it is not practicable to use the variable-mu tubes in place of the older -24s. The -35s require a stronger input signal voltage than the -24s, and this cannot be obtained from the present volume control connections. Since this method of control would have to be removed and replaced by another different arrangement, the change would cause considerable work and expense. The advantages in this receiver of the -35 tubes would hardly be noticeable, and the change cannot be recommended as worth-while.

Fails to Operate

A friend has a H. F. L. nine-tube battery set. It stopped operating, and we have put in a new volume control because the old one seemed to cause the trouble. Now everything seems perfect but the set has failed. What do you think may be the trouble?

The trouble may be found to be in a burned-out audio transformer primary coil, and the coils of these amplifying transformers should be tested for electrical circuit. This may be done by connecting a 22½-volt B-battery and voltmeter across the plate and positive B-battery terminals of the transformers. If the coil is intact a small voltage will be registered on the meter; if there is a break, no voltage will be indicated. In case of trouble the transformer must be replaced, as it is impracticable to repair it. The primary windings frequently burn out because of the high voltage passing continuously through from the B-battery.

Was the volume control replaced in exactly the same manner as the old one? Check over the wiring. See that all tubes are perfect, for the mere lighting of a tube does not indicate that it is perfect. Test out the entire circuit for electrical conductivity, especially the leads going to the speaker terminals.

Signals Are Weak

My Majestic, model 20 chassis receiver, worked well and then ceased operating. It still brings in local stations, but very weak. What can I do to increase the strength of the signals and bring the set up to its previous standard?

We suggest that perhaps one of the audio amplifying transformers has burned out, and its primary winding should be tested as explained in a previous question this month.

Have the tubes tested again, and replace defective ones. The resistors should be tested also, and the ground and aerial connections carefully examined. There may be trouble in the field or voice coils of the speaker.

For your information there are two transformers which might burn out. One is an input between the second detector and the two -45 push pull audio tubes, and the second is an output between these tubes and the voice coil of the speaker.

Failing in the above personal tests it will be wise to use the services of a repair man who has meters to test out the entire continuity of the circuit.

Changing Set for Short Waves

I have a Freed-Eiseman receiver that I

would like to rewire with plug-in coils, etc., so that I can also receive short waves in addition to the broadcast waves. Tell me what to do.

You cannot rewire the coils of your receiver so as to make it respond to all the waves, including the lower bands. You can build or procure a short wave adaptor that will attach to your set so that short waves can be received. But there is really nothing so satisfactory as a short wave set built entirely for the purpose, unless one has a super-heterodyne receiver and uses a short wave converter in connection with it.

Using 2-Volt Tubes

How can I use the new -30 and -31 two-volt tubes in a three-circuit tuner that has used -01A and -99 tubes?

The two-volt tubes (type -30) can be employed in a regenerative three-circuit receiver, but the -31 tube can be used in the last audio power stage only, for it is a powerful amplifying tube. You must be careful not to use more than two volts on the filament of the tubes. The performance should come between the -01A and -99 types, and very satisfactory for this style of receiver.

When this style of circuit is balanced, and proper condensers and coils used, it cannot be excelled by any other type of

Andy Sannella, a veteran conductor of radio and recording orchestras, composer and a star of many instruments.

small circuit for distance getting, especially with headphones. Its howls and squeals, however, have made many enemies among radio listeners.

Pentodes in Majestic

I have a Majestic, model 60, and wish to substitute the -47 pentode tube for the present two -45s now in the set. What shall I do to make the change?

The new pentode tubes may be used in this particular set with the use of adaptors, but the benefit will not be sufficient to warrant the change. When -45s are used in push pull, as they are in your set, there can be no gain in volume or tone when two -47s replace the -45s. In some midget sets, however, the pentode gives greater volume, and the advertisement you quote most likely referred to such situations. And you cannot remove one -45 and replace the other with a single -47, and thus use but one power tube in a push-pull out-circuit.

What Are the Best Receivers?

I wish to purchase a set to cover all broadcasts, but must I use plug-in coils for the short waves? What is the best set to select from the enclosed list?

It should be clearly obvious that we cannot advise which of the sets listed by you should be purchased. However, the list was well prepared. The following information may be of help in selecting a set of the kind you desire.

There are several "all-wave" receivers now on the market, and they are very satisfactory. They have a combination of antenna coils which permit of a selection of waves of different lengths without the necessity for plugging in different coils. A simple switch does the work. Or, if you have a mind to purchase a good superheterodyne receiver, you can also procure a converter which permits of short waves being received on the standard broadcast set. It is no longer necessary to change coils in a combination receiver when listening to short waves.

Loop Aerial On Superhette Receiver

How can I attach a loop aerial to my R. C. A. Superhette receiver so that it will operate similar to the model 28 Radiola? A loop similar to that used on the RCA

28 cannot be used on your Superette because the wiring of the two sets is entirely different. The suggestion is impracticable, but instead, you might make a loop antenna of another type. Wind 30 turns of covered wire on a frame about three feet square and connect each end of the loop to the aerial and ground terminals of the Superette. A ground wire should also be used in the usual manner.

But when a loop is used the signal voltage received is very weak, and not sufficient to excite the receiver sufficiently. It is advisable to use an additional stage of radio-frequency amplification. This may be accomplished by fixing up a small container with a 2-volt -30 amplifier tube, dry cell, and small 90-volt B-battery. A variable condenser of .0005 capacity is connected across the loop ends, and one of these also goes to the grid of the -30 tube, and the other end to the -A and -B leads. The plate of the tube connects to the antenna terminal on the receiver through a .004 fixed condenser. The plate also connects directly to the positive B 90-volt battery through a small choke coil. The -B side of the battery assembly connects to the ground terminal of the receiver, which also is attached to the ground in the usual manner. This auxiliary circuit amplifies the incoming signal so the receiver will operate better, and acts as a wave trap tuning device as well.

Some Squeals and Howls

I have a Pierce Airo receiver that squeals and howls at times. I use -01A and -12A tubes, and a -00A detector. What can I do to stop this nuisance? Also, I would like to have a circuit diagram.

We do not believe the -00A tube to be a proper detector in this receiver. And the -12A might prove best as the last stage audio amplifier tube, yet it also makes a good detector. Use -01A tubes throughout the rest of the circuit. A new tube in the detector frequently stops howling. A broken or open grid wire in the circuit will cause continuous howling, and a defective secondary in an audio transformer gives rise to similar symptoms. Check over the grid leak and
(Continued on page 25)

Monthly GATHERING of the CLAN

RADEX Family Discusses Radio

THE Editor has been pretty successful for eight years in hiding himself behind that title. Now comes Arthur L. Robb, 1338 Mulvane Street, Topeka, Kans., with the following comment: "To prove to you that I actually read RADEX from cover to cover, I have some comments to make about the statement of ownership which appeared on page 67 of the December issue. The first thing that is apparent is that one Fred C. Butler is practically synonymous with The Radex Press. I suggest that a sketch be written up about him and published in RADEX just as is done with other individuals connected with Radio. I, for one, would like to know just what sort of a person he is who can put out this sort of paper. The sketch might also contain a history of the development of RADEX; where he got the idea; how the magazine was started, etc. While some fans doubtless have complete files of all back issues, my first copy is No. 32 and there are probably many others in the same situation as I am."

The Editor's first comment was "nothing doing," but "Betty," of the Gossip Page, says she thinks the readers are entitled to know something about the man to whom they write so many letters and that she purposes to write an article such as Mr. Robb suggests and to see that somehow or other, it gets into an early issue.

We'll see.

In the meantime, let's have a look at this month's mail and find out what the family is thinking about.

Not Fewer But More Announcements

That order of the Commission extending from fifteen to thirty minutes the requirement for announcing, has pretty nearly swamped the office with mail. It is to be hoped that the broadcasting stations will not take advantage of this ruling. A quarter of an hour is plenty long enough to broadcast without an announcement. Even if one is not a

DXer but likes to listen to any good program he picks up, it adds greatly to his pleasure to know what station he is receiving. One of the most fascinating things about radio is the ability to pick up stations clearly at great distance. Stations which do not announce frequently are localizing themselves and unnecessarily limiting their own value. It would seem to a business man in any other line as though the stations would

If you thought that picture of Kate Smith in January didn't do the girl credit, how about this one?

lean the other way and take every advantage to announce their call letters and city. They might just as well not be on the air at all so far as any value to themselves is concerned, as not to have people know the station they are listening to. We urge the Broadcasters' Association to give this matter the attention it deserves and in turn urge their members to take every possible opportunity to work their call or their city into their program announcements. This will not require a break in the program or announcement but merely a little originality and ingenuity. This is one way we would do it: "The next selection—a favorite with listeners of KXXK, etc."

Or: "KXXX now presents, etc." Practically every announcer now says "We." "We are glad—" "We will now." This "we" would be all right if those listening knew who "we" were. How much simpler instead of such an indefinite and meaningless term to use the station's call.

J. D. Gavitt, 915 Ohio St., Lawrence, Kansas, thinks readers of RADEX and DX Clubs ought to take this matter up with their representatives in Congress, but we doubt the effectiveness of this plan. What is really required is a little brain work on the part of announcers and station managers and Congress can't legislate brains into anyone.

When the "Reds" Broadcast

"Who logged XEW on November 8th, when the 'Reds' seized the station and broadcast a red-hot speech from that station?" quotes Herbert Berkowitz, 2940 Westchester Ave., New York City, from our January number and then answers, "I did, and will describe it as best I can. I have a store at the above address and have here a Crosley Show-box. Since October I have been receiving XEW pretty regularly almost any night after 8 p.m. On that particular Saturday night about 10 p.m. I tuned in that station. The reception was not so good but I kept it on for no particular reason. I was not listening closely and did not notice any interruption of the program, but all at once the reception became loud and clear as a local station and a loud voice came over and in such an impassioned way that I stopped what I was doing and went to the speaker to find out what it was all about.

"I understand Spanish fairly well but couldn't get the idea at first, not because I didn't understand it, but because I didn't think such talk was allowed. However I glued my ear to the speaker and got as much as I could understand. Some friends who were around also heard it and, although they could not understand any of it, could easily sense the general meaning by the forceful tone of the speaker. I translated for them as best I could and we listened until he had finished. Immediately after he stopped, there was silence for some time. This puzzled me also and I tuned out after waiting a few

minutes but I still continued to think and talk about it for I could not figure how such a speech could be allowed without international complications, because many prominent Americans as well as Mexicans and even Europeans were mentioned in quite an uncomplimentary way. It was not until the next Monday morning when I read the dispatch in the newspapers, that I knew what had happened. I never got such a kick out of my radio before."

The Story of TI-4-NRH

This puzzle is proposed by William McLain, 100 Maple Tree Lane, Wheeling, W. Va.: "Why does the experimental station in Shreveport, W9XX, use W9 prefix when Louisiana is in the W5 district? ("W9XX is going to be W5XA from now on," says Rudolph Kure, 301 Warner St., Cincinnati, Ohio.)

Mr. McLain writes interestingly regarding the Costa Rican station. "The call is Ti-14-nrh," he says, "and not T14-NRH. At one time NR was the international intermediate of Costa Rica. The letter H was added to designate Heredia, the city in which NRH is located. New intermediates put into effect January 30, 1930, gave Costa Rica TI for the new prefix. Because NRH had gained so much fame, the owner, Amando Cespades, did not want to drop the old call letters. Costa Rica did not sign the treaty and therefore Cespades continued to use NRH until December 6, 1930, when the United States officially protested to the government of Costa Rica. In order to relieve the embarrassment of his government, Cespades tacked on the prefix of his amateur station TI-4-AC to NRH making it TI-4-NRH. He could not use all five letters, TINRH, because five letters in a call denotes an aircraft station. Amando Cespades ordinarily uses TI-4-NRH, but as he is used to using NRH, it slips his mind sometimes and he announces NRH instead of TI-4-NRH, just an oversight no doubt. (?) Mr. Rowland, who failed to get a verification from this station, should write them again with all particulars regarding the program he received and ask for verification. It would be wise to mention if

it was received on sort wave or on the b. c. band."

Cost Not Main Factor

"I want to take issue with the statement of Eugene Cole, of Houghton, Mich., in RADEX, that daylight reception is possible only with the most expensive sets," says Sgt. R. C. Broadrick, Box 81, Fort Monroe, Va. "Even though I am so situated that I have to use an indoor antennae, still WPG, WOR, WEA, and others, 300 to 600 miles distant, can be tuned in at any hour they are on the air. The cost of a set is no criterion of its efficiency. I use a Majestic 20, cost \$74.50. I am not a radio man but merely an electrician—Sergeant U. S. Army—but after spending some \$3000 building various sets, I have come to the conclusion that there are any number of sets selling for less than one hundred dollars that are superior to any set I can build. The Majestic 20 is merely one of them."

"Do you think that a water pipe would be a better ground than a dealer-installed copper rod?" asks Chas. C. Hudlow, H. Park, Rt. 1, Chattanooga, Tenn. Grounds, like aerials, vary greatly in different locations, and the "best" can be determined only by experiment. Our Technical Editor is of the opinion that no ground can possibly equal a good soldered connection to a cold water pipe and that substitutes are for those who do not have access to a city water system. Many have written us, on the other hand, that such a ground as that described by Ollie Ross in the June, 1931, RADEX (No. 50) has improved their reception over their previous water pipe ground. No broad prescription for grounds and aerials can be written. This is a matter for experiment, the cost of which is small and the possibilities well worth the effort. Mr. Hudlow, a new reader, is puzzled by the term "DX."

(Continued on page 28)

And here we have that charming friend of the children, "The Lady Next Door," otherwise Miss Madge Tucker, director of juvenile programs for the NBC. Daily except Sunday on the WEA, chain at 5:00 p.m. EST, although at this writing this feature has been moved forward to 4:30.

BETTY'S RADIOGRAPHERIES

Little Stories of the Stars

ARTHUR TRACY, who goes under the pseudonym of "The Street singer," confesses that his greatest thrill came when broadcasting recently from a blimp soaring over the towers of New York in a program that was heard throughout the United States. After he landed Tracy admitted that when the project was first broached he fully intended to decline with thanks. Only a few weeks before he had put down his foot on a younger brother's attempt to enroll for an aviation course. Now, he not only is agreeable to his brother's choice, but is himself a confirmed aviation enthusiast.

Tracy came to radio after years of musical comedy, motion picture house and night club efforts. Starting on early afternoon periods he soon was drawing such a volume of fan mail that officials of Columbia moved him to the coveted 11:00 p.m. period, where he was heard thrice weekly, until a few weeks ago when he was signed to appear on the "Pillsbury Pageant."

Arthur was born in Philadelphia. Both of his parents were singers. When he was about ten years of age Arthur became a "street singer" in fact. He used to carol under neighborhood windows and gather the falling coins, then rush to a music store and buy copies of songs of the day. Later he got a chance to sing in a church choir.

When fifteen Arthur started a course of self training. He bought every record of Caruso and carefully rehearsed the phrasing, methods of shadings and other tricks that Caruso was famed for, making it a point to keep playing each record until he had it memorized down to the last note. When eighteen he went to a local singing teacher who kept constantly calling for more volume.

After finishing high school he went to the University of Pennsylvania to study architecture and was a member of the glee club and college dramatic league. But instead of an architect Arthur was destined to be a singer and he finally enrolled in the Curtis Institute of Music. Striking out on his own he started giving local concerts and was spotted by scouts for the Shuberts. They signed him for a leading role in a road company of "Blossom Time," and later transferred him to one of the numerous companies of "The Student Prince." Five years in musical comedy, several vaudeville tours, a period as master of ceremonies in a motion picture theatre, and then a friend brought him to Columbia for an audition. Tracy accompanies himself on the accordian. Tune in the "Pillsbury Pageant" over CBS Fridays, from 9:00 to 9:30 p.m. EST.

* * *

Vaughn de Leath has the distinction of being literally the First Lady of Radio Land. She was the first woman to send radio programs over the air. That was in 1920 when she made her debut under the direction of Dr. Lee DeForest over an experimental transmitter located in an improvised studio in the World Tower in New York. She sang and told stories to the unsympathetic ear of an old 1904 model phonograph horn which con-

veyed her programs to an eager public of a few amateur experimenters in radio transmission. Through this crude medium her voice became known to hundreds of crystal-set owners throughout North America, and when high-power transmission was made possible, Miss de Leath's was the first woman's voice to be heard by radio in Europe.

In addition to being the original Radio Girl, Vaughn originated modulated singing into the microphone. Explaining how the necessity brought about this type of singing, Miss de Leath says that back in the early days when radio apparatus was not as perfect as it is today, loud high notes often proved expensive. Many a singer, becoming too vocally vigorous, would break a delicate tube with a high note. These tubes cost \$110 each, so Vaughn learned to keep her voice constantly modulated. Good thing our friend, Walter Winchell, wasn't broadcasting in those days, with his "Okay, London!" Since that time she has been heard regularly over the air, and you can now hear Miss de Leath over the Columbia twice a week, every Monday at 6:15 p.m. EST and every Friday at 6:30 p.m. EST, in a program of popular songs.

* * *

Alexander Gray, romantic baritone of the musical comedy stage and the talking screen, can be heard nightly, except Sunday, over the CBS at 10:30 p.m. EST, accompanied by Nat Shilkret's

36-piece orchestra, on the Chesterfield programs, known as "Music That Satisfies." Although not a newcomer to radio, Gray rarely has faced Eastern microphones. While in Hollywood, however, the young baritone was engaged to play the leads in complete radio performances of "Blossom Time" and "Chocolate Soldier." Each of these performances lasted more than two hours.

Gray attained stage and screen success after a colorful and varied career. His early schooling was obtained in Baltimore, with summer interludes of work on a dairy farm and in tobacco fields in Pennsylvania. He attended high school in Philadelphia and his vacations were spent in a machine shop of an electrical supply company. As a student at Penn State, Alex worked his way through college by taking care of furnaces, washing dishes and selling aluminum utensils. He found time, nevertheless, to become prominent in the glee club, quartet and dramatic society.

Graduating as an industrial engineer, Gray worked his way to Europe as a deck hand on a liner and returned as a

coal passer in the stoke-hole of a yacht. Years later came an audition with Florenz Ziegfeld and a part in his Midnight Frolic. He since has had featured roles in "The Follies," "Sally," "The Desert Song," and others.

Deserting New York and "the road" for Hollywood, Alex played opposite

Marilyn Miller in her first film, "Sally," and was featured in the musical comedy films "No, No, Nanette," "Spring Is Here," "Song of the Flame" and "Viennese Nights." When musical pictures lost their vogue Gray returned to New York and after a vaudeville tour, was chosen as the one out of many to star on the Chesterfield programs.

Irene Beasley, the "long, tall gal from Dixie," was born January 28, 1904, in Whitehaven, Tenn., a village built around a post office, grocery store, and a cotton gin. Her father and mother were both non-professional singers and her grandmother was an expert pianist. From her grandmother, Irene received her first piano lessons. When she was six, her family moved to Amarillo, Texas, where she started her schooling. After some time at Sweet Briar in Virginia, she went to Mississippi to teach school. She was superintendent, principal, and teacher of seven grades, with eleven pupils in all. From then on things began to happen in a chain of accidents.

While she was still teaching, Miss Beasley wrote a song, "If I Could Just Stop Dreaming," which she had published herself. It was bought, and in order to exploit it, she sang it many times over a small radio station. That led to work in Chicago for larger stations and for motion picture house presenta-

tions. Subsequently, Irene returned to Memphis and while in a music store chanced to meet a representative of the Victor Recording Company. This meeting brought her to New York in order to make a test record, and the test resulted in a Victor contract.

The next step occurred in a New York music publisher's office, when Irene met Dale Wimbrow. He introduced her to Columbia and an audition, and she has been heard over CBS since April, 1929. You can hear Irene's pleasing voice over CBS Mondays from 9:30 to 9:45 p.m. EST, with the Round Towners program, and on Thursdays from 9:15-9:30 p.m., EST, on the Mennen program.

* * *

Here's the "All-American Radio Team" just compiled from answers to a questionnaire sent out by the Radio Editor of a New York paper: Dance orchestra, Guy Lombardo's; Symphony orchestra, Philadelphia Symphony; Male singer of popular songs, Morton Downey; Female singer of popular songs, Kate Smith; Male singer of semi-classical songs, James Melton; Female singer of semi-classical songs, Jessica Dragonette; Feminine harmony team, Boswell Sisters; Male harmony team, Revelers; Dialogue act, Amos 'n' Andy; Master of ceremonies, Ben Bernie; Sports announcer, Ted Husing; Studio announcer, Milton Cross; Commentator, Lowell Thomas; Organist, Jesse Crawford; Instrumental soloist, Toscha Seidel; All-dramatic program, Sherlock Holmes; Musical program, Rapee orchestra with Virginia Rea and Frank Munn; Comedy act, The Colonel and Budd; Children's program, Lady Next Door; Advice to Women in the Home, Ida Bailey Allen. What do *you* think about it?

With the LUCUBRATORS

Better Look That One Up

IN spite of the warm weather, distant reception is reported from many districts as being unusually good. Better aeriels, better grounds and better sets are probably responsible in a large measure. Whatever the cause, logs are growing rapidly. Some readers report as many as six and eight new ones tuned in in a single night in spite of the fact that logs were already well filled. Many attribute these new catches to information in the column "Their Time On the Air" and to hints dropped in this department by other readers. There's nothing like fishing when you know the fish are there and hungry for bait.

B. C. Stations on S. W. Sets

"Although I frequently read in RADEX of short-wave catches on broadcast receivers, I have yet to see a report of b. c. reception on a short-wave set," says T. Colegrove, Frankfort, Mich. "So here is one. I use a National d. c. SW-3 and I have heard 408 stations on the broadcast band in a little over a year." Mr. Colegrove favors a long aerial. He uses one with two wires, 225 feet long and 150 feet high, located on a high bluff overlooking Lake Michigan. Instead of a ground, he uses an eighty-foot counterpoise. In spite of the length of his aerial he can tune in CMK, CKAC, XER and WSB—stations in four countries but five kilocycles apart. Mr. Colegrove gives us a few DX tips. "CMK comes in fine about 9 or 10 o'clock on 725; 4QG, Brisbane on 770 and 2BL, Sidney, 855, are frequently heard after 5 a.m. EST., CMCD, 925, comes in fairly well even when the U.S. stations are on the air on both sides of it, as does CMCY, 1345; XEO comes in fine on exactly 935 kcs. every night from 9 to midnight, in spite of the fact that he is listen on 940 and his verification says 940. XEX comes in frequently about the same time on 1204 and he became quite indignant when I wrote him that he was on 1204; KGMB,

Honolulu, signs off almost every morning at 4:30. a. m. K6XO, an experimental station in Kahuka, Hawaii, 7520 kcs., can be heard frequently about 5 or 6 a.m. testing with Point Reyes, Calif. He sure has a terrible sock."

Troubles in Socket Aerial

A warning is broadcast to users of light-socket antennas by R. F. Miller, 2705 Pennsylvania, Dallas, Texas, to beware of a short circuit. "During the summer my Atwater Kent 75 went haywire, cutting distance and volume in half. Having the set tested twice failed to disclose the trouble. I wrote to RADEX for help and I took the letter and the set to the shop and then they were not long in locating the trouble. Due to a short circuit in the light socket antenna, I had to replace the volume control and put in a new set of coils due to one being burned out. That was the end of my trouble." Mr. Miller wonders if anyone can help him with the following: "Using a Flewellyn De Luxe S. W. adapter on October 3rd, I heard someone talking about National Tours of Australia. The most I could catch of the rest of the program sounded like the calls of all kinds of birds. I got to hear their call letters but once and not very clear then. They sounded like 2KY, but as this station is listed with only 250 watts, it doesn't seem possible I heard them."

Jumping Around in Canada

"On December 30th, I received CHNS on a wave length of 825 or about that, as it came in between WHAS and CMGA. I clearly heard the announcement as 'Station CHNS, Halifax, Nova Scotia'," writes Wm. F. Lesser, 180 Harman St., Brooklyn, N. Y.

We receive many letters from readers who hear the Canadian stations on other than their assigned frequencies and who therefore assume that the listing in RADEX must be wrong. Regarding this C. P. Edwards, Director of Radio Service, Dominion of Canada, writes: "Many such changes are only temporary in character. Stations are

occasionally permitted to try out a new frequency for a test period of say one month, with a view to the permanent adoption of such frequency if satisfactory. It is not our policy to show such tests in official lists unless and until same are made permanent. However, we are making careful note of your request and will arrange to furnish you each month with either a corrected list or a statement of amendments to date." We are receiving excellent cooperation from the Canadian authorities (who, by the way, use ten copies of RADEX monthly in their own official work) and we believe our readers may safely assume that the frequencies shown in this magazine are the correct ones, bearing in mind the temporary experimental use of other frequencies to which Mr. Edwards refers.

Something on Every Wave

"Listened to a station early in December on 1350 kcs. which announced as KRDO, Meridian, Idaho," reports Boyd Erlbeck, 110 N. Cordier St., Lodi, Calif. "Could this by any chance be KIDO having moved from Boise to Meridian? I am sure about the call being KRDO." How about this, Idaho readers? Mr. Erlbeck wants the time on the air for CKCD or CKFC. He recently tried out the new GM Super Converter on his Majestic 130A TRF and reports it works wonderfully well—at least 25% more power and extremely selective. "By an actual test, I tuned in on every single channel from 540 to 1500 without a miss and in each case, no matter what the distance or power, I got a station with absolutely no interference from either side. This included tuning in on WSB, five kcs. from XER and separating KPO, WMAQ, CJRW and WEA. And power—WJZ and WABC filled the whole house."

"While DXing this morning (Sunday, January 3rd)," advises Wm. R. Anderson, 852 Manning Ave., Toronto, Ont., "I heard CFRB, Toronto, putting on a test program. They were on for over an hour but I did not hear them give their call. For music, they rebroadcast programs picked up on a radio receiver from XEW, XER, WABC, KMOX, etc. So if any listeners heard stations on 690

kcs. instead of their regular frequencies, they were listening to CFRB and not the one announcing." Ha! Perhaps this is one answer to those letters we get from readers who hear stations on other than their own frequencies and jump to the conclusion that RADEX must be in error.

The First and the Last

Chas. E. Summers, 28 Gallatin Ave., Buffalo, N. Y., still has the old crystal set on which he heard KDKA's first real broadcast, he being a Pittsburgher at the time. Each one in the family took turns listening at the headphones. Now Mr. Summers has 485 stations on his log with verifications from 447. He finally heard from WCOC after four months. Mr. Summers says WCBF is on the air each Wednesday from midnight to 1:00 a.m. CST with a religious program. He heard the call WPFB, Hattiesburg, Miss., on December 26th. WRBJ has changed its call.

C. R. Brown, Jr., Box 112, Tazewell, Va., reports re his Scott All-Wave. "Here on the eastern seaboard, I not only can get without interference, KNX and KFI at 9:00 p.m., EST., both with powerful eastern stations on either side of them and only 10 kcs. distant, but on the short waves I listen to VK2ME, Sidney, Australia, every Sunday morning between 6:00 and 7:00 EST, VK3ME, Melbourne, Australia, 6:00-6:30 a.m., EST, Wednesday and Saturday mornings, and numerous South American and European stations."

No. 659 is First Foreigner

Earl R. Roberts, 712 South 9th St., Cambridge, Ohio, is elated over bringing in his first real foreigner on a log of 658. It was RUS, San Salvador. Mr. Roberts reports a new station at Nassau, Bahama Islands, VPM or VPN on 340 and 610 kcs. He recently brought in seven new stations in one night, most of them with low power, with a Mexican on 1085 or 1090 which he cannot identify. It came in from 1:15 a.m. to 2:00 EST Monday, December 21st. XEL was formerly listed at 1090 but was recently changed to 1000.

Allen W. Mummey, Rt. 2, Walnutport, Pa., also picked up RUS, San

Salvador on Sunday, December 20th at 4:00 a.m. EST.

Clifford Lee, 1221 Kenton St., Springfield, Ohio, heard both WLS and WENR of 870, broadcasting on about 1550 one evening late in November. WLS had the Maxwell House program and WENR had a different orchestra. He heard both announcements. Another mystery. Clifford reports that WOE at Palm Beach, Fla., and ZTN (VPM?), Nassau, Bahama Island, both on 610, broadcast every morning from 2:00 to 4:00 EST. Who is WOE?

Those Police Stations

"On my Model 40, 25-cycle Atwater Kent, I can hear short-wave police stations from 1662 to 2440 kcs., but cannot bring in the one here in Buffalo. During the day I cannot get one on short wave, but when evening comes, they crowd in three or four at once. All of them are heard at 3 on the dial." This report comes from Valentine Sadowski, 188 Miller Ave., Buffalo, N. Y. Valentine also reports that WMAK is off the air and he hopes forever.

Fred J. Ephlin, Jr., 1234½ Cahueuga Blvd., Hollywood, Calif., can count the towers of five broadcasting stations from his windows—all within half a mile. There, DXers, is some handicap and illustrates why some logs of fifty stations may be better than others with 500. Notwithstanding, Fred has 265 on his list.

Undeliverable in Mexico

Willard K. Jennings, 45 Thorn St., Rahway, N. J., thinks there must be some mistake about mail for XED being returned as he received verification promptly. Nevertheless, several other readers send us their envelopes showing the same "Fraudulent" mark as our own.

Some readers assume because no symbol is shown that certain stations do not verify reception. That is not the case. A missing symbol merely indicates that we have not been able to get a definite statement regarding their policy from that station.

C. L. Arner, Orangeville, Ohio, is proud of having brought in CKOV, Kelowna, B. C., a hundred-watter half a continent away.

Some Pending Changes

The Commission records show that WFLA and WSUN are being reduced from 1000 watts to 250, but these stations advise us that, while this is correct, the Commission has given them an experimental license permitting continuation on the old power and that a construction permit has been granted for a 5 k.w. W. E. transmitter at Bayview, which is under construction and nearly completed. We are therefore continuing this station at 1000 watts for the present.

"If your first information about a change in WPCH from 810 to 570, came from someone around New York City,

Lady Wilkins, talented wife of Sir Hubert, recently appeared in "The Bath Club," a CBS feature. Before her marriage Lady Wilkins was well known on the stage as Suzanne Bennett.

I can easily understand their error," says H. E. Apgar, Kenvil, N. J. "I have heard WPCH on my own radio back of WMCA on 570 although WPCH was broadcasting on its own frequency of 810 at the same time. I know no explanation and I can't figure it as a harmonic. This phenomenon can be heard practically any day not just occasionally." Here is a problem; has WPCH two personalities, a sort of Jekyll-Hyde?

WLAP, Louisville, which has been on 1010 for some time, is back on 1200 although the Commission has given it "permission to operate after midnights on 1010 kcs. with 250 watts, to make

antenna tests and experiments to determine that with such radiating device, operation may be had without interference with other stations on same channel."

Richard Bogert, 1416 Linden St., Allentown, Pa., reports hearing the following stations on other than their listed frequencies: HIX, 669, on 626; CHNS, 925, on 815; CHGS, 1120, on 1135; CKCL, 580, on 585.

"John McGill will be interested to know that some mornings VAS may be picked up at 3:00 a.m. EST," proffers James A. Morse, 14525 Coit Road, Cleveland, Ohio. "They give a weather report and sign off at once. In spite of their power, they come in quite weakly." (The new Canadian official list reduces the power of VAS from 10,000 to 2,000. This is more like it.—*Ed.*) Mr. Morse would like to hear from some DXer on the West Coast.

News From the DX Clubs

Roland Trenchard, Chairman of the Courtesy Programs Committee of the Newark News Radio Club, advises us that KGIW, 1420, Trinidad, Colo., will be on the air with an anniversary program Monday, February 22nd, from 11:00 p.m. until 3:00 a.m. EST. He also gives us the following tips: KFBI, 1050, Milford, Kans., conduct a splendid early morning program the 15th of each month, known as the International Frolic. Try them the morning of February 15th. The Wednesday issue of the *Newark News*, by the way, contains the committee's report of advance news and DX programs. It is sent free to out-of-town members of the club.

From Karl J. Halpern, 1435 Coney Island Ave., Brooklyn, N. Y., chairman of the Courtesy Programs Committee of the World Radio Reception Club, comes the information that that Club will hold a gala DX program on March 19th and that the following stations have agreed to take part: WPCH, 2:30 to 4:30 a.m. EST; WNYC, 3:30 to 4:00 a.m. EST; WLBW and WCAC, 2:00 to 2:30 a.m. EST. Others will be added later.

CKOV, Kelowna, B. C., announce that they put on a DX program every Thursday and Saturday night from

midnight to 2:00 a.m. PST. Also XEH puts on a DX for the U. S. from midnight to 1:00 a.m. CST every Tuesday night. "Have any others heard XEV, Puebla, on about 785, with great volume on a long, late DX for the U. S.?" asks P. J. Hauss, 222 S. Butler Ave., Indianapolis, Ind.

From a letter from L. J. Foster, President, Buffalo Evening News DX Club, we quote the following: "Our Club broadcasts every Thursday at midnight over station WBEN. Every week we give one paid-up membership to the listener from the farthest point who writes in and tells some part of the program. We want suggestions and criticisms regarding these programs."

More DX Tips

William D. Slade, 84 Hillside Ave., Freeport, N. Y., reports a rumor that the owners of WMCA-WPCH may exchange the latter station for WNYC so that WMCA will have full time on 570 kcs. He reports WKBC, Birmingham, on the air daily from 5:00 a.m. to 9:00 p.m. CST and WBCM, Bay City, from 8:00 a.m. to midnight.

A DX tip or two comes to us from Arthur Collins, 68 Amber St., Buffalo, N. Y. "VOWR, St. Johns, N. F., is only on the air on Sundays, 11:00 a.m. and 6:30 p.m. and Tuesdays and Thursdays at 8:00 p.m. EST. CMCF, Havana, Cuba, is on the air only Mondays and Fridays at 9:00 to 11:00 p.m. EST." Mr. Collins reports that WMAK, Buffalo, is no longer on the air.

Another Outlaw Convicted

Lester R. Reinmund, 1120 South 76th St., West Allis, Wis., has a verification from KGMB, Honolulu, in which they state they are on the air daily from 9:00 a.m. to 3:00 p.m. and from 5:00 to 11:00 p.m. Honolulu time, which is five and one-half hours after New York time.

Martin Howard, 1632 Calvert St., Baltimore, Md., reports that another outlaw, KTST, Seymour, Texas, has been convicted of operating without a license. For Mr. Duranceau, Peterboro, Ont., Martin says that WBIS is on daily from 7:45 to 9:00 a.m. and 1:00 to 2:00 p.m. EST.

From Edgar McCarthy, 608 Lafayette

Ave., Hawthorne, N. J., a member of the club, comes the information that DX programs of the Radio Listeners Club of Central New England may be heard every Sunday morning, 1:00 to 1:30, over WTAG.

Notes and Targets

E. B. Davis, 11 N. Second St., Easton, Pa., reports that the new WEEU, Reading, went on the air on New Year's Day and that CMCD, Havana, 925, has a DX program every Saturday night from 9:00 to 2:00 a.m. Sunday, EST.

"Anyone needing North Dakota, may tune in KFYZ any day from 7:00 a.m. 11:00 p.m. CST," says A. N. Hirth, Fairview, N. J.

KGFK, Moorhead, Minn., has a DX program every other Friday from 2:00 to 4:00 a.m. EST; nest on February 5th, says Donald G. Powers, 134 Kislingbury St., Rochester, N. Y.

WFEA, Manchester, N. H., is now operating says William D. Slade, 84 Hillside Ave., Freeport, N. Y.

The policy of station WGBS has been changed by its new management in regard to verification of reception. "We

should appreciate it if you would advise your readers that we are glad to verify reception of our listeners and that we send Ekko stamps upon receipt of 10c," writes the American Radio News Corporation, 235 East 45th St., New York City.

"Wish to say that all requests for Ekko stamps are promptly complied with when accompanied by ten cents," reports station KMA, Shenandoah, Iowa. "Of course, we receive a number of requests for verification by people who do not send money."

WCOC advises us that it is their practice to acknowledge communications from their listeners, but that on some recent programs they got behind on letters but have now caught up.

Identifications Wanted

"Can anyone identify station KRA, heard on November 8th, about 5:00 a.m. EST, on 50.3 meters; think it is somewhere in the Philippines, but not sure." This inquiry comes from Roger Causse, SS. Thermo, Havana, Cuba. KRA is listed as a Boeing Air Transit station in Boise, Idaho, but the station Mr. Causse heard was playing music for several

Radio World Offers Choice of NINE Meters!

To do your radio work properly you need meters. Here is your opportunity to get them at no extra cost. See the list of nine meters below. Heretofore we have offered the choice of any one of these meters free with an 8-weeks' subscription for RADIO WORLD, at \$1, the regular price for such subscription. Now we extend this offer. For the first time you are permitted to obtain any one or more or all of these meters free, by sending in \$1 for 8 weeks' subscription, entitling you to one meter; \$2 for 16 weeks, entitling you to two meters; \$3 for 26 weeks, \$6 for 52 weeks, entitling you to six meters. Return coupon with remittance, and check off desired meters in squares opposite.

RADIO WORLD is the first and only national Radio Weekly. In tenth year. The news of the progress of the entertainment, science and business of radio *when it is news*. 15c a copy; newsdealers everywhere.

RADIO WORLD, 145 West 45th Street
New York, N. Y. (Just East of Broadway)

Enclosed please find \$..... for weeks subscription for RADIO WORLD and please send as free premium the meters checked off below.

NAME

ADDRESS

CITY.....STATE.....

hours. Mr. Causse's home is in Lester, Pa., P. O. Box 6688. Mr. Causse takes exception to XER's boast of being "the most powerful commercial station in the world," pointing out that a station in Warsaw, Poland, has 150 k. s. and that three others in Russia have 100 k. w. Says Mr. Causse: "I think Dr. Brinkley is doing more harm than good by putting up such a powerful station with such unenjoyable programs. He is just spoiling good programs for American and Canadian listeners and think he should be permanently tuned out. The stuff he puts on the air is 75 per cent cheap advertisements; surely he doesn't expect people to listen to that and enjoy it."

"I would greatly appreciate it if you, or any of your many readers could tell me the location of an unlisted station with the call letters KDX," writes K. G. Seabrook, 346 Piccadilly, at London, Ont. "I have plainly heard the following announcement at 1:00 p.m. EST on the 27th of December: 'This is KDX, experimental station testing, operating on a wave of 1200 kcs. with 7½ watts power.' Several phonograph records were played with station announcements between. At the sign-off came 'This is KDX calling CEX.' " The call letters are assigned to Portable Radio No. 39, in the Third Zone operated by the Geophysical Research Corp. As the Third Zone

centers in Baltimore, it is hardly likely that this was the station received by Mr. Seabrook. Can anyone identify it?

Who Heard These?

"SOS," signals Donald Murphy, 506 E. 43rd Ave., Vancouver, B. C. "On December 20th, between 6:15 and 6:20 p.m. PST, I heard a station broadcasting on 690. I heard 'Piccolo Pete', 'Sings Another Chorus' and 'Sing, You Sinners, Sing'. Between numbers Sheaffer pen, were being advertised. They were just about to announce when a Calgary station came on and drowned them out. The station was very weak, not being a quarter as loud as WLW which was coming in at the time."

"Does anyone know of a very small station in the U. S. on 720 kcs.?" asks T. Colegrove, Frankfort, Mich. "I heard him the morning of December 30th between KMPC and CKMO so I am certain about his frequency. I think he is in Minnesota as I understood him to say he was playing a selection for someone in Minneapolis. At 5:12 a.m. he said, 'Goodnight, everybody,' and signed off."

"Am extremely anxious to identify a station I heard on 1370 kcs. December 15th at 9:15 p.m. EST," writes H. R. Garrett, 171 Hillsdale Ave., E. Toronto, Ont. "They were broadcasting a dedication program to the new management of the station. One selection played was

City and State

'Blue Kentucky Moon.'" Mr. Garrett says CMCD, on 925, broadcasts a DX program every Saturday night from midnight to 3:00 a.m.

"I would like to identify a station on 1370 kcs. I picked up Sunday, December 13th," writes Stanley Savage, Route 4, Spokane, Wash. "I think it was an eastern station. I heard pipe organ music from 1:00 to 1:30 a.m. PST." Mr. Savage has been trying for two years to tune in an Alaska station.

"On the morning of December 6th, about 4:00 a.m. EST, I heard a station on 605 kcs. broadcasting a test program. He said he was calling someone in St. Vincent Hospital, New York City. He was not in the U. S. for he said he wanted reports from listeners in this country. Can anyone help me on this?" Ray La Rocque, 135 Highland St., Worcester, Mass.

"On the morning of January 1st, I heard a station on 1370 kcs. at 5:45, who in the middle of each selection would announce the telephone number Logan 5626. Ask your readers if they can help me with this one," is the request of Bernard Murray, Jr., 1049 West 9th St., Erie, Pa.

More Calls for Help

John M. Lennon, 122 Linden St., Camden, N. J., is very anxious to log HHK and wants some DX club to arrange a special advising this magazine in time for publication in advance. WCOC verified for him but only after six weeks.

Regarding HHK, Derek Wharton 22 Elmwood Ave., Rye, N. Y., says they are on each Friday from 8:00 to 9:00 p.m. EST., Saturday, 6:45 to 7:15 a.m. and Wednesday 8:00 to 9:00 p.m.

"Both my letters to CKOC, Hamilton, Ont., asking for verification, were refused at Hamilton and returned to me," writes Rexford Newcomb, Jr., 605 Nevada St., Urbana, Ill. The owner and address appearing in the Index by Frequencies is that given by the Dominion Government. What is the correct mail address for CKOC?

"At midnight, PST, I received a program of dance music on 690 kcs., coming in with much volume," reports Charles C. Norton, 2545 Polk St., San Francisco, Calif. "The announcer said the program

was coming from the 'Buffalo Cafe,' but the city was not given." Who knows this one?

"Who is VPM?" asks John McGill, Jr., Olive Hill, Ky., "Have heard them between 1300 and 1310 kcs. three times during the past month. Once they were calling Palm Beach and once New Orleans."

R. E. Moran, 31 Rochester St., Ottawa, Ont., reports receipt of XET on 750 and they said verifications could be had by addressing XET, at Dallas, Texas. How come?

Jack Pettis conducts the orchestra on the Bright Spot program each Sunday afternoon at 2:15 EST over the NBC-WEAF network. Jack formerly played the sax in Ben Bernie's orchestra

Dolphus Whitten, Jr., Gurdon, Ark., reports a new air station, KCAA, Tulsa, and wants to know frequency and power.

C. W. Thomas, McAlester, Okla., wants to know if WJSV is ever on the air when WLAC and KSTP are silent.

Donald Brickey, Rr. 1, Bloomington, Ill., heard a Cuban station on 1315 on December 27th at 2:45 a.m. with 50 watts. He caught the above information but was unable to identify the call letters and asks the help of our readers.

Three questions from Geo. B. Holland, Jr., 1340 Baker Ave., Schenectady, N. Y.,

Who is WMLO or WNLO, heard on 1500? Is WEEU on the air yet? When are HRB, HIX, VOWR on the air?

Answers to Inquiries

"For those who wanted information regarding stations VE9CB and VE9CY," writes Victor Filion, 649 Ste. Angele St., Three Rivers, Que., "I may say that these are Canadian experimental stations, the former owned by Canadian National Carbon Co., Hillcrest Park, Toronto, and the latter by Canadian National Railways, Bank St., Ottawa, Ont."

In answer to the inquiry in the December issue, an unsigned card conveys the information that the "Egyptian Ballroom" is located in the Shrine Mosque, Atlanta, Ga. The broadcast is from WGST.

"Tell Virgil Engleman he heard XEN as they sign off with the sound of a train," advises Jesse L. Lansman, 717 S. Shelby St., Louisville, Ky.

Edwin Sommerer, Jr., 925 E. Washington, South Bend, Ind., wants to hear from other young DXers. He heard station KUKU but can't find it in his RADEX. (That's the "Phoney" station used in a burlesque skit by the NBC.) Edwin wants a recipe for bringing in more Canadians. Watch RADEX for their time on the air and use lots of patience.

Ernest Ball, 39 Delaware Ave., Ottawa, Ont., wants to learn of any DX club in that city. In the six months after he discovered RADEX, his log of 100 grew to 245. He counts 10-BP, Wingham, Ont., as his best catch.

Wanted, Clubs and Correspondents

James B. Crusan, 424 Smithfield St., Mount Pleasant, Pa., wants to know of a DX club near him which he could join. He also wants to know when KZRM is on the air.

Richard G. Hill, 1219 E. 86th St., Cleveland, Ohio, would like to hear from owners of a Lyric and would also like to join a DX club that could provide him with notice of coming DX specials.

Donald Murphy, 506 E. 43rd Ave., Vancouver, B. C., would like to correspond with other DXers, both in the U. S. and Canada.

I. J. Blakeman, R. D. 6, Toledo, Ohio, would like to exchange hints with other DXers, particularly Zenith owners.

Robert D. Lougheed, Ste. 2, 510 19th Ave., West, Calgary, Alta., wants to get into touch with a DX club in his vicinity.

Russell Arnot is another DXer who would like to join a club in the Northwest. His address is 715 Fifth St., Bismarck, N. D.

William Bowers, 1417 Turner St., Allentown, Pa., with 561 stations to the credit of a two-tube set, would like to correspond with other DXers.

Charles Maylone, Box 375, Placerville, Calif., wants to join a DX club and to correspond with others in the central and eastern states.

Grand Rapids, Mich., readers interested in forming a DX club are requested to get into touch with Al Hatfield, 334 Bond Ave., in that city.

DXers interested in forming a club in Minnesota should write to Donald Babb, 908 North Owen St., Stillwater, Minn.

L. A. Thomas, 1324 E. Pierce St., Phoenix, Ariz., promises to answer all communications from other DXers wherever they may be.

Henry Kurtz, III, South Kent School, South Kent, Conn., wants to hear from other 16-year-old DXers.

M. C. Harlow, 212 Bird Lane, Clarksburg, W. Va., would like to join a DX club in his vicinity.

Robert C. House, 194 Capen Blvd., Buffalo, N. Y., wants to correspond with other DXers.

Elmer C. Roth, 1294 W. Grand Blvd., Detroit, Mich., wants to correspond.

Correspondents wanted. Roy Sell, Watertown, Wis.

1440	WMBD	Peoria, Ill., new CBS.

condenser, and a new leak of about 3 megohms may be necessary. Small devices known as howl arresters, which slip down over the tubes, often prevent squealing. They may be purchased in any radio supply store.

Address the Pierce Airo, Inc., 510 6th Avenue, New York City, N. Y., for a circuit diagram of your receiver.

Significance of Fixed Condenser

What is the purpose of the condenser between the positive terminal for the speaker and the ground of my Grebe Synchronous five-tube receiver? It seems to keep my set from working properly. Can I remove it without causing damage to the set?

The condenser is attached between the positive speaker output lead and the negative C-battery terminal, which also is the ground. Its purpose is to by-pass the high frequency voltage that comes from the output amplifier tube into the ground. It is simply one way of by-passing the entire A, B and C battery assembly, so as to give quieter and smoother tones in the speaker.

This condenser may be removed, but if it seems to spoil the reception, it likely is defective and needs replacing.

Voltage Regulator Tube

The -74 tube in the B eliminator of my Kolster 6H a. c. receiver has burned out several times. What is the proper connection? Can the tube be taken out and not used?

Only two connections are necessary for the -74 voltage regulator tube, for the tube has but two pins that are used. One fits into the G opening of the socket, and the other into the filament hole diagonally opposite the grid connection. The tube then connects between the positive 90-volt terminal of the eliminator and the negative B terminal. Its purpose is to keep this 90-volt output constant and steady and improve reception. The tube should not burn out unless incorrect voltage is applied to the terminals because of defective wiring or changes in the circuit.

The eliminator will work when the

tube is removed, but the 90-volt output may be inclined to vary with signal fading or swinging as a result.

A Stuttering Receiver

My Clarion AC-51 model set fades and stutters, but after it warms up for an hour it works satisfactorily. What can be done to correct this annoyance?

Although the tubes have been replaced it seems to us that either a tube or socket may be defective. And a resistor can cause this annoying form of thermal irregularity. Check these sources again very carefully, giving strict attention to the tube sockets and the spring contacts. The rectifying tube may be at fault, or the two -45s in the push-pull output circuit. The volume control, which connects to the screen grids of the first three -24 tubes, should be examined carefully for defects.

Test out the entire circuit for broken or loose connections which might expand under heat and thus become better conductors. Check over the voice and field coils of the speaker, and see that the cone does not chatter against the field of the speaker.

Noisy Eliminator and Receiver

My A eliminator does not seem to work well, and my Freed Eiseman receiver is noisy and seems too loud at times. Can you help me out?

If the eliminator uses a metallic rectifying unit it is apt to become noisy as the rectifying ability of the metal discs become diminished. Often such units need replacing. The loudness may come from natural fading that you cannot control, or some fault in the tubes or receiver. All tubes should be tested. Perhaps the B-eliminator, if you use one, varies in voltage, especially in the 90-volt circuit. Read the answer to a previous question about the voltage regulator tube.

B-Eliminator Tube

My Gould eliminator requires a new tube but I have been unable to procure the old Manhattan tube the eliminator uses. Can I substitute some other make of tube?

We have no data on the Manhattan tube and imagine it has been replaced by another style. Your service man should be able to determine this for it seems likely that either the -16B or -81

tubes can be used provided two tubes are now in your eliminator or the -13 or -80 if one tube is used. But perhaps still another form of tube—the Raytheon—is used. Your local service man can decide this in a moment.

Another Noisy Set

I have a Metrose eight-tube receiver. It has given lots of trouble, for it pops and crackles all the time and the volume drops. I had a new resistor, power transformer, choke, and filler condenser installed at different times. Now it has new tubes, but the noise persists. What can be the trouble?

You seem to have a set that has a complication of diseases, for it has had more than its share of troubles. Once in a while a receiver turns up this way, and no amount of doctoring can make it perfect. However, the trouble must be in a bad resistor, a broken down power pack filter condenser, loose tubes in their sockets, a broken or loose connection, worn volume control, defective speaker voice coil or output transformer primaries, or aerial and ground. The latter adjuncts should not be overlooked, for a swinging aerial which touches some object or which has some loose connections often is the cause of troubles laid to the internal arrangements of radio sets. Certainly a competent service man can locate the seat of voltage variations, if in the set, by making a thorough continuity test of the entire circuit.

Interfering Hum

When the street lights go on in the evening my radio set begins to hum and I cannot stop it. The power company seems not able to prevent it, and what shall I do?

There is nothing that can be done when interference from adjacent power lines carrying alternating current is felt. The lines are dead until the street lights come on at night, and that is why the trouble is absent during the daylight hours. Remove the radio set to a point as far as possible from the lines, and set up an aerial still farther off, if practicable, but at right angles to the direction of the lighting wires. The use of an inside aerial of the coil type, buried antenna, or loop, should eliminate most of this hum, but there is always some loss in signal strength when smaller aeri-als are used.

Squeals and Jerks in Reception

My Knight eight-tube receiver squeals and jerks when the volume is turned up more than half way. How can I stop this annoying trouble?

Howling frequently is the cause of too much plate voltage on the radio frequency or detector tube. If this can be reduced somewhat the howling may cease. Again, it may be microphonic, and try grasping the detector tube to stop it. If the squeal subsides somewhat get a "howl arrester" and slip it over the tube. The jerking trouble may be due to loose tube socket connections, a defective resistor, or trouble in the power pack filter condenser. Have these parts tested by a competent service man, and at the same time examine the tubes for possible causes for the squealing. A tube may light, yet be defective, or always breaking into oscillation.

Ancient History of 1925

RAY EVERLY'S letter in the January RADEX, reminded me of the "good old days" when we thought that WTAM's 3,500-watt station (storage-battery operated) was a super-power station and the more dials a set had the better it was," volunteers Eugene Martin, 704 South Green St., Wichita, Kansas. "I like to reminisce and recall 1925 before the Commission, before the Mexican 'invasion,' the day of the horn speaker and blooming set, when KFI was the chief DX thrill.

"Here is a list of fifteen questions compiled entirely out of my memory, which I believe will make the Old Timers hunt up their RADEX of seven years ago: "

1. What important station during the course of its existence has operated on 780, 600, 1040, 970 and 800?

2. What 5,000-watt station has operated on the same frequency since 1925?

3. What station was the first wave-pirate, taking a Canadian wave, breaking down governmental control and throwing broadcasting into chaos with stations shifting overnight to any frequency they wanted? (This station has at last suffered retribution by deletion; "the mills of the gods grind slowly," etc. *Ed.*)

4. What two high-powered NBC stations traded waves since the big shake-up?

5. What were the former call letters of the following: (a) WOW, (b) KTM, (c) KTSA, (d) WRUF, (e) WJSV, (f) KWK, (g) KOL, (h) WXYZ, (i) XEN, (j) WABC?

6. What Chicago station once shared a wave with WEAJ?

7. What station divided time with WLS for several years?

8. What station has operated on these six frequencies since 1925: 940, 760, 1190, 990, 1070 and 600?

9. What low-powered NBC station has had the same wave since 1925?

10. What were the letters of the old RCA station in New York that divided time with WOR on 740?

11. With what present-day station were these old-timers associated? (a) WLIB, (b) WQJ, (c) WCX, (d) WDAD, (e) KLDS.

12. What was the first big NBC station to go over to Columbia?

13. Under what call did WENR test its new 50 k.w. station in 1928?

14. What calls has WTAM used?

15. What station in 1926 changed its wave each evening from 1260 to 750 for a few hours?

Readers may check their memories with Mr. Martin's answers on page 24.

Outside the B. C. Band

(Continued from page 3)

press dispatch to ships at sea, which becomes the practice time of code beginners. The great NAA at Washington, NPG at San Francisco, Bordeaux and Paris, Manila, Holland, the East Indies, and Cape Race, may be heard any night on very long waves. There is a haunting fascination in listening to code, and, before one knows it, the code will seem familiar. In a few evenings the call signals, which are repeated many times, will begin to make sense, and the listener will be able to identify the station he hears.

Much has been said about short waves; anyone can arrange a suitable receiver. Broadcast bands are covered by standard sets. But the high waves

are not being explored by most radio fans. A long wave receiver is easy to construct. A -99 tube, two "A" dry cells, and a 45-volt "B" battery are necessary. Headphones are used, and are connected between the plate of the tube and the positive terminal of the B-battery. The filament of the tube connects to the A-battery with a rheostat in series to control the filament and volume. The -A and -B connect together, and also to the ground. Procure a "honey-comb" coil having a range of 9,000 to 18,000 meters, and also one ranging from 4,000 to 10,000 meters. Use one or the other according to the wave lengths to be tuned in.

A variable condenser of about .005 capacity should be connected across the ends of the coil and this is used for tuning purposes. Then connect the aerial to one end of the coil and the ground to the other. The aerial end of the coil should also go to the grid of the tube, but through a grid leak and condenser of standard values. Place a small fixed condenser across the telephone leads. Many stations can be heard with this set and hours of pleasing DX-ing can be enjoyed.

The Goldbergs

(Continued from page 7)

You remember that court-room scene in which Mollie saves Jimmie, the little Italian, from jail? Miss Berg considers that her best sketch, because every eye in the studio was damp when it was finished.

Off the air Jake is just as busy as Molly. He is writing a book of war memories, translates many American plays into Jewish and recently wrote twenty-six booklets and commercial radio sketches for a paint company. He likes radio better than the stage. His home is in Kew Gardens and he has a wife and two daughters. So far only one of his ambitions has been thwarted. He cannot learn the saxophone. But he plays pinochle, bridge, football and golf, in the few hours he is at home on Long Island.

Years ago he was one of the Hi Henry Minstrels and played in vaudeville at

Tony Pastor's, also in the 10-20-30 melodramas which graced Bowery billboards long before such producers as A. H. Woods, the Shuberts and Edgar Selwyn put him on Broadway.

Rosie and Sammy? They came in for rehearsal before the interview was finished. Sammy is Alfred Corn, son of a New York physician. Rosie is Roslyn Silber. A nice-looking boy of fourteen with a sensitive, artistic face and curly hair. Sammy is taller than Mollie or Jake and towers over Rosie's thick, dark curls. Three years ago he played "Curly" in Eva LeGallienne's "Peter Pan."

Both Rosie and Sammy are products of the Sunday Children's Hour and pupils of Miss Madge Tucker of NBC's production department.

"Time for a soda before rehearsal?" queried Sammy. It was a hot November afternoon. Rosie's eyes brightened.

"Ha, so that's the straw that shows the wind blows," exploded Jake.

"Rosie! Sammy! I'm surprised with you. Time it is for rehearsal and you ask for soda! Come!" Mollie marched them both off to rehearsal. Jake followed obediently.

The RADEX Family

(Continued from page 13)

This is the code for long-distance or distant reception.

M. E. Read, Care Cortes Development, La Lima, Honduras, writes to Gordon H. Wightman, whose inquiry regarding the cuckoo station was printed in December: "A friend of mine sent me a copy of the December RADEX and last night I was reading it with the radio on when I came to your inquiry. I turned to 1030 kcs. and immediately picked your station up, but had to stay on for some time to get an announcement—they having the same bad habit of not announcing except at long intervals. It was XEB, Mexico City." We will have to change our slogan to RADEX, The International Magazine! Here is a reader in Vancouver, B. C., asking a question and away down in Central America, another reader turns on his radio and gets the answer.

Here is a phenomenon discovered by

Gilbert Van Vranken, Jr., 2230 N. El Molina Ave., Pasadena, Calif. "I have noticed on three different radios that when you attach one tip of the earphones to the aerial binding post and the other tip to a good ground connection with the set turned off, at certain times of the day music can be heard just as loud as can be heard on a crystal set, but with a slight hum. Every night I can hear KFI in this way between 7:00 and 9:00 p.m. It is loudest at 8:00 and dies away at 9:00. From 9:00 to 9:15 nothing can be heard but at 9:30 KHJ can be heard faintly. This works only when the set is plugged into the current a certain way. Turn the prongs around and I get only a hum." So if your set goes dead some night, try Gilbert's discovery.

To Our DXers Parents

The Editor receives many letters commending the work of this magazine and once in a while one is received that is especially gratifying. Here is an example: "My boy, who is in high school, is never away from home nights and we are glad to have him where we can know what he is doing. He reads RADEX from cover to cover and gets up at 3:00 a.m. to pick up China, Japan, Australia and all over the world. I know you will be glad to know you and the RADEX are encouraging boys to devote their time to something that is educational as well as entertaining. You have my thanks and best wishes for a successful life. G. Ed. Alexander, Hughson, Calif."

"Your RADEX map shows Mexico on Mountain time," points out John S. Wyborski, 3011 Agate St., Philadelphia, Pa., "but XEO, XER, XET, XEW, XED and XEN at least, all use Central time." All official maps show Mexico on Mountain time, but in the U. S. and perhaps elsewhere, many cities are taking the time of the zone east of them in order to lengthen their daylight. Has anyone a better explanation?

We received many letters from readers who picked up the new phantom station CKTB. RADEX receives a voluminous mail and all letters are promptly answered with one exception. When the answer to a question is to appear in the new edition of this magazine, we let that serve as our reply. If, therefore, your

question is not answered in the next copy of the magazine, please write us again.

From Harvey Kees, Beulah, N. D.: "Ask the guy in charge of Questions and Answers to tell me whether the jack marked 'PHONO' on a seven-tube Amfico is for the phones or a phonograph. I find by plugging the phones in this jack that I have an excellent home broadcasting station but the music comes out of the phones too." Harvey reports reception in North Dakota as extraordinary. At almost any time of the day he can get all the big Chicago stations.

New Government Books Ready

While broadcasting stations in the United States number about 610, showing no substantial increase in the last year or two, the number of American radio stations of nearly all other classes has increased very largely. This is shown in the new lists of "Commercial and Government Radio Stations" and "Amateur Radio Stations" compiled by the Radio Division of the Department of Commerce and just off the presses of the Government Printing Office in Washington. The amateur increase alone was 4,000 in the last two years, 22,730 being listed. The commercial and government station list is available at 20 cents a copy and the amateur list at 35 cents. Address the Superintendent of Documents, Government Printing Office, Washington, D. C. Send currency or money order, not postage stamps.

"The Buenos Aires station on the short waves that relayed the Lucky Strike program to New York, Saturday, December 5th, was LSN on 30.33 meters," advises P. J. Soper, 256 Burroughs Terrace, Union, N. J. "LSN announced very clearly during the preliminary tests. The announcer had to rehearse his lines several times before the actual broadcast."

C. C. Jenkins, Director of Radio for the *Toronto Globe*, writes: "Have advised many people in this country to secure RADEX regularly as the best log of this country's stations as well as those in the States."

Richard D. Caddell, 605 Ridge Ave., North Side, Pittsburgh, Pa., sends us

clippings from the Pittsburgh papers reporting the conviction of Lee Elton Spencer, operator of the outlaw station WGM at Jeannette, Pa. Spencer faces a fine of \$5,000 and five years in prison. His defense was that his radio waves didn't leave the state!

Is this another illegitimate child? The Ambrose Radio Service, Ambrose, N. Dak., notifies us that WHHN is operating on 1500 kcs. at Noonan, N. Dak., and that their application has been on file for about nine years.

Using a hot-air register for an aerial, Clyd Yelland, 816 Hancock St., Hancock, Mich., has brought in a surprising number of distant stations "all without noise of any kind."

In answer to many inquiries, back issues of RADEX may be obtained at the regular price as far back as No. 41, September, 1930.

Those Programs Again

WE have been struggling for several months to find a method of giving the network programs in the most convenient form possible in a minimum of pages. Our readers have borne with us kindly and their letters to us have demonstrated to what a great number of people, our programs are a matter of primary importance. Here is one letter from hundreds:

"Not being a DXer but just one who turns to the radio for relaxation and entertainment, your feature "What's On the Air Tonight?" has added considerably to my enjoyment. Previously I had difficulty in remembering to keep track of the various items and programs that especially appealed to me. Now I have the information all tabulated so that I can tune in on any desired feature in a second.

"I read and enjoy each and every letter published, but cannot help wishing that those 'DX' fanatics who are intolerant of everybody's ideas but their own, would grant a little space to the other members of the RADEX family and refrain from continually exhorting you to make RADEX a DX magazine pure and simple. I am not, as I stated, a DX

fiend, but I understand their enthusiasm for their hobby and derive a lot of pleasure from their letters. Many thanks to the army of DX contributors whose letters convey much interesting and helpful material. Extend their department if you can but save a little corner for the fellows who, like myself, frequently stay on one particular station for hours at a time when the various programs happen to suit our mood."

This letter by H. Realf, Loon Lake, Sask., sums the matter up in a very fair way and we hope our DXers will say "Amen" more or less enthusiastically. Now that the newspapers of the country are deleting their programs to a point where they are worthless, it behooves RADEX more than ever to cover the program field.

Hundreds of readers write us that they are so situated that they must have the calls in connection with each program if they are to get any good out of them, hence the calls have returned to stay and in alphabetical order—a bit of drudgery no other publication undertakes. We now find our idea of the three chains in parallel columns will not work out properly because of the great difference in number of programs in a given time, making it necessary to look on three different pages for some periods. We are therefore returning in this issue to listing by hours rather than by chains and we are eliminating the annoyance of the "daily" column by putting each feature in its proper place for each day of the week, although we give the station calls for such repeated features but once. We feel sure that this change will be most helpful. We are also giving the times for the four zones, thus saving our friends in zones outside the Eastern from doing mental arithmetic with their radio pleasure. All in all, we feel that "What's On the Air Tonight?" as it appears in this number, is about as compact, convenient and comprehensive as we can make it. We hope you will like it.

Instead of a separate list of chain stations, the network affiliations including the National "Red" and "Blue" are now shown in both the Index by Frequencies and the Index by States and Cities.

WHAT'S ON THE AIR TONIGHT?

Fill in calls and dial numbers for those stations through which you best receive the three chains. You can then turn quickly to the one that has the feature you want.

INDEX BY FREQUENCIES AND DIAL NUMBERS

NOTICE OF COPYRIGHT

The method of logging by wave-lengths or frequencies was devised by The Radex Press in 1924 and has been copyrighted and recopyrighted each year since that time. The arrangement of stations in groups by frequencies or wave-lengths with dial readings in connection therewith is fully covered by our copyright and all infringers will be vigorously prosecuted.

KEY

Frequency in kilocycles. Wavelengths in meters. Night power in watts in third column. Second column symbols: *Verifies reception for postage or sends station stamp for 10c. †Verifies for postage; no stamp. ‡ Stamp only. † Does not verify. § Does not reply. § Verification 25c, reply card 10c. Fourth column symbols: D, Daytime only. Dn, Daytime but may use some evening hours. S, Sunday only. X, Has permit to increase power. † Uses greater power in daytime. CP, Has construction permit only. Z, Has permit to change frequency. Y, has permit to change location. □ These stations are synchronized. 1-2-3, Small figures indicate stations sharing time. a-b-c, Small letters indicate stations with two sets of calls. Some Canadian, Cuban and Mexican stations have odd frequencies; correct frequency shown in fourth column. Dashes (---) have no meaning.

RADEX will welcome the cooperation of its readers in these times as never before. It would be a very great favor if you would show this magazine to your

friends and explain its merits to them. As the number of readers grows, the magazine can expand and this will bring you a bigger and better publication.

Their Time On the Air

THE following information regarding time on the air has been secured from the stations concerned, from newspaper clippings, and from our readers. The times shown can be quickly converted into your own time by use of the following table:

Your Zone	Where Time is Given as			
	EST	CST	MST	PST

Trans-Pacific Stations

The following list of the principal Japanese and Australian stations is furnished by Leon V. Garland, P. O. Box 665, Lennox, Calif., who vouches for their accuracy. Mr. Garland wants us to include these in our regular indices. We are sorry we cannot do this for of course our Atlantic DXers would then want the principal European stations and the Index by Frequencies would soon be so big as to be inconvenient.

HOW TO TUNE A SET CORRECTLY

Read This Page Carefully and You Can Set Your Dials Accurately for Any Station in America

ALL stations in America are listed in RADEX in three tables:

- 1st by Frequencies.
- 2nd by Call Letters.
- 3rd by States and Cities.

The Index by Frequencies is the one to be used, the other two are merely supplementary.

Let us assume you have just bought your first RADEX. Proceed as follows:

Tune in some station — any station that comes in. Tune it sharply, turning down your rheostats (Volume control) until we find the marks on your dials at which it comes in most clearly and with greatest volume.

Let us assume that the station we are hearing is WEAF in New York. First we must ascertain the frequency for this station. Look it up under WEAF in the Index by Call Letters or under New York in the Index by States and Cities. In either of these indexes we find that the frequency of WEAF is 660. Now we turn to 660 kilocycles in the Index by Frequencies and Dial Numbers. Here we find that WEAF is one of the two stations which have been assigned the 660 keys, frequency by the Federal Radio Commission. We also find that it has a power of 50,000 watts, that it is located in New York City and is owned by the National Broadcasting Co., Inc.

In the blanks for dial numbers opposite 660 kilocycles (which is the wave length of 454.3 meters) enter the dial readings of your set. It is immaterial whether your set has one, two or three dials. Use as many of three spaces provided as you need. The set used in the illustration had two dials. In this case we entered the dial readings for 660 kilocycles as 69-67.

Let us now tune in some other station. We repeat the same procedure in tuning and find that we are hearing, let us say, WOS at Jefferson City. Proceed as before in ascertaining the frequency of WOS. This we find to be 630 keys. We turn to 630 in the Index by Frequencies and enter our dial readings for this band which on the set we are using was 72-70.

We now have found that the dial numbers for 630 keys, are 72-70 and the dial numbers for 660 keys, are 69-67. If we now will set our dials for 650 keys, it is obvious we will have our set tuned for 650 keys. We listen carefully and if they are on the air and within range of our set we will tune in WSM of Nashville at this point. We then enter the dial readings for WSM opposite 650 keys. Now it is

clear that if we reset our dials at 71-69 our set will be tuned to 640 keys, and at that point KFI of Los Angeles will be heard, always assuming, of course, that it is on the air and within range of our particular set.

Now we tune in some other station, proceeding as before until after an evening or two, we have blanks filled on every page. We are now able to set our dials for any frequency we desire and consequently any station we may want whether we have ever received it before or not.

Our index now becomes of great value to us in identifying programs. Let us say that we hear music at 67-66 on our dials. We refer to our Index by Frequencies and Dial Numbers and we find that we are in tune to 680 kilocycles. On this wave there are two stations: KPO at San Francisco and WPTF at Raleigh, N. C. Both of these stations have 5000 watts in power. But knowing which is the closer to our set, we can tell almost invariably which station we are hearing. The Radio Commission has had to give the same frequency in most cases to several stations but they have distributed them geographically so they should not interfere. When two stations in the same locality have the same frequency, they are required to divide the

time. In this case, of course, it is not possible to tell which one of the two stations is broadcasting at the particular moment we hear it, but we do know it is one or the other of them.

The second column in the Index by Frequencies, as we have seen, gives the power of the station as measured in watts. This power also aids us in identifying stations as we will not ordinarily hear those stations with 500 watts or less unless they are close to our home city.

The Index by Call Letters also has spaces providing for logging dial numbers, but these are provided merely for the convenience of those who want to be able to turn instantly to some favorite station. They may or may not be used as you desire. Remember that it is the Index by Frequencies that we must use to get the most value and pleasure out of our radios.

The Index by Frequencies is now printed with marginal tabs. If you will fill in under the word "dial" your reading for this particular frequency, you can then turn instantly to any frequency desired. Take a pair of shears and cut along the dotted line as shown.

INDEX BY FREQUENCIES AND DIAL NUMBERS

Frequency (kilocycles)	Wave Length (meters)	Station	Dial Numbers

Sometimes I think there ought to be a law to make everyone do a little studying every week. I didn't think that a year ago because it looked like all the cards were stacked against me. But I am certainly rolling in the money now. Maybe my story will show you the way to larger earnings also.

I Thought Radio Was a Plaything

But Now My Eyes Are Opened, and I'm Making Over \$100.00 a Week!

\$50 a week! Man alive a year ago I thought anyone making that much was just plain lucky.

Twelve months ago I was just barely getting by. It was the same old story—a little job; a salary as small as the job.

If you had told me that twelve months later I would be making \$100 a week in my own Radio business—I'd thought you were crazy.

But I am getting ahead of my story—let me tell you how it all started. I was hard up a year ago because I had been kidding myself—that's all—not because I had to be. I thought a fellow either had to be lucky or have a string of college degrees a half a mile long to make good money.

One day I picked up a magazine and the headline of an ad attracted me because it seemed to fit my case. It said, "I will show you how to start a spare time or full time Radio business of your own WITHOUT CAPITAL."

"They're trying to kid somebody," I thought, "but I'll find out what it is all about anyway."

I wrote in and within a few days received a 64-page book telling about the opportunities in Radio, how I could prepare right at home in my spare time, and how they would show me how to start making money in my neighborhood selling and repairing Radio sets and doing other jobs. It would probably have sounded too good to be true if the promises had not been backed up by 100 letters from fellows who had taken their course and were very enthusiastic about it.

What has happened since seems almost like a dream to me now. I took their course and in about a month I was ready to start making money in my neighborhood—as much as \$20 and \$30 a week. It wasn't long until I had saved enough money to start a little business of my own.

That business has since grown to the point where I am clearing an average of \$100 a week. All this took place under the watchful guidance of my friends at the National Radio Institute. They also offered to train me for other lines—in case I wasn't interested in having my own business. Broadcasting stations, Radio Manufacturers, Operating on Board Ship, Servicing Sets, Aircraft Radio, Tele-

vision and Talking Movies are other fields their training covers. And to think, until the day I wrote for that book, I'd been wailing, "I have never had a chance—I will never have one because I have no pull and have never had the advantage of a good education!"

Friend—you may not be as bad off as I was—but think it over—are you satisfied? Are you making as much money as you need? Would you sign a contract to stay where you are for the next ten years at the same salary? Those are the things you have to think about—because no one is going to make it his business to push you ahead—you must make it your own business.

Take my tip—write for their book. It won't cost you anything—only a two-cent stamp. It shows you a lot of things which I don't believe you know now—a lot of facts and figures on the opportunities in this new, fast-growing field. Where the jobs are, what they pay, how to get ready for one. Beginners as well as experienced men are making as much as \$1,000 to \$2,000 a year more as a result of N. R. I. training. You place yourself under no obligation because the book is free and is gladly sent to anyone who is ambitious and wants to get ahead. Just address J. E. Smith, President National Radio Institute, Dept. 2B0, Washington, D. C.

J. E. SMITH, President,
National Radio Institute,
Dept. 2B0, Washington, D. C.

Dear Mr. Smith:

Send me your 64-page free book, which gives information on the opportunities in Radio—Operating on Board Ship, in Broadcasting Stations, Commercial Land Stations, Set Servicing, Radio Manufacturing, Aircraft Radio, Television and Talking Movies. I understand this request places me under no obligation and no salesman will call on me.
