You'd expect to pay a nickel for such a nail

This tempered-steel nail will penetrate
poured concrete.

①

②

Notice the lengthwise fluting
on the shaft: it prevents splitting,
whether you are driving into
concrete or wood.

③

The fluting gives the nail
a screw-like grip. It won't pull out.

④

The head will not split off. See how it is
shaped to countersink itself
on the final blow of the hammer.

⑤

Good as it is,
you can buy a pound of these nails for 49¢.
There are approximately 100 in a pound.

MORAL:

There is no such thing as a dull product.
Only dull approaches to interesting products.
