---

Herein you will find listed every authorized Radio Station in the United States also listings by Call Letters, Wave Length, Kilocycles and States. If you do not get certain station on your radio do not blame your radio as at that time they may not be broadcasting. Besides, some of the stations listed are small powered and do not carry the wave length a great distance. Register the stations you heard and you will enjoy your radio more. It will be a treat to look over the towns you airially visited. Here you can make your connection from coast to coast—and hold the line as long as you wish.

KILOCYCLES AND RADIO WAVE LENGTHS

For approximate calculation, to obtain kilocycles divide 300,000 by the number of meters; to obtain meters, divide 300,000 by the number of kilocycles. For example, 100 meters equals approximately 3,000 kilocycles, 300 meters equals 1,000 kilocycles, 1,000 meters equals 300 kilocycles, 3,000 meters equals 100 kilocycles. The following table may be used for rapid and accurate conversion either from kilocycles to meters or meters to kilocycles.

For highly accurate conversion the factor 299,820 should be used instead of 300,000. The table below gives accurate values of kilocycles corresponding to any number of meters and vice versa. It should be particularly noticed that the table is entirely reversible.

## *Your Advertisement Here!*

Will be in the hands of your prospect daily for months at a trifling cost.

You can use cuts to illustrate your items, furthermore, an up-to-date Radio Register is appreciated and referred to constantly. You can get stations by wave length, kilocycles, call letters, or states and cities.

This book gives the most for the price. You will find it on sale for 15c at the stores. If desired you can sell them so those that you give away do not cost you anything.

All orders sent C. O. D. to save bookkeeping. See order sheet for quantity prices. Mail your order now and soon you will hear the Cash Register Ring.
