## Cut this out.

## Cut yourself in on 16 extras:

- 1** More electronics courses (22) than any other school. This lets you choose one that's just right for you.
- 2** Or, to meet special needs, I.C.S. will tailor-make a course for you, personally.
- 3** You may pay for your course month by month, as your study progresses.
- 4** Famous *Heathkit*® equipment (only I.C.S. has it).
- 5** Complete library of texts included in price of course.
- 6** Your money back if you fail to pass test for 1st or 2nd Class Radiotelephone license after studying the appropriate I.C.S. course.
- 7** Experienced home-study counselors always available to help you.
- 8** Broad career guidance facilities.
- 9** I.C.S. mails progress reports to your employer, if you request.
- 10** Programed courses (optional) for quick, easy study.
- 11** I.C.S. constantly reviews all texts to assure up-to-dateness.
- 12** Complete courses in Telephony available—only from I.C.S.
- 13** Greater experience in correspondence education than any other school (75 years—over 7½ million students).
- 14** One out of every 14 top executives in America has at one time studied with I.C.S.
- 15** All courses accredited by National Home Study Council.
- 16** New 64-page "ElectronICS" fact book, just off the press, is yours FREE. It answers the most-often-asked questions about breaking into electronics.

Any number of schools can teach you electronics.  
All of them offer some of these extras.

But only I.C.S. has them *all*. Why should you settle for less?

Cut yourself in on electronics success.

# WHITE'S RADIO LOG

**An up-to-date Broadcasting Directory of North American AM, FM and TV Stations. Including a Special Section on World-Wide Short-Wave Stations**

**T**his is the third and last part of *White's Radio Log*, now published in three parts twice each year. This format presentation enables the Editors of RADIO-TV EXPERIMENTER to offer its readers two complete volumes of *White's Radio Log* each year, while increasing the scope of the *Log* and its accuracy.

In this issue of *White's Radio Log* we have included the following listings: U. S. AM Stations by Call Letters, U. S. FM Stations by Call Letters, Canadian AM Stations by Call Letters, Canadian FM Stations by Call Letters and the World-Wide Short-Wave Section.

In August-September 1966 issue of RADIO-TV EXPERIMENTER, Volume 46, No. 1, the *Log* will contain the following listings: U. S. AM Stations by Frequency, Canadian

AM Stations by Frequency, U. S. Television Stations by States, Canadian Television Stations by Location and the World-Wide Short-Wave Section. In the event you missed a part of the *Log* published during the first half of 1966, you will have a complete volume of *White's Radio Log* by collecting any three consecutive issues of RADIO-TV EXPERIMENTER during the last half of 1966. The three consecutive issues are an entire volume of *White's Radio Log* that offers complete listings with last minute station change data that are not offered in any other magazine or book.

If you are a broadcast band DX'er, FM station logger, like to photograph distant TV test patterns, or tune the short-wave bands, you will find the new *White's* format an unbeatable and up-to-date reference.

## World-Wide Short-Wave Stations

■ The shortwave section of *White's Radio Log* is an exclusive feature of RADIO-TV EXPERIMENTER magazine. This is a listing of the most active and most often reported stations, as compiled from reader reports sent in to us, from published schedules of the stations listed, and from actual monitoring at the official RADIO-TV EXPERIMENTER monitoring station, DX Central.

We invite our readers to send in their loggings for inclusion in these listings. Be sure to include the following information for each station reported: approximate frequency, callsign and/or station name, and time monitored in Greenwich Mean Time (24 hour clock). Address your reports to: DX Central, White's Radio Log, RADIO-TV EXPERIMENTER, 505 Park Avenue, New York, N.Y. 10022, U.S.A.

**Note!** At the request of many of our readers, and to conform with radio club publications and international broadcasting schedules, we are going to be bringing you the Shortwave Section of WHITES RADIO LOG with all times indicated in Greenwich Mean Time, 24 hour clock. "GMT" is the international time system and indicates the time at the Greenwich Observatory in England.

To aid you in converting GMT into your local time, we offer you the following chart, which you may find a handy guide around your DX shack.

## AMERICA'S OLDEST AND LARGEST RADIO-TV, ELECTRONICS HOME-STUDY SCHOOL

Compare if you like. You'll find—as have so many thousands of others—that NRI training can't be beat. From the delivery of your first lessons in the remarkable, new Achievement Kit sent the day we receive your enrollment, to "bite-size," easily read texts and carefully designed training equipment . . . NRI gives you more value. The picture above dramatically illustrates the material included in just one NRI course. Everything you see is included in low-cost NRI training. But NRI is more than kits and texts. It's also friendly, per-

sonal services which have made NRI a 50 year leader in the home study field.

Whatever your interest or need . . . whatever your education . . . there is an NRI instruction plan in Radio-TV Servicing, Electronics or Communications to fit your needs; tuition rates to fit your budget. Prove to yourself—your best home-study buy is NRI. Mail postage-free card today. No salesman will call. NATIONAL RADIO INSTITUTE, Electronics Division, Washington, D.C. 20016.

# BUILD, EXPERIMENT, EXPLORE, DISCOVER WITH NRI CUSTOM-DESIGNED TRAINING KITS

## BUILD YOUR OWN PHONE/CODE TRANSMITTER

This is just one of seven training kits programmed into NRI's Complete Communications course. You get actual practice in building your own crystal-controlled, phone/code transmitter and putting it on the air. You experiment with modulation, "clamping" circuits, key filters, other aspects of commercial transmitter operation. Can be put on the air simply by attaching an antenna and complies with FCC regulations. As with all NRI training kits, you get the most modern features and parts.

## BUILD ACTUAL ANALOG COMPUTER CIRCUITS

Industry, business offices, the government and military all need trained Electronics Technicians. NRI's Industrial Electronics course prepares you. You progress through 10 carefully designed training kits, topping off your practical experience phase of training by experimenting with feedback control systems, analog computers and digital computer elements. You actually solve problems on this analog computer you build yourself. This is the *practical*, fast way to a good paying, career position.

## BUILD A CUSTOM-ENGINEERED TELEVISION RECEIVER

Want to earn \$3 to \$5 an hour in spare time? Want your own part-time or full-time business? In Radio-TV Servicing you learn to install, maintain, service radios, TV sets, hi-fi and stereo, other home Electronics equipment. In your training are eight training kits, including this complete, modern, slim-line TV receiver. You build it yourself, become familiar with components and circuits, learn servicing procedures . . . and earn extra money as you train. National Radio Institute, Washington, D.C.

### Join the Thousands Who Gained Success with NRI

"I am Frequency Coordinator for the 11th Naval District. The course was priceless." J. J. JENKINS, San Diego, Calif.

"Many thanks to NRI. I hold FCC License, am master control engineer with KXIB-TV." R. L. WOOD, Fargo, N.D.

"I am a Senior Engineering Aide. Without NRI I would still be working in a factory at a lower standard of living." D. F. CONRAD, Reseda, Calif.
