DESCRIPTION OF COLUMNS AND TERMS USED IN THIS LIST:

H: Use this column to track Mexican Stations which you have heard.

FREQ: This is the assigned frequency of a station on the AM Band

CALL: This is the call letters assigned to the station in the AM Band.

CITY/STATE: Exact city-of-license is given where known. The following abbreviations are used for Mexican states:

| | | | | |
|---------------------------|-----------------------|------------------------|-----------------------|------------------|
| Agua - Aguascalientes | Coah - Coahuila | Jal - Jalisco | Pueb - Puebla | Tama- Tamaulipas |
| BC - Baja California | Col - Colima | Mex - Estado de México | Qtro - Querétaro | Tlax - Tlaxcala |
| BCS - Baja California Sur | DF - Distrito Federal | Mich - Michoacan | QRoo - Quintana Roo | Ver - Veracruz |
| Camp - Campeche | Dur - Durango | Mor - Morelos | SLP - San Luis Potosí | Yuc - Yucatán |
| Chia - Chiapas | Gjto - Guanajuato | Nay - Nayarit | Sin - Sinaloa | Zac - Zacatecas |
| Chih - Chihuahua | Guer - Guerrero | NL - Nuevo León | Son - Sonora | |
| | Hdgo - Hidalgo | Oax - Oaxaca | Tab - Tabasco | |

POWERS: "-1" = station power is unknown. Other negative numbers indicate presumed, suspected, or estimated powers. Many of these listings are a result of the fact that stations seldom publicize their night powers. Directional antenna patterns (U2, U3, etc.), when known, are listed in the "Notes" column.

SLOGANS: May include frequently-used network names. For new CPs, the licensee organization is listed here if known. "R" = "Radio." "LV" = "La Voz." Announced frequencies in slogans need to be clear on the exact text; i.e. 860 is Ocho Ciento Sesenta but 8-60 is Ocho Sesenta. This difference is important for identifications and for DXers who have limited Spanish language skills. For FM frequencies, the decimal point "." is punto. Some stations will identify by their call letters and this is not always listed under slogans.

SCHEDULES: "24h" = 24 hours a day. "NSP" = no silent period (24 hours, 7 days a week). "SP" = weekly silent period, details in "Notes" column.

ALL TIMES ARE IN UTC (Coordinated Universal Time), also known as GMT (Greenwich Mean Time). All Mexican states use UTC minus 6 hours (GMT-6) except Baja California Sur, Chihuahua, Nayarit, Sinaloa, and Sonora (GMT-7); and Baja California (ex-Norte) (GMT-8). Note that all states observe Daylight Savings Time (except Sonora), so subtract 1 hour from listed schedules from the first Sunday of April (2 AM local time) to the last Sunday of October (2 AM local time). The following border cities begin daylight savings time on the second Sunday in March and end on the first Sunday of November: Mexicali and Tijuana in Baja California, Juarez and Ojinaga in Chihuahua, Acuna and Piedras in Coahuila, Anahuac in Nuevo Leon and Matamoros, Nuevo Laredo and Reynosa in Tamaulipas. ">" in place of a dash means that the station stays on later than the second time listed, but exact sign-off time is unknown. Similarly, "<" indicates that the station is on the air by the first time listed, but the exact sign-on time is unknown. Some stations are listed as silent or possibly silent. Many stations in Mexico now broadcast 24h/day. However, many also sign on at 0500/0600 hours local time and run to 2300/2400 hours' local time. The schedule column has been updated when a schedule is known. Please keep in mind that this column isn't absolute in some cases and the actual schedule may differ from the listed schedule.

News articles have been published in DX bulletins on the move of AM stations to FM in Mexico. The number of FM simulcasts has increased significantly so this seems to be true. Watch for changes and report them to keep this list updated.

News articles were also published that Mexico has adopted IBOC as the standard for digital radio. Watch for IBOC stations and report them. One station noted with IBOC is XEKAM Tijuana on 950 kHz. XEB on 1220 kHz simulcasts on FM channel HD2.

Information in this book is updated to September 30, 2013. Thanks to all the DXers who report their loggings to the IRCA, NRC and ABDX. Those loggings were used along with network lists to compile slogans and FM parallels along with formats.

We welcome your comments, suggestions, additions, and corrections regarding this list. Please write to: Martin Foltz, 25102 Pradera Drive, Mission Viejo CA 92691-5311 USA or by email at martinfoltz@cox.net. Thank you!

A QUICK GUIDE TO THE SPANISH LANGUAGE

By Bill Hardy

When you hear Mexican radio stations, you may hear letters, numbers and slogans. If you know a little basic Spanish, you'll be ahead of the game. Spanish pronunciation in Mexico is fairly straightforward. Each vowel has one sound: a = "ah" e = between "eh" and "ay" i = "ee" o = "oh" u = "oo." Consonants mostly resemble their English language counterparts, with some notable exceptions. "H" is silent. "J" sounds like our "h," as in "Jose". "X" may sound like our "x," as in "éxito," but in Mexican place names such as México (MEH-hee-koh) or Oaxaca (wah-HAH-kuh), it sounds like our "h." "ñ," "ny," has the "nyuh" sound of "Señor" (seen-NYOR). Double "l" sounds like "y," as in "Vallarta" (bah-YAR-tuh). "B" and "V" both sound like "b," and that can be confusing. The sounds of some consonants depend on the next letter. For instance, "g" can sound like the hard "g" sound of "Gomez" (ga, go, gu) or our "h" sound of the Spanish "j" (je, gi). "C" can sound like "k" (ca, co, cu) or "s" (ce, ci). "Cu" plus a vowel (cua, cue, cui) makes a "kw" sound, as in "frecuencia." "Ch" equals English "ch," as in "mucho." "Qu" (que, qui) sounds like "k."

Accents in Spanish are very regular. Normally, a word ending with a vowel (a, e, i, o, u), or "n" or "s," has an accent on the next-to-last syllable, such as "cinco" (SEEN-koh) or "Variedades" (bah-ree-eh-DAH-dehs). Words ending with any other consonant have an accent on the last syllable, such as "festival" (fes-ti-BAHL) or "Ciudad" (cee-oo-DAH-d). But when there are exceptions, an accent mark is shown over the vowel in the accented syllable, such as "éxito" (EX-ee-tohs). We show these accents when known.

On this page are charts of Spanish letters and numbers. These should help you pronounce station call letters, plus numbers such as "5-70" (cinco setenta) in the slogan column. Note that B and V sound alike, and there are two ways to pronounce W and two ways to pronounce Y. Also note that numbers 21-29 are compound words and not separated by a "y" (and). This combining applies only to the 20's (21-29):
