DESCRIPTION OF COLUMNS AND TERMS USED IN THIS LIST:

**H:** Use this column to track Mexican Stations which you have heard.

**FREQ:** This is the assigned frequency of a station on the AM Band

**CALL:** This is the call letters assigned to the station in the AM Band.

**CITY/STATE:** Exact city-of-license is given where known. The following abbreviations are used for Mexican states:

|                           |                       |                        |                       |                   |
|---------------------------|-----------------------|------------------------|-----------------------|-------------------|
| Agua - Aguascalientes     | Coah - Coahuila       | Jal - Jalisco          | Oax - Oaxaca          | Tab - Tabasco     |
| BC - Baja California      | Col - Colima          | Mex - Estado de México | Pueb - Puebla         | Tama - Tamaulipas |
| BCS - Baja California Sur | DF - Distrito Federal | Mich - Michoacan       | Qtro - Querétaro      | Tlax - Tlaxcala   |
| Camp - Campeche           | Dur - Durango         | Mor - Morelos          | QRoo - Quintana Roo   | Ver - Veracruz    |
| Chia - Chiapas            | Gjto - Guanajuato     | Nay - Nayarit          | SLP - San Luis Potosí | Yuc - Yucatán     |
| Chih - Chihuahua          | Guer - Guerrero       | NL - Nuevo León        | Sin - Sinaloa         | Zac - Zacatecas   |
|                           | Hdgo - Hidalgo        |                        | Son - Sonora          |                   |

**POWERS:** "-1" = station power is unknown. Other negative numbers indicate presumed, suspected, or estimated powers. Many of these listings are a result of the fact that stations seldom publicize their night powers. Directional antenna patterns (U2, U3, etc.), when known, are listed in the "Notes" column.

**SLOGANS:** May include frequently-used network names. For new CPs, the licensee organization is listed here if known. "R" = "Radio." "LV" = "La Voz." Announced frequencies in slogans need to be clear on the exact text; i.e., 860 is Ochocientos Sesenta but 8-60 is Ocho Sesenta. This difference is important for identifications and for DXers who have limited Spanish language skills. For FM frequencies, the decimal point "." is *punto*. Some stations will identify by their call letters and this is not always listed under slogans.

**SCHEDULES – ALL TIMES ARE IN UTC** (Coordinated Universal Time), also known as GMT (Greenwich Mean Time), except for the supplemental spreadsheet where local times are used to describe the time(s) at which stations broadcast the national anthem. All Mexican states use UTC minus 6 hours (GMT-6) except Quintana Roo (GMT-5), Baja California Sur, Chihuahua, Nayarit, Sinaloa, and Sonora (GMT-7); and Baja California (ex-Norte) (GMT-8). Note that all states observe Daylight Savings Time (except Sonora and Quintana Roo), so subtract 1 hour from listed schedules from the first Sunday of April (2 AM local time) to the last Sunday of October (2 AM local time). The following border cities begin daylight savings time on the second Sunday in March and end on the first Sunday of November: Mexicali and Tijuana in Baja California, Juárez and Ojinaga in Chihuahua, Acuña and Piedras in Coahuila, Anahuac in Nuevo Leon and Matamoros, Nuevo Laredo and Reynosa in Tamaulipas. ">" in place of a dash means that the station stays on later than the second time listed, but exact sign-off time is unknown. Similarly, "<" indicates that the station is on the air by the first time listed, but the exact sign-on time is unknown. Many stations in Mexico now broadcast 24h/day. However, many also sign on at 0500/0600 hours local time and run to 2300/2400 hours' local time. The schedule column has been updated when a schedule is known. Please keep in mind that this column isn't absolute in some cases and the actual schedule may differ from the listed schedule.

Music may be in English (E), Spanish (S), or English-Spanish (E/S).

**NETWORKS:** The networks below range from satellite-fed simulcasts (e.g., Radio Fórmula) to stations which do not simulcast but use identical jingles and promotional announcements (eg Nucleo Radio Mil). Smaller regional networks of 2 to 5 stations may simulcast at times. These networks are often identified by a common slogan in the "Slogans" column (e.g., Radio Sistema Zacatecas). Groups of stations which merely use the same advertising agency (Corporadio, Sociedad Mexicana de Radio) are no longer listed as networks, because the names of these "networks" are virtually never mentioned on the air. There are many more minor local ownership groups and networks than listed here, but these have been selected mostly because they may be mentioned on air.

Regional affiliates and lesser-known national affiliates are listed in the "Notes" column. SA, "EH-she ah," is widely used in corporation names in Mexico, and means roughly the same as "Inc" in the US or "Ltd" in Canada.

**NOTES:** This column includes regional networks, FM parallels, and other details to help identify a station, as well as the station's FM migration status if known. The following abbreviations are used in the "Notes" column:

|                             |                                 |                               |                |
|-----------------------------|---------------------------------|-------------------------------|----------------|
| // - parallel to, simulcast | CP - construction permit        | freq - frequency              | s/on - sign on |
| + - plus or minus           | ex- - formerly                  | kW - kilowatt, 1000 watts     | SW - shortwave |
| 24h - 24 hours a day        | FB - football                   | OC - open carrier, "dead air" | w - watts      |
| AN - all night              | FM - FM band (88.1 – 107.9 MHz) | R - radio                     |                |
| BB - baseball               |                                 | s/off - sign off              |                |

The following abbreviations describe directional antenna patterns:

|                                      |  |                                    |  |
|--------------------------------------|--|------------------------------------|--|
| U = unlimited time                   | U2 = unlimited, DA at night only                 | U5 = unlimited, DA day, ND night   | All stations in Mexico operate with U1 unless noted. |
| D = daytime only                     | U3 = unlimited, same DA day and night            | D1 = daytime only, non-directional |  |
| DA = directional antenna             | U4 = unlimited, two different DA's day and night | D3 = daytime only, directional     |  |
| ND = non-directional                 |  |                                    |  |
| U1 = unlimited time, non-directional |  |                                    |  |

INE (agency governing Mexico's elections) – AM coverage maps dated December 2016: <https://tinyurl.com/Mexico-AM-maps-2016>

Mexico has adopted IBOC as the standard for digital radio. A list dated April 18 2012 has 10 stations authorized to use IBOC. Watch for IBOC from these stations and report them. XEKAM Tijuana on 950 kHz has used IBOC for several years.

## WHAT'S NEW THIS YEAR?

Quite a few additional stations have turned off their AMs after the end of their 1-year mandatory simulcasting period, including several widely-reported stations like XEFQ, XEMON, and a few DX targets like XELAC. A handful of others appear to have turned off their AMs despite having a "continuity order" to remain active on AM to prevent a small number of remote households from being cut off from any radio or TV service. (One example is XEK-960, which has recently turned off their AM for the second time). It is possible that these stations may reappear on AM at some point.

The following stations are believed to have left AM, and have been removed from this edition: XEWA-540 (NL), XEZK-550, XEBX-610, XELG-680, XESOS-730 (unauthorized), XEOH-750, XEZR-800, XEMIA-850, XEAAA-880, XEOK-900, XEZAR-920, XEFAMA-960, XEK-960, XEO-970, XEMH-970, XEFQ-980, XECH-1040, XESP-1070, XEMCA-1090, XEOQ-1110, XEBF-1150, XECD-1170, XEBON-1280, XEHIT-1310, XERCH-1340, XERPU-1370, XEMON-1370, XEHF-1370, XEWD-1430, XEABCJ-1440, XEJM-1450, XECHZ-1560, XELAC-1560. As we were going to press, the web site and Facebook page for XEJPV-1560 were taken down, and it is being reported that Grupo Mega Radio, which had been cited by the IFT in 2019 for failing to renew most of their licenses, was planning to shut down all of its AMs in the Juárez market. The other Mega Radio stations with expired licenses are XEZOL-860, XEFV-1000, XEWR-1110, and XEF-1420. Grupo Mega Radio also owns XECJC-1490, so its status is in doubt as well.

(XESOS-730, a major "pest" for western US DXers which suddenly disappeared around September 2019, is rumored to have moved back to 1140, a frequency it occupied briefly about 20 years ago. The Imágen Radio web site, which has finally been updated after being out-of-date for many years, shows XESOS on 1140. So far this is assumed to be in error, but it should be noted that XESOS had a continuity obligation and should not have turned off their AM, so this situation bears additional monitoring).

The following new stations that have come on the air since the last edition of the Log: XELFFS-980 (replacement for XEFS), XEMEFM-1240 (replacement for XERPA), XECSCGU-1620 (Mexico's first 7-letter AM call). More CPs are expected to be completed as the Acustik and El Heraldo Radio networks expand their coverage across the nation.

Listeners in Mexico have informed us that the following stations, believed to have been off of AM (and not reported by DXers) for years, are in fact still on the air: XEDGO-760, XEAK-890, XEBV-1100, XEVS-1110, XETL-1390.

Obtaining accurate information from BC Sur and the Rio Grande Valley has been quite difficult in the past. Most stations in these regions have little or no web presence. Some have simple web pages that have not been touched in years, and web streams that have not worked in a long time. The situation in the Rio Grande Valley has improved substantially with the availability of a reliable SDR in Brownsville, Texas. The situation in BC Sur remains as frustrating as ever.

The situation in México City remains unstable. Radio Centro has continued its slow implosion. Several long-silent stations (mostly operated by Radio Centro and Grupo Siete) have been put back into service, often after transmitter overhauls and relocations, and others have gone down for the same purpose. Quite a few lease management arrangements and programming contracts around the

country have been terminated as well. The contract between Radio ACIR and Radio Disney ended at the end of 2019, and the two Disney affiliates on AM switched to other formats (at least one of these, XEOK-900, has since left AM). Radio Disney has since signed a contract with a different partner (Grupo Siete), but all known affiliates so far have been on FM. Some additional stations that have been impacted by sales and lease terminations include XEGTO-590 (reverted to Éxtasis Digital format after Multimédios lease terminated) and the stations formerly running Radio Red programming (source station XERC-FM 97.7 was sold to MVS Radio; XERED-1110 was taken silent for transmitter overhaul, and relay stations XEDKR-700 and XESTN-1540 started relaying XHRED-FM 88.1, which has been branded as both Universal 88.1, a nod to the popular format once found on XERC-FM, and La Octava). The situation with México City AMs remains in flux as this edition of the Log is going to press. With the purchase of XERC-FM, MVS has turned its La Mejor regional music format into an actual programming feed, with most affiliates now getting most or all of their programming from XERC-FM. Thus, you may hear mentions of FM 97.7 (and México City phone numbers) on La Mejor affiliates. It is not yet known whether US stations such as KSUN-1400, which have used the "La Mejor" branding in the past, are now running the actual network programming feed.

Readers of the last two editions of the Log have correctly noted that the latitude/longitude data, whose original source was unknown to the current editor and publisher, left a lot to be desired. This data was audited this year. Google Maps was used to verify that a plausible AM tower actually existed at each alleged site, and when this was not the case, other public sources were consulted to determine the correct site whenever possible. Special thanks to Dan Goldfarb and Paul Walker for major contributions to this effort.

In the supplemental data spreadsheet, we have added station phone numbers, and links to station program schedules, for as many stations as we could find.

## GENERAL NOTES:

The issuance of CPs for existing AM stations to move to FM has slowed down substantially, as almost everything that can be done to make room for existing AMs on the FM dial has been done. A few cases remain where a station that had missed the earlier opportunity to move to FM (usually for failing to pay the appropriate fees) may still apply for FM migration at a future date if an FM allocation is available (XEXN-1010 is believed to be one such case; sale of the station is pending, and the new owners are expected to file for FM migration). In some markets, notably Puebla, a station that had not initially been granted a scarce FM allocation may still be granted one if the original grantee fails to follow through (as when XEZT's allocation was transferred to XEHIT).

The purpose of the FM migration is ***not*** to vacate the AM band. We know this for at least 3 reasons:

1. It would be impossible. Even after changing the required spacing for FM stations from 800 kHz to 400 kHz, it was obvious from the start that markets such as Mexico City, Guadalajara, Puebla, etc., would not have enough available FM slots to allow all existing AM stations to move.
2. Existing AM licenses that are vacated by stations moving to FM are put up for auction (85 more were released for bidding on 8/26/2019), and a few dozen CPs have already been issued to new licensees for those recently-vacated AM stations.
3. Applications for brand-new AM licenses are still being accepted and granted (see XECSIA-1620, XECSCGU-1620 and XECSIB-1640, among several others).

The purpose of the FM migration is surely to maximize the utilization of the FM band (as well as the related license fees!), with the challenge being how to divide the available FM slots fairly between existing commercial AM licensees and other groups such as indigenous and "social"/"community" broadcasters. To this end, the FM spectrum between 106 and 108 MHz has been allocated for social, community and indigenous stations, and wherever possible, commercial stations in this frequency range are being moved to lower frequencies on the FM dial.

Under the new call sign conventions adopted by the IFT, virtually all new licenses are assigned 6- or even 7-letter calls, the first 7-letter call having recently been assigned to the CP for XECSCGU-1620 in Guachochi, CHIH, which is already on the air.

Musical formats have evolved quite a bit over the years, and the lines between the different formats seem more blurry than ever. Even the stations themselves often use two or three different terms in describing a single format. Norteña music seems much less prevalent than it was 25 years ago, and is often lumped in with ranchera. The Romántica format, which used to be indicative of multiple acoustic guitars and beautiful harmony singing, now often consists of shallow adult contemporary or dance club music. The Grupera format can range from sophisticated musical arrangements with talented brass musicians (somewhat similar to the traditional Tropical format) all the way down to cheap synthesizer music, with all the brass instruments replaced by very disappointing electronic imitations.

National newscasts are far more common today than they were even ten years ago. DXers with little or no Spanish language skills are especially cautioned not to fall into the bad habit of hearing (for example) "mentions of Chiapas" on a station, and concluding that the station heard was the one in Chiapas. Mis-identification of Mexican stations by DXers with poor Spanish language skills is more common than many of us would like to believe.

Information in this Log (and the supplemental spreadsheet described below) is updated to **August 24 2020**. Thanks to all the DXers who report their loggings to the IRCA, NRC and ABDX. Those loggings were used to help verify slogans and FM migration status. It should be noted that our efforts in recent editions of the list have focused getting the formats, networks, slogans and FM migration status of each station up to date. In this year's edition, we have continued to research FM migration status, fix inaccurate transmitter locations, and begin to improve some secondary data such as hours of operation. Some data, especially night powers and the status of several stations allegedly still on the air in BC Sur, continue to be elusive. We are still looking for volunteers to help research station hours of operation and national anthem versions. This can be accomplished by monitoring station web streams, SDRs, or the stations themselves if they are audible from your location. Interested DXers are encouraged to contact the editor for details.

**SUPPLEMENTAL SPREADSHEET** – With this edition of the Mexican Log we are once again adding a spreadsheet with supplemental information that may be useful to DXers trying to identify weak signals from Mexican stations. This spreadsheet comes from the editor's personal station list. It shows the URLs (when known) for each station's web page, live stream, Facebook page, and program schedule page (if any), as well as any phone numbers found on those pages. The links can be especially useful for DXers using SDRs on their own laptops, to quickly check a web stream (or program name) to see if it matches a signal being heard on the radio. Phone numbers can be useful since they may be numerically close to the numbers heard in the station's ads. Although México is on the same area code system as the US and Canada, phone numbers are often still recited in traditional Latin American fashion, one or two digits at a time (e.g., "5-55-12-12" instead of "555-1212"). Users are cautioned that we have occasionally found station web sites to be hacked, and it is the sole responsibility of each user to ensure they have adequate virus protection on their computers before clicking on any link in this spreadsheet. A good number of these URLs change each year, due to web site overhauls, re-branding, changes in a station's choice of streaming vendors, etc. The spreadsheet also reflects the editor's efforts (through DXing with beverage antennas in Chula Vista CA and near Baker NV, as well as monitoring station web streams and listening to the Brownsville, Texas SDR) to learn what type of national and/or state anthems each station plays in the morning and evening (typically, but not always, around 6am and/or Midnight local time). With some frequencies having only a few stations left, knowing the type of anthem played on each station can be valuable in helping to identify the station being heard. Users are cautioned not to employ this technique on Sunday evenings, when most stations air a common version of the national anthem from the National Hour program around 11pm local time, and to remember that there are a few US stations such as KNRV 1150AM and KNUV 1190AM which also air the Mexican national anthem as part of the Radio Fórmula network feed from México. Finally, we have noted that web streams for Mexican stations may perform very poorly (excessive buffering), have extended outages, be well out of synch with the on-air broadcast, and not work on mobile devices.

**NOTES FOR SUPPLEMENTAL SPREADSHEET:** The following abbreviations are used in the "WEB", "LIVE", "FB" and "SCHED" columns:

- Defunct - Last time we checked, web site was no longer there (or owner had not paid annual domain registration fees?).
- DJ - The station does not seem to have a current Facebook page; the page in this link belongs to an individual announcer.
- EMPTY - The last time we checked, this web page was essentially "empty" (contained no useful information).
- FB - (LIVE column): This live stream must be accessed via Facebook.
- FM - This site is for the station's FM, and may or may not contain useful information about the AM.
- INDIV - Station has set up an individual Facebook page instead of a business page.
- NET - Page or live stream is for the entire network or ownership group, not just this station.
- NG? - The last time we visited this URL, it was not working. Generally this implies the page has worked in the past.
- STALE - The last time we checked, this site seemed well out of date. Watch for format/slogan changes and new pages.
- UC - Web page was under construction the last time we checked.

We welcome your comments, suggestions, additions, and corrections regarding this list. Please write to Mexican Log editor Tim Hall at [TimHall1@gmail.com](mailto:TimHall1@gmail.com). Thank you!

XEJPV was still active in early 8/20, but their web site and Facebook page were down as this edition of the Log went to press, and it was reported that all Grupo Mega Radio stations in this market may be shutting down except for 105.9FM. Relays XHLE 99.5FM "Romance" Guadalajara overnight on weeknights. Paid programming overnight on weekends.   |

In 5/20 they were raising funds for a 2kW transmitter to increase their coverage area, so the initial power must have been less than that. First 7-letter call issued on AM. Licensee is a drug rehabilitation center, and the other name of the organization in question (Radio Dabar, Dabar being the Hebrew word for "Word,") implies a religious format. The acronym of the licensee's organization is CREO, Spanish for "I believe." This stands for Centro de Rehabilitación El Olivo, A.C. Transmitter coordinates are approximate (Google Maps has not been updated since the transmitting antenna was built). |

## A QUICK GUIDE TO THE SPANISH LANGUAGE

By Bill Hardy, revised by Guillermo Glenn Hauser, 2019

When you hear Mexican radio stations, you may hear letters, numbers and slogans. If you know a little basic Spanish, you'll be ahead of the game. Spanish pronunciation in Mexico is fairly straightforward. While ``long`` vowels in English are actually diphthongs, in Spanish each vowel letter has one pure sound: a = "ah", e = "eh", i = "ee", o = "oh", u = "oo",

Consonants mostly resemble their English language counterparts, with some notable exceptions. "H" is silent. "J" sounds like our "h," but stronger, as in "José". "X" may sound like our "x," as in "éxitos," but in Mexican place names such as México (MEH-hee-koh) or Oaxaca (wah-HAH-kah), it sounds like our "h." "ñ," enye, has the "ny" sound of "Señor" (seh-NYOR). Double "l" sounds like "y," as in "Vallarta" (bah-YAR-tah). "B" and "V" sound the same in two different ways depending on whether they are initial in a word: like our B; or amid a word, like our V. R is slightly trilled especially if initial, and more trilled if double. Like "radio" (RRAH-dhee-oh). D unless initial sounds like "th" in our word "the". Better rendered as "dh", also as in "ciudad" (twice).

The sounds of some consonants depend on the next letter. For instance, "g" can sound like the hard "g" sound of "Gómez" (ga, go, gu) or our soft "h" sound of the Spanish "j" (ge, gi). "C" can sound like "k" (ca, co, cu) or "s" (ce, ci). "Cu" plus a vowel (cua, cue, cui) makes a "kw" sound, as in "frecuencia." "Ch" equals English "ch," as in "mucho." "Qu" (que, qui) sounds like "k".

Accents in Spanish are very regular. A word ending with a vowel (a, e, i, o, u), or "n" or "s," is stressed on the next-to-last syllable, such as "cinco" (SEEN-koh) or "Variedades" (bah-ree-eh-DHAH-dhehs) without any acute accent mark. Words ending with any other consonant are stressed on the last syllable, such as "festival" (fehs-tee-VAHL) or "Ciudad" (cee-oo-DHAHDH). If a word is stressed on any other syllable, an accent mark is required, such as "éxitos" (EX-ee-tohs).

On this page are charts of Spanish letters and numbers. These should help you pronounce station call letters, plus numbers such as "5-70" (cinco setenta) in the slogan column. Note that B and V sound alike, and there are two ways to pronounce the letters V, W and Y. Also note that numbers 21-29 are compound words and not separated by a "y" (and). This combining applies only to the 20's (21-29)

Letters of the alphabet as they are individually pronounced in callsigns:
