Mexican Stations	18

HOW TO GET THE MOST OUT OF YOUR RADIO

To get the most satisfactory results, the greatest distance, and the greatest number of Broadcasting Stations on your Radio, take this Log-Book in hand and tune in a familiar Station on your Radio.

After you have done this, find the Kilocycle for this familiar Station in the alphabetical list on pages 3 to 7. Then turn to pages 11-12 and record your dial marking opposite the Kilocycle of this Station. If tuned in during the hours of broadcast and, if within the range of your Set, *all Stations grouped under this Kilocycle will be Received on your Set at the Same Dial Marking.*

Proceed in the same manner to mark pages 11-12 according to the Kilocycles of other familiar Stations and you will see that the Kilocycles on pages 11-12 are arranged so the Highest Dial Marking on your Set will be recorded at the beginning of Page 11, and decrease consecutively until the Lowest Dial Marking will be recorded at the end of Page 12.

Therefore, any Stations broadcasting on Kilocycles not yet marked with your Dial Settings must tune in on your Radio Set in between the dial Settings of the nearest Kilocycles (wave-lengths) of the Stations you have already recorded.

You need not be technically inclined to properly use the "Official Radio Log." Keep it constantly in readiness on or near your Radio. Once you become accustomed to its use, you will have occasion to refer to it often, since it greatly increases your Radio Enjoyment.
