DESCRIPTION OF COLUMNS AND TERMS USED IN THIS LIST:

**H:** Use this column to track Mexican Stations which you have heard.

**FREQ:** This is the assigned frequency of a station on the AM Band

**CALL:** This is the call letters assigned to the station in the AM Band.

**CITY/STATE:** Exact city-of-license is given where known. The following abbreviations are used for Mexican states:

Agua - Aguascalientes	Coah - Coahuila	Jal - Jalisco	Oax - Oaxaca	Tab - Tabasco
BC - Baja California	Col - Colima	Mex - Estado de México	Pueb - Puebla	Tama - Tamaulipas
BCS - Baja California Sur	DF - Distrito Federal	Mich - Michoacan	Qtro - Querétaro	Tlax - Tlaxcala
Camp - Campeche	Dur - Durango	Mor - Morelos	QRoo - Quintana Roo	Ver - Veracruz
Chia - Chiapas	Gjto - Guanajuato	Nay - Nayarit	SLP - San Luis Potosí	Yuc - Yucatán
Chih - Chihuahua	Hdgo - Hidalgo	NL - Nuevo León	Sin - Sinaloa	Zac - Zacatecas
			Son - Sonora	

**POWERS:** "-1" = station power is unknown. Other negative numbers indicate presumed, suspected, or estimated powers. Many of these listings are a result of the fact that stations seldom publicize their night powers, and night powers are often missing from station license documents and construction permits ("CPs"). Directional antenna patterns (U2, U3, etc.), when known, are listed in the "Notes" column.

**SLOGANS:** May include frequently-used network names. For new CPs, the licensee organization is listed here if known. For FM frequencies, the decimal point "." is *punto*. Some stations will identify by their call letters, and this is not always listed under slogans.

**SCHEDULES – ALL TIMES ARE IN UTC** (Coordinated Universal Time), also known as GMT (Greenwich Mean Time), except for the supplemental spreadsheet where local times are used to describe the time(s) at which stations broadcast the national anthem. All Mexican states use UTC minus 6 hours (GMT-6) except Quintana Roo (GMT-5), Baja California Sur, Nayarit (except Bahía de Banderas), Sinaloa, and Sonora (GMT-7); and Baja California (Norte) (GMT-8). **Note that all of Chihuahua has changed to GMT-6/CST, and Mexico no longer observes Daylight Savings Time, except for Baja California (Norte) and certain cities along the US border** (Ciudad Acuña and Piedras Negras in Coahuila, Anahuac in Nuevo Leon and Matamoros, Nuevo Laredo and Reynosa in Tamaulipas; for stations in these cities, subtract 1 hour from listed schedules from the second Sunday of March (2 AM local time) to the first Sunday of November). ">" in place of a dash means that the station stays on later than the second time listed, but exact sign-off time is unknown. Similarly, "<" indicates that the station is on the air by the first time listed, but the exact sign-on time is unknown. Many stations in Mexico now broadcast 24hours a day. However, many also sign on at 0500/0600 hours local time and run to 2300/2400 hours local time. The schedule column has been updated when a schedule is known. Please keep in mind that this column isn't absolute in some cases and the actual schedule may differ from the listed schedule.

## FORMATS:

AC - Adult Contemporary	EDU - Educational	MER - Merengue	ROM - Romántica (Love Songs/
BAL - Ballads	EX - Exitos (classic hits – S	NEW - New Age/Light "Jazz"	Ballads or Pop AC)

E: - English Language Announcers or songs		ROK - US Classic Rock music	VAR - Variety

Music may be in English (E), Spanish (S), or English-Spanish (E/S). "STUNTING"= temporary programming between format changes.

**NETWORKS:** The networks below range from satellite-fed simulcasts (eg, Radio Fórmula) to stations which do not simulcast but use identical jingles and promotional announcements (eg Nucleo Radio Mil). Smaller regional networks of 2 to 5 stations may simulcast at times. These networks are often identified by a common slogan in the "Slogans" column (e.g., Radio Sistema Zacatecas). Groups of stations which merely use the same advertising agency (Corporadio, Sociedad Mexicana de Radio) are no longer listed as networks, because the names of these "networks" are virtually never mentioned on the air. There are many more minor local ownership groups and networks than listed here, but these have been selected mostly because they may be mentioned on air.

Regional affiliates and lesser-known national affiliates are listed in the "Notes" column. SA, "EH-she ah," is widely used in corporation names in Mexico, and means roughly the same as "Inc" in the US or "Ltd" in Canada.

**NOTES:** This column includes regional networks, FM parallels, and other details to help identify a station, as well as the station's FM migration status if known. The following abbreviations are used in the "Notes" column:

- |                            |                                 |                               |                |
|----------------------------|---------------------------------|-------------------------------|----------------|
| // - parallel to simulcast | ex- - formerly                  | kW - kilowatt, 1000 watts     | SW - shortwave |
| + - plus or minus          | FB - football                   | OC - open carrier, "dead air" | w - watts      |
| 24h - 24 hours a day       | FM - FM band (88.1 – 107.9 MHz) | R - radio                     |                |
| BB - baseball              | freq - frequency                | s/off - sign off              |                |
| CP - construction permit   |                                 | s/on - sign on                |                |

The following abbreviations describe directional antenna patterns:

- |                                      |  |                                    |  |
|--------------------------------------|--|------------------------------------|--|
| U = unlimited time                   | U2 = unlimited, DA at night only                 | U5 = unlimited, DA day, ND night   | All stations in Mexico operate with U1 unless noted. |
| D = daytime only                     | U3 = unlimited, same DA day and night            | D1 = daytime only, non-directional |  |
| DA = directional antenna             | U4 = unlimited, two different DA's day and night | D3 = daytime only, directional     |  |
| ND = non-directional                 |  |                                    |  |
| U1 = unlimited time, non-directional |  |                                    |  |

Corporadio (<http://mpm.com.mx>) – Formerly listed as CORP network, it is actually more of an advertising agency and publisher. Corporación Mexicana de Radiodifusión ([www.cmr.com.mx](http://www.cmr.com.mx)) – Advertising co-op, formerly listed as CMR network.

INE (agency governing Mexico's elections) – AM coverage maps dated December 2016: <https://tinyurl.com/Mexico-AM-maps-2016>

In 2008, Mexico adopted IBOC as the standard for digital radio, and initially authorized 11 AM stations and 10 FM stations to use it. The 11 AM stations are listed below. At present, no Mexican AM stations are believed to still be broadcasting in IBOC, but it is definitely used by a number of FM stations.

Station	Notes	Station	Notes	Station	Notes
XESURF-540	No IBOC.	XEEZ-970	Moved to FM	XEOQ-1110	Moved to FM
XEFD-590	No IBOC.	XEO-970	Moved to FM	XERM-1150	No IBOC.
XEKAM-950	Used IBOC for about 10 years, then discontinued it.	XENLT-1000	Moved to FM	XEHF-1370	Moved to FM
		XEYC-1030	Moved to 1460	XEOR-1390	No IBOC.

Obtaining accurate information from BC Sur and the Rio Grande Valley is always challenging. Most stations in these regions have little or no web presence. Some have simple web pages that have not been touched in years, and web streams that have not worked in a long time. The situation in the Rio Grande Valley improved substantially with the availability of an SDR in Brownsville, Texas, a few years ago, but that SDR has been experiencing poor AM reception in 2023. The situation in BC Sur remains as frustrating as ever.

## WHAT'S NEW THIS YEAR?

**Be sure to review the time zone changes on the first page of this document.**

The number of active Mexican AM stations has dropped below 300, probably for the first time in most of our lives. In the early 1990s, we listed about 950-960 AM stations in México, but this number was surely inflated, because in those days we had virtually no way of screening out long-defunct and never-built stations. Available data sources at the time could mostly be traced back to lists of stations (and allocations for future stations) first published in the 1950s. The future is promising, however, as there are currently about 75 construction permits for new AM stations and replacements for former AM stations that have migrated to FM, some of which will be very interesting targets for DXers.

In 2022, the IFT revalidated the "continuity obligations" which are issued to some stations to ensure that all Mexicans, even those living in extremely remote areas, have access to at least one acceptable radio or TV signal. The orders are issued to AM stations, informing them that they must keep their AM on the air after migrating to FM. The licensee can "transfer" this obligation to a new social/community station if a suitable organization can be found to take over the AM license. This often results in embarrassing losses of coverage, as the existing licensee is allowed to take their AM off immediately, whereas the new licensee may take years to put the new AM on the air, or even fail completely. A second, more bizarre legal loophole appears to have arisen in the past year. In the cases of XEFI-580, and possibly XEPET-730, XELN-830, and XETG-990 (see notes below), the existing AM license was offered in one of the IFT's periodic license auctions, and even though the license received no bids, the existing licensee still took the AM off the air, despite the continuity obligation.

The results of the latest IFT analysis were reported by Raymie Humbert in his excellent "En Frecuencia" blog. To put it mildly, there were many surprises in the revised listings. If nothing else, this shows that the IFT is still having trouble (as did their predecessor agency, the SCT) simply keeping track of which stations actually exist on AM! Several of the stations in the list below had actually been allowed to turn their AMs off years ago. Some of them will eventually return to AM.

In the following table, the "2018" and "2022" columns show the number of people who would allegedly lose their only viable radio/TV signal if the AM station in question were to go off the air. The "Notes" column discusses the perceived current status of each station.

Freq	Station	2018	2022	Notes
540	XEHS	27552	3594	Still active on AM in 2023.
540	XEMIT	119692	126000	This station went off the air (along with its old FM 107.9) when its license expired 4/13/23; a new station XHCPEO-94.9 has been licensed and is on the air (the station's web site has been updated accordingly) but no license has been re-established for AM 540, seemingly leaving a huge number of listeners with no viable radio or TV signal per the IFT. It is expected that a new application for AM 540 will be filed soon. The state of Chiapas remains a hotbed of pirate activity, with 124 pirate stations reportedly active in 2023 (all on FM).
540	XETX	33056	41287	Still active on AM in 2023.
540	XEWA	260689	215786	Reported silent 4/23, but back on the air (possibly at lower power) soon thereafter. This refers to the station in San Luis Potosí, not the smaller station in Monterrey, which finished migrating to FM a few years ago.
550	XEPL	7431	4684	Still active on AM in 2023.
560	XEGIK	230	34	May or may not still be active on AM.
560	XEMZA	20360	?	AM is believed to be already off the air; continuity obligation has been transferred to the licensee of the new social/community station XECSAW, which will replace XEMZA.*
560	XESRD	75970	78234	Believed to still be active on AM (confirmed by station 7/23).
570	XELQ	920	59	Still active on AM 7/23, but the license has been transferred to a new social/community licensee as XECSAY 5/23, so XELQ is likely to go off the air soon.
570	XEOA	46565	48623	Believed to still be active on AM.
570	XETD	10016	5367	AM has returned to the air after being silent for years.
570	XEUK	224	110	AM has been off for over a decade. They have had a continuity obligation for a long time, and it is unknown whether the order was issued before or after the AM was turned off. The station and a local listener both confirmed 7/23 that the AM was still off.
570	XEVJP	48065	48155	IDs on web stream still mention AM (5kW) 7/23, but the AM was found to be off the air in the 2021 IFT audit.
580	XEFI	7301	5054	The station confirmed 7/23 that the AM was taken off the air. A photo of the abandoned AM transmitter site was posted to Facebook by a non-DXer 6/23. XEFI had not been logged by US DXers since the AM license was noticed in a 2021 IFT auction, but it has since been re-added to the IFT master station list. The FM has been re-branded as "Studio 96.5."
600	XEHW	5	5384	Believed to still be active on AM.

Freq	Station	2018	2022	Notes
610	XEGS	21840	14353	Allegedly still on the air, but has not been logged recently, whereas it used to be the dominant station for DXers throughout the US southwest. Day power recently reduced from 50 kW to 25 kW. Presumably the night power has been reduced as well? AM 610 references have been removed from the station's web page.
610	XEUM	9351	5886	Believed to still be active on AM.
630	XEFX	5	1271	AM was found to be off the air in the 2021 IFT audit, and a local listener stated the AM had been off the air since at least the beginning of 2019. IDs continue to include 630 AM with stated power 1kW, but we have no reason to believe this station is on the air at this time.
630	XEJR	43845	?	This station has been off AM since January 2013. Unlike several other cases cited here, in this case the IFT has actually conceded that it failed to order this AM to stay on until it was far too late (i.e., after the initial 1-year simulcast was over, the AM had been turned off, and the surviving FM license sold to a new owner).
650	XEEJ	28075	?	This continuity obligation was transferred to the licensee of the new social/community station XECSBK, which is already on the air; prior to this, XEEJ had been off for a year or two.*
650	XEPX	28518	24056	Believed to still be active on AM. ID on web stream still includes AM 7/23.
660	XEEY	562	13	License is being transferred to new social licensee XECSBM. XEEY may be off the air by now. We have an unconfirmed report that the new station is on the air with Cadena Azul programming //XECSEO-1220 (see new social/community licenses below).
660	XESJC	3122	1984	Appears to still be active on AM. Web stream now broadcasts automated music from the state government (La Radio de Sudcalifornia).
660	XEYG	19809	25977	AM has been off the air for years.
690	XEMA	63396	48656	Still active on AM 7/23.
700	XELX	38455	5775	Believed to still be active on AM.
720	XEDE	7660	2045	AM has been active only sporadically in recent years.
720	XEKN	19189	20864	Believed to have been silent on AM since 2021 (or earlier).
730	XEHB	28960	33684	Still active on AM in 2023.
730	XELBC	2061	?	Station has been off AM for years (if it ever actually broadcast on AM in the first place); the continuity obligation has been transferred to the licensee of the new social/community station XECSBU, which will replace XELBC.* Web stream for XHLBC (which still refers to the station as XELBC) is running automated music from the state government (La Radio de Sudcalifornia).
730	XEPET	90215	85725	Unsure if still active on AM. The AM license was put up for auction in 2022 but received no bids.
730	XESOS	547	526	AM returned to the air after the 2021 audit, then went off for about a year. It was active sporadically in late 2022 and has been active for most of 2023.
740	XEPOR	25276	85026	Believed to still be active on AM.

Freq	Station	2018	2022	Notes
740	XEQN	36413	44747	Believed to still be active on AM.
760	XEEB	669	539	This station, which moved to FM over a decade ago (most likely with the blessing of the IFT's predecessor agency, the SCT) was recently issued a continuity order by the IFT, seemingly unaware that the station no longer existed. The IFT was apparently unwilling to admit their error and has actually told the licensee to put the AM back on the air. They have even issued a "site change" CP to "move" the AM to what is presumably the transmitter site of the FM. The AM returned to the air 4/23.
770	XEML	15772	12755	Believed to still be active on AM. ID on web stream still includes AM 7/23.
780	XELD	13292	?	AM is believed to be already off the air; continuity obligation has been transferred to the licensee of the new social/community station XECSCF, which will replace XELD.*
780	XEXY	7795	3971	Station has declined FM migration and will remain on AM. They have created yet another new Facebook page, but their last 2 web pages are no longer online.
790	XENT	3511	1292	Believed to still be active on AM, but loggings have dropped off sharply in recent years. This may be the result of previously not powering down at night for several years.
800	XEERG	388	338	AM was found to be off the air in the 2021 IFT audit, and has not recently been logged on the Brownsville SDR, but a local listener reported 7/23 that they were active. This one defies explanation. Whether the city of license is still Montemorelos (as it was listed for decades), or Ojo de Agua (as reported in more recent years), how can this station cover any territory that is not covered by the high-powered stations in nearby Monterrey?
810	XEFW	2014	5118	Operating sporadically on AM in recent years. Believed still silent on AM 6/23.
820	XEABCA	11	2	Still active on AM in 2023.
830	XELN	4011	3084	Probably inactive on AM. Like XEFI-580, the AM license was put up for auction in 2022 but received no bids. The Multimedios web player page, which lists other AMs that are still on the air, no longer lists XELN-830.
840	XEXXX	6647	6091	A local listener confirmed 7/23 that they were still active on AM. ID on web stream still includes AM (5 kW) 07/23.
870	XEACC	15065	13943	AM was found to be off the air in the 2021 IFT audit.
920	XELCM	17071	?	AM is believed to be already off the air; continuity obligation has been transferred to the licensee of the new social/community station XECSCY, which will replace XELCM.*
940	XERLA	2428	6084	AM had been silent for several years before suddenly returning to the air 4/23. Automated music seems to be provided by state government (La Radio de Sudcalifornia).
950	XEMAB	2677	1203	AM has been off the air frequently in the past year but is believed to be back on the air 7/23.
950	XEPB	179	?	This appears to be another IFT error. The AM had been off the air for about a decade before a continuity obligation was ordered, and the station's licenses (AM and FM) expired in the meantime.

Freq	Station	2018	2022	Notes
960	XEK	59	70	AM has been off for years. They had previously ignored their continuity obligation by turning off their AM several times. AM license was eventually surrendered 5/23 after they showed the IFT that other AM stations were audible in the area in question.
970	XESW	6191	418	Believed to still be active on AM.
990	XETG	37458	38851	Currently believed silent on AM. The AM license was put up for auction in 2022 but received no bids. The AM station was reactivated but went silent later in the year.
1000	XEGQ	19070	15548	This is believed to be another case where the IFT failed to issue the continuity obligation until long after the AM had gone off the air. The station appears to have no web presence (AM or FM) apart from a Facebook page which has not been updated since 8/22.
1010	XEPA	1127	8702	Still active on AM in 2023.
1100	XETGO	22331	28648	Still active on AM in 2023 but had been silent in 2021 and 2022.
1140	XETE	29486	?	AM is believed to be already off the air; continuity obligation has been transferred to the licensee of the new social/community station XECSAL, which will replace XETE.*
1200	XEPAS	357	91	This station, whose existence has been in doubt for over 20 years, was reported by one DXer in 2022, but this is unconfirmed (the station heard may have actually been the very phonetically-similar XECPAC, especially given the hour at which the national anthem was reported). The 2021 IFT audit found no trace of this station, and it is possible the licensee is being forced to put an AM station on the air where one may have never existed before.
1400	XESH	333	291	Still active on AM in 2023, despite having been offered for auction in 2021.
1480	XECARH	4497	10721	Believed to still be active on AM.
1570	XERF	404	620	Still active on AM in 2023. The numbers seem surprisingly low for a 100 kW station.

\*These cases highlight the major procedural flaw in the IFT continuity obligations: A station that finds a new social/community licensee to take over their continuity obligation can turn off their AM immediately, before the new licensee even begins to construct the replacement station. The people who were relying on the AM station as their only satisfactory radio or TV signal will theoretically be cut off until the replacement station comes on the air (if it ever does).

About 15 stations which previously had a continuity obligation do not have one anymore. A few of these stations appear to have turned off their AMs. Noticeably absent from the above list is XEBAC-1100, a station which (like XEPAS-1200) may never have existed on AM. XECSE-750 also has no more continuity obligation and seems to have left AM (this is not yet confirmed).

The following new stations have reportedly come on the air: XEHEEP-650 (testing 3/23), XETMEP-780 (11/22), XECPAF-850 (testing 4/22, full-time 11/22), XECSBK-650 (3/23), XECSEP-1230 (3/23).

The following stations have reportedly left AM: XEMIT-540 (4/23), XEFI-580 (confirmed by station 7/23), XETNT-650 (~6/22), XEMAR-710 (confirmed by DJ 7/23), XEROK-800 (silent since 03/22, transmitting antenna dismantled, and abandoned studio building reportedly burned by transient migrants 4/23), XEAGR-810 (confirmed by station 7/23), XECJ-970 (2/22), XELFFS-980 (12/22, owners leased XHEV-99.9 and moved the format there), XEBCC-1030 (left AM several years ago per a local listener), XEIE-1030 (sometime after 4/21, confirmed by station 7/23), XESAG-1040 (almost certainly turned off AM 5/23), XEWL-1090 (confirmed by station 7/23),

XECG-1240 (reportedly off AM before 4/23), XERPU-1370 (confirmed by local listeners, one of whom said the AM was turned off around the time the "La Lupe" format was installed in 2020), XETY-1390 (confirmed by station 7/23), XEXI-1400 (sometime in 2020?), XENU-1550 (silent since 4/21, confirmed off by station 7/23), XEUT-1630 (10/22, license expired and they chose not to renew it). The situation with XELFFS-980 is especially odd. A month after the owners took the station off the air, the IFT authorized a transmitter site move. Perhaps at some future date the FM lease agreement will be terminated, and the AM will be reactivated at the new site?

XEPAS-1200 has been re-removed from the list until its existence on AM can be confirmed. See note above.

XESAL-1220, a college station in Saltillo, Coahuila, has been removed from this year's list. They operated about a full decade after their license expired back in 2012, but they appear to have shut down sometime in the last year or so. Their web stream and Facebook page have been deactivated, and their web site (a page within the university's web site) appears to have been abandoned.

XETPH-960 has also been removed from this year's edition. Although this government-operated indigenous station seemingly did broadcast on AM briefly after first being built in 2012, a lack of reliable power in the area forced them to remain off the air for long periods of time. For at least the past 5 or 6 years, their web stream has been relaying other INPI stations (mostly XEZON-1360), and running generic INPI programming, implying that no local programming is being produced for XETPH anymore. To your editor's knowledge, no one has ever claimed to have logged this station. Another INPI station, XEJMN, was logged by a DXer in 2/23 but shortly thereafter their web stream also started playing generic INPI programming, possibly indicating that this station may also be silent. XEZON-1360 went silent 8/23 due to flood damage, and may be off for some time, due to the amount of equipment damaged.

XEFE-790 has been silent for about 2 years. It was sold in 2022 but appears to have made no progress returning to the air. It is not heard on the Brownsville SDR, and has no web presence, except for a Facebook page that they resumed updating in 2023. It has been removed from the list until such time as there is any reason to believe it will actually return to the air. Same with XERC-790, which has been silent for many years. (We have received contradictory information about the proposed new transmitter site for XERC. One report stated that they planned to diplex with XEB-1220, but the IFT paperwork specifies a new site). XESFT-780, which returned to the air long after their AM and FM licenses expired, appears to be completely off the air now. They have no web presence and are no longer heard on the Brownsville SDR.

XESOS-730, which had turned their AM off (again!) before last year's Log was published, returned to the air by 10/22, probably after being caught by the IFT again. They have a continuity order to keep the AM on the air. The same is true for XEEB-760 and XERLA-940, both of which returned to the air 4/23 after being silent several years as noted in the table above.

The web stream for XESJC-660 (the only web presence the station has ever had) now plays automated music with "La Radio de Sudcalifornia" liners after each song, exactly as heard on XERLA-940. The same has been true of the web stream of XELBC-730 (actually XHLBC-95.7; it's unclear if they ever actually broadcasted on AM) for several years. The web pages for XESJC and XELBC are essentially identical except for the logos. The two web streams do not play the same music. XERLA-940 has never had a web presence. It would appear that the government of BC Sur supplies basic automated programming for radio stations around the state to use as needed, but as these stations are all run in secrecy, it is difficult to know exactly what is going on. One has to wonder about the usefulness of a station that plays endless music with no news, weather, or other local information.

XESPN-800, XEMBC-1190, and XEBG-1550, which left the air 5/22, returned 11/22 under new ownership. They have been running a few hours of civic/political talk in the afternoons, and automated music (not the same songs on each station) the rest of the time. The two Tijuana signals quickly deteriorated – particularly XESPN, which was broadcasting a loud hum with almost inaudible audio. In the spring of 2023, they finally added some slogans and branding. By 7/23 XESPN's audio quality had finally improved, but they also announced that their (day) power was now only 500 w, down from 1 kW.

XEAAA-880, which was reported by one DXer as returning to AM last year, was confirmed by a local DXer in Guadalajara as being off. A DXer in the Guadalajara area has posted several videos in the past year showing that several of his local stations go off the air (at least occasionally) for a few hours in the middle of the night. Such silent periods for US stations have been almost non-existent the past 30 years.

XEMYL-1000, which had been silent since 2020 due to COVID-related economic pressures, officially turned in its AM license 5/23.

XEVS-1110, which had been reported as still active on AM despite not being logged by DXers for years, confirmed via Facebook message 6/23 that they no longer transmit on AM. The same is true for XETL-1390.

XEPVJ-1110, which had turned off their AM in 2020, thinking it might be a temporary measure during the pandemic, never turned the AM back on. XEPUE-1210, which migrated to 104.3 FM several years ago, is also reported to have turned off their AM back in 2020.

XEUU-1080 is now a daytimer.

XEVILL-650 is operating sporadically and/or with very low power on AM. A lease agreement ended, and the station now has no web presence.

As the Acústik network begins to get some of their CPs from the 2017 auction on the air, the 3 original stations for this network continue to struggle. XEJP-1150 had been operating only a few hours a day but appears to be back to full-time Acústik network programming as of 7/23. XEUNO-1120 was running long sets of music with no IDs 3/23, and XEMN-600 has been off the air since about 9/21, their license having expired sometime prior to 7/19. Ironically, the IDs that have been heard on the newly-built stations have all come from the network feed, and only mentioned the 3 original stations. XEFB-630 has apparently replaced the defunct XEMN-600 as the Monterrey affiliate, but the pre-recorded network IDs were not immediately updated to reflect this, and XEFB-630 just returned to the air at the end of 7/23 after being silent for most of the last 2 years. Raymie Humbert reports that Radio Rural Mexicana, winner of several social/community licenses last year, is connected to Acústik. It is conceivable that a few years from now, there might be enough Acústik stations on the air to allow DXers to check for parallel signals to help ID them.

Grupo Mega Radio in Ciudad Juárez continues its slow decline. Most or all of its stations in this market have been operating on expired licenses for several years. They have lost all court appeals and been ordered to shut the stations down. All of their individual station web sites have been shut down (domain names not renewed) except for XEZOL-860 and XEWR-1110. XEJPV-1560 has been leased to the Catholic diocese and is airing the Guadalupana programming formerly heard on XEWG-1110 and XEWG-1240. Web streams were still active for the surviving stations as of 7/23. Grupo Siete's XEWG-1240 is airing the Radio Crystal programming that used to run on weekends on its former sister station XEROK-800, which has been permanently shut down (XEROK's abandoned transmitting facility was reportedly later destroyed by transient migrants).

The Herald Radio network has lost some affiliates. XEPE-1700, which had been abruptly turning off their transmitter in the early evening hours and remaining off overnight throughout the winter of 2022-23, suddenly dropped Herald Radio programming and reverted to the PSN feed in late 2/23. This means that at any given time, if all of the stations involved are on the air, there are now 6 stations in the Tijuana-Puerto Nuevo market simulcasting the political speeches of the cronies of Baja California's now former governor (and infamous rogue radio station operator) Jaime Bonilla Valdez: XESS-620, XESDD-1030, XEAZ-1270, XEC-1310, XEXX-1420, and XEPE-1700. Prior to the return of XESPN-800 and XEBG-1550, which now air some civic news and talk programming, the former governor was seemingly on the brink of establishing a monopoly for local radio news and political talk in Tijuana. Interestingly, both XESS-620 and XESDD-1030 have been silent since at least 5/23, so perhaps the cost of running the same programming on 6 stations with almost no revenue (except for occasional paid religious programming) is finally catching up with the former governor?

XEWW-690 has been stunting for about two years, running their massive 77 kW day/50 kW night signal playing rather awful obscure rock music with no ad revenue. This is seemingly pointless, and a massive waste of money, since Mexican licenses are granted for 20 years, and a station does not lose its license after being silent a designated amount of time the way US stations do (we have seen cases where stations return to the air after more than a decade of silence). Sometime around 6/23, XEWW applied for permission to get English language news, talk, and sports programming from the US, so if this application is approved, we may finally see a new format on this station fairly soon.

The RTV Guerrero network, which had unintentionally allowed all of its AM and FM (and TV?) licenses to lapse at the end of 2021, has had new licenses granted for 4 AMs, 2 FM, and 2 TV stations. The reinstated AM licenses are for XECPCG-820 (ex-XEGRC), XECPCP-870 (ex-XEGRO), XECPOG-1100 (ex-XEGRM), and XECPTG-1310 (ex-XEGRT).

Licenses continue to be granted for social/community stations. Once again, there is a lot of activity in Guanajuato:

Freq	Call	State	City	Licensee/Notes
560	XECSAX	QROO	Chetumal	Fundación Educacional de Medios; replaces XEQAA, which moved to FM years ago.
840	XECSCN	GJTO	Celaya	Radio Lacustre; replaces XEFG, which moved to FM many years ago.

Freq	Call	State	City	Licensee/Notes
????	XECSEP	PUEB	Puebla	Carlos Martínez Macías, Fundación Educacional de Medios, Radio Cultural de Zapotlán. Another bureaucratic foul-up by the IFT results in another duplicate call letter assignment (these calls are in use on 1230 kHz in Culiacán). Frequency unknown, but likely one of the frequencies vacated recently in this market by stations that finished migrating to FM. This station has not yet appeared in the official IFT station list as of 7/23.
????	XECSJG	JAL	Guadalajara	Carlos Martínez Macías, Fundación Educacional de Medios, Radio Cultural de Zapotlán. Frequency unknown, but probably one of the many excellent AM frequencies which have been abandoned by stations migrating to FM in recent years. This station has not yet appeared in the official IFT station list as of 7/23.

Raymie Humbert reports that Radio Lacustre, Radio Tonatiuh, Radio Metro Misión Potosina, and Radio Comunicación Purépecha, which have been awarded a total of 10 AM licenses in recent auctions, are all connected to Media Group of Michoacán, operator of 5 existing AM stations which have reportedly struggled to stay on the air.

The CP for XESMA-1280, a social community station to replace XESQ which had moved to FM several years ago, was surrendered 5/23.

As reported previously, the Hidalgo state radio/TV network lost the licenses for all of their stations. In a post to their Facebook page, they tried to blame the previous administration for their own failure to renew their licenses but provided no clear evidence to support this claim. All 10 surviving stations, including the lone surviving AM, XEHGO-1010, went off the air in melodramatic fashion, after a 20-hour marathon "goodbye" program scheduled for 28 Nov 2022. Some residents of the state reportedly asked the federal Human Rights agency (CNDH, well known to DXers for their many public service announcements on AM stations around the country) to investigate the loss of these stations. We have since learned that XEHGO-1010 has obtained a new license (with new calls XECPHH) and has just returned to the air as this edition was being compiled (8/23).

Lastly, here are the AM affiliates (where known) for the LMB (Liga Mexicana de Beisbol) in 2023:

Team	City	Stadium	Known AM Affiliate(s)
Acereros de Monclova	Monclova, Coahuila	Estadio Monclova	XEGIK-560
Algodoneros de Unión Laguna	Torreón, Coahuila	Estadio de la Revolución	(FM only)
Bravos de León	León, Guanajuato	Estadio TV Cuatro Domingo Santana	None?
Diablos Rojos del México	Iztacalco, CDMX	Estadio Alfredo Harp Helú	XEX-730, XEW-900
El Águila de Veracruz	Veracruz, Veracruz	Parque Deportivo Beto Ávila	XEQT-800
Generales de Durango	Durango, Durango	Estadio Francisco Villa	(FM only)
Guerreros de Oaxaca	Oaxaca, Oaxaca	Estadio Lic. Eduardo Vasconcelos	None?
Leones de Yucatán	Mérida, Yucatán	Parque Kukulcán Alamo	(FM only)
Mariachis de Guadalajara	Zapopan, Jalisco	Estadio Panamericano	XEDKT-1340

Team	City	Stadium	Known AM Affiliate(s)
Olmecas de Tabasco	Villahermosa, Tabasco	Estadio Centenario Orsan	(FM only)
Pericos de Puebla	Puebla, Puebla	Estadio Hermanos Serdán	XEZT-1250
Piratas de Campeche	Campeche, Campeche	Estadio Nelson Barrera Romellón	XESTRC-920
Rieleros de Aguascalientes	Aguascalientes, Aguascalientes	Parque Alberto Romo Chávez	(FM only)
Saraperos de Saltillo	Saltillo, Coahuila	Estadio Francisco I. Madero	XESAME-930
Sultanes de Monterrey	Monterrey, Nuevo León	Estadio Mobil Super	XET-990
Tecolotes de los Dos Laredos	Nuevo Laredo, Tamaulipas/ Laredo, Texas	Parque la Junta / Uni-Trade Stadium	(FM only, but substantial chunks of game broadcasts can be heard on XEZOL-860)
Tigres de Quintana Roo	Cancún, Quintana Roo	Estadio de Béisbol Beto Ávila	Possibly XECPR-660, XECTL-860 (games are carried on XHCBJ-101.9, which these two AMs may simulcast).
Toros de Tijuana	Tijuana, Baja California	Estadio Chevron	(FM only)

#### GENERAL NOTES:

The issuance of CPs for existing AM stations to move to FM has seemingly stopped, as almost everything that can be done to make room for existing AMs on the FM dial has been done. A few cases remain where a station that had missed the earlier opportunity to move to FM (usually for failing to pay the appropriate fees) may still apply for FM migration at a future date if an FM allocation is available. In a few markets with congested FM dials, a station that had not initially been granted an FM allocation was granted one later, after the original grantee failed to follow through.

Mexico's FM migration was ***not*** an effort to vacate the AM band. We know this for at least 3 reasons:

1. It would be impossible. Even after changing the required spacing for FM stations from 800 kHz to 400 kHz, it was obvious from the start that markets such as Mexico City, Guadalajara, Puebla, etc., would not have enough available FM slots to allow all existing AM stations to move.
2. Existing AM licenses that are vacated by stations moving to FM are put up for auction, and several dozen CPs have already been issued to new licensees for vacated AM stations during multiple auctions.
3. Applications for brand-new AM licenses are still being accepted and granted, and new AM allocations are still being added. In addition to the periodic IFT auctions, social/community applicants can seemingly file new applications at any time.

The purpose of the FM migration was to maximize the utilization of the FM band (where license fees are substantially higher, thereby maximizing government revenues), while auctioning off the old AM licenses (to generate a little more revenue) in case anyone wanted them. The area between 106 and 108 MHz has been allocated for social, community and indigenous stations, and wherever possible, commercial stations in this frequency range are being moved to lower frequencies on the FM dial.

Musical formats have evolved quite a bit over the years, and the lines between the different formats seem more blurry than ever. Even the stations themselves often use two or three different terms in describing a single format. Norteña music seems much less prevalent than it was 25 years ago and is often lumped in with ranchera. The Romántica format, which used to be indicative of multiple

acoustic guitars and beautiful harmony singing, now often consists of shallow adult contemporary or dance club music. The Grupera format can range from sophisticated musical arrangements with talented brass musicians (occasionally similar to the traditional Tropical format) all the way down to cheap synthesizer music, with all the brass instruments replaced by embarrassingly bad electronic imitations. Your editor's choice for best Mexican music is XEB-1220, and for best overall music programming is XECCBI-1370. Also commendable is XEARZ-1320, which runs a classic "beautiful music" format as used to be popular in the US 50 years ago, though there have been some reports that a format change is pending there.

National newscasts are far more common today than they were even ten years ago, and government PSAs airing nationwide often promote tourism in individual states that need help bolstering their tourist industry. DXers with little or no Spanish language skills are especially cautioned not to fall into the bad habit of hearing (for example) "mentions of Chiapas" on a station and concluding that the station heard was the one in Chiapas. Mis-identification of Mexican stations by DXers with poor Spanish language skills is more common than many of us would like to believe.

Information in this Log (and the supplemental spreadsheet described below) is updated to **August 17 2023**. Thanks to all the DXers who report their loggings to the IRCA, NRC and ABDX. Those loggings were used to help verify slogans and FM migration status. Some data, especially night powers and the status of several stations allegedly still on the air in BC Sur, continue to be elusive. We are still looking for volunteers to help research station hours of operation and national anthem versions. This can be accomplished by monitoring station web streams, SDRs, or the stations themselves if they are audible from your location. Interested DXers are encouraged to contact the editor for details.

**SUPPLEMENTAL SPREADSHEET** – With this edition of the Mexican Log we are once again adding a spreadsheet with supplemental information that may be useful to DXers trying to identify weak signals from Mexican stations. This spreadsheet comes from the editor's personal station list. It shows the URLs (when known) for each station's web page, live stream, Facebook page, and program schedule page (if any), as well as any phone numbers found on those pages. The links can be especially useful for DXers using SDRs on their own laptops, to quickly check a web stream (or program name) to see if it matches a signal being heard on the radio. Phone numbers can be useful since they may be numerically close to the numbers heard in the station's ads. Although México is on the same area code system as the US and Canada, phone numbers are often still recited in traditional Latin American fashion, one or two digits at a time (eg, "5-55-12-12" instead of "555-1212"). Users are cautioned that we have occasionally found station web sites to be hacked, and it is the sole responsibility of each user to ensure they have adequate virus protection on their computers before clicking on any link in this spreadsheet. A good number of these URLs change each year, due to web site overhauls, re-branding, changes in a station's choice of streaming vendors, etc. The spreadsheet also reflects the editor's efforts (through DXing with beverage antennas in Chula Vista CA and near Baker NV, as well as monitoring station web streams and listening to the Brownsville, Texas and Juriquilla, Querétaro SDRs) to learn what type of national and/or state anthems each station plays in the morning and evening (typically, but not always, around 6 am and/or Midnight local time). With some frequencies having only a few stations left, knowing the type of anthem played on each station can be valuable in helping to identify the station being heard. Users are cautioned not to employ this technique on Sunday evenings, when most stations air a common version of the national anthem from the National Hour program around 11 pm local time, and to remember that there are a few US stations such as KNRV 1150 and KNUV 1190 which also air the Mexican national anthem as part of the Radio Fórmula network feed from México. (Non-Spanish speakers are warned in general not to use web streams to identify stations heard on Sunday nights, as most stations across the nation air the National Hour and other government-supplied programming, especially during the 10 pm Central Time hour, which may lead to mis-identification). Finally, we have noted that web streams for Mexican stations may perform very poorly (excessive buffering), have extended outages, be well out of synch with the on-air broadcast, and not work on mobile devices. While updating the URLs for the 2021-22 edition and beyond, we noticed a bug in the

web streams of stations that use iHeartRadio for their streaming services. When you click on a link, like the ones in our spreadsheet, the web site fails to take you to the requested URL, landing instead on a generic help page and giving false information about your browser version being out of date. Pasting the same web address directly into the browser's address bar works, but even that may sporadically fail from one attempt to the next. This bug has now existed for multiple years, so we doubt that it is going to be fixed. For these stations we attempt to provide alternate links when available. Also, please note that (just as in the US and Canada), iHeartRadio web streams often cut away from the station's actual programming during ad breaks (and top-of-hour ID breaks!), substituting ads that are local to the listener's perceived location. For such stations, SDRs may be more useful than the stations' live streams (or perhaps using a VPN that allows one to pretend to be in some distant part of the world, for which no local ad content would be available?).

**NOTES FOR SUPPLEMENTAL SPREADSHEET:** The following abbreviations are used in the "WEB", "LIVE", "FB" and "SCHED" columns:

- Defunct - Last time we checked, web site was no longer there (or owner had not paid annual domain registration fees?).
- DJ - The station does not seem to have a current Facebook page; the page in this link belongs to an individual announcer.
- EMPTY - The last time we checked, this web page was essentially "empty" (contained no useful information).
- FB - (LIVE column): This live stream must be accessed via Facebook.
- FM - This site is for the station's FM, and may or may not contain useful information about the AM.
- IHR - This live stream is on iHeartRadio, and has the bug described above; try mouse-copying the URL into your browser.
- INDIV - Station has set up an individual Facebook page instead of a business page.
- MENU - This feature is reached via a menu on the given web page.
- NET - Page or live stream is for the entire network or ownership group, not just this station.
- NEWS - The page is for the station's news department.
- NG - The last time we visited this URL, it was not working. Generally this implies the page has worked in the past.
- STALE - The last time we checked, this site seemed well out of date. Watch for format/slogan changes and new pages.
- UC - Web page was under construction the last time we checked.

We welcome your comments, suggestions, additions, and corrections regarding this list. Please write to Mexican Log editor Tim Hall at [TimHall1@gmail.com](mailto:TimHall1@gmail.com). Thank you!

Active on AM as of 3/23 (logged by DXer), but may be operating intermittently. Station confirmed 7/23 that the AM was on. The station has aired German and native language programs in the evenings. The current (8/20) schedule on the station's web site lists a broadcast day of 1100-0800, with Mennonite programming in the evenings (6:50pm-11pm local time).
■		GNAY	Nay	Tepic	2500	150	Nayarit Comunica, Radio Nayarit, La Radio Cultural [del Estado] de Nayarit	1300<0705	CLA/CUL/VAR		//XHTNY 100.3FM (testing 1/23). Still active on AM 2/23 (logged by DXer). Pre-recorded IDs and slogans are often played over Mariachi/folkloric music which often includes a shout of "Viva México!" Frequently gives automated time checks (male and/or female voices) punctuated by an 8-note Westminster-style grandfather clock chime. IDs frequently as "XEG-Nay." Schedule on web page indicates they operate from 6am-12:03am local time, but web stream monitoring indicates the station is on the air before 6am. Had been reported as directional during the day, but their new antenna (7/19) is a single tower, and a review of their license 7/23 confirmed that the station is non-directional (as with most Mexican licenses, the night power was missing).

Automated time checks are followed by two short musical notes. Online schedule covers 6am-10pm, but the station is on until at least Midnight.
☐	730	CSBU	BCS	Loreto	10000		Radio Rural Mexicana				CP (2022) for new station to replace XELBC, which was supposed to stay active on AM per IFT decision, but may never have been active in AM in the first place.
☐		HB	Chih	Hidalgo del Parral	50000	1000	La Mas Picuda 104.7	24h?	VAR/GRU	RAMA	//XHEHB 104.7FM (ex-107.1FM). Staying on AM per IFT, and still active on AM per 2021 IFT audit. Logged by DXer 6/23.
☐		X	DF	México	60000	60000	W Deportes, TDW	24h	SPT	W	No FM. No longer //XEHL 1010AM. Still active on AM 7/23 per local monitoring. U3 Antenna?
☐		SOS	Son	Agua Prieta	25000	300	La Ranchera 97.3	24h?	VAR	RCN/ZER	//XHSOS 97.3FM. Reactivated AM approximately 10/22, probably after being caught off the air again. Still active 7/23 (logged by DXer). Evening program is called "Báilale."
☐		PET	Yuc	Peto	10000		La Voz de los Mayas	1200-0000	IND/MEX	INPI	//XHPET 105.5FM. Programming in Spanish & Maya languages. Very distinctive time check: 6-note acoustic guitar theme, followed by hour and minute in Maya and Spanish, followed by longer guitar theme. Staying on AM per IFT, and still active on AM 8/21 per IFT audit, but the AM license was put up for auction by the IFT 8/19 (there were no bids).
☐	740	QN	Coah	Torreón	10000	1000	105.9 FM Grupo Fórmula Torreón, Radio Fórmula	24h	NWS/TLK	ORF1/ORFT	//XHQN 105.9FM. Staying on AM per IFT, still included in 7/23 IFT list, and still active on AM 8/21 per IFT audit (logged by DXer 11/22). Web stream noted running Trión programming overnight (at least on weekends), abruptly cutting back to ORF1 feed at 6am local time with no anthem or ID (station almost never IDs).
☐		VAY	Jal	Puerto Vallarta	1000	1000	92.7 Mix, 80s, 90s, y Más	SILENT	CHR/INT	ACIR	//XHVAY 92.7FM. Still active on AM 8/20 (confirmed by station employee, who said they planned to stay on AM for the long term), but went silent 8/22. Still included in 7/23 IFT list. Top-of-hour IDs are rare, and usually about 5 minutes late, but they still include XEVAY 740AM (1kW) as of 7/23. Most liners read the slogan as "92 punto..... Siete-mix." Announcers in liners no longer pronounce V in call letters as UV ("oo-veh") and Y as "yeh." Runs Panorama Informativo morning news block from Noticias 88.9FM in México City 6-10am.
☐		POR	Oax	Putla de Guerrero	5000	1000	Te Prende Radio 98.7	1200-0130	NWS/VAR/GRU		//XHPOR 98.7FM. Staying on AM per IFT, and still active on AM 8/21 per IFT audit (logged by DXer 4/21). Still included in 7/23 IFT list. Facebook cover photo still actively promotes AM 740 7/23, but the AM has not been mentioned in Facebook posts since 2022.

Still active on AM 7/23 per local monitoring. Despite creating a web site and Facebook page with the call letters XERAG for its "Radio Alegría" program, the call letters remain XEABC. ABC Radio (and this station in particular) are struggling to update their branding and formats.

☐	760 EB	Son	Ciudad Obregón	5000		La Zeta 98.5, La Música de tu Vida, Uniradio	24h	POP:E/S	RAMA	//XHEB 98.5FM. AM returned to the air 4/23. Moved to FM years ago (confirmed by station, and by 8/21 IFT audit), but was ordered to put the AM back on the air in 2023. CP issued to "move" the AM to a new site (presumably the existing FM site?). CP for the "move" specifically lists the station as a 5kW non-directional daytimer (previously they had a small night power authorization).
☐	NY	Son	Nogales	5000	100	Radio Geny	24h	EX/ROM/BAL:E		Station already had an FM station before the migration, and appears not to have been included when FM frequencies were allocated for most Nogales AM stations in 2018. Still active on AM 10/20 (logged by DXer).
☐	770 ML	Mich	Apatzingán	5000	1500	La Ranchera 98.3 FM 770 AM	1200-0602	RAN/CAT	PM/RASA	Staying on AM per IFT. Still active on AM 7/23 per local monitoring and included in 7/23 IFT list. Many ads for agricultural insecticides and local medical clinics. Web stream is constantly interrupted by "local" ads for businesses closer to the listener's perceived location, similar to what is experienced on iHeartRadio web streams.
☐	ACH	NL	Monterrey	25000	1000	Radio Fórmula [Monterrey/7-70]	24h	NWS/TLK	ORF1	No FM. Still active on AM 10/22 (logged by DXer) and included in 7/23 IFT list. Signal seems much weaker than in past years.
☐	ANT	SLP	Tancanhuitz de los Santos	10000		La Voz de las Huastecas	1200-0115	IND	INPI	Still active on AM 6/23 per SDR monitoring. Long ID (over 2 minutes) usually given around 1209 UT. Programming in Spanish, Náhuatl, Pame & Tének languages.
☐	FRTM	Zac	Fresnillo	10000	1000	W Radio		VAR	W	//XEW 900AM, at least at times. Often runs same 4-note descending arpeggio as XEW around the top of the hour. New station started regular schedule 12/20; replaced XEIH which moved to FM years ago.
☐	780 XY	Guer	Ciudad Altamirano	2500	1000	La [Poderosa] Voz del Balsas	24h	VAR		Confirmed active on AM 7/23 by local listener. It had abandoned its FM migration to XHXY 89.5FM (it had to stay on AM per IFT either way). Still included in 7/23 IFT list, but the station's web site is gone (as is the web site of co-owned XERY 1450AM).
☐	CSCF	Jal	Autlán	5000		Radio Rural Mexicana				CP (2022) for new social/community station to replace XELD, which has already turned off its AM. License lists 5kW day power, and states the station cannot operate at night because this has not been negotiated with the US FCC (XELD had a small night power authorization, possibly 250w or 500w). Not using XELD's old facilities.
☐	GLO	Oax	Guelatao de Juárez	10000		La Voz de la Sierra Juárez	1200-2400	IND	INPI	//XHGJO 88.3FM. Still active on AM 2/23 (logged by DXer). Night power in recent years has seemed much higher than 750w, but loggings of this station seemed to stop shortly after the audit, and the current status of the AM is unclear. ID on web stream is FM only 8/23.
☐	GAJ	Jal	Guadalajara	250	250	Radio Fórmula	24h	NWS/TLK	ORF1	No FM. Still active on AM 5/21 (logged by DXer) and included in 7/23 IFT list. Directional antenna? Presumably due to their unusually low power, the station's pre-recorded ID liner contains the unusual phrase, "...operando con la máxima potencia autorizada." Transmitter location unknown.
☐	CSCI	Tab	Villahermosa	-1	-1	Álvaro Hernández Hernández				CP (2021) for new station. City of license not specified on 6/21 IFT list, and still missing on 8/22 list; presumed to be a replacement for XEVA Villahermosa, which moved to FM.
☐	800 SPN	BC	Tijuana	500	-250	Norte 800 AM, Esquina 32	24h	NWS/TLK/REG/EX		Returned to the air under new ownership 11/22 after going silent 5/22. Severe audio problems under new ownership were resolved by summer 2023, but power was reduced to 500w per announcements 7/23. No FM. Transmitting antenna for both XESPN and XEBG is assumed to be the antenna on top of their studio building.
☐	ZV	Guer	Tlapa	5000		La Voz de la Montaña	1300-0100	IND	INPI	To be //XHCPCF 92.3FM (2023 CP). Still active on AM 5/21 (logged by DXer). Programming in Spanish, Náhuatl, Mixteca & Tlapaneca languages. Pre-recorded top-of-hour ID by female announcer is spoken over music from a blatty brass band.

☐	QT	Ver	Veracruz	1000	1000	La Poderosa 106.9 FM	24h	REG/GRU	RAMA	//XHQT 106.9FM. Allegedly still active on AM (confirmed by station 9/22 and 7/23, and web stream ID still includes AM 7/23), but they had turned in their AM license 5/22, and have been excluded from all subsequent IFT lists. Transmitter location unknown.
☐	810 EMM	Gjto	Salamanca	1000	500	La Salmantina 810, La Mas Prendida	1200-0602	VAR		No FM. Confirmed active on AM 7/23 by local listener, and included in 7/23 IFT list.
☐	CSAA	Mor	Cuernavaca	-1	-1	Instituto Michoacano de Radiodifusión, A.C.				CP (2020) for new station. CP on 1610 in 6/21 IFT list (unspecified city in Michoacán) had the same call letters, but that station is not present in recent IFT lists, and was likely a typo.

Still active on AM 7/23 (confirmed by station), and AM is still included in 7/23 IFT list. Facebook page now mentions AM again. Early morning show "Tropimañana" includes "rooster" sound effects between songs produced by a novelty store rubber chicken. Logged by DXer 2/22. Station takes a lot of requests, and runs many live and pre-recorded announcements which often recite the station phone number in an unusual manner: 9-87-87-2-0-9-48. info@sol899.com.

Still active 7/23 per local and SDR monitoring (seemingly without a license, as it has not been found in IFT lists since at least 10/20). Facebook page still mentioned AM 810 7/23.
☐	820	ABCA	BC	Mexicali	3500	500	La Ke Buena	24h	GRU	TVR	//XHABCA 101.3FM. Staying on AM per IFT per renewed order 9/21, to avoid leaving 2(!) people with no radio/TV coverage due to the reduced range of the FM. Still active on AM 2/23 (logged by DXer). Staying on AM per IFT, and still active on AM 8/21 per IFT audit (logged by DXer 7/22). Still licensed per 7/23 IFT list, but this AM license was included in the IFT-8 auction, and the AM is likely to have been turned off, even though it should not have been. Mutimedios web player page, which lists other active AMs, no longer lists XELN. Station almost never IDs, but they frequently give their (FM only) slogan. ## A QUICK GUIDE TO THE SPANISH LANGUAGE

By Bill Hardy, revised by Guillermo Glenn Hauser, 2019

When you hear Mexican radio stations, you may hear letters, numbers and slogans. If you know a little basic Spanish, you'll be ahead of the game. Spanish pronunciation in Mexico is fairly straightforward. While ``long`` vowels in English are actually diphthongs, in Spanish each vowel letter has one pure sound: a = "ah", e = "eh", i = "ee", o = "oh", u = "oo",

Consonants mostly resemble their English language counterparts, with some notable exceptions. "H" is silent. "J" sounds like our "h," but stronger, as in "José". "X" may sound like our "x," as in "éxitos," but in Mexican place names such as México (MEH-hee-koh) or Oaxaca (wah-HAH-kah), it sounds like our "h." "ñ," enye, has the "ny" sound of "Señor" (seh-NYOR). Double "l" sounds like "y," as in "Vallarta" (bah-YAR-tah). "B" and "V" sound the same in two different ways depending on whether they are initial in a word: like our B; or amid a word, like our V. R is slightly trilled especially if initial, and more trilled if double. Like "radio" (RAAH-dhee-oh). D unless initial sounds like "th" in our word "the". Better rendered as "dh", also as in "ciudad" (twice).

The sounds of some consonants depend on the next letter. For instance, "g" can sound like the hard "g" sound of "Gómez" (ga, go, gu) or our soft "h" sound of the Spanish "j" (ge, gi). "C" can sound like "k" (ca, co, cu) or "s" (ce, ci). "Cu" plus a vowel (cua, cue, cui) makes a "kw" sound, as in "frecuencia." "Ch" equals English "ch," as in "mucho." "Qu" (que, qui) sounds like "k".

Accents in Spanish are very regular. A word ending with a vowel (a, e, i, o, u), or "n" or "s," is stressed on the next-to-last syllable, such as "cinco" (SEEN-koh) or "Variedades" (bah-ree-eh-DHAH-dhehs) without any acute accent mark. Words ending with any other consonant are stressed on the last syllable, such as "festival" (feh-s-tee-VAHL) or "Ciudad" (cee-oo-DHAHDH). If a word is stressed on any other syllable, an accent mark is required, such as "éxitos" (EX-ee-tohs).

On this page are charts of Spanish letters and numbers. These should help you pronounce station call letters, plus numbers such as "5-70" (cinco setenta) in the slogan column. Note that B and V sound alike, and there are two ways to pronounce the letters V, W and Y. Also note that numbers 21-29 are compound words and not separated by a "y" (and). This combining applies only to the 20's (21-29)

Letters of the alphabet as they are individually pronounced in callsigns:

A	ah	O	oh	1	uno, una	15	quince (KEEN-seh)	80	ochenta
