National Radio Club's *AM Radio Log* *42nd Edition*

Over the years we have dedicated each edition of the AM Radio Log to a club member, Log contributor or fellow traveler who has served our radio hobby. This year's suggestion for who the Log should be dedicated to comes from Joan. This year we are dedicating the Log to the members of the National Radio Club. NRC members have steadfastly contributed to and purchased the Log, which has kept it viable and a source of income that helps us to maintain the publication of DX News, e-DXN and nationalradioclub.org and all of its historical archives. Thank you, members of the National Radio Club. (Wayne Heinen July 28, 2021)

I have tried to maintain current data, however, our source for calls and frequencies for translators is the FM query at the fcc.gov website. As of press time we are finding postings of active licensed translators can be a few weeks behind. In these instances the call sign for a former frequency may appear and at other times the previous operating call and frequency may appear. I still have some 450+ pending translator construction permits that I am aware of at press time.

New for the 42nd Edition is the reintroduction of the use of an asterisk (*) to the right of a call sign to denote that the station is non commercial. We have also eliminated Stereo Operation and the Dollar sign (\$) that signifies it, as many of the stations that adopted the old stereo AM technology have ceased using it. Please also note the IBOC (M1) which utilizes both an analog and digital signal is taken from the FCC's "list of stations authorized to transmit both analog and digital signals." located at the AM query page. Since the technology hasn't caught on many stations that were using it have ceased using it or use it sporadically. IBOC Only (M3) digital operation with no AM component is indicated in the Additional Powers field.

This edition has received numerous updates by many National Radio Club members and other interested AM radio hobbyists. Special thanks go to David Yocis for his efforts to ensure that accurate Federal Communications Commission data appears in the log. For our Canadian data, a special thanks to Shawn Axelrod, Jon Pearkins and Dan Sys for that information. These were by no means the only participants in this Club effort to continue to bring you the best and most accurate log. Many updates were gathered from the FCC database and many websites of networks and radio stations. However, we still find that many web pages with data are hopelessly out of date. Special thanks goes to Bill Hale and Shawn Axelrod for "mining" much of the data for me to use in updating the da-tabase.

A word concerning "deleted" stations. We leave a station in the AM Radio Log until the station is no longer listed in the FCC's AM Query database. Many "deleted" stations have been known to "reappear" upon a review or appeal of the deletion order. These stations carry the phrase "*Lic Cancelled still in amq*" in the Additional Powers field to indicate that a vestige of the call and the Facility ID still exist. We have a few listed as deleted

due to unpaid FCC debts that have also been left in the book. These could be licensed again, if they get their debt right by the FCC .

We are now also listing stations that DXer's are reporting to us as silent. We have found that many stations are rather lax at obtaining Special Temporary Authority to remain silent. You will find these stations listed as "Reported Silent" with a date in the Hours of Operation field. Stations that are on the FCC's silent list are now listed as "FCC Silent" with the date in the Hours of Operation Field.

This log is updated through DX News Volume 88 Number 18, IRCA's DX Monitor through Vol 58 - No 36. Dan Sys' Canadian Radio News, FCC's AMQ & FMQ through August 1, 2021. The last day for data entry was August 2, 2021.

It is of great importance that the users of the AM Radio Log pass to us changes as they occur. The accuracy of the AM Radio Log's next edition will be due to the input of DX'ers which helps us keep this publication's database up to date. Your input to the next addition can come to us by mail or by Internet e-mail:

How to read the AM Radio Log

Call

The call letters of the station or an indication that it is the Voice of America (VOA) station on 1180 kHz. Calls of stations that have not previously operated on a given frequency contain a #: C#, K# or W# (with a number for database integrity). A small "n" is a nighttime only operation. An * next to the call indicates a non-commercial station.

City of license

City of License, or in certain cases, multiple cities used for legal station identification. These are shown as they appear in the FCC database. Even though you may hear multiple cities announced during an ID, that is usually for promotional reasons. My local KEPN-1600 ID's as "Lakewood-Denver"; Lakewood is the City-of-License, and Denver is the major market that is served. In these instances, the City-of-License must be mentioned first.

Time Zones

A = Atlantic (E +1) or Alaskan (E -4) N = Newfoundland (E +1 1/2) E = Eastern C = Central (E -1) M = Mountain (E -2) P = Pacific (E -3) H = Hawaiian (E -5)
(+) = Does not observe Daylight time

Antenna Codes (See Page vii)

Additional Powers

This column shows powers used in the special hour categories as outlined in the Definitions of Operating Hours section of these instructions. If known, we list PSSA powers here. Those stations that we know have no PSSA powers are also listed as having none. (More on PSSA and psra is listed on page “x”) SX is a synchronous transmitter on the same frequency in the location shown, if there is not a separate listing by the FCC. Also found in this section are Special Operating Authorities designated as STA . The FCC, under certain situations, will allow a station to operate with facilities other than those shown on their license. These include conditions such as lower power non-directional operation in the event of a tower being destroyed.

Application & Permit Codes

Applications for New Stations; Since many of these applications are never approved we have stopped trying to include them in the LOG. This information is available from the AM Switch column in DX News.

New Not on Air; The station has been granted permission to operate by the licensing authority but is not yet on the air.

AP = Application (AP U1 1000/1000) The station has applied to the licensing authority for a change to an on-the-air station . This is the first step in the process. If approved, a Construction Permit will be issued.

CP = Construction Permit (CP U1 1000/1000) The application was approved and the construction permit granted.

FROM: The station has applied for (AP FROM 700) or has been granted a Construction Permit (CP FROM 700) on this frequency; however, it is still currently operating under the frequency listed to the right of the “from”. The call will end with a # sign.

TO: The station currently operates on this frequency and has either applied for the other frequency (AP TO 700) or has been granted a CP for the other frequency (CP TO 700).

Hours of Operation

Listed in 24-hour format. Hours in () are Sunday or days specified.

24 hr All-night operation Silent Period unknown

24 hr M0000-0555 Indicates Monday morning silent period

NSP No Silent Period

FCC Silent Station was off air and on the FCC Silent list

Reported Silent Station was off air per contributor

LSR Local Sunrise

LSS Local Sunset

LSS+ Operates up to two hours after local sunset with a PSSA or LSSA

Groups, // Operation, Slogans, Branding and other notes

//CBK-540 indicates the station is parallel CBK which operates on 540 kHz.

//CFQC 92.9 would be operating in parallel CFQC FM 92.9.

//K268DI-101.5 would be operating in parallel translator. K268DI-101.5

"Talk Radio 630 K How" is the **Slogan or branding** of KHOW-630 radio. Slogans, sometimes referred to as branding, are listed in quotation marks.

Grp= La Cadena Cristiana is a station that is in a larger group of stations that operate in parallel. Most times the group name we have used is also the slogan or branding that the stations uses. These are listed in the Groups section at the back of the book. When you see a Grp= you can reference the individual stations both AM and FM that are in the Groups Section. Although a little cumbersome, the of stations with multiple translators and the proliferation of many regional groups of stations this was the only reasonable solution.

Station Classes

The story of classes of radio stations goes back to the North American Regional Broadcasting Agreement, which divided the (then) Medium-Wave radio spectrum into three groups of stations: one which served large areas (clear channels); those which served a smaller geographic area (regional channels); and a third for small communities and rural areas (local channels).

Although signals in the medium-wave frequencies are absorbed into the ionosphere during daylight hours, hence ground wave DX is limited by strength of signal, its path, and the receiver. But, they bounce off this level of sky at night and travel hundreds, even thousands of miles.

Protection was granted to a select few stations which were designated I-A Clear Channel operations. These stations were allocated to frequencies upon which only one station was authorized to operate at night, and transmitted from a single, efficient tower with a power of 50,000 Watts (50 kW). These stations were afforded protection not only in their primary service area, they were also protected in their secondary service area. Most of these stations, especially those in the middle of the continent, could be heard coast-to-coast. In the late 1960s, it was determined that vast areas of the West which could not receive interference-free primary service from an authorized AM station nor did not receive a signal strength of at least 1 mV/m from an authorized FM station. These areas were called "white areas". A second nighttime facility, designated Class II-A, was authorized on each of these frequencies occupied by a I-A station. These stations were licensed with up to 50 kW day and night but had to protect the I-A station at night. By the early 1990s, the rules had been altered again whereby the former I-A stations received nighttime protection to only 750 miles from their transmitter, and now many stations occupy these frequencies.

All former Class I-A stations are now designated Class A. All newly-authorized nighttime operations on the former I-A channels, however, must protect the Class A stations so none of their signal will enter this imaginary 750-mile circle. In a couple of cases, this limitation has been shortened. Some of the new nighttime authorizations utilize as little as 1 Watt. Only two of the former 1-A clear channel stations operate with directional antenna systems: WWL-870 in New Orleans, Louisiana; and WBZ-1030 in Boston, Massachusetts. In these cases, this decision was elective as both are coastal cities and the signal is directed inland, away from the adjoining bodies of water.

On each of the following channels, one Class A station is authorized in the U.S., operating with a power of 50 kW, non-directional, day and night: 640, 650, 660, 670, 700,

720, 750, 760, 770, 780, 820, 830, 840, 870, 880, 890, 1020, 1030, 1040, 1100, 1120, 1160, 1170, 1180, 1200, and 1210 kHz.

Canadian "Class A" stations are assigned to the following frequencies: 690, 740, 860, 990, 1010, and 1580 kHz.

Mexican "Class A" stations are assigned to the following frequencies: 730, 800, 900, 1050, 1220, and 1570 kHz.

The lone clear channel authorized for the Bahamas is 1540 kHz. Class A, Class B or Class D stations may be assigned on 1540 kHz but are restricted to limiting its signals in the direction of the Bahamas. Also, no station located less than 650 miles from the Bahamas is licensed to operate at night on 1540.

Canada and Mexico do not follow the same guidelines when assigning more than one station on these frequencies. A few Mexican stations on their clear channels have used power levels as high as 250,000 watts.

On the frequencies 680, 710, 810, 850, 1080, 1110, 1170, 1500, 1510, 1520, 1530, 1560, typically two "Class I-B" stations were authorized to operate with 50 kW at night, but each was restricted somewhat by utilizing directional antenna patterns which protected the other station. Other stations on these frequencies either had to reduce power and/or employ a directional pattern so as not to interfere with these stations, or shut down altogether during nighttime hours. Former Class I-B stations have also been designated as Class A. Class B and Class D stations are licensed on these frequencies.

Several frequencies were designated as shared clear channels. They are: 540 (Canada and Mexico), 940 (Canada and Mexico), 1000 (U.S. and Mexico), 1060 (U.S. and Mexico), 1070 (U.S. and Canada), 1090 (U.S. and Mexico), 1130 (U.S. and Canada), 1140 (U.S. and Mexico), 1190 kHz (U.S. and Mexico) and 1550 (Canada and Mexico). On these frequencies, the designated countries were allowed to assign "Class I-B" stations, with the only restriction being they could not interfere with stations on the same frequency in the other country.

Even older stations on the regional channels received some degree of protection. Stations on these frequencies were limited to 5 kW of power. Although these regional channels were populated by 60-70 stations, only a few were authorized to operate at night. Most employed multiple tower systems to direct their signal away from the few other stations authorized on those channels at night. The majority of stations on these channels were licensed to operate during daylight hours only and were called "daytimers". Lobbying on behalf of the Daytime Broadcasters Association in the 1980s resulted in the authorization for almost every station on these regional channels to operate at night but with very low power, typically from 10 to 100 Watts. Today, a few stations on regional channels have been authorized to operate with up to 50 kW but must employ highly directional antenna systems, especially at night. Regional channels are 550, 560, 570, 580, 590, 600, 610, 620, 630, 790, 910, 920, 930, 950, 960, 970, 980, 1150, 1250, 1260, 1270, 1280, 1290, 1300, 1310, 1320, 1330, 1350, 1360, 1370, 1380, 1390, 1410, 1420, 1430, 1440, 1460, 1470, 1480, 1590, 1600, and the new "expanded band" of frequencies (created in the mid-1990s) from 1610 through 1700 kHz. The majority of stations in the expanded band operate non-directional with 10 kW daytime and 1 kW nighttime.

The need for local radio service reached many small towns and the "Local Channel" was created. The six local channels are 1230, 1240, 1340, 1400, 1450, and 1490 kHz. Originally, these stations were authorized 250 Watts day and night, non-directional. But even these low-powered stations have seen change. In the early 1960s stations on the local channels were authorized to increase their daytime power to 1000 Watts while nighttime operation was limited to 250 Watts. Then in the 1980s, they were allowed to leave their

1000 Watts radiating 24 hours a day. The theory was that they were only going to interfere with one another. Even with their maximum power, signals on these frequencies rarely are heard greater than 20-30 miles. However, during rare opportunities, some of these stations have been logged by DX'ers several hundred miles away. There are a few U.S. stations on these Local Channels which use directional patterns, but generally they are in the Northeast where stations are spaced closer than other areas. Also, there are some Canadian stations on these frequencies which are authorized higher powers but also must utilize highly directional antenna patterns to avoid interference.

In 1987, all AM radio stations in the U.S. were classified as A, B, C, or D.

Class A

A "Class A" station is an unlimited-time station that operates on a clear channel and is designed to serve a primary and secondary over an extended area at relatively long distances. Its primary service area is protected from objectionable interference from other stations on the same and adjacent channels, and its secondary service area is protected from interference from other stations on the same channel. "Class A" stations must use not less than 10 kW, nor not more than 50 kW.

Class B

A "Class B" station is an unlimited time station which is designed to serve only a primary service area. "Class B" stations are authorized to operate with a minimum power of 0.25 kW (or, if less than 0.25 kW, an equivalent RMS antenna field of at least 141 mV/m at 1 km) and a maximum power of 50 kW, or 10 kW for stations that are authorized to operate from 1610-1700 kHz. There are some "Class B" stations in Canada on the "Local Channels".

Class C

In the U.S., all stations on the Local Channels are "Class C".

Class D

"Class D" stations operate either daytime, limited time or unlimited time with nighttime power less than 0.25 kW and an equivalent RMS antenna field of less than 141 mV/m at one km. Class D stations shall operate with daytime powers not less than 0.25 kW nor more than 50 kW. Nighttime operations of Class D stations are not afforded protection and must protect all Class A and Class B operations during nighttime hours.

Antenna Codes by Bill Hale

The National Radio Club's use of letter-number designations goes back several decades when it was apparent that a need arose to standardize reporting stations' facilities. All of these combinations are used in the NRC's AM Radio Log.

These letter/number combinations are an NRC 'invention', we'll call it, and have been widely accepted and used in the DX community. The FCC has its own set of identifiers, but they don't cover all the combinations as we do.

The letters D, U, N, L, or ST (the latter three are rare), when paired with a number designates the station's operating hours and its antenna pattern status.

A 'D' means Daytime; 'N' means nighttime; 'L' means limited time (of which there are only a couple of those left); 'ST' means Shared Time. And finally, the one we hear more of currently is the letter 'U', which stands for Unlimited Time operation.

The numbers that follow the letter designate one of 14 different combinations of a station's antenna pattern. See the chart on Page iv which covers them.

Daytime-Only Operation

Let's first look at stations that broadcast during the daytime only. That group of stations is getting smaller in number, but there still are quite a few. Since they are Daytimers, their letter is a 'D'. If the station is non-directional, their number is '1', so we end up with D1. If they use a directional pattern, their number is '3' and that gives us D3. But, wait! What happened to '2'? We didn't forget it, and will cover that later.

Unlimited (Time) Operation

Unlimited Time stations may operate 24 hours-a-day. Their letter designator is 'U'. AM signals, depending on power, can travel up to thousands of miles at night. So, the majority of Unlimited Time stations operate with more power during the day than at night, so as not to interfere with other stations on their frequency.

Nighttime Operation

There are two stations that operate only at night.

Limited Time Operation

Two stations operate during limited periods of time.

Shared Time Operation

This means two or more separate facilities in the same city on the same frequency share time during the broadcast day. The 1240 frequency in Decorah, Iowa is one example of this operation remaining in the U.S.

Critical Hours Operation

The time right after sunrise in the morning and before sunset in the evening is a very critical time for Medium Wave signals. The ionosphere is in transition in the morning and can't decide whether to bounce that radio wave back to earth, as it has been doing all night, or to absorb it as its properties allow when the sun hits it. The same thing happens in the afternoon, only in reverse. The mix of unpredictable skywave with the groundwave signals of a station means that interference to other stations is possible. This is of particular concern when the stations involved cover wide areas, where it may be daylight in one segment and dark in another.

So the FCC has established two periods during this skywave/groundwave mix time. In the morning it's from local sunrise to two hours after local sunrise and in the afternoon from two hours before local sunset to local sunset. This is where the term 'Critical Hours', or as we abbreviate it CH, comes into play in our discussions.

So, so even though they are authorized to operate at their daytime power, they may cause interference to other stations on the same frequency during these transition periods. Not all stations have to worry about critical hours. Some Daytimers also have CH authorizations.

Power Levels

Up until the 1990s, all stations were authorized to operate with powers in steps which were nice and even. Like 250, 500, 1000, 5000, 10000, 25000, and 50000 Watts. And there were hundreds and hundreds of stations that were Daytimers. So let's say a Daytime station with

500 Watts wants to raise its power, but the next step is 1000 Watts. If they were to increase to 1000 Watts, chances are they would cause interference to another station. That's why they have only 500 Watts in the first place.

But . . . if they could raise their power to say, 742 Watts without causing interference, that would give them a better local signal, and not cause interference. So, the FCC has relaxed the rules and made it possible to have a power level of almost any quantity, as long as the equipment is set up in such a way to keep it stable. Older transmitters were factory-built to be 1000 Watts, or 5000 Watts or whatever. But newer transmitters are capable of maintaining power between those old steps at about any level needed. So now, stations can be authorized power levels which just barely fall short of interfering with others during normal daylight hours.

But . . . what happens during Critical Hours? The fact hasn't changed that at 500 Watts everybody was happy. Now during Critical Hours, our 742 Watt station may cause interference to one or more stations. The FCC says that our station must use the original daytime level of 500 Watts during Critical hours. So, our example can sign on with 500 Watts, increase power to 742 Watts at Local Sunrise plus two hours, then at Local Sunset minus two hours they must decrease it back to 500 Watts. If a Daytimer is non-directional, remember they are designated D1 even if they have a CH power.

If a Daytimer is non-directional, and utilizes a directional pattern during the Critical Hours, we designate it as D2. If a Daytimer is normally directional (D3), but uses a separate pattern during CH operation, that's D4!

There's one more category for Daytimers: 'D5'. That's when a daytime station is directional during daytime hours, but non-directional during CH operation. In reality, there aren't many D5 operations, but they do exist, so we track them.

Let's look at some examples: Most of the formerly-designated I-A clear channel stations operate with 50 kW day and night, non-directional. We designate them as being U (for Unlimited Time) and 1 (for non-directional), and of course, their powers are all 50,000 Watts day and night. So they are U1 50000 50000 in the AM Log.

Now, say a station is non-directional during the day and directional at night. Since they broadcast day and night, their letter is 'U' and their number is '2' meaning directional nights only. If a station is directional all hours using the same power and pattern, their designation is 'U3'. Different patterns day and night with the same power? Or same pattern but different power levels day and night? They're both 'U4'.

We've covered the basic group of five daytime-only and four unlimited-time designations. It's when we get into the unlimited-time stations with Critical Hour operations that things get crazy. Unlimited time operation with three different patterns, daytime, critical hours, and nights? That's 'U7'. See the accompanying chart (*Next Page*) for all the codes.

| Code | Day | Night | CH |
|------|-----|-------|-----|
| D1 | ND | - | |
| D2 | ND | - | DA |
| D3 | DA1 | - | - |
| D4 | DA1 | - | DA2 |
| D5 | DA | - | ND |

PSRA/PSSA Authorizations By Bill Hale

Some stations are authorized with two other categories of operation, namely Pre-Sunrise and Post-Sunset. These are commonly referred to as PSRA and PSSA, meaning "Pre-Sunrise Authority" and "Post-Sunset Authority".

First, some history: We all know, medium-wave signals travel greater distances during non-daylight hours. Older, established stations that had been on for years were protected from interference, both day and night. In other words, new stations could be licensed, but were authorized as daytime-only, and would have to protect the coverage areas of the older stations. During the winter in the northern states, some stations were only able to operate seven or eight hours a day. Many of these stations complained that they were at a disadvantage when it came to being able to serve their community during the very lucrative drive-time hours, and weren't able to be there during the critical early morning hours when they were needed.

So they, with the help of their lobbying group, the Daytime Broadcasters Association, got the FCC to relax the rules allowing daytime stations to sign on at 6 AM and/or remain on until 6 PM local time. Naturally, in the summer months here in the Northern Hemisphere, those two periods of time are usually blessed with sunshine, so Pre-Sunrise and Post-Sunset usually is a factor only in the dark of winter. Okay, so now these Daytimers got to sign on before sunrise and stay on after sunset. But that means they will most likely cause interference to Fulltime stations that had been operating during those hours of semi-darkness for years. So the FCC said to these stations, "you can come on at 6 AM and/or stay on until 6 PM, but at a lower power level before local sunrise and after local sunset".

The FCC's rules are very clear when specifying the amount of power permissible during these periods, but interestingly the calculations must only consider the co-channel stations, not the adjacent-channel operations. Neither PSRA nor PSSA can exceed 500 Watts. Initially, when the PSRA and PSSA authorizations were announced, the FCC said that power must be increased and reduced at different levels, determined by the amount of daylight. As an example, say a station's daytime power was 500 Watts and local Sunrise was 7:45 AM. At 6 AM they could sign on with 18 Watts, boost it to 229 Watts at 7 AM, and

come up to full power at 7:45. That caused a lot of problems as a variable adjustment would have to be employed. Remember, this was in an era 30+ years ago, when technology isn't what we think of today, and computers were just being introduced to the broadcast community. The Log has codes for LSRA "Limited Sun Rise Authority" and LSSA "Limited Sunset Authority". These indicate were the station has an Authority, but it is limited in the number of months that it has been authorized. This is done to protect other stations on the channel from interference during these periods.

And all those who contribute their timely loggings to the National Radio Club's DX News Magazine and the International Radio Club of America's DX Monitor!

THE HISTORY OF THE AM RADIO LOG

Formerly called the National Radio Club Domestic Log, the first edition of the National Radio Club Domestic Log was published by mimeograph and hand-typed stencil in Boston in 1968, with John Callarman providing the typing and the original Boston Publishing Committee the hand labor. The second and third editions were published in Boston as the Boston Publishing Committee changed the method of print for National Radio Club publications to commercial offset. A "mid-term" edition was published by the New Jersey Publishing Committee in 1975 and a new edition of the National Radio Club Log in the fall of 1976. The log also underwent another technological change when in 1978 the log information went from 3" x 5" cards to a computerized system. In order for us to keep you abreast of the ever-changing AM dial scene, the logbook is now published annually, just prior to the start of the fall listening season.

The roots of the National Radio Club AM Radio Log, though, date back to the 1930's when RADEX magazine published a log, and the '40's and '50's when the Newark News Radio Club BCB editor Carroll Weyrich produced an annual medium wave log.

The accuracy of an endeavor like the National Radio Club AM Radio Log cannot be guaranteed, primarily because changes occur daily in the vast amounts of information contained in this publication. Network, format, schedule, and address information is very volatile, and since there are no central sources to which all this information must be reported, it requires close monitoring by many people to keep this information up to date. Information from the FCC and from the stations themselves, as well as from you the user of this log, help to keep the information current and accurate.

The National Radio Club publishes DX News 20 times a year. By subscribing to DX News magazine, members will receive important AM station changes within two weeks after we first hear of them during the winter DX Season and weekly year round by subscribing to the stand alone www.e-dxn.com website or the add on feature with a printed subscription.

The National Radio Club is a non-profit organization beginning our 89th year of service by radio enthusiasts for radio enthusiasts. The people who publish the National Radio Club AM Radio Log and DX News magazine, some with many years of background in the professional broadcasting field, are as interested as you are in the need for accurate and fast information. We hope you will consider joining us as we explore the ever-changing world of AM broadcasting and distant reception.

The National Radio Club

Over the years the National Radio Club has gained recognition as a leader among DX clubs. The National Radio Club has pioneered many areas, the offset printing of bulletins, the NRC Domestic Log (now AM Radio Log), numerous books on antennas and receivers, and information books on the hobby. The National Radio Club is still growing and improving, with new books and our on line e-DXN.com.

DX News offers 20 bulletins per year, bi-weekly in winter, monthly in summer, over 750 pages a year of DX and radio information. Our on line version is <http://www.e-DXN.com>.

For a sample copy of the printed DX News magazine please mail \$1 to:

The National Radio Club, P.O. Box 473251, Aurora CO 80047-3251.

For more information on joining the National Radio Club please visit our website:

<http://www.nationalradioclub.org>

We would be happy to welcome you into the National Radio Club family!

Formats

| | |
|----------|---|
| AC | Adult Contemporary current hits |
| AC/EZL | Light Adult contemporary |
| AC/OLD | Adult Contemporary Based Oldies |
| AOR | Album Oriented Rock. Current and Classic Album cuts |
| Beach | Surf Oriented Oldies |
| BIZ | Business Format |
| Brokered | Programming sold to individuals and organizations in blocks. This can include infomercials, ethnic, religious or anything that the purchaser may want to air. |
| C&W | Country & Western |
| CCR | Contemporary Christian |
| CHR | Top 40 Rock |
| CLA | Classical Music |
| CLR | Classic Rock |
| EE | English Language Programming |
| ETH | Programming directed at various Ethnic groups |
| EZL | Also called "Middle of the Road" |
| FARM | Agricultural oriented programming |
| FF | French Language Programming |
| GOS | Gospel (Southern Gospel when used alone) |
| JAZ | Jazz Programming |
| JJ | Japanese Language Programming |
| KID | All Kids Programming |
| NOS | Nostalgia Music of the 30's, 40's, 50's; Big bands, "standards" |
| NWS | News |
| OLD | Oldies (Anything pertaining to Older Rock Music) |
| Polka | Polka Music |
| RAP | Rap or Hip Hop style music |
| REL | Religious Programming |
| REL:AC | Contemporary Christian Music |
| Rock | Rock'n Roll of some form |
| SPT | Sports or Sports Talk Programming |
| SS | Spanish Language Programming |
| Tejano | A mix of English and Spanish language music and announcements |
| TLK | Talk Programming (generally telephone call-in programs) |
| Tourist | Travelers Information and tourist attraction promotion |
| UC | Programming for a Black audience "Urban Contemporary" |
| VAR | Variety (CBC net is a good example) a bit of everything - also "fill in" music or features when a brokered format station does not sell all its time. You never know from one day to the next what they'll do! |

Many specialty and foreign language and foreign music formats are actually spelled out in the format area of the given station. The AM Radio Log is meant to be a DX'ers tool and is not intended to be an ultimate guide to the myriad of formats that have surfaced over the years.

":" indicates a combination of formats or language and format, e.g.=SS:REL would indicate that the station has religion in Spanish.

"/" is used to separate multiple formats and does not indicate day/night formats. e.g., C&W/

CHR

d= day format; n=night format; an = all night e.g., C&Wd/ACn

am = morning programming

About The National Radio Club

Our magazine, DX News, is a must for the serious or casual BCB DX'er and is only available through the National Radio Club. Subscribing to either DX News magazine or e-DXN.com entitles you to membership privileges, including discount prices on many National Radio Club products.

In the early days of radio broadcasting, when the listening audience was comprised of amateur operators, experimenters, engineers and the like, a new hobby had its beginning. DX, in the parlance of telegraphers, meant long distance, and gradually came to mean distant reception as well. The early listener had usually constructed his own receiver, and his big thrill was not just from the news or the music he heard, but the realization that his assortment of glass and wires with a bedspring antenna was really bringing in voices and music all the way from Pittsburgh, Chicago or Los Angeles!

It was a natural development for the hobbyist to tune up and down the dial, logging the numerous stations that could be heard. These stations were eager to hear from their listeners. This was the only way, at the time, that they could learn how well their signal was getting out. Listeners were asked to write letting the station know from where, how well, and under what conditions the station's signal had been heard. In return, stations began sending cards or letters thanking the listener and confirming his or her reception. With the collecting of these verifications (QSL's), the DX hobby was born.

Numerous clubs were formed in those early years for the sole purpose of exchanging information about equipment, antennas, tuning tips and general information about the hobby and the stations. The National Radio Club was one of these early pioneer clubs, getting its start in York, Pennsylvania in 1933, when a small group of DX'ers organized and began to mimeograph a bulletin, DX News. Now after 87 plus years of continuous operation, DX News is still the premier publication for the medium wave (AM) DX'er. Membership soon spread from York to all parts of the U.S. and Canada and now to members around the world.

Over the years the National Radio Club has gained recognition as a leader among DX clubs. The National Radio Club has pioneered many areas, the offset printing of bulletins, the NRC Domestic Log (now AM Radio Log), numerous books on antennas and receivers, and information books on the hobby. The National Radio Club is still growing and improving, with new books and our on line e-DXN.com.

DX News offers 20 bulletins per year, bi-weekly in winter, monthly in summer, over 750 pages a year of DX and radio information. Our on line version is e-DXN.com is a pdf version of DX News emailed to you on the same schedule as the print version.

For a sample copy of the paper DX News please mail \$1 to: The National Radio Club, P.O. Box 473251, Aurora CO 80047-3251. or download the pdf at
