Squares represent 325 miles across and 200 miles up and down. Mark in pencil or ink the approximate location of your own city, then it will be easy to estimate the distance to the station you are hearing.

This map is divided into 100 squares numbered in the left hand upper corner. The first row is numbered from 1 to 10, the next 11 to 20 and so on.

To locate a station on the map, find the number in the column headed "Map Location" on pages 2 to 24 then trace across the row that contains the number and in that square you will find the city where the Broadcasting Station is located.
