5 FEATURES

- 1 Specially Treated Filament**—Providing a steady uninterrupted stream of electrons to the plate and insuring smooth operation.
- 2 Real Mechanical Rigidity**—All parts are held rigidly in position, eliminating vibration and noises which mar ordinary reception.
- 3 High Degree of Vacuum**—An important feature. Ordinary tubes are pumped for 72 seconds. Silvertone Tubes are pumped for nearly 300 seconds.
- 4 Complete Degasification**—After obtaining a vacuum, there remains in the ordinary tube a small quantity of gaseous vapors, causing inefficient operation. These are removed in Silvertone Tubes.
- 5 Best of Materials Used**—Each tube is inspected and tested more than forty times.
