ARBITRON

Arbitron wins \$97,000 settlement in copyright suit

New York, N.Y.- The Arbitron Company has won a \$97,000 judgment in its most recent copyright infringement suit. The company stated that in 1991 it had collected more than \$1 million in settlements and damages from radio and

Licensed Users Only!

If you don't have a license agreement with The Arbitron Company to use the data in this report, you'd better close this book and put it down.

Any use of these data without a valid license from Arbitron is a violation of federal law. Arbitron vigorously pursues ratings pirates. We take them to court and we win big. In 1991, Arbitron collected over one million dollars in settlements and damages from radio stations, newspapers, agencies and advertisers who used our data without benefit of a license agreement.

If there's something in this report you want to read, sign a license agreement first. If you already have a license agreement, don't give *any* copies of these data to people and companies who don't. If we find that you've given Arbitron data to an unlicensed party, you'll be named in a suit for damages.

And if you think you can photocopy a newspaper article and use the data that way, think again. These radio audience estimates are now and forever the copyrighted property of Arbitron. No matter how you get your hands on the estimates, you still can't use them without a license agreement from Arbitron.

Don't be a ratings pirate. It just doesn't pay.

WHAT EMRC ACCREDITATION MEANS

The Arbitron Radio Service has been accredited by the Electronic Media Rating Council since 1968. To merit continued EMRC accreditation, Arbitron (1) adheres to the Council's Minimum Standards for Broadcast Rating Research; (2) supplies full information to the EMRC regarding all details of its operation; (3) conducts its measurement service substantially in accordance with representations to its subscribers and the Council and (4) submits to, and pays the cost of, thorough annual audits of accredited Arbitron services by CPA firms engaged by the EMRC. In addition to sizable audit charges, Arbitron provides office and file space for EMRC auditors as well as considerable staff and computer time involved in various aspects of these inspections.

Further information about the EMRC's accreditation and auditing procedures can be obtained from the Executive Director, Electronic Media Rating Council, 509 Madison Avenue, Suite 1112, New York, New York 10022.

PREFACE

This report is a compilation of radio audience estimates designed to represent radio listening during a typical week for this market for the Spring 1992 survey period. The surveys to which the Metro Audience Trends estimates apply are identified in the Metro Audience Trends section of this report. The estimates are based on listening information recorded in seven-day diaries by persons 12 years of age and older. All audience estimates are approximations subject to statistical variations related to sample size and other limitations. The reliability of audience estimates cannot be determined to any precise mathematical value or definition.

This report is intended to furnish radio station, advertiser and agency clients of Arbitron with an aid in evaluating radio audience size and composition. Arbitron attempts to provide herein a summary description of methodology that may be understood by all who use the report. A more detailed description of Arbitron methodology can be found in a separate publication, available to all syndicated radio report subscribers, entitled *Radio Description of Methodology*.

WARNING

All Arbitron audience estimates and Arbitron maps are copyrighted. The willful, unauthorized use of any Arbitron audience estimate or map constitutes copyright infringement which could subject the infringer to civil damages of up to \$100,000 and criminal penalties of up to one year imprisonment and a \$25,000 fine pursuant to Chapter 5, Sections 504 and 506 of Title 17 of the U.S. Code. All users of this report are referred to Restrictions on Use of Report (Page iii, Paragraph 21).

PLEASE NOTE/Users of this report should become familiar with the sections of this report entitled the *Description of Methodology* (Pages i-iv) and *Limitations* (Page iii, Paragraph 16). Further, instructions for estimating reliability and effective sample bases for this report may be found on Page v. See Page 2A for the Table of Contents and survey schedule for this market.

These population estimates are based upon 1990 U.S. Bureau of the Census estimates updated and projected to January 1, 1992, by Market Statistics based on data from Sales and Marketing Management's 1991 publication of "Survey of Buying Power," and other informational sources. (See Page 5B for important clarifications.)

Metro Market Profile

The Arbitron Metro Market Profile provides information on demographics, socioeconomic characteristics, retail sales, consumer spending, print media and passenger car registrations. A Metro Ratings and Time-Spent-Listening (TSL) summary for all the 1992 radio markets is also included in this section.

The data in this section are reported for the Metro Survey Area as defined by Arbitron for this Market Report. However, for Metros

LOS ANGELES

comprised of a portion of one or more counties, these data may not be representative of the actual Metro Survey Area.

This Market Profile section is provided to assist radio stations and advertisers in evaluating media opportunities. A brief description of each set of data is provided. However, for your convenience in obtaining additional information regarding the data contained in these pages, please refer to the contact supplied for each data source.

Metro Area Lifestyle Profile by PRIZM® Groups

Group	Description	National % Persons 12+	Metro % Persons 12+	Index of Concentration
S1	Educated, affluent executives and professionals, elite metro suburbs	4.91	11.61	236
S2	Pre and post-child families and singles, upscale, white-collar suburbs	7.18	20.79	290
S3	Upper-middle class, child raising families, outlying, owner occupied suburbs	13.39	16.86	126
U1	Educated, white-collar singles and couples in upscale, urban areas	6.71	16.66	248
T1	Educated, young, mobile families, exurban suburbs and boom towns	12.28	1.51	12
S4	Middle-class, post-child families, aging suburbs and retirement areas	6.21	4.15	67
T2	Middle-class, child raising, blue-collar families, remote suburbs and towns	9.45	1.12	12
U2	Mid-scale families, singles and elders in dense, urban rowhouse & highrise areas	6.47	12.65	196
R1	Rural towns, villages, farms and ranches, agrarian middle America	6.25	0.00	0
T3	Mixed gentry and blue-collar labor, low-mid mill and factory towns	10.65	0.39	4
R2	Landowners, migrants and rustics in poor rural towns, farms and uplands	9.03	0.00	0
U3	Mixed, unskilled service and labor in aging, urban rowhouse and highrise areas	7.47	14.26	191

PRIZM®

PRIZM® is a market segmentation system developed by Claritas/NPDC, Inc. to help marketers target consumers and profile markets and audiences by lifestyle. Claritas analyzes key demographic characteristics from the U.S. Census and hundreds of millions of actual consumer purchase records to classify each neighborhood in the U.S. into one of 40 distinct PRIZM clusters. Among the characteristics analyzed are income value and type of housing, marital status, presence and ages of children in a household, ethnicity, urban-suburban-town-rural location, age, sex, occupation, level of education, as well as new car registrations, magazine subscriptions, real estate transactions, and financial data. Claritas updates PRIZM annually.

The PRIZM system provides marketers with a way to identify and target key consumer segments. There are 40 unique clusters organized into twelve groups. Each group is identified by a group code which denotes a basic neighborhood type. (U1-U3 groups are Center-City Urban; S1-S4 groups are Fringe Suburban; T1-T3 groups are New Satellite Suburbs and Towns; and R1-R2 groups are Town and Farms in Rural Areas.) When linked to market and radio measurement data, this geodemographic model produces descriptive audience information.

The twelve PRIZM groups are described above. Each PRIZM group's composition in this metro for persons 12+ is compared to the group's national composition. The index compares the metro market's composition for each group with the national composition. An index of 100 indicates that the market has the same percent concentration as the nation; an index of 200 means that the market's composition is twice that of the nation.

For more information about PRIZM, please call (703) 683-8300. PRIZM is a registered trademark of Claritas/NPDC, Inc.

Sales Data

Effective Buying Income, Total Retail Sales, Retail Expenditures and eleven categories of store sales have been compiled by Market Statistics and furnished to Arbitron. These data, based on Sales and Marketing Management's 1991 publication of "Survey of Buying Power" (12/31/90 estimates), are arranged according to Arbitron's Spring 1992 Metro definitions.

NOTE: Although the total population of a given geographic area will include those residing in group quarters, household totals will not. Therefore, calculations of per-household income and retail sales do not adequately reflect an area's true residential makeup.

Metro Effective Buying Income*

Effective Buying Income (EBI) (\$000)	\$182,194,597
Median Household EBI	\$36,670
EBI per Household	\$47,115

*EBI represents disposable personal income (including group quarters), minus any compensation paid to military or diplomatic personnel stationed overseas.

Metro Retail Sales Data (\$000)

Total Retail Sales	\$89,308,897
Retail Expenditures per Household (\$)	\$23,095
Food Stores	\$16,213,961
Supermarkets	\$14,984,977
Eating & Drinking Places	\$10,842,050
General Merchandise Stores	\$9,114,300
Department Stores	\$6,798,293
Apparel and Accessories Stores	\$6,192,677
Automotive Dealers	\$18,204,352
Building Materials & Hardware Stores	\$4,155,294
Drug Stores	\$3,392,323
Furniture and Appliance Stores	\$2,180,583
Radio, TV & Music Stores	\$2,509,590

Top Ten Employer Industries

The Top Ten Employer Industry Classifications are defined below by a Federal Government Census called STANDARD INDUSTRIAL CLASSIFICATION (SIC). SIC's are sorted by the primary activity of individual business establishments based on the 1989 County Business Pattern Reports of the U.S. Census.

Employer	# of Employees	% of Total
1) HEALTH SERVICES	355,334	7.6
2) BUSINESS SERVICES	321,799	6.8
3) EATING AND DRINKING PLACES	302,132	6.4
4) WHOLESALE TRADE-DURABLE GOODS	235,660	5.0
5) TRANSPORTATION EQUIPMENT	211,781	4.5
6) ENGINEERING & MANAGEMENT SERVI	176,111	3.7
7) SPECIAL TRADE CONTRACTORS	157,924	3.4
8) WHOLESALE TRADE-NONDURABLE	134,287	2.9
9) INSTRUMENTS & RELATED PRODUCTS	111,274	2.4
10) FOOD STORES	110,240	2.3

TOTAL METRO EMPLOYEES 4,706,127

TOP 10 TOTAL EMPLOYEES 2,116,542 45.0%

Metro Market Profile *(continued)*

LOS ANGELES

Metro Census Data

Market Statistics has furnished Ethnic Populations, Household Data, Retail Sales and Employer Industries to Arbitron on a county level, using Spring 1992 Metro definitions. Most data are based on the 1990 Census; exceptions and clarifications are noted in the text below. For further information, contact your Arbitron representative.

Metro Ethnic Populations are reported for all Standard and Condensed Markets. Ethnic sampling procedures need not be in place. The percent for each demo is based on persons 12+. Ethnic population information is based on the 1990 Census, updated to 1/1/92.

Metro Ethnic Population

	Blacks	%	Hispanics	%
PERSONS 12+	786,500	100.0	3,151,200	100.0
TEENS 12-17	86,700	11.0	427,700	13.6

18-24	59,900	7.6	363,600	11.5
25-34	93,900	11.9	480,700	15.3
35-44	69,000	8.8	286,900	9.1
45-49	24,700	3.1	82,700	2.6
50-54	21,000	2.7	59,500	1.9
55-64	29,900	3.8	82,300	2.6
65+	29,100	3.7	64,300	2.0
WOMEN				
18-24	59,300	7.5	281,800	8.9
25-34	99,600	12.7	402,300	12.8
35-44	78,800	10.0	274,100	8.7
45-49	28,700	3.6	85,100	2.7
50-54	23,600	3.0	64,300	2.0
55-64	35,900	4.6	97,200	3.1
65+	46,400	5.9	98,700	3.1

For each of the following Census categories, the Metro % is applied to the Metro population 12+ to determine Metro Total. For split county Metros, the Metro % represents the whole county(ies) Census category distributions.

- Total Households** are based on 1990 Census data, updated to 1/1/92.
- Effective Buying Income (EBI) of Households** is grouped into eight discrete income categories. The income reported is disposable total household income or income after personal taxes, nontax payment and personal contributions for Social Security are deducted. 1980 Census-based Metro percents are applied to 1990 households, updated to 1/1/92. Median income is shown for all Metro households (1980 based, updated to 1/1/92).

3. Value of Owner-Occupied Housing Units are estimates of the number of owner-occupied housing units falling into six value groups. For the 1990 Census data, this figure includes single-family condominiums. However, this Census figure excludes mobile homes, housing units located on 10 or more acres, housing units located on commercial property and two housing units sharing the same address. The median value for all owner-occupied units in the Metro is shown (1990 Census).

4. Monthly Contract of Renter-Occupied Housing Units are the number of rented housing units grouped into six monthly contract groups. This Census excludes no-cash rental units. Median rent is shown for all rented units in this Metro (1990 Census).

5. Household Size categories are based on 1990 Census data, updated to 1/1/92.

6. Seasonal Housing Units are defined as housing units used or intended for use only during certain seasons of the year; they are not included in the total household base (1990 Census).

7. Education represents the education levels of all persons 25+ (1980 Census).

8. Colleges and Universities are taken from the most current available survey of colleges and universities conducted by the National Center for Education Statistics. Only students enrolled in an accredited degree program are included in the enrollment figures. Percentages for the full-time enrollment are based on total enrollment.

9. Occupation data represent the number of persons 16+ that are employed in each of six occupation categories. A total of the six categories is shown. Percentages are based on total persons 16+ (1980 Census). Occupations included in each category are listed below:

Managerial/Executive, administrative and managerial occupations; professionals; specialty occupations.

Technical/Technicians and related support occupations, sales and administrative support positions, including clerical.

Service Worker/Private household occupations, protective service occupations and other services.

Farm Worker/Farming, forestry and fishing occupations.

Precision Production/Craft and repair occupations.

Operators/Machine operators, assemblers, inspectors, transportation and material moving occupations, handlers, equipment cleaners and laborers.

10. Farm Population/Estimate represents all persons living on a farm located in the Metro (1980 Census).

11. Transportation to Work information is based on estimated employed persons 16+. Percents are calculated on the sum of employed persons 16+ (1980 Census).

12. Car Ownership by Household/Total households are distributed into one of four Car Ownership categories. Percentages are based on total 1/1/92 household estimates.

Newspaper and Magazine Circulation

Newspaper and magazine circulation data, as of mid-May 1992, were obtained from the Audit Bureau of Circulations' Data Bank Service, 900 North Meacham Road, Schaumburg, Illinois 60173, (708) 605-0909, and are Copyright 1992, Audit Bureau of Circulations (ABC); unauthorized copying or reprinting of this information is prohibited.

Newspaper circulation figures represent average estimated paid circulation reported to and covered by the latest available Audit Report. Publications reported have a Metro circulation of at least 1%. Arbitron may have adjusted the ABC Newspaper Circulation data for Metros comprised of a portion of one or more counties, to reflect as closely as possible the newspapers' circulation in the Arbitron defined Metro area. (NOTE: The adjusted figures may not represent the newspapers' total circulation.) Combined circulation for AM newspapers that publish updated editions throughout the day are reported under the AM column, and are noted with an asterisk (*) in the PM column. Magazine circulation figures are the latest paid circulation for a single issue.

Passenger Car Registrations

The Metro Share of New Private Passenger Car Registrations is supplied by the Motor Statistical Division of R. L. Polk and Co. Polk prepares monthly reports (actual counts) of new cars registered in each state. Percentages are listed for American car manufacturers and the five leading imports. The top imports are determined through nationwide ranking. Fleet, other commercial or government registrations are not included. Figures shown are for October through December of the 1992 model year. Further automotive statistical information may be obtained from the Motor Statistical Division, R. L. Polk and Co., 1155 Brewery Park Blvd., Detroit, Michigan 48207, (313) 393-0880.

Policies and Procedures for Special Station Activities and Rating Distortion

In accordance with EMRC and industry guidelines, Arbitron provides the following information relating to Rating Distortion and Special Station Activities to advise Arbitron clients about the applicable Policies and Procedures and to assist Report users in making evaluations of the audience estimates contained herein.

Arbitron's original policy statement dated May 20, 1977, has been updated by Policies and Procedures releases of February 1978, December 1981, January 1987, February 1988 and handbooks of May 1985, March 1987 and June 1990. For further guidance on this subject, please refer to the most recent publication entitled *Rating Distortion and Rating Bias* distributed to all radio stations June 1990.

As a practical matter, Arbitron's published guidelines cannot cover all possible future station promotions. Therefore, in order to avoid possible citation, stations are hereby advised to submit planned activities to Arbitron for a confidential prereview.

RATING DISTORTION is defined as: Any station activity which Arbitron believes may affect the way in which diarykeepers record their listening without causing corresponding changes in actual listening; or, which has the potential to result in a station having access to current survey diaries and/or the identity or whereabouts of current or future diarykeepers; or, which may result in a diary being used by any person, in any manner, for any purpose, other than those originally intended by Arbitron. **ARBITRON MAY DELETE FROM ITS REPORTS, COMPUTER TAPES OR OTHER SERVICES THE AUDIENCE ESTIMATES FOR STATIONS THAT ARBITRON DETERMINES HAVE ENGAGED IN RATING DISTORTION ACTIVITIES.**

Rating Distortion may take the form of Diarykeeper Solicitation, Improper Promotional Activities or other means. The following categories and examples are illustrative only and are not all-inclusive:

Diarykeeper Solicitation is any attempt by, or on behalf of, a station to directly encourage the recording of listening other than actual listening. It may take the form of a public or private appeal for diarykeepers to surrender their diaries or to misreport -- in any way (e.g., overstate, understate, misstate) -- their actual listening to any station. Diarykeeper Solicitation includes attempted breaches of diary security, whereby a station has the potential to learn the identity of diarykeepers or to gain access to, or influence over, current or upcoming survey diaries.

Improper Promotional Activities are those which do not directly appeal to diarykeepers but which may nevertheless cause diarykeepers to misreport their actual listening -- possibly as a result of diarykeeper confusion or manipulation. Improper Promotional Activities include, but are not limited to, contests which may cause diarykeepers to misreport their actual listening by offering prizes based on amounts of listening recorded or claimed; attempts to cause diarykeepers to lose their anonymity; promotions which might cause a diarykeeper to surrender a diary in trade for a prize or for cash.

Rating Distortion is sometimes confused with "hypoing." However, whereas Rating Distortion involves activities that may cause diarykeepers to report more or different listening than actually occurred, "hypoing" refers to station activities designed to cause more actual listening. Rating Distortion is a violation of Arbitron's policies. Hypoing is not.

For station activities determined to be in violation of Arbitron's guidelines on Rating Distortion, but not resulting in the station's estimates being delisted from the Report, Arbitron may place the station's estimates at the bottom of

each page below a distinguishing line ("below-the-line"), and/or note the activity on Page 5B of the Report, along with a cover note. Appropriate notice may also be made for other applicable services.

SPECIAL STATION ACTIVITIES generally fall into one of two categories: Rating Bias and Extemporaneous Comment(s):

Rating Bias is defined as: Any announcement, statement or activity which could alert, sensitize or remind diarykeepers about past, current or future surveys in any way which might encourage participation in a current or future survey. Such activities may interfere with the objectivity or conduct of the survey and may take the form of announcements or statements on air, in print or in any other medium.

Rating Bias activities include survey announcements which are generally preplanned, repeated or stylized messages which may alert listeners to the survey, regardless of whether the words "Arbitron" or "diary" are used, and/or urge listeners to "be accurate" in reporting their listening. Rating Bias also includes activities which contain language or graphics suggestive of the survey. Rating Bias may also take other forms, such as a contest or research activity if, in Arbitron's opinion, the activity may sensitize the diarykeeper about Arbitron surveys.

Sourcing of previous survey information in the form of advertising which promotes a station's success in prior surveys, as permitted by contractual agreement with Arbitron, does not constitute Rating Bias. Note, however, that references to a station's performance in prior surveys in the context of appeals for support are not protected under this guideline, and may, in fact, be violations of Arbitron's guidelines on Rating Bias.

For station activities determined to be in violation of Arbitron's guidelines on Rating Bias, Arbitron may, for applicable Radio Market Reports, (1) place a note on Page 5B and may also (2) place a cover notice and may (3) place the station's audience estimates at the bottom of each page below a distinguishing line. Appropriate notice may also be made for other applicable services.

Extemporaneous Comment(s) is defined as: A type of reference on the air or in print that mentions or alludes to a past, current or future Arbitron survey, diary(ies) or radio ratings in any way which might sensitize diarykeepers to a current or future survey or which may affect the way in which diarykeepers report their listening in a current or future survey. As the name implies, these are generally one-time-only, spontaneous remarks which may have been intended as humorous.

For station activities determined to be Extemporaneous Comments, Arbitron may, for applicable Radio Market Reports, place a note on Page 5B and may also (2) place a cover notice and may (3) place the station's audience estimates at the bottom of each page below a distinguishing line. Appropriate notice may also be made for other applicable services.

GENERAL INFORMATION With respect to Rating Distortion and Special Station Activities:

a. Complaints must be in writing, accompanied by evidence such as an aircheck tape, direct-mail advertisement or newspaper clipping. Complaints will be accepted up to the day after the last day of the survey, and should be addressed to: **Radio Special Station Activities Committee, Radio Policies & Procedures, The Arbitron Company, 312 Marshall Avenue, Laurel, MD 20707.**

b. The initiation of an inquiry is solely within the discretion of Arbitron.

c. Arbitron will review activities conducted at any time (not just during, or four weeks prior to, a survey) for compliance with these guidelines if, in Arbitron's judgment, the activity has the potential to undermine the credibility of the survey. The same activity could be subject to citation in two or more consecutive Market Reports, depending on the timing and severity of the activity.

d. Activities by stations in nonsyndicated areas (that is, areas not covered by any Market Report) may still be subject to citation if the area is being surveyed for a custom report or other Arbitron service.

e. Activities cited for one simulcast station may also be cited for the other simulcast station.

f. Activities found to be in violation of these guidelines may or may not have actually affected reported listening. Such an effect would be virtually impossible to prove or disprove and Arbitron makes no attempt to do so. Activities violating these guidelines are inherently detrimental to the broadcast, advertising and audience measurement industries because the fact that such activities occurred undermines confidence in audience estimates.

Arbitron reserves the right to use any available means to draw attention to any station activity which, in Arbitron's opinion, has the potential to undermine the credibility of the survey even though such activity does not meet any of the specific criteria stated above. Arbitron further reserves the right to take other appropriate action depending upon the content, context, frequency or repetition of the activity.

INDUSTRY STATEMENTS

"The American Association of Advertising Agencies (AAAA) Media Research Committee opposes any attempt in any medium to distort results of any audience measurement survey... By encouraging daily recording or reporting of radio listening activity, [stations] may be sensitizing the public and thereby contributing to rating distortion or inflation. The AAAA Media Research Committee takes violations of rules against distorting practices, as described by rating services, seriously."

"The Arbitron Radio Advisory Council (ARAC) is very concerned about the continued practice of station activities that are intended to distort ratings data... we strongly recommend that Arbitron take serious action against anyone who violates the accredited standards. Likewise, special treatment should be taken when judging stations that repeatedly break this policy after prior warning."

"The National Association of Broadcasters (NAB) is joined by the Electronic Media Rating Council (EMRC) in condemning the activities engaged in by some broadcast stations that intentionally distort [or bias] legitimate audience surveys... practices specifically targeting survey respondents severely detract from the reliability and the validity of audience research. Stations that engage in these practices negatively affect the research results, which in turn influences the credibility and value of audience research in an increasingly competitive media marketplace."

"The Radio Advertising Bureau (RAB) Goals Committee condemns any practices by radio stations designed to intentionally bias or cause distortion of the listening estimates reported by the ratings companies... they harm the credibility and value of the audience research, thereby impairing the ability of advertisers to buy efficiently and intelligently to the detriment of all radio stations... [and] the rating companies have adopted stern policies against these activities."

Special Notices and Station Activities

THE MARKET

METRO DEFINITION/ The radio metro definition of this market is Arbitron defined. It does not conform to the Metropolitan Statistical Area implemented by the U.S. Office of Management and Budget in June 1983.

Trend analyses may be affected by any change in definition. However, there are no changes in the metro definition for the reporting periods covered by the Metro Audience Trends section of this report.

POPULATION ESTIMATES/ Effective with the Fall 1991 survey, populations for this report are Market Statistics 1/1/92 whole county population estimates [1990 Census-based].

For split county populations the 1/1/92 [1990 Census-based] whole county populations are allocated to the respective split counties based on Market Statistics 1991 zip code population estimates [1980 Census-based].

METRO ETHNIC CONTROLS/ Black and Hispanic Differential Survey Treatments used in the Metro Survey Area. All Metro counties, including HDBA and/or HDHA splits, receive the same ethnic procedures.

THE SAMPLE

METRO IN-TAB/TARGET INDEX/ The sample target on page 3A is the design target for this Arbitron metro and does not include any oversample which has been placed in certain embedded metro counties. The intab on page 3A includes oversample for one or more embedded metro counties.

In order to provide a measure of Arbitron's intab/target performance for the metro counties not receiving embedded metro oversample, the following index excludes the intab and corresponding target (each county's proportionate share of the design target for this metro) for the metro counties listed below:

In-tab: 3,329
Target: 3,144
Index: 106

Excluded Counties: Orange, CA

PARTIAL METRO ETHNIC CONTROLS/ The table below contains the ethnic population and in-tab for that portion of the Metro for which ethnic controls apply, as well as the ethnic population and in-tab for the total Metro. Note: Estimates in the Ethnic Composition section of the report are based on the total Metro ethnic in-tab.

Black Persons 12+	
Controlled Metro:	
Population	
Total	7,412,400
Ethnic	753,600
Percent	10.2
In-tab	
Total	3,329
Ethnic	320
Percent	9.6
Excluded Counties	Orange, CA
Total Metro (Controlled and Non-Controlled):	
Ethnic Population	786,500
Ethnic In-Tab	335

THE STATIONS

NEW STATIONS, CALL LETTER CHANGES, AND TREND DATA/

Current Call Letters	Former Call Letters	Prior Trend Data	On-Air Date/ Date of Change
KCBS-FM	KODJ-FM	Spring 1991	July 12, 1991

Stations are identified in this report under their current call letters and the audience estimates reflect listening recorded for the new and, if applicable, the old call letters. The Trends section displays trend data pertaining to both the old and the new call letters. Survey dates will be listed in the "Prior Trend Data" column whenever trend information exists for a station that has changed call letters. The date of the call letter change will also be included in order to identify which call letters were in use during a particular survey. Audience estimates for any new stations beginning broadcast activities during the survey are reported for an "average" week of the twelve week period, including those weeks when the station was not on the air.

TECHNICAL DIFFICULTY/ The following station(s) reported to Arbitron that they experienced reduced power (REDUCED), intermittent power (INTERMIT), signal interference (SIG INTRF), or were off the air (OFF) for five or more continuous minutes in a quarter-hour during the survey period.

Station	Affected Date and Time	Problem

Description of Methodology

SAMPLING AND MEASUREMENT TECHNIQUES

1. SAMPLING METHODOLOGY/Surveys for Arbitron Radio Market Reports are conducted by using geographic units called sampling units. A sampling unit consists of a county or a split county. The latter are defined by zip code information based on 1980 Census data, as updated annually by Market Statistics.

Sample targets are established for the Metro and, if applicable, the non-Metro TSA and/or the ADI. Sample targets are then established for each sampling unit proportional to its Persons 12+ population in the respective survey area subject to minimum sample requirements for Radio County Coverage. The amount of sample ordered is determined by dividing the sampling unit target by the expected rate of response based on previous survey(s) sample performance and other factors.

For each 12-week survey period, a complete new sample of telephone numbers is computer-selected for each sampling unit through the use of a systematic interval random selection technique. These telephone numbers are drawn from a sample frame provided by Metromail Corporation containing all listed residential telephone numbers and all possible unlisted telephone numbers from 100-blocks with at least 10 listed residential telephone numbers. The sample frame is updated by Metromail using current available telephone directories. Known business and group quarters telephone numbers are excluded from the sample frame. The total sample is randomly divided into approximately equal weekly groups for placement.

If a need for additional sample arises after the original samples have been selected by the computer, then such additional sample is generally selected in the same manner from the original sample frame.

2. TOTAL SURVEY AREA (TSA) DEFINITION/

The TSA is comprised of the Metro and any additional counties (or split counties) which meet certain criteria for inclusion. TSA definitions are based on historical radio listening patterns and are updated biennially from an analysis of the diary data used for the most recent County Coverage study. For TSA analyses purposes, all stations are considered as Home to the county (or split county) of the city to which they are FCC-licensed.

A county or geographic split-county (hereafter, simply "county") from which there were at least 10 diaries in-tab will be added to the TSA of an existing market if:

- (i) the Metro-licensed stations cumulatively receive a minimum of 10 diary mentions; **and**
- (ii) the mentions to Metro-licensed stations account for at least 10 percent of the total mentions to all stations from that county (9.5+ rounds to 10).

A county from which there were at least 10 diaries in-tab will be retained in the TSA of a market if:

- (i) the Metro-licensed stations cumulatively receive a minimum of 8 diary mentions, **and** the mentions to Metro-licensed stations account for at least 8 percent of the total mentions to all stations from that county (7.5+ rounds to 8); **or**
- (ii) Metro-licensed stations cumulatively receive fewer than 8 diary mentions and the mentions to Metro-licensed stations account for at least 10 percent of the total mentions to all stations from that county (9.5+ rounds to 10).

For purposes of survey area stability, a county from which there were fewer than 10 diaries in-tab will generally not be added to or deleted from a TSA.

A county which does not meet the applicable criteria outlined above may nevertheless be added to or retained in the TSA if:

- (i) at least 15 percent of its station mentions are to Metro-licensed stations, *regardless* of the number of in-tab diaries and/or number of mentions to Metro-licensed stations (14.5+ rounds to 15); **or**
- (ii) approximately 75 percent of the county's border is contiguous with other counties in the same TSA.

A county which does not meet any of the above criteria will be excluded from the TSA. Counties which qualify for inclusion in the TSA under any of the above criteria will *still* be excluded if they are not contiguous with the TSA.

TSAs for new markets are established in accordance with all of the above criteria, except that more recent diary data may be used, if available.

The inclusion of a county in a TSA does not imply that all metro-licensed stations have received diary mention(s) in that county.

Because TSAs for adjacent markets frequently overlap, TSA audience estimates for one market may not be additive to TSA audience estimates for an adjacent market.

Arbitron reserves the right to make market definition decisions based on its professional research judgment in cases where strict application of the above criteria would produce illogical survey area configurations or would adversely affect the quality and/or utility of the reported estimates.

3. ARBITRON RADIO LISTENING DIARY/

Arbitron uses one-week individual diaries to gather listening information from persons 12 years of age and older. Bilingual (Spanish-English) diaries are provided to all survey participants in the Metro of a Hispanic-controlled market who have identified themselves as Hispanic in response to an ethnicity question or from whom ethnic information was not obtained, and to any others indicating a preference for a bilingual diary. Premiums of varying monetary amounts are provided to encourage respondent cooperation. Arbitron sends a diary for each Person 12+ reported in the sample household up to a maximum of nine.

4. SAMPLE PLACEMENT AND DATA

RETRIEVAL/Initial contact with listed sample households is by a letter informing them of their selection by the computer and stating that an interviewer will be calling to request their cooperation in the survey. Initial contact with unlisted sample households is made by the interviewer at the time cooperation is requested.

Arbitron interviewers call all selected telephone numbers to ascertain the possibility of a media affiliation, to gain consent for participation in the survey, to determine the number of Persons 12+ living in the household at the time of the placement call and, where applicable, to determine the race/ethnicity and demographics of the household. Households with more than nine persons 12 years of age and older are ineligible for survey participation.

Interviewers are instructed to make a number of attempts to reach every telephone number in the sample. These attempts are made at different hours of the day and evening. Diaries are then mailed directly to the consenting sample households from Arbitron.

After the initial contact, the interviewer is directed to make additional contact(s) with the sample households to make sure the diaries have been received; to assist members of the household in understanding the diaries' purpose; to answer any questions; to remind the diarykeepers to return their diaries after the survey week; and to thank them for their participation in the survey.

Explicit instructions are provided to each interviewer, and validation checks are regularly conducted to ensure that instructions are being properly followed.

PROCESSING TECHNIQUES

5. PROCESSING OF DIARIES/Arbitron makes reasonable efforts to utilize all returned diaries. However, some returned diaries are determined by Arbitron to be unusable. Among those which are unusable are diaries which are obviously incomplete; are postmarked and/or arrive on or before the last day of the survey week or after the production cutoff date; or which otherwise lack essential information. Only those with seven usable days are processed. The total number of in-tab diaries may differ from the sample target.

Usable diaries are prepared for computer processing in accordance with procedures listed in the Arbitron Radio Edit Procedures Manual. The listening information in the diaries is then computer-entered so that certain computer verifications and edits can be made. These include ascription procedures, the allocation of credit for aberrated call letters and other analyses and pretabulation preparations.

CALCULATING TECHNIQUES

6. CALCULATION OF ESTIMATES/

a. Sample Balancing. The weighting system used by Arbitron, sample balancing, is an iterative marginal weighting technique designed to compensate for disproportionate in-tab from specified marginal classes. Marginal weighting means that in-tab is weighted to represent the population for each specified marginal class. The number of geographic marginal classes (i.e., counties, split counties or county clusters) will vary. The number of age/sex marginal classes is generally 16. In addition, markets that are race and/or ethnically controlled are sample balanced so that in-tab from the race/ethnic group is weighted to represent the population of that race/ethnic group. As a result of this cumulative weighting, a Persons-Per-Diary Value (PPDV) is computed for each diary. The PPDV is the number of persons that diary is estimated to represent.

b. Computing Cume Persons Estimates. Station Cume Persons estimates are computed by summing the PPDVs for each diary in which a station received listening credit for the time the station is on the air within a daypart. PPDVs are summed for all diaries within each discrete demographic group with listening to the station, then rounded to hundreds. Station Cume Persons estimates for broader demographic groups are computed by adding the rounded Cume Persons estimates for the component discrete demographic groups within the same daypart.

c. Computing Average Quarter-Hour (AQH) Persons Estimates. Station AQH Persons estimates are computed by multiplying the number of quarter-hours of listening to a station within a daypart for the time the station is on the air in each diary by the diary's respective

Description of Methodology (continued)

PPDV. The result of this multiplication is summed for all diaries within each discrete demographic group, then divided by the number of quarter-hours the station is on the air during the applicable daypart and rounded to hundreds. Station AQH Persons estimates for broader demographic groups are computed by adding the rounded AQH Persons estimates for the component discrete demographic groups within the same daypart.

d. Rounding of Calculations. Rounding occurs at various stages in the calculation of audience estimates at demographic and daypart summation levels.

e. Broadcast Hours. (i) Local time differences within a market that overlaps time zones are accounted for by adjusting to the time observed by the majority of counties in the Metro of the market being measured. (ii) Only one set of sign-on/sign-off times for a station is used in calculating audience estimates for the market report. Arbitron uses the sign-on/sign-off times reported for the month closest to December and the shortest broadcast day within that month as provided by the affected radio station. (iii) Audience estimates are adjusted for the station's actual broadcast schedule. However, when a station changes sign-on/sign-off times during an Arbitron survey period, the times used in calculating audience estimates are taken from those days of operation comprising the majority of consecutive days of the survey period. (iv) Stations broadcasting for less than an entire reported daypart are indicated by a footnote symbol next to the station's call letters or audience estimates. (v) Stations must notify Arbitron in writing of any changes in the station's sign-on/sign-off time as soon as they occur but no later than the day after the last day of the survey; changes in a station's daytime or 24-hour status will be noted on Page 5B of this report.

f. Technical Difficulties. No adjustments are made to either diary entries or reported audience estimates for periods of technical difficulty. The notation of technical difficulties on Page 5B is only to assist the users in making their own evaluation of the reported audience estimates. Arbitron will accept information on technical difficulties only up to the day after the last day of the survey.

CRITERIA FOR REPORTING STATIONS

7. CRITERIA FOR REPORTING STATIONS/

To be listed in an Arbitron report, a commercial radio station must engage in systematic regular commercial broadcasting pursuant to the authority of the Federal Communications Commission (FCC) or other appropriate governmental authority. Call letter designations exceeding four characters are shortened to four characters. Reported call letters are the FCC-authorized call letters in use on the last day of the survey as reported to Arbitron. In the event a station has changed call letters during the survey period, the first call letters listed in the report are those in use on the last day of the survey, with the station's previous call letters noted immediately below them. Arbitron maintains a call letter history based on information provided by radio stations and the FCC. In the event of exchanges of frequencies between stations in a market, the call letters under which audience estimates are published in this report are based on Arbitron's verification and interpretation of information from various relevant sources, which include

the FCC and the affected stations. Specifics regarding the above are listed on Page 5B of this report.

Audience estimates for a station which does not meet Minimum Reporting Standards (MRS) cannot be obtained in any way from the audience estimates published in this report, including the Metro Audience Trends estimates from prior survey periods. TSA estimates are limited to stations which have qualified for reporting in the Metro. All radio stations, commercial and noncommercial alike, are measured using the same methodology and are included in Metro and/or ADI Totals. All commercial stations are evaluated using the Minimum Reporting Standards as described in Paragraphs 8 and 9. Noncommercial stations are not eligible to be listed in this report and are not considered in MRS evaluations. For report qualification purposes, stations are considered commercial/noncommercial based on their status as of the last day of the survey as reported to Arbitron.

8. MINIMUM REPORTING STANDARDS (MRS) FOR NONSIMULCAST STATIONS/A commercial station which does not simulcast with another station is included in this report if it has met **all** of the following Minimum Reporting Standards for the Metro or, if applicable, the ADI among Persons 12+ during the Monday-Sunday 6AM-Midnight daypart during the current survey of the market:

a. The station must have received five or more minutes of listening in a quarter-hour in at least ten in-tab Metro diaries (ten in-tab ADI diaries for ADI markets), **and,**

b. The station must have a Metro Cume rating of 0.495 or greater (ADI Cume rating of 0.495 or greater for ADI markets), **and,**

c. The station must have a Metro Average Quarter-Hour rating of 0.05 or greater (ADI Average Quarter-Hour rating of 0.05 or greater for ADI markets) for the time the station is on the air during the Monday-Sunday 6AM-Midnight daypart during the current survey of the market.

9. MINIMUM REPORTING STANDARDS (MRS) FOR SIMULCAST STATIONS/MRS for simulcast stations are based on the percent of quarter-hours in the Monday-Sunday, 6AM-Midnight daypart (when both stations are on the air simultaneously) that the two stations simulcast for every week of the survey:

a. 9.49 percent or less — The two stations are considered to be **nonsimulcast** stations and each must independently meet the criteria used for nonsimulcast stations. (See Par. 8.)

b. 9.5 percent to 90.49 percent — The two stations are considered to be **partially simulcast** stations. Provided that *one* of the two stations meets **all** MRS criteria described in Par. 8 above, the second station is included in the report if it (i) meets the criteria of Par. 8(a) and (b) **and** (ii) achieves the Average Quarter-Hour rating described in Par. 8(c) for any one of the four basic Monday-Friday dayparts; viz., 6AM-10AM, 10AM-3PM, 3PM-7PM, 7PM-Midnight.

c. 90.5 percent or greater — The two stations are regarded as **totally simulcast** stations for MRS purposes and therefore will be treated as a single station in **all** phases of the MRS criteria described in Par. 8. If the **combined** audience of the two stations is sufficient to meet **all** criteria of Par. 8, then both stations will be listed in the report even though one (or both) stations might not meet the MRS criteria if considered indi-

vidually, so long as each station is mentioned in at least one Metro (or ADI) in-tab diary anytime during the 24-hour/7-day survey week.

10. HOME AND OUTSIDE STATIONS/Any station either licensed to a city located within the Metro of a market or which is recognized under Arbitron's policies and procedures as having acceptable Multi-City of Identification is listed in the market report as a home station. However, if two stations are partially or totally simulcast and one of the two stations is a home station, both may be treated as home stations. All other stations are classified as *outside* stations. For reports containing an ADI section, outside stations are further classified into: (a) *outside the Metro but home to the ADI*, or (b) *outside the Metro and the ADI*. Within each reporting classification, U.S. stations are listed alphabetically followed by non-U.S. stations listed alphabetically.

SIMULCAST TOTALS

11. CRITERIA/A simulcast Total line in a particular daypart is only available to stations which **partially** or **totally** simulcast (see Pars. 9b and c) and which simulcast 100 percent (as defined by Arbitron, see Par. 47) for the entire daypart during the entire survey period. For simulcast stations a Total line of combined audience estimates will appear following the individual station estimates when the two stations are simulcast for the entire time both stations are on the air in a reported daypart.

Total lines for simulcast stations are reported only in the Target Audience, Specific Audience and Audience Composition sections of this report.

Total lines may still be shown even if one or both simulcasting stations are not on the air during the entire reported daypart.

12. SIMULCAST TOTAL AVERAGE QUARTER-HOUR PERSONS/The simulcast Total line is the summation of the estimated average number of persons who listened to one station plus the estimated average number of persons who listened to the second station during a reported daypart. If one or both of the simulcast stations are not on the air for the entire reported daypart, the individual station estimates will be adjusted for their actual broadcast schedule(s); the Total line for the two stations uses the longest on-air time of the two.

13. SIMULCAST TOTAL CUME PERSONS/The simulcast Total line represents the estimated number of *different* persons who listened to either station during the reported daypart; thus, the Total line provides an estimate of the *unduplicated* audience to the simulcast pair during the reported daypart.

STATISTICAL RELIABILITY

14. SAMPLING ERROR/Arbitron estimates are subject to the statistical variances associated with all surveys using a sample of the universe and, additionally, to all of the factors described in Special Notices and Paragraph 16. Approximations of the sampling error can be developed by use of Tables A and B included herein. These tables were derived from an empirical study which employed "Jack-Knife Replication." The study, published by Arbitron, is entitled *Arbitron Replication II: A Study of The Reliability of Radio Ratings*. Tables A and B produce estimates of sampling error at the one standard error (*one sigma*) level. However,

Description of Methodology (continued)

users of this report should keep in mind that, due to the factors discussed in Paragraph 16, the accuracy of Arbitron estimates, data and reports and their statistical evaluators cannot be determined to any precise mathematical value or definition.

15. EFFECTIVE SAMPLE BASE (ESB)/Estimates of the Effective Sample Base indicate the size of a simple random sample (in which all diaries have equal value) that would be required to provide the same degree of reliability as the in-tab sample actually used to produce the audience estimates in this report. The statistical reliability of such estimates depends on the ESB and only indirectly on the number of diaries tabulated. Statistical reliability is also affected by all of the factors described in Paragraph 16. Approximations of ESBs may be determined through the use of squared Table B values included herein. The Arbitron formula for estimating ESBs is based upon the same empirical study referenced in Paragraph 14. The Arbitron formula to estimate ESBs takes into account the disproportionate sampling of Metro areas, and differences in return rates among sampling units, the individual sex-age categories and race/ethnic groups, where applicable. As a general rule, ESBs for all Cume estimates will be less than total in-tab diaries, and the ESBs for all Average Quarter-Hour estimates will be larger than the ESBs for Cume estimates and may be even greater than the total in-tab sample. This is due to the intraclass correlation of the listening between quarter-hours for the various dayparts.

LIMITATIONS

16. LIMITATIONS/In addition to the sources of possible error which are described elsewhere in this report, the user should be aware of the limitations described below:

- a.** The sample is drawn from telephone households only. Persons in nontelephone households are thereby excluded from the sample frame. Commercial establishments listed in directories are specifically excluded from the sample. Steps are taken to exclude residents of group quarters from Arbitron's sample frame (except in instances where a private phone is installed in the individual living quarters). Further, all possible telephone directories and all possible unlisted telephone numbers may not be available in the lists prepared by Metromail Corporation and used as Arbitron's sample frame.
- b.** Effort is made to exclude households with a media affiliation. The inclusion or exclusion of such households from the sample is dependent upon information revealed by the sample household in response to Arbitron's media affiliation question at the time of the diary placement call.
- c.** The interviewer may not always be under the direct control of Arbitron. In certain instances, independent telephone survey organizations are utilized by Arbitron. There may be instances where Arbitron instructions are not followed.
- d.** Nonresponding persons may have listening habits which differ from those of respondents. Persons residing in nontelephone households may have listening habits which differ from those of persons residing in households with telephones.
- e.** Nonresponding persons in the original designated sample prevent the in-tab sample from being a perfect probability sample.

f. The sample design and/or response patterns may preclude proportional representation of certain groups within the population such as ethnic groups, racial groups, persons in certain income or education groups, or persons whose primary language is other than English. Such persons may have listening habits which differ from other persons.

g. The population estimates from Market Statistics used in designing the sample are based upon the decennial U.S. Census and are subject to all the limitations inherent therein. In addition, population estimates are subject to limitations such as sampling errors, errors in locating undocumented populations, and processing and recording errors. Furthermore, the sources used by Market Statistics to update populations between decennial Census dates may not include adjustments for known or unknown over- or undercounts of various segments of the population, including undocumented population groups. In addition, annual population updates may be based on the results of sample surveys and are subject to their respective limitations. These limitations in data from Market Statistics are inherent in the Arbitron estimates based thereon.

h. Zip code information used in this report is subject to defects and limitations.

i. Diaries, or portions thereof, may be completed improperly if the diary instructions are not understood or are not followed by diary-keepers. Such diaries may be unusable and excluded from the survey. Some diary entries may have been made on the basis of hearsay, recall, diarykeeper approximations or could have been influenced by comments made by the interviewer or others to diarykeepers.

j. Human and computer processing errors may occur before or after the diaries are received by Arbitron. Consequently, the degree of variance in the data may be greater than that expected from sampling variance alone.

k. The data upon which Arbitron has based its in-tab sample weighting, including racial or ethnic identification, may not be precise.

l. Defects and limitations found in data supplied by others are inherent in Arbitron estimates based thereon.

m. Logical analysis, preprocessing preparation, transcription of the data, or postsurvey week telephone validation calls may affect some of the diary listening entries before the data are projected. Diaries, or portions thereof, may thereby be modified or excluded from the survey. These procedures may affect the audience estimates or a station's ability to meet MRS.

n. Arbitron conducts research involving new methods of improving cooperation of diary-keepers and/or securing additional information from such persons. Occasionally, a portion of this research may be integrated with actual surveys and, if and when so done, may cause the degree of variance in the data to be greater than that expected from sampling variance alone.

o. Certain data, such as when the station was on and off the air, facilities, call letters used, slogans claimed, format, programming, Sales Representative, network and time periods when two stations were simulcast or separately programmed, are based on data supplied by the stations, the FCC, and/or recent industry publications or notices. These data may not be accurate or timely and may affect the way certain audience estimates are reported.

p. Situations in which stations have or have had the same call letters or frequency or have changed call letters or frequency may result in diarykeeper confusion in correctly identifying the station to which the listening occurred.

q. Due to rounding, mathematical manipulation by the user of estimates for narrow dayparts in this report may produce a result which may be incongruent with estimates for broader dayparts also contained in this report.

r. Reported trends estimates may not be comparable over time due to methodological or operational changes, changes in survey area definitions or populations, or conditions not under Arbitron's control, such as changes in station operations/facilities/special activities.

RETENTION OF RAW MATERIALS

17. RETENTION SCHEDULE/In-tab Arbitron listening diaries used for the compilation of the most current audience estimates published in this report, along with all unusable diaries and other survey materials, will be stored for one year from the date on which this report was first mailed to subscribers by Arbitron; after such time, all diaries and other survey materials are destroyed. Subscribers to this report are advised that if special cross-tabulations of the reported estimates are desired, they should be ordered before the retention period has expired. Upon proper appointment, subscribers to this report may examine, but not copy, the in-tab Arbitron listening diaries used in this report at Arbitron's Laurel, MD, office.

SPECIAL NOTICES PAGE

18. SPECIAL NOTICES/To the extent that any provisions contained in this description of methodology are inconsistent or conflict with any provision contained in the *Special Notices* on Page 5B of this report, such *Special Notices* are deemed to supersede and/or amend this description of methodology.

RESERVATION OF RIGHTS

19. RESERVATION OF RIGHTS/Arbitron reserves the right to exercise its professional research judgment in modifying, waiving or suspending any policy, procedure or element of methodology that would appear to Arbitron to be unreasonable, illogical or impractical in light of known conditions.

DISCLAIMER OF WARRANTIES

20. DISCLAIMER OF WARRANTIES/Arbitron makes no warranties, express or implied, concerning: data gathered or obtained by Arbitron from any source; the present or future methodology employed by Arbitron in producing Arbitron ratings; or the Arbitron data, estimates or ratings contained herein. All Arbitron data and estimates represent only the opinion of Arbitron and reliance thereon and use thereof shall be at subscriber's own risk.

RESTRICTIONS ON USE OF REPORT

21. RESTRICTIONS ON USE OF REPORT/All Arbitron radio audience estimates, together with the map contained herein, are proprietary to and copyrighted by Arbitron. They are provided to Arbitron clients pursuant to the terms of both written license agreements between Arbitron and such clients and the restrictions and limitations on use printed herein. All Arbitron

Description of Methodology *(continued)*

audience data and estimates are for the exclusive use of Arbitron clients and their authorized representatives and may be disclosed only to advertisers, prospective advertisers and their agencies for the purpose of obtaining and retaining advertising accounts and through advertising or promotional literature. Any commercial use of Arbitron audience estimates or data for the purpose of selling advertising time or space by or on behalf of broadcast, cable, or print media must be under the terms of a written license agreement between that media and Arbitron specifying permitted uses. For an Arbitron client to divulge any data or estimates to a nonsubscribing station, or to lend and/or give a

copy and/or a reproduction of any part of any report to any nonsubscriber, including print media, advertisers and/or their agencies, constitutes a breach of the license agreement between Arbitron and client. Quotations by clients of the estimates as allowed by this section for purposes of advertising or promotion must identify Arbitron as the source and that Arbitron's data and estimates are copyrighted. It also should be mentioned that the audience estimates are subject to all qualifications and limitations stated in the Arbitron report. Arbitron recommends that the appropriate market, survey period and kind of audience estimate (e.g., Boston, Spring 1992, Total Survey Area

Monday-Friday 3PM-7PM, Average Quarter-Hour Estimates, Men 18-24) be stated.

A subscriber to any particular report may not use the demographic data or audience estimates printed in the Metro Audience Trends section which reference a market report to which they did not subscribe.

Neither this report, the map contained herein nor any audience estimate may be used in any manner by nonclients of Arbitron without written permission from Arbitron.

Users of audience estimates are referred to the current policies of the Federal Trade Commission relating to the use of audience estimates.

Glossary of Selected Arbitron Terms Used in this Report

22. AREA OF DOMINANT INFLUENCE (ADI)/ Arbitron Television's geographic market design which defines each television market exclusive of others based on measurable viewing patterns. Every county or sampling unit in the contiguous United States is assigned exclusively to one ADI.

23. AVERAGE QUARTER-HOUR PERSONS/ The estimated number of persons who listened to a station for a minimum of five minutes within a quarter-hour. The estimate is the average of the reported listening in the total number of quarter-hours the station was on the air during a reported daypart. This estimate, expressed in hundreds (00), is shown for the Metro, TSA and, where applicable, the ADI.

24. AVERAGE QUARTER-HOUR RATING/ The Average Quarter-Hour Persons estimate expressed as a percentage of the appropriate estimated population. This estimate is shown for the Metro and, where applicable, the ADI.

25. AVERAGE QUARTER-HOUR SHARE/ The Average Quarter-Hour Persons estimate for a given station expressed as a percentage of the total Average Quarter-Hour Persons estimate to all radio within a reported daypart. This estimate is shown for the Metro only.

26. CUME DUPLICATION/ The percentage of one station's estimated Cume audience that listened to a second station. This estimate is shown for the Metro only.

27. CUME PERSONS/ The estimated number of different persons who listened to a station for a minimum of five minutes in a quarter-hour within a reported daypart. (Cume estimates may also be referred to as *cumulative* or *unduplicated* estimates.) Cume Persons estimates are expressed in hundreds (00) in this report. This estimate is shown in the Metro, TSA and, where applicable, the ADI.

28. CUME RATING/ The estimated number of Cume Persons expressed as a percentage of the appropriate estimated population. This estimate is shown for the Metro only.

29. DAYPART/ A time period for which audience estimates are reported (e.g., Monday-Friday, 6AM-10AM; Saturday, 10AM-3PM).

30. DESIGNATED SAMPLE/ Telephone numbers selected from the sample frame for this survey determined by Arbitron to be usable.

31. DIARY MENTIONS/ The number of in-tab diaries in which listening to a station has been recorded for at least five minutes in a quarter-hour within a given daypart.

32. DIARYKEEPER/ Any individual found eligible to receive and sent survey materials.

33. EFFECTIVE SAMPLE BASE (ESB)/ The theoretical sample size to be used for estimating the sampling error of audience estimates. (See Par. 15.)

34. ETHNIC COMPOSITION/ Audience estimates for Total, Black and/or Hispanic persons expressed in hundreds (00), ratings and composition percents. Ethnic composition estimates are reported for the Metro of ethnically controlled markets only if at least 30 Black and/or 30 Hispanic diaries, as appropriate, are in-tab from the Metro.

35. EXCLUSIVE CUME AUDIENCE/ The estimated number of Cume Persons who listened to only one station within a reported daypart. This estimate is shown for the Metro only.

36. GROUP QUARTERS/ Group quarters are residences such as college dormitories, homes for the aged, military barracks, rooming houses, institutions and residences of nine or more unrelated individuals.

37. IN-TAB SAMPLE/ The number of usable diaries tabulated in producing the report.

38. LISTENING LOCATIONS/ Locations such as At Home, In-Car or Other for which audience estimates are reported. (Other includes At Work listening.)

39. METRO SURVEY AREA (Metro)/ Metro Survey Area definitions generally correspond to the federal government's Office of Management and Budget's Metropolitan Statistical Areas, Primary Metropolitan Statistical Areas or Consolidated Metropolitan Statistical Areas subject to exceptions dictated by historical industry usage or other marketing considerations as determined by Arbitron.

40. METRO TOTALS AND/OR ADI TOTALS (Total listening in the Metro and/or Total listening in the ADI) / The Metro and/or ADI Total estimates include estimates of listening to reported stations as well as to commercial stations that did not meet the Minimum Reporting Standards plus estimates of listening to non-commercial and unidentified stations.

41. MINIMUM REPORTING STANDARDS (MRS)/ Criteria used to determine the stations listed in this report. (See Pars. 8-9.)

42. RATING/ (See *Average Quarter-Hour Rating and Cume Rating*.)

43. SAMPLE FRAME/ The universe from which eligible diarykeepers are randomly selected. The sample frame for Arbitron radio surveys is designed to include households with telephones.

44. SAMPLE TARGET/ The number of diaries that is the objective for in-tab sample size.

45. SAMPLING UNIT/ A geographic area consisting of a county or split county. (See Par. 1.)

46. SHARE/ (See *Average Quarter-Hour Share*.)

47. SIMULCAST/ The simultaneous broadcast of one station's total and uninterrupted broadcast flow by a second station without any variation except if the two simulcast stations choose to separately identify their call letters, frequency, slogan and/or city of license, if appropriate, at the same time.

48. SIMULCAST TOTALS/ Combined audience estimates for two stations in dayparts when they are simulcast. (See Pars. 11-13 and 47.)

49. SPLIT COUNTY/ A portion of a county composed of one or more zip codes which has been separately identified for purposes of ordering and controlling sample.

50. TECHNICAL DIFFICULTY (TD)/ Time period(s) of five or more consecutive minutes during the survey period in which a station listed in this report notified Arbitron in writing of reduced power, intermittent power, signal interference or times the station was off the air within the station's authorized broadcast day.

51. TIME SPENT LISTENING (TSL)/ An estimate of the amount of time the average person spent listening to radio or to a station during a specific daypart expressed in hours and minutes. This estimate is shown for total radio listening for the Metro only.

52. TOTAL SURVEY AREA (TSA)/ A geographic area that includes the Metro Survey Area and may include additional counties. (For explanation of the criteria used in establishing the TSA, see Par. 2.)

ARBITRON RADIO RELIABILITY — TABLE A

RATING	VALUE	RATING	VALUE	RATING	VALUE	RATING	VALUE	RATING	VALUE	RATING	VALUE	RATING	VALUE	RATING	VALUE	RATING	VALUE

Note: When rating is greater than 50.0, use the value given for a rating equal to 100.0 minus the original rating. For example, if the rating were 87.3, use the value shown for a rating of 12.7 (100.0-87.3)

INSTRUCTIONS FOR ESTIMATING THE RELIABILITY OF AUDIENCE RATING ESTIMATES

The reliability of a survey estimate is generally defined in terms of the estimated margin of sampling error around the estimate, or "confidence interval." The confidence interval describes the extent to which a survey estimate, based on a random sample of a population, may vary from the result that would be obtained through a complete census of that population. (See Par. 14 for further discussion.)

Confidence intervals can be calculated for any rating published in this report in two steps: (1) calculating an estimated standard error by dividing the Table A value by the Table B value and then (2) using the estimated standard error to construct a confidence interval around the rating.

1. Calculate an estimate of standard error:

a. Using Table A, select the rating for which you want to calculate standard error and locate the corresponding Table A value. For example, the corresponding Table A value for a 3.7 rating is 18.88. Table A values are simply the square root of the rating x (100 - the rating); therefore, Table A values are constant across all markets and surveys.

b. Using Table B, select the demographic group (down the side) and the daypart (across the top) of the rating and locate the corresponding Table B value. Note that for all Cume ratings, the first column is the appropriate one. Table B values are the square roots of the ESBs (Effective

Sample Bases) for each market and survey; therefore, Table B values differ from report to report. The Table B value used in this example is hypothetical. For example, the Table B value for a Metro AQH rating for Men 18+, Mon-Fri 6AM-7PM might be 55.00.

c. Divide the Table A value by the Table B value to obtain an estimated standard error. Using the example above, 18.88 ÷ 55.00 = 0.34.

2. Use the estimated standard error to construct a confidence interval around the rating:

a. The rating +/- one standard error will yield a 68% confidence interval. In the above example, 3.7 +/- 0.34 will yield a confidence interval of 3.36-4.04. Interpretation: The user can be 68% confident that a survey of all Men 18+ would yield a Mon-Fri 6AM-7PM rating between 3.4 and 4.0.

b. The rating +/- (1.64 x the standard error) will yield a 90% confidence interval. In the above example, 3.7 +/- (1.64 x 0.34) would yield an interval of 3.14-4.26. Interpretation: The user can be 90% confident that a survey of all Men 18+ would yield a Mon-Fri 6AM-7PM rating between 3.1 and 4.3.

c. The rating +/- (1.96 x the standard error) will yield a 95% confidence interval (compute as in (b) above), and the rating +/- (2.58 x the standard error) will yield a 99% confidence interval (compute as in (b) above).

TO ESTIMATE RELIABILITY FOR PROJECTED NUMBERS OF PERSONS

To estimate standard error (and construct confidence intervals) for Persons estimates rather

than ratings: (1) Convert the Persons estimate into a rating. (Persons ÷ the population x 100). (2) Calculate standard error using the instructions above. (3) Convert standard error for the rating into standard error for the Persons estimate. (Standard error x the population ÷ 100). (4) Use the Persons estimate +/- one standard error for a 68% confidence interval; use the Persons estimate +/- the standard error multiplied by 1.64, 1.96 or 2.58 to get 90%, 95% or 99% confidence intervals, respectively.

TO ESTIMATE EFFECTIVE SAMPLE BASE (ESB) SIZES

Approximate ESB for age/sex groups and dayparts can be calculated by squaring Table B values. For example, the estimated ESB for M18+, M-F 6A-7P, with a hypothetical Table B value of 55.00, would be 55.00 squared, or 3025. (See Par. 15 for further discussion of ESB values.)

TO OBTAIN ADDITIONAL METHODOLOGY DETAILS

Please reference *Radio Description of Methodology and Arbitron Replication II: A Study of the Reliability of Radio Ratings* for further discussion of the above and a discussion of more complex applications.

LIMITATIONS

Although Arbitron believes the above-described procedures provide report users with useful estimates of standard errors, the reader should note the limitations described in Paragraphs 14-16 and 18-21 herein on Pages ii-iii.
