Are advertising budgets large enough—p. 17
Baseball rules the airwaves
This fall Virginia's TV viewers are seeing the nation's football classics via WTVR; its radio listeners are hearing them over WMBG and WCOD.

All three are Havens and Martin stations, known since 1926 for complete broadcast service in the Old Dominion.

Only Havens and Martin stations provide broadcast service to viewer or listener. This is in line with company policy, with a record for radio and TV innovations and firsts that has few equals.

These First Stations of Virginia have provided complete NBC service to a faithful audience for many years. Whether you're interested in radio or TV, ask Blair about the stations which serve Virginians.

Crosley launches $2,000,000 contest

Crosley division of Avco brought two tons of $1 bills, totaling $2,000,000, into New York's Hotel Commodore 28 September to prove to dealers it really is launching contest with $2,000,000 of prizes, for Shelvador refrigerators. In addition, said Bill Blees, Crosley g.s.m., $2,000,000 plus will be spent this fall to promote contest, through Benton & Bowles. Included are two TV shows.

-SR-

Schenley seems to drop radio

Whether Schenley dropped broadcasting or broadcasting dropped Schenley, big distiller has announced it has stopped trying to get into radio and TV "for present." Schenley's ad department, however, is "keeping matter under exploration and consideration."

-SR-

RMA will add TV to "week"

Radio Manufacturers Assn. has added TV to name and scope of U.S. Radio and Television Week, 30 October-5 November. RMA will run no association campaign, but has prepared spot announcements and newspaper ads for manufacturer use with dealers.

-SR-

10,000,000 sick radios will get promotional needle

To put estimated 10,000,000 idle radio receivers back to work, RCA's tube department is running "radio-repair and tune-up" campaign with dealers. It's estimated that 40,000 radio technicians now service 80,000,000 home and car sets. With 24,000,000 TV sets by 1956 - plus more radios - 50,000 more technicians would be needed.

-SR-

Meck starts daytime television show

John Meck Industries, Inc., Plymouth, Ind., sets example to other TV set makers by sponsoring daytime, one-hour, four-afternoon-a-week show over WNBQ, Chicago. Program features news bulletins, news pictures, and time and weather reports. WCAU-TV, Philadelphia, has begun continued telecasting from 2 p.m. to 11 p.m.

-SR-

Winchell replaces K-F with Hudnut

Walter Winchell will get back into the drug business next January when he switches sponsors from Kaiser-Frazer Motors to William R. Warner & Co., for Richard Hudnut's home permanent wave and other hair products. K-F is seeking $30,000,000 loan from RFC, reportedly for retooling, etc., for introduction of low-priced car.

-SR-

Meighan heads CBS on Coast

With more radio and TV originations expected from Hollywood, CBS has "regrouped" there. V-p Howard S. Meighan will be chief executive officer on West Coast, with Merle S. Jones, general manager of KNX and Columbia Pacific net, and A. E. Joscelyn, director of Hollywood operations.
Edward Petry & Co. has told station executives of expansion plans, involving separate new TV department under Keith Kiggins; enlarged AM selling force in New York under "Hanque" Ringgold; new promotion staff headed by Seth Dennis, and long-term lease in new building now being constructed at 488 Madison Ave.

Government-owned British Broadcasting Corp. reports favorable balance of $370,249 for fiscal year ended March 31. Bulk of $33,097,022 income of BBC — which doesn't carry advertising — came from licenses on receiving sets, at rate of $2.80 for each radio and $5.60 for each TV set.

FM Association, Washington, reports 501 churches in Southern Baptist convention have signed tentative application cards for low-power FM stations. Churches are asking FCC permission to operate in 10-watt educational band, now controlled by National Association of Educational Broadcasters.

MBS has signed new sponsored programs totaling more than $2,000,000 in time. Five new advertisers have joined and six temporarily suspended shows are back.

Margaret Truman will be guest soloist on American Oil Company's "Carnegie Hall" musical program over ABC on 20 December. Amoco's new series (through Joseph Katz Agency) began 27 September.

One thousand-foot tower now being constructed for WCON-TV, within city limits of Atlanta, will be tallest broadcast tower in U.S. . . WJZ-TV also will move up higher, if FCC okays its petition to share NBC facilities on top of New York's Empire State building.

In August, for second time in about four years, newspaper ad linage in 52 major cities measured by Media Records was smaller — 3.6% — than parallel month of year ago. August, 1949, however, had only four Sundays as against five in August, 1948. . . Direct mail volume currently is estimated about 10% higher than last year.

Contests seem to be coming back strong again. Pillsbury Mills is promoting "Grand National Recipe and Baking Contest" with $153,000 in prizes, on "Galen Drake" show on ABC and in other media.

Generoso Pope, publisher of Italian language newspaper, "Il Progresso Italo-Americano," would buy WINS, 50,000 watts, New York, for $512,000. Station is now owned by Crosley Broadcasting. If FCC approves, Pope would have to sell WHOM, New York.

Du Mont Laboratories have announced they will repurchase Du Mont VHF transmitters from TV broadcasts and CP holders who may be required by FCC to change from VHF to UHF band.

THIS is not a fairy story . . . it's a Hooper story:

For five consecutive months, (Dec. '48 thru Apr. '49) WDAY had the highest Share-of-Audience ratings — Morning, Afternoon and Night — of all stations in the country!

What's more, we expect to get it again for the next 5-month period!

In addition to this amazing urban superiority, WDAY also has tremendous rural listenership. A new booklet gives facts and figures on some typical campaigns over WDAY—box-top premium offers, mail-order sales, and mail-pull response to prize contests. The number of replies, cost-per-reply and comparative costs paint an impressive picture of WDAY's large and loyal audience throughout the Red River Valley.

Get this new booklet today! It will convince you that WDAY is indeed one of the most fabulous stations in the nation, located in one of the most fabulous farm regions!
There are a lot of "fins" in the metropolitan area of North Carolina and they're being spent for drugs, foods, autos, trucks, furniture, appliances and radios, clothing, hardware, gas, oil and tires, tobaccos, cosmetics, soft drinks and dairy products.

You can hook on to some of our "finny" denizens with WNAO and WDUK in combination... as sharp a pair of hooks as you'll ever find. There's a discount to help you bait 'em, too.

Ask Avery-Knodel, our "reps". They've got the fishin' ground all charted.

you'll do better with the same line ... and 2 hooks!

North Carolina's Largest Metropolitan Market
Dear Mr. P & G—and you too!

It's time to cut your radio talent costs!

With some 1700 licensed stations fighting for listeners, it's time we all realized that radio talent cannot justify the prices they're asking (even at currently lower figures).

The "geniuses" are kidding you!

You can buy better scripts than you're getting for less money. You can get better acting, better directing, better over-all production for less money.... IF you'll get off Broadway and Hollywood and Vine to find it.

Come to the "country" and find new sources!

Right now, we're doing 16 network and transcribed shows a week for sponsors, and they're TOP FLIGHT. Ask Ralston Purina, Frigidaire, Nabisco, Light Crust Flour, Jax Beer, and countless other advertisers.

We're doing dramatic shows, musical shows, and variety shows with fresh, new talent....sound scripting....and "major league" production. We're delivering our clients increased sales for only 60% the costs you're paying on even your least expensive productions.

Our dramatic shows get results...cost less!

Take our new transcribed serial drama series "Second Spring". It's written by a writer you once paid $450 a week. It's directed by a former C. B. S. director. And the acting will amaze you. In one heavily populated market, "Second Spring" is given credit for a 128% increase in cracker sales. We doubt that it's that good; but the sponsor, a national advertiser, swears it's true. You can try it in some of your troublesome markets for as little as $2.50 per station.

Radio faces a new day....a day of scaled-down costs to adjust to scaled-down results. You sell a lot of soap out in the "country". Why not build a radio show out there, too?

Steel strike is major cloud in brighter business sky

With the coal miners back at work, Washington found the chief obstacle to substantial business recovery this fall to be the calling out of 500,000 steel workers on the pension issue. President Truman announced that he would make no further effort to intervene. He left settlement of the dispute in the hands of Cyrus S. Ching, director of the Federal Mediation and Conciliation Service.

Industrial production gained in September

Federal Reserve Board reported that September industrial production, which turned upward in August for the first time since last October, continued to move ahead last month. The August figure was 170%, as against 162% for July and 169% for June — compared with the 100% index base of the 1935-49 average. National Association of Purchasing Agents has found that 50% of plants surveyed will increase production schedules in October.

House group would increase postal rates $130,000,000

Including only a "mild" increase of $15,000,000 for second class rates, for magazines and newspapers, the House Post Office Committee is considering a bill to boost postal rates a total of $130,740,000 a year. The Senate P. O. Committee has approved a measure to raise rates by about $100,000,000 — with $10,000,000 of this coming from periodicals. Magazine and business paper groups made a strong fight last spring against large second class increases. Under the House bill first class rates would bring in $36,000,000 additional; third class — circulars, seeds, light catalogues — would rise $23,600,000; fourth class — parcel post and heavier catalogues — $10,000,000. Special services would rise $14,765,000.

Small businessmen see no harm in big business

Sixty-four per cent of small businessmen surveyed by Psychological Corporation, New York, believe that big business does more good than harm, and only 13% expressed themselves in the reverse. To the question as to what "group" caused them the most difficulties, 58% of the small businessmen said government bureaus, 20% said labor unions, and 20%, large companies. . . . Dr. Wilford L. King, chairman of the Committee for Constitutional Government, told a Senate subcommittee that big business is not monopolizing the American economy.

TV and radio set production reaches new high mark

Following an early-summer decline, television set production in August climbed to the record level of 185,706. Radio Manufacturers Association announced. This figure was more than twice as large as the 79,531 sets produced in July. AM radio set production rose from 318,104 in July to 559,014 in August, and FM and FM-AM combinations increased from 23,843 to 64,179.

Devaluation will reduce United States exports

Devaluation of the British pound and other foreign currencies in the "pound orbit" will tend to stimulate their exports to the United States but to curtail our own. British cars, textiles, leather, chinaware, and French wines, etc., will be lower priced in this country. Because the dollar will buy about 30% more abroad, travel agencies are getting set for a record rush of U. S. tourists overseas. Travel advertising in this country by European countries and groups probably will be stepped up.

Airlines turn loss to profit; may increase advertising

In contrast with a net loss of $14,000,000 for the first nine months of 1948, four major airlines — American, United, Northwest and TWA — are expected to report a total $14,000,000 net profit for the parallel period of this year. Eastern Air Lines has made a profit right along. The airlines have found that, instead of spending most of their efforts battling for higher rates, they can do all right if they promote vigorously enough. Such devices as "air coach" services and special "family rates" have helped.

Consumer buying declines only 2% from record level

Consumer buying in the second quarter of 1949 was only 2% less than the record mark reached last winter, the Department of Commerce reports. Meanwhile, the department notes an upturn in consumer credit as an "important factor supporting the volume of consumer buying." Business loans also started to move ahead again last month.

Retailers stress need to create demand

Despite a summer decline in sales, National Retail Dry Goods Association points to a growth of optimism among retailers. The merchants realize, NRDGA says, that "the retailer's function is not merely to supply demand but likewise to create demand."

Commerce forms advertising advisory committee

As the first step toward setting up an advertising service unit, the Department of Commerce will establish a permanent advisory committee. Temporary chairman is Paul B. West, president of Association of National Advertisers.

10 OCTOBER 1949
For the past decade Servel's new president, balding, energetic W. Paul Jones was one of the foremost competitors of the outfit he now bosses. As vice president of Philco Mr. Jones has been responsible for the effective promotion of electric refrigerators. In 1948 Philco had doubled its sales over the preceding year and was fast becoming one of the nation's leaders. Jones had streamlined the company in a craftsmanlike manner. Cynical critics claim that he was baited into the gas camp (Servel makes only gas refrigerators) by a fabulous salary offer. However, intimates of Jones are aware of his propensity for tackling challenging chores. It is characteristic of his boyish enthusiasm for accomplishment.

The 47-year-old executive is faced with a monumental task. Competing with a dozen electric refrigerator producers, Servel is outsold 10 to one. In addition to public reluctance to accept gas refrigerators, they are priced above the electric models. One of Jones' first jobs will be to slice the price differential to the absolute minimum. As an inventor who has patented several features to improve automatic refrigeration, Jones is convinced of the superiority of gas refrigerators. For the future, he plans a national advertising campaign to pepper the populace with the firm's slogan, "Stays Silent—Lasts Longer," which Servel hopes will become as popular as was Packard's "Ask the man who owns one."

In 1941 Servel had encouraging evidence that its gas product had dented the American market. Profits reached the $2,000,000 mark. With the war limiting the production of refrigerators, the company used radio for institutional advertising in order to retain its expanding foothold in the field. In 1943-44 Servel sponsored the Billie Burke Show. Using only radio spots in subsequent years, business boomed to a record high in 1948 when Servel netted $5,436,168. Of the $381,300 ad budget for the first seven months of 1949, $111,554 was expended to sponsor What's My Name? for 26 weeks. By year's end the total radio advertising budget is expected to reach an estimated $250,000.
On the afternoon of Thursday, September 22nd, at 4:00 p.m., the story was out. Liggett & Myers, which had just revived their king-sized brand of cigarettes, Fatima, from a thirty-year obscurity, was dropping Tales of Fatima on CBS and was picking up Dragnet, a two-listed whodunit with a good summer rating record, on NBC. The announcement came as a surprise to many people at Liggett & Myers' agency, Newell-Lanett, to network executives at CBS, and to the broadcast advertising business in general.

There seemed to be no immediate reason. Basil Rathbone, star of Tales of Fatima, had been promoted by Liggett & Myers to the point where he was rapidly becoming a secondary trade-mark for the cigarette brand. The show, off to a bad start programmewise with the first few broadcasts, had just added a new guest star policy, changed its format, and was doing fairly well when it came to ratings and sales pull. How, then, did NBC manage to snatch the Fatima billings from under the watchful eye of CBS?

The thinking on that one goes back to March, 1949. At that time, Liggett & Myers was doing some top-brass worrying about Tales of Fatima, which was not doing too well as far as ratings went on the 26 stations which carried it commercially. The program lacked focus (as reported to CBS and the client by Scherwin Research) and seemed somehow to be missing the mark. CBS, knowing that to sell Liggett & Myers a show you sell the client and not the agency first, came up with an interesting proposal. Plans at that time were in the works for Liggett & Myers to sponsor Bing Crosby in a 9:30-10 p.m. spot on Wednesday nights on CBS. Why not, suggested CBS, buy the Groucho Marx show from 9:00-9:30 p.m. the same night, and sell—for the first time in network radio—two cigarette brands of a sponsor on a one-hour, back-to-back basis?

Liggett & Myers was receptive to the idea, but before the big tobacco firm could do anything about it, Groucho Marx was bought by Elgin-American. However, Liggett & Myers is one of those advertisers who, when a good idea is thrown at them, is willing to wait awhile to put it to work. From time to time, the idea of selling two cigarette brands in a one-hour period was discussed at Liggett & Myers and with the higher echelon of Newell-Lanett. Somehow, NBC got wind of it.

A few weeks before the Tales of Fatima option was due to run out, NBC, its collective feathers a bit ruffled by recent CBS show and talent raids, decided to pull a quick one on the boys on Madison Avenue. NBC called on Liggett & Myers with an impressive pitch. Once before, NBC had tried to sell Liggett & Myers on using the Howdy Pardner Show for Fatima, but the deal had gone awry at the last minute. This time, NBC was certain, nothing was going to go wrong.

NBC's deal: (1) Liggett & Myers was planning to put the Chesterfield Supper Club into a 10-10:30 p.m. time slot on Thursdays. NBC could get the 10:30-11 p.m. slot cleared for a new Liggett & Myers program as well, thus giving them a chance to utilize the back-to-back gimmick. (2) NBC's new crop of summer shows had a strongly-rated whodunit, Dragnet, which had been getting ratings in the 8.0-9.0 class, and it was available. (3) Liggett & Myers could sponsor Dragnet on 140 stations, get national coverage for newly revived Fatima brand, and get the 10% "full network" discount. Also, two half-hour shows in an hour period earned the one-hour discount.

Liggett & Myers bought. Dragnet started October 6.

The lonely wail of the prairie dog...

the screech of big city taxi...the farmer up at 5:00 or the salesman on the 7:42...13,000,000 New Yorkers or cattle herders of the West; all America loves America's music.

That's why PRAIRIE STARS presented on WOV by Rosalie Allen, sweetheart of the prairie, delivers one of the most loyal responsive audiences (64% of whom are women) in all radio.

For maximum results at minimum cost—for a program that sells—for proven sales results, buy Prairie Stars, broadcast nightly at nine.

Ask to see the new Prairie Stars Audience Audit.

It's the facts on who is listening to... Prairie Stars

For six years KVOO has been the only station out of the 120 used by Dr. LeGear to carry year-round advertising for this account! Why? — Year in, year out, Dr. LeGear (and all KVOO advertisers) know they can always count on KVOO for RESULTS!

Dr. D. H. LeGear

Dr. L. D. LeGear Medicine Company

July 15, 1949

Mr. Sam B. Schneider
Para Service Director
Radio Station KVOO
Tulsa 3, Oklahoma

Dear Sam:

Congratulations on the fine job you and KVOO are doing selling Dr. LeGear's new approved FLY SPRAY.

As you probably realize, this product is on the air over a number of stations and is being pushed by other mediums of advertising. All of our salesmen are doing a good job of selling this item. This, naturally, speaks well for the product and for the sales force but, of course, the real test of effective advertising is unsolicited orders.

I just wanted to advise you that we have had more unsolicited orders for Dr. LeGear's FLY SPRAY from KVOO's primary area than from any other area that we cover. I want you to know that we all appreciate this very much and trust that you will keep up this "top-notch" selling.

Sincerely yours,

Dr. L. D. LeGear Medicine Co.

Dr. D. H. LeGear

RADIO listening in Iowa has increased 213% since 1941!

This and other significant trends are features of the 1949 Iowa Radio Audience Survey.* For the twelfth consecutive year, this outstanding Survey continues to give a complete and accurate picture of radio in Iowa. It enables advertisers and agencies to determine Iowa’s greatest radio value for any radio promotion, in any or all parts of the State!

This valuable book will be off the press in a few days. Write now to reserve your free copy!

*The 1949 Iowa Radio Audience Survey is a “must” for every advertising, sales or marketing man who is interested in Iowa.

The 1949 Edition is the twelfth annual study of radio listening habits in Iowa. It was made by Dr. F. L. Whan of Wichita University—based on personal interviews with over 9,000 Iowa families, scientifically selected from cities, towns, villages and farms all over the State.

As a service to the sales, advertising and research professions, WHO will gladly send a copy of the 1949 Survey to anyone interested in the subjects covered.

Are ad budgets big enough?

Study of 69 leading companies shows that more advertising would build sales and reduce other costs

Five billion dollars are now spent annually by all advertisers in all media in the United States.

Critics of advertising cite this figure to emphasize the "waste" of advertising. They ignore the fact that advertising is the primary force in creating and maintaining and developing businesses. They don't dare try to guess what would happen to the nation's economy, and their own livelihood, if advertising were drastically reduced all along the line.

The $5 billion figure looks big. But actually, from several standpoints, there are sound reasons for believing that it isn't nearly big enough.

The overall ratio of all advertising and promotion to all the national income today is only about 2.1%. This is smaller than the 3.3% of 1938, when the nation's income was less than one-third as large. It is too small to support most companies — especially companies dealing in consumer products — in today's competitive, buyer's market. It is too small to support, and to help to reduce, the costs of personal salesmanship.

In the next decade, it would seem, advertising must be big and strong enough to assume a real pre-selling role. In fact, it is fast becoming mechanized selling. With self-service accounting for an increasing share of all retail business, advertisers must make doubly sure that their brands are known and accepted.

T. F. Flanagan, managing director of the National Association of Radio Station Representatives (and formerly president of Penn Tobacco Company, a substantial advertiser), has analyzed advertising expenditures against sales and other items in annual reports for 1948 of 69 leading national advertisers.

He chose these 69 from lists of the 150 top advertisers in network radio, magazines and newspapers, as compiled by Publishers Information Bu

</table>

Combined annual sales of all 69 in 1948 were more than $18 billion. Against this figure were total “selling, advertising, general, and administration expenses” (usually lumped into one item in annual reports), of about $2.5 billion, or about 13.4% of sales. But advertising expenditures in these media were only $258,288,250—or only about 1.4% of sales, and only 10.7% of total “administration” costs.

The network radio figures published by PIB cover time costs only. Adding $70,000,000 for estimated network radio talent, for spot radio time and talent, and outdoor advertising. Mr. Flanagan found a “mass media” total for these 69 companies of $328,228,250. The projection of this last figure thus becomes 1.8% of sales volume and 13.7% of total “administration” costs.

Even with the addition of point-of-sale, direct mail, television, and other media, the advertising volume of these leading advertisers probably would not exceed 2.5% of sales.

For some of them—notably Borden and National Dairy, Armour and Swift, which maintain their own delivery systems, and National and Sunshine Biscuit, which sell direct to stores—costs of selling are the dominant factor in administration costs. But in many of the others the “physical” sales job also weighs heavily.

Among the score of leading advertisers whose ratio of advertising expenditures to administration costs was below the 10.7% average for the three media. were the Big Four rubber companies—Firestone, Goodrich, Goodyear, and United States Rubber—and California Packing (Del Monte), Heinz, and Pet Milk.

Also on the “below average” list were du Pont, Eastman Kodak, International Harvester, Johnson & John-
son, Prudential Life, RKO Radio Pictures, and Socony Vacuum Oil.

The rubber companies pay the costs of maintaining many of their own stores. So does Eastman, Prudential—\(80\%\) of its profits. The advertising had higher-than-average ratios among the Big Five life-insurance companies—is represented by thousands of salesmen. Du Pont and Harvester run many-sided businesses, with separate sales organizations for each. The oil companies still have a big stake in service stations. And until the recent Supreme Court decision, several large movie producers, including RKO, also operated theaters.

All of these factors add to the sales part of "administration costs." Manufacturing businesses which own hundreds or thousands of outlets, or must be represented by hundreds or thousands of salesmen, do proportionately less advertising to total costs.

Most of them might fare better if they cut down on direct personal contacts and put the difference into advertising. This is especially true of insurance, which is rarely bought but nearly always sold. It is also true of oil companies. Either with their own stations or exclusive-franchise stations, their outlets usually carry only one brand of oil or gasoline, and the refiners—and consumers—pay for expensive duplication of facilities.

On the other hand all the motor car and appliance, tobacco, radio-TV-appliance, liquor and soft drink, watch, fountain pen, and textile product companies, among these 69, had a higher-than-average ratio of advertising to administration costs. This also applies to most food, soap, drug, and tobacco advertisers, for which figures are available.

It is more than a coincidence that most companies in the latter group also had higher-than-average ratios of advertising to sales volume and to net profits.

Take, for example, that diversified company, American Home Products. The ratio of its three-media advertising expenditures to total administration costs was about 16%. Its ratio of advertising to sales was about 4% and of advertising to net profits about 80%.

Or take B. T. Babbitt (Bab-O), where the ratio of advertising to administration costs was 50%; the ratio of advertising to sales about 12%, and to net profits, nearly 100%. In Babbitt's case, there's little doubt about what makes the mare go—and nearly all its advertising money is spent in radio.

Almost 50% of the Bayuk Cigar (Phillies) administration costs were for advertising, and the Bayuk advertising expenditure was 4% of sales and nearly 70% of profits. Bayuk devoted about 90% of its three-media expenditure last year to radio.

One-third of the Reynolds Tobacco (Camel) administration costs were for advertising. This was only about 15% of sales volume, but about 33% of net profits. Although detailed figures aren't available, similar ratios are reported to have obtained for American Tobacco and Liggett & Myers. All three spend more money in network radio than they do in newspapers or magazines. Reynolds has learned a lesson from its experience of 15 years ago, when it cut out all advertising "to save money." Sales dropped sharply.

(Please turn to page 40)
Block Drug didn't add network radio to their tooth advertising without knowing something ahead of time about the impact of Ammi-ident air commercials. Before committing roughly two-thirds of an estimated $2,000,000 advertising budget to CBS's Burns & Allen, they saturated a number of test markets with one-minute announcements and chain breaks. What they learned helped answer the question of how to spend the bulk of the national ad budget. They also discovered the kind of supplementary advertising best designed to back up the network advertising of Ammi-ident.

The Ammi-ident air-test campaign told radio-minded Block executives that commercials describing their "new model" dentifrice would get both attention and action. They didn't need that evidence, however, to know the spoken word would build sales for their products. A special e.t. announcement campaign for Allenru (an internal remedy for rheumatic aches and pains) boosted sales 150% in advertised areas. In some areas the one-minute spots, aired only between 6:30 and 8:30 a.m., shot sales up 900%. This was in 1947. The overall sales of Allenru continued to climb in 1948, with the first four months of the year showing a national increase of 31% over the same period the previous year.

Sales increases of Poslam (a medicated ointment). Allenru and Omega Oil, all of which were strongly promoted by radio, are described by the company as "sensational." Sales manager Paul A. Woods of Collier Drug Co., a Birmingham, Alabama, wholesaler, wrote WAPI last year that within a few weeks a campaign of five one-minute announcements per week built sales from a half-dozen cases of the small-size Omega Oil and three cases of the large size per month to 36 dozen and 12 dozen cases respectively. "We were not prepared for the tremendous demand," he wrote. Throughout the South sales shot up 333 1/3% within four months after start of the campaign. Country-wide, Omega Oil sales about doubled in the same period, while the Poslam curve rose 15%. Block advertising manager George J. Abrans wrote the agency (Redfield-Johnstone, New York): "The radio commercials you have prepared have played a most important part in the fast growth of these three products."

The original Ammi-ident was on the market about two years, sold primarily through ethical channels. It was not advertised. Block Drug Co., Inc., of Jersey City, N. J., bought it in November, 1948. It was not advertised for the following three months, but sales began to pick up automatically as a result of stories in consumer publications, climaxcd by a piece in the Reader's Digest.

If we take "1" as a figure to represent sales at the time Block took over, Ammi-ident sales rose lazily on the strength of magazine publicity on
ammoniated dentifrices to a “20” by the end of January, 1949. The first advertising it got was a full-page spread in metropolitan dailies throughout the country tying in with the Reader's Digest story. The copy wasn't strong, but it zoomed sales to “85” (over the “1” of the preceding November) by the end of February.

By this time, Block Drug president Melvin A. Block, advertising manager George J. Abrams, and the agency, Cecil & Presbrey, New York, were ready with a test campaign of radio announcements and full-page space in selected markets. Two of the things they wanted to find out were:

Which media would give Amm-i-dent the most instant mass acceptance (over-night, if possible)? In which should they concentrate the bulk of their funds in a national drive? The Block people have used local and regional radio with outstanding success for many of their products, including items in their line of cosmetics and toiletries. They knew what air-selling had already done for them. Cecil & Presbrey, one of the strongest newcomers in radio and TV selling, has pioneered new radio sales techniques for Phillip Morris (daytime radio), Speidel, and others.

But neither of these organizations is prone to jump to conclusions, despite their backlog of experience, without careful testing. Besides, with a product like Amm-i-dent there were special problems. The characteristics of the product and what they are designed to accomplish required considerable explanation and verification. The sales pitch called for rather detailed presentation in order to establish in the prospect's mind the desired picture of the product's benefits.

Tests had shown the presentation called for such material as case-histories and pictures; technical pictures; graphs or charts; pictures of the product, etc. Most adult dentifrice users were on the blasé side, a little inured to the plethora of similar claims of “regular” tooth paste and powder brands. Re-conditioning such users to the basic Amm-i-dent claims of cavity prevention invited a Reader's Digest-Popular Science combination of anecdotal statement on product background and development, how it works, what it will do for humanity, etc.

George Burns and Gracie Allen are now starting to tell the Amm-i-dent story on CBS.

The first national Amm-i-dent copy to break was the tie-in with the Reader's Digest story last February. It utilized long, detailed copy. It got startling readership. Early the same month individual market tests began.

These tests, in such cities as Columbus and Toledo, Ohio, Ft. Wayne, Ind., Syracuse, N. Y., etc., were run simultaneously with an overall national newspaper campaign of full-page and 1000-line ads in about 230 papers.

Radio test cities got as many as 50 announcements per week for a month. Of the total number of announc-
Tailor-made transcriptions

Advertisers from autos to breakfast foods find it pays to fit program to markets

Five reasons why sponsors use custom commercials on syndicated e.t. shows:

1. Sponsor identification is invariably higher when the show's "mood" is unbroken.

2. Promotional tie-ins of all types pay off better when the client-star link is strong.

3. Costs are often the same, or even lower than hiring local announcers at AFRA rate.

4. "Customizing" an e.t. show adds prestige with listeners and local merchants.

5. Custom commercials with special themes are cheaper than an all-custom show.

There's nothing new about custom-made transcriptions. The first shows that reached the air on wax back in the late 1920's, were custom-made to an advertiser's order. One of the earliest of these shows was a two-hour Christmas show, put together in Europe, by BBDO for a bakery client. This show was a round-up, on 78 r.p.m. records, of such famous talent as the Grenadier's Band in London and the Sistine Choir in Rome. It did a bang-up one-shot promotional job, and started a whole cycle of special recordings and later, e.t.'s.

After a brief one-year period, in which newly-born recording companies ran around signing up stations to handle their transcribed or recorded programs on an exclusive basis, the NAB put a stop to this practice in 1929.

After 1929, the practice of tailor-making a show to an advertiser's order fell off. Many of the transcription firms who make their living mainly from syndicated e.t. shows came into the field, and most advertisers who decided to go non-network in their programming found that the growing list of syndicated e.t. shows could supply most of their wants.

There were a few exceptions during the early and middle 1930's. In 1937, Chevrolet, long a pioneer in any new form of broadcast advertising, commissioned the World Broadcasting e.t. firm (now a part of Fred Ziv's organization) to put together a 15-minute musical show called Musical Moments. The platters were placed on what, at that time, was the biggest national selective campaign in the history of radio. Some 450 stations were used to carry the show, which featured "name" musical...
In the late 1930's and in the 1940's, other sponsors used custom-made e.t.'s to do special market promotions, to introduce new products, or to sell seasonal products when network time was hard to buy or difficult to arrange. C. P. MacGregor, and later Les Mitchel, tailor-made the Skippy Hollywood Theater which is still boosting sales for that brand of peanut butter. Londonderry Ice Cream Mix was introduced in a custom-made e.t. show that featured the famous story-telling Lou Holtz and his "Lapidus" jokes. In the mid-1940's Standard Oil boosted seasonal sales for its Flit line of insecticides via e.t.s. Coca-Cola used its Songs by Morton Downey on a custom-made basis, with live tags for local bottlers, after that show left the network air. The same soft-drink concern used an e.t. dramatization of Claudia. Rose Franken's wool-gathering young wife, to bolster sales.

In Cincinnati, the Kroger Company, one of the nation's largest grocery chains, has for more than a decade been doing a terrific merchandising and selling job with three custom-made soap operas on wax, which are sold by the producing company to other clients on a syndicated basis in non-Kroger territories.

Lew Parker, comedy star of the Broadway show Are You With It, sold Mennen shaving products on a tailor-made transcribed show. Bing Crosby, one of the owners of the packing firm that produces Minute-Maid Orange Juice, helped open up the entire field of fresh-frozen fruit juices with a five-minute e.t. show that sold Minute-Maid. Stanback powders received a terrific shot-in-the-arm a couple of years back with a 15-minute custom-made e.t. show, starring Peter Donald, which the headache-remedy firm found to be only slightly more expensive than doing the job with transcribed announcements and station breaks. There have been others, too, who have found that the increased impact and sponsor identification of a custom-made transcribed show is one of the most effective ways to sell a product on the air.

There are several degrees of "custom-made transcriptions." The fanciest, and of course the most expensive, method is to have a show created from the ground up and designed solely for one advertiser's product. The shows in this category, such as Electric Auto-Lite's dealer-sponsored Gasoline Alley, the Brand Name Foundation's The Name Speaks, the Carr Melody Bakers for Pennsylvania's big Carr Bakeries, are of general interest, but are aimed primarily at the audience that buys the product or service being air-promoted.

A sort of compromise between this method of building a show from scratch and the long lists of available syndicated shows is the e.t. show with "customized commercials." Here, a regular syndicated show from the library of a transcription company is

(Please turn to page 56)

**Five reasons why sponsors use completely custom-built e.t. shows:**

1. Tailor-made transcriptions guarantee an advertiser that the show is exclusively his.
2. In large campaigns, syndicated e.t.'s often cannot be cleared for the markets wanted.
3. The sponsor identification is at its strongest, and can compare with the best in network radio.
4. A complete uniformity of commercial approach and program vehicle can be done reasonably.
5. All-custom shows can be expensive on a small scale, but are low-cost when used widely.

10 OCTOBER 1949
With more and more programs every week featuring America's leading negro singers, musicians and personalities, WDIA has become top choice with more than 1/2 MILLION NEGROES listening in its primary area. That's why WDIA is known everywhere as the station that's "OUT FRONT DOWN SOUTH." More and better programs are planned for the folks who listen and like WDIA in Memphis.

SONGBIRDS OF THE SOUTH
Here is the most popular female group in the whole South. These maternal songbirds are top favorites everywhere they go, and you'll hear them Saturdays and Sundays at 5:15 on WDIA.

ROYAL HARMONY BOYS
Saturdays at 5:00 P.M. is "good listening time" with three favorite singers of spiritual songs. Listen for them on WDIA—look for them in your community.

PILGRIM TRAVELLERS
Meet a well-known group, typical of the radio and recording stars you hear regularly in Queens, on WDIA's all-star parade of programs. If you're familiar, you'll hear them on WDIA.

WDIA is constantly on the alert for programs that please you, the listener, and we feel that the by-word "Out Front Down South" is well earned.

Dial 73 and LISTEN

WDIA
Memphis, Tenn.

HOOPER STUDIES HAVE FOUND THAT NEGRO-BEAMED PROGRAMS SUCH AS THESE SOMETIMES CAN ATTRACT UP TO 69.7%

The forgotten
15,000,000

Ten billion a year Negro market
is largely ignored by
national advertisers

When a segment of the American population that is larger than the population of the entire Dominion of Canada is overlooked and under-developed by U. S. national advertisers and their agencies, something would seem to be wrong. In the case of America's 15,000,000 Negroes, something very definitely is.

There were 14,460,000 colored people in the United States two years ago, as against Canada's total population of 11,500,000. In numbers and in buying power the American Negro market is growing by the proverbial leaps and bounds. The generally accepted annual Negro income figure is $10,000.00.
000,000, although from a national survey conducted in 1946 by Edgar A. Steele, then director of research for the Research Company of America, the total is closer to $12,000,000,000.

Of this total, according to Steele's findings, $2,700,000,000 is spent for food, a round two billion for clothing, $750,000,000 for household, $300,000,000 for furniture—down to $100,000,000 for automobiles. In any advertiser's book that ought to represent a potent buyer's market—and yet very little is known of advertising techniques that will effectively sell the Negro. Steele's survey for the Research Company of America only three years ago was the first national study ever made of a population segment that increased 113% between 1940 and 1944.

A ten-billion-dollar income figure for any one market would, of course, mean very little to broadcast advertisers if the percentage of radio homes in that market were low. In the Negro market, however, ability to listen to radio sales messages more than matches ability to spend. Steele's breakdown of Negro radio homes in the ten most important Negro areas follows:

<table>

Reaching the Negro market through radio does not involve the same problems that are found in bringing American products to the attention of foreign-language groups in the U.S. The latter can't be "gotten to" via standard English-language radio techniques or American programs. But the American Negro speaks and understands the English language. Though in many places colored folk live as a "city within a city," though there are social segregation, economic and political barriers, civic and fraternal restrictions, there are nevertheless no such things as "segregated ears." The Negro sitting in front of his radio is able to hear and understand everything that his white fellow-American can. And he has the inclination and the money to buy the food, drug, clothing, household, and automotive products that are directly plugged to 125,000,000 other Americans whose skins are lighter.

Why, then, with no such obstacle as "segregated ears," with no barrier of foreign language, have national advertisers and their agencies consistently ignored a lucrative and constantly expanding market? Opinions among agency people and others who have attempted to study the situation range from the old bugaboo of prejudice to ignorance of the market.

Some advertisers and agencies realize they may possibly be passing up a good thing, but they feel that for them to research the Negro market would be too expensive and too difficult. While it's true that not a great deal is generally known about how to reach the Negro with effective radio advertising methods, advertisers do have sources for information on the overall colored picture, such as the Research Company of America, Joseph L. Wootton of Interstate United Newspapers, Inc.

The angle of race and color can't help entering any appraisal of the dark-skinned portion of America's population. Advertisers who themselves may have no personal bias feel that if they heeded part of their radio budget directly to the Negro audience they would lose among white buyers of their products what they might gain among the color. Obviously, a complete sociological tract could be derived from that angle, and where an advertiser is swayed by a consideration of racial discrimination, no amount of Negro-market research will influence him.

For the advertiser who does want to...

Duke Ellington has sold goods both on Negro-market and national network programs.

Willie Bryant's "After Hours" show over WHOM is popular with New York City's Negroes.
Does your TV commercial click?

First Daniel Starch findings show that remembrance ranges from 98% to 11%

Cartoon and stop-motion techniques (B.V.D., Ajax Cleanser, etc.) and the service approach (Kool weather reports, Bulova time signals) rate top scores in the first TV commercial report to be released about October 20 by Daniel Starch & Staff. Ajax offering tested in the initial August survey was a network commercial. Kool, Bulova, and B.V.D. were all spots. Ads were scored on how well people remembered and liked them. An attempt was also made to measure their effect in creating brand acceptance.

The fact that the integrated, or blended, commercial came out second in esteem of the Starch sample doesn’t imply necessarily it’s a second-rate style of selling. Nor does the least well received — situations especially contrived for the sales talk — mean they can’t do a top-notch selling job.

Before one can estimate the future value, and some of the limitations of the Starch reports on TV commercials, it is wise to consider just what Dr. Starch’s reports actually attempt, and what that has to do with selling goods.

Research experts will take his techniques and sample apart to see if they are adequate for their purpose. Some won’t like the “aided recall” method of getting responses to TV ads seen during the week or month previous to the survey. Others will disapprove showing the person interviewed a sequence of still shots to represent a live or animated commercial. This article will not attempt to evaluate Dr. Starch’s techniques. It is probable, however, that most researchers will grant they are adequate for present purposes. Some will not agree that what the reports now attempt is sufficiently useful or accurate. Very few agencies or sponsors had seen the advance findings (the report was at the printers) as this story went to press, but a number of agencies and advertisers told Strossor they felt almost anything that throws even a little light on the subject would be welcomed.

When a Starch investigator asks a person tone of two hundred men or two hundred women in New York, Chicago, Philadelphia, Boston at present if he has seen the commercial represented by one to six stills photographed from the screen of a monitor set, the answer is assumed to establish that the ad is remembered. More than fifteen years ago Dr. Starch reasoned that since no one could read an ad he hadn’t been exposed to, the first step was to determine if he had seen it.

Since both a TV commercial and a magazine ad are set between editorial or entertainment matter in a roughly similar manner, adaptation of the readership studies to TV seemed logical. Another point of correspondence is the kinship of the magazine ad to the blended commercial. Generally the magazine ad is reasonably appropriate in style and subject matter to the majority of a publication’s readers, as is the blended commercial to the followers of the program in which it appears.

Dr. Starch also reasoned that a commercial that inspired dislike wasn’t likely to be read with interest or thoroughness, if at all. So his TV commercial investigators put attitude questions to their subjects covering degrees of liking or disliking.

In the field of qualitative research there is a major distinction between liking something and believing the statements or claims involved. In other words, format, content, presentation, may be pleasing to a subject, even though he disbelieves or doubts the
truth of specific statements or claims.

The liking or pleasure one may feel for a commercial presentation is in a broad but quite definite sense its entertainment value. This is important to the extent that a commercial has to be entertaining to be "taken in." It will be interesting to note, a little further on, some commercials with a very low memory or liking score that got an extremely good "brand acceptance" score for viewers as compared with non-viewers.

These data are obtained by showing all respondents a card on which is listed a limited number of brands of one type of product. The top major brands are used, and usually include four manufacturers. If the product were tires, the names of four makes would be used.

The one being interviewed is first shown each product card and asked which one he would buy. His choice, whether listed or not (or any other answer he may make), is recorded.

After answering about all the products, he is then shown the commercial story boards (boards on which are pasted the sequences of pictures representing various stages of the commercial as seen on television), and asked, "Have you seen this commercial?" If he says yes, he is asked to select one of the following statements which best expresses his attitude towards it.

1. I like it so much that I look forward to seeing it.
2. I enjoy it whenever I happen to see it.
3. I have no feeling one way or the other.
4. I don't particularly like to see it.
5. I definitely dislike it or object to it.

(Please turn to page 42)
ALTHOUGH THE BREWER USES THE "AIR" IN OTHER WAYS, MAURICE SPITALNY'S ORCHESTRA IS THE BASIS OF THE CAMPAIGN

Highbrow music sells beer

Eleven-year "Tap-Time" series helps to lift Fort Pitt volume from 82,000 to 1,200,000 barrels

Most broadcast advertising is better, when the president of the company keeps as far away from air policy as possible. The opposite is true in the case of the Fort Pitt Brewing Company. Ever since President Michael Berardino decided to become advertising and sales manager as well as chairman of the board and president, Fort Pitt and Old Shay beer and ale have increased their share of the consumer brew dollar, until today they're 11th among beers in the United States and they're still growing.

In 1933, when Berardino took over Fort Pitt, it was a poor third among local Pittsburgh beers with an annual output of 82,000 barrels. In 1943, Fort Pitt passed the 1,200,000 barrel mark. The first half of 1949 was 15% ahead of 1948. Broadcast advertising deserves a good share of the credit, for while today it receives only 35% of the Fort Pitt promotion dollar, it's the only advertising until the current campaign that appears to be different from competitive brews. Point-of-sale advertising in the brewing business usually takes 25% of each firm's advertising dollar. That's not true of Pennsylvania brewers, for state laws prohibit the sale of beer in groceries and other such retail outlets where a good part of a brewer's point-of-sale material is used. Penn state laws also limit the amount of point-of-sale advertising a brewer can do in a tavern to around $10 per year.

Pennsylvania beer must be sold in regular advertising media, and ear cards and outdoor advertising get as much (35%) of Fort Pitt advertising money as radio. The other 30% goes to newspapers.

Brewers like to change their advertising agencies frequently. Fort Pitt has had the Pittsburgh office of Batten, Barton, Durstine and Osborn throughout its phenomenal 11-year rise.

Fort Pitt has likewise sponsored Tap Time right from the time (1933) that President Berardino reorganized the company. Tap Time is his baby. He was warned, when he first suggested it, "musical programs don't sell beer." He smiled at the warning then and his smile, when the subject comes up today, is even broader, for Tap Time, with Maurice Spitalny at the baton, has been the spearhead of Fort Pitt
broadcast advertising during the past 11 years.

It's the program, not the advertising, that's sold Fort Pitt and Old Shay beer. The commercials during the entire half-hour musical program are kept under two minutes. This is less than half of what is generally allotted commercial copy in a normal half-hour program.

There has been some feeling that because one of the Spitalny brothers conducts the program it's strictly in the classical vein. Tap Time is a musical variety program, with the tunes running all the way from the special arrangements of the latest swing numbers (Kinder Sisters) to operatic arias with Martha Briney of the Pittsburgh Symphony and Pittsburg Opera. She's also sung with the New York City Center Opera Company.

The orchestra, while not of symphonic size (it's only 24 men), can handle most assignments with musical aplomb. It's as much at home with a fast rhythmical selection as it is with an old time classical favorite.

Tap Time enters the home at the family hour, 7:30-8 p.m. Its Hooperating is consistently ahead of similar national network programs. Fort Pitt expects the program to sell the product, not the "reminder" commercials. And it's been doing just that for over a decade.

While most beer advertisers change their broadcast advertising frequently, Fort Pitt goes along serving good beer and good music throughout the year. There are literally thousands of families who look upon Tap Time as part of their Tuesday evening living, and tune it as regularly as they wash the grime of Pittsburgh off their faces.

Fort Pitt beer is being sold far beyond the Pittsburgh Tri-state area. Tap Time was first heard over KDKA. In 1941 a 3-station West Virginia network was added. Tap Time is now heard over KDKA, WTAM (Cleveland); WBLK, Clarkshurg, WPAR, Parkersburg, and WWVA, Wheeling, West Virginia; WKBO, Harrisburg, and WORK, York, Pennsylvania.

Regional networks are nothing new in beer advertising, but a beer-sponsored musical program over a regional network is. Tap Time does a good Fort Pitt job on all its stations for it never gets too high over the musical heads of its listeners, whether they be in Wheeling, West Virginia or Cleveland, Ohio.

It would be foolhardy to pretend that Tap Time alone has built Fort Pitt annual business of $29,477,000, and net profit, in 1948, of $1,515,215. It hasn't. Fort Pitt hasn't ignored the value of sportscasting nor of other media. Instead of fighting for big sports events, it sponsors two of the most popular sports announcers in the Pittsburgh area, Joe Tucker (WWSW) and Bob Prince (WAS). Prince does a 6 p.m. sports round-up every day and covers the water-front. Prince makes a number of play-by-play programs and has a large sports following. The fact that he handles the Fort Pitt commercials himself contributes to the selling value of his daily Case of Sports.

Joe Tucker broadcasts the warm-up 15 minutes before the Pirates baseball games for Fort Pitt. Since many baseball followers tune in before the game starts, Tucker reaches them with Fort Pitt. In order to tie Joe Tucker and Bob Prince more firmly into Fort Pitt advertising, the company has them handle the play-by-play broadcasting of the home games of the Pittsburgh Hornets (hockey team). They both handle commercials as they both call goals and penalties. The sum total of the sponsorship of the "round-up," "warm-up" and hockey play-by-play has reached the point of making Prince and Tucker mean Fort Pitt beer whenever they are on the air. That's nice going, if you can get it.

Fort Pitt doesn't stop with the sponsorship of sports shows and Tap Time. It has live and transcribed shows on the air in a number of markets where Fort Pitt and Old Shay beers are dis...

...I know Fred Brokaw

You probably know him too if you are in this business. His many friends are really good friends. I guess it is not just because of his remarkable personality but because of his good, solid business sense.

I met him first a way back when he was a long, lanky, awkward freshman. We thought he was pretty good material for our fraternity up at Cornell. One night we invited him over for dinner just to “look him over”. Later I planted myself in one of the upstairs studies. You see I was a senior then. As our boys were showing him the house they brought him in and conveniently disappeared. I asked Fred to sit down and after some discussion I had the honor of putting our pledge button on his lapel.

After he graduated he came to New York where I was already making progress in the advertising business. He asked me, “How do you get a job in this racket?” I objected to the name “racket” because I considered the business pretty important and liked to think it was a profession. I gave him the kind of advice a senior should give a freshman. Before I knew it he had a job selling magazine advertising. He made quite a name for himself and made friends who have never left him.

Then back early in 1933 I set up this radio representative business. Looking for the best man I could find, I took on Fred Brokaw. At first he was useless or worse. He couldn’t seem to adjust himself to the lack of factual sales information that was characteristic of radio in those days. Then he came into my office one day and said, “I think I’ll write an article about radio.” I said, “You! You tell me you know nothing about radio.” He wrote it and sold it to a national magazine. Among other letters one came from Deke Aylesworth, then president of N.B.C., inviting Fred to his office to meet John Royall, then in charge of programs. This probably helped Fred get his confidence, because from then on there was no question about his success in the broadcasting business.

I think most people in broadcasting know Fred Brokaw and share some of the feelings I have for him. We have been working together now for sixteen years. No man could have a more able, more agreeable, or more pleasant business partner.

Now Fred is going to Chicago to supervise our activities in the Middle West and West Coast. He is moving with his family and will make that his permanent home. I know he will be welcomed by his many old friends and soon make many new ones. He will have new responsibilities and new opportunities. Our vice-president Gar Packard will continue his very able work there as manager. I will miss Fred here in New York but his activities in Chicago, as resident partner, will balance our national organization. I know Fred Brokaw.

RADIO AND TELEVISION ADVERTISING

New York Boston Detroit Chicago Hollywood San Francisco

10 OCTOBER 1949
Mr. Sponsor asks...

"Is TV developing any distinctive, popular program types of its own?"

Seymour Mintz

Director of Advertising
Admiral Corp., Chicago

Any new entertainment form is certain to be derivative in its early stages of development. It is obvious that television is no exception. The heavy debt it owes to other media is apparent to even the most casual viewer. In the rush to build shows for the rapidly expanding television market, vehicles designed for the stage, screen, or radio were adapted in their entirety for television presentation. It is apparent that many of these productions, though possessed of considerable merit, cannot long continue to maintain wide audience interest in the face of competition presented by productions tailored specifically for the capabilities and limitations of TV.

It is certainly true that television is well on the way to developing distinctive popular program types and, although it is inevitable that they will borrow from other media, the total effect will be one of individuality.

In developing The Black Robe I have tried to combine elements that television is able to treat to best advantage. The intimacy of the medium, its confinement, and its realism lend themselves particularly to the documentary or semi-documentary type of approach. (This is not to say, of course, that television will necessarily be limited to such documentary presentations.)

The drama inherent in the night court of a large city provides a tremendous impact in a limited physical area—is by its very nature intimate and must be treated realistically. To

The Picked Panel answers

Mr. Mintz

Slowly but surely, television is developing a personality of its own.

For the most part, it is true that television programs today are a combination of all other entertainment media. Television showmanship is now in the process of digesting and refining vaudeville, theatre, movies, and radio techniques to fit the peculiar needs and limitations of the television screen. It has yet to evolve any distinct television program type, but it is making a start.

The challenge of the electron has been accepted. The gauntlet, thrown down by science, has been picked up by men and women of creative talent who have begun to reap a harvest from years of experimental planting.

Although we cannot yet put our finger on any distinctive television program type, perhaps the closest approach is instantaneous transmission of great public and sporting events. But it is the very physical nature of televising these events which marks them as distinctive. They are not staged exclusively for television.

Each day, however, the creative minds are coming up with new ideas and solutions to the problem of television entertainment. Already we can see, here and there, the touches which are "strictly television."

No longer does a drama find itself rudely transplanted and cropped to fit TV size. Instead, it is re-worked, redesigned to meet the stringent requirements of a 10-inch screen or a cramped television stage. What's more, the audience has grown more selective. No longer content to suffer hashed-up programs, it has demanded and is starting to receive, programs designed for and executed within the television boundaries.

A certain combination of the traditional forms has taken place: a compression of drama, dance, and music, the blending of the radio newscast with the newsreel; the constantly expanding use of the camera; the lessening reliance on the spoken word. These things herald the television program future. They are signs that the creative energy which brought, in turn, the theatre, motion picture, and radio to peaks of creative virtuosity, is now seizing hold of an even more complex problem of molding a living, vibrant medium of artful entertainment from a maze of lamps, tubes and cells.

The old forms paved the way. But this year we are seeing the old bring forth the new. The results are in many cases exciting, and in more instances they are disappointing. But the trend is on. The signs and indications are there. The television infant is being weaned. It is beginning to stand on its own feet and talk its own language.

Some day soon we may be able to say, "That's real television!"

The heavy debt it owes to other media is apparent to even the most casual viewer. In the rush to build shows for the rapidly expanding television market, vehicles designed for the stage, screen, or radio were adapted in their entirety for television presentation. It is apparent that many of these productions, though possessed of considerable merit, cannot long continue to maintain wide audience interest in the face of competition presented by productions tailored specifically for the capabilities and limitations of TV.

It is certainly true that television is well on the way to developing distinctive popular program types and, although it is inevitable that they will borrow from other media, the total effect will be one of individuality.

In developing The Black Robe I have tried to combine elements that television is able to treat to best advantage. The intimacy of the medium, its confinement, and its realism lend themselves particularly to the documentary or semi-documentary type of approach. (This is not to say, of course, that television will necessarily be limited to such documentary presentations.)

The drama inherent in the night court of a large city provides a tremendous impact in a limited physical area—is by its very nature intimate and must be treated realistically. To

The Picked Panel answers

Mr. Mintz

Slowly but surely, television is developing a personality of its own.

For the most part, it is true that television programs today are a combination of all other entertainment media. Television showmanship is now in the process of digesting and refining vaudeville, theatre, movies, and radio techniques to fit the peculiar needs and limitations of the television screen. It has yet to evolve any distinct television program type, but it is making a start.

The challenge of the electron has been accepted. The gauntlet, thrown down by science, has been picked up by men and women of creative talent who have begun to reap a harvest from years of experimental planting.

Although we cannot yet put our finger on any distinctive television program type, perhaps the closest approach is instantaneous transmission of great public and sporting events. But it is the very physical nature of televising these events which marks them as distinctive. They are not staged exclusively for television.

Each day, however, the creative minds are coming up with new ideas and solutions to the problem of television entertainment. Already we can see, here and there, the touches which are "strictly television."

No longer does a drama find itself rudely transplanted and cropped to fit TV size. Instead, it is re-worked, redesigned to meet the stringent requirements of a 10-inch screen or a cramped television stage. What's more, the audience has grown more selective. No longer content to suffer hashed-up programs, it has demanded and is starting to receive, programs designed for and executed within the television boundaries.

A certain combination of the traditional forms has taken place: a compression of drama, dance, and music, the blending of the radio newscast with the newsreel; the constantly expanding use of the camera; the lessening reliance on the spoken word. These things herald the television program future. They are signs that the creative energy which brought, in turn, the theatre, motion picture, and radio to peaks of creative virtuosity, is now seizing hold of an even more complex problem of molding a living, vibrant medium of artful entertainment from a maze of lamps, tubes and cells.

The old forms paved the way. But this year we are seeing the old bring forth the new. The results are in many cases exciting, and in more instances they are disappointing. But the trend is on. The signs and indications are there. The television infant is being weaned. It is beginning to stand on its own feet and talk its own language.

Some day soon we may be able to say, "That's real television!"

NORAN E. KERSTA
V.p. in charge of radio, TITWILLIAM H. WEINTRAUB & Co.
New York
have attempted movie techniques in such a setting would have considerably weakened the presentation, and a stage technique could never have provided the intimacy which is so essential in this show. Only television could catch the subtleties of emotion, the nervousness, the self-conscious bravado, and the restrained emotion of these non-professionals portraying the humanity that parades before the magistrate in a night court.

The immediacy of the court scene in *The Black Robe* could never be duplicated on film, and only on radio could an audience feel the same sense of participation in the life of the city that they do now on *The Black Robe*. It is obvious, however, that on radio the essential visual impact would be lost.

*The Black Robe* is only one answer to television's big question now. But it is an answer that we feel has been successful in developing a distinctive popular program type exclusively for television.

**Phillips H. Lord**
Phillips H. Lord, Inc.
New York

Everything has to have a starting point. The first automobiles looked like surreys with fringe on top. The first radio programs borrowed from the stage. It's not surprising that the first television programs derived from ideas established by radio and movies. However, I don't think there is any doubt that television, like everything else, is developing a style of its own. Don't forget, though, that television is still young—even if the demands made of it by some people might confuse you into thinking that it was a medium of mature age.

Television will always resemble the movies, the stage and radio—simply because it is a combination of all of them. Television's distinctiveness will stem from several factors which you might sum up as its "intimacy." What what had previously been public entertainment—in theaters—into the home. Obviously this calls for a more intimate tone and at the same time a broadening of interest because you are playing to family units.

I think I can best illustrate my point with one of our shows, the Olsen and Johnson "Fireball Fun-For-All." There has been a definite evolution in their

(Please turn to page 38)
How To Lose An Account
A Winston-Salem dry cleaner, using WAIRadio exclusively, cancelled his news strip. Reason: He outgrew his plant and could not handle the increased business WAIRadio brought. We lost this account for six months. Now he's back on the air, the new plant in operation and business is booming.

Gallup finds Bob Hope funniest comedian
With no intention of going into audience ratings, George Gallup has come up with public opinion survey ranking Bob Hope as "funniest comedian" by two-to-one ratio over Milton Berle, second. Others, in order, were Jack Benny, Red Skelton, Fibber McGee and Molly, Abbott and Costello, Fred Allen, Amos 'n' Andy, Arthur Godfrey, Eddie Cantor.

23% of non-owners would buy TV sets soon
Marketscope Research Company, Newark, finds 23% of non-TV-set owners in New York metropolitan area expect to buy TV set in next six months. Ninety-five per cent of non-owners have viewed TV, with 55.9% viewing 2.5 hours or more at least three times a month.

Network time sales dipped 2.1% in first half
Gross time sales of four coast-to-coast AM nets in first half of 1949 totaled $112,862,890, reports Publishers Information Bureau. This was 2.1% less than $115,307,811 in first half of 1948.

WOR-TV makes debut with World Series
Formal debut of WOR-TV, as sixth New York metropolitan TV station, was scheduled to be telecast of first game of World Series. Station will start evening programming on 11 October...WFMY-TV, Greensboro, claiming to be "first station in Carolinas with live television," went on air 22 September with large-scale promotion campaign.

TV costs cause Ayer to change advertising commission basis
Because of program TV production costs, N. W. Ayer & Son has shifted commission basis to clients from 16 2/3% on net cost of time and space and preparation to 15% of gross, basis charged by other agencies.
MOST ECONOMICAL MEANS OF SELLING MORE MERCHANDISE TO MORE PEOPLE . . . IN THIS B I L L I O N - D O L L A R M A R K E T !

IT'S IMPORTANT that you consider these 65 South Texas counties as one, single, solitary market! That's what they ARE!

For food, clothing, general merchandise . . . for a thousand daily needs . . . people in this self-contained segment of Texas rely for distribution upon a single great city — San Antonio!

Just as San Antonio's lifelines of commerce flow forth in all directions, so does the penetrating signal of clear-channel WOAI. In these 65 counties, WOAI delivers a smashing 50 to 100% BMB Primary audience — BOTH DAY AND NIGHT!

According to C. E. Hooper's "Listening Area Coverage Index" of Fall 1948, WOAI takes you into more homes in these 65 counties than any other station . . . more by 2 to 1 in Daytime . . . more by 3 to 1 at Night.

Boasting 316,700 BMB 1949 Radio Families, the 1,337,500 people who make up this Self-Contained market rang up Retail Sales last year totaling well over $1,000,000,000!* Up 13.8% over the previous year!

Lassoed into a single, Billion-Dollar market . . . served by the single city of San Antonio . . . and by a single, clear-channel station, WOAI!

That's the story of these 65 self-contained counties. And, that's why advertisers acclaim WOAI as the "most economical means of selling more merchandise to more people who live, work and play in them!"

format in the few months that they have been on television. Originally using the same broad techniques they changed their approach, moving toward a format that is more personal.

In the theater they wandered all over a large stage and used the entire auditorium. Study of the kinescopes of early programs made it evident that such activity created a barrier between the performers and the home audience. The result has been to limit the area of activity, which in turn means tighter comedy, both visual and spoken.

It would take a necromancer with a super-powered crystal ball to predict exactly what style television will assume, because technical developments will no doubt be influential. But the fact that it moves right into your living room must get first consideration. Milton Berle, for instance, is still Berle, but not the same comic you saw in night clubs. Perhaps my meaning will be clearer when I point out that children are among his staunchest admirers, while he still retains his popularity with adults who saw him in night clubs and is equally popular with adults who don’t know what a night club is.

In addition to that, the way television devours talent and material, it is bound to develop a program style of its own, though exactly what form it will take I wouldn’t care to hazard beyond these things which are indicated by experience.

MYRON P. KIRK
V.p. in charge of radio, TV
Kudner Agency, New York

While television may not have developed any recognizable new program types, it seems to be blending various entertainment forms into a TV format which is peculiar unto itself.

Drama, most certainly, has begun to come of age on TV. Television dramatic shows are numerous, and, in many cases, of excellent quality. They possess the visual art which radio, of necessity, lacks. They are trimmed of superfluous action through TV’s time limitations. And, in addition, TV drama has the impact of a front row seat for everybody in the house. I believe drama on television will do much to raise the theatrical level on a national basis.

Some sort of news approach is now being gingerly attempted on TV screens. What will develop is a question, but there’s no doubt about the forthcoming appearance of excellent remote and studio news shows on the medium. Children’s shows, too, are beginning to shape up effectively on TV.

It seems to me that the flood of quizzes, audience participation shows, and giveaways will recede in the near future, leaving only the strongest entrants in each field.

All in all, while TV hasn’t too much to boast about as a creative medium to date, I believe that the story is just unfolding. There will be new types of programming developed for TV, composed of the best elements of all entertainment media.

WILLIAM B. LEWIS
V.p., Kenyon & Eckhardt

1. **ST. JOHN PLANTATION**, near St. Martinsville, Louisiana, was built in 1828 by Alexandre Etienne de Clouet. Since 1887, St. John has been owned by a prominent New Orleans family, who have faithfully preserved the grace and dignity of its ante-bellum architecture.

2. **THE DAIRY INDUSTRY** is developing fast in Louisiana. With year-round pasturage and growing markets, it’s adding millions to the state’s diversified farm income. Another reason why WWL - land exceeds the national average in increased income, increased buying power, and general prosperity.

3. **WWL’S COVERAGE OF THE DEEP SOUTH**

50,000 watts—high-power, affording advertisers low-cost dominance of this new-rich market.

**WWL-LAND**

The greatest selling power
in the South’s greatest city
50,000 WATTS CLEAR CHANNEL CBS AFFILIATE

BMB Maps of WWL-coverage and other data available from the Katz Agency, Inc., our National Representatives.
Today, Reynolds is the largest advertiser of the three. Philip Morris, which has had the largest percentage increase in sales of tobacco's Big Five in the last eighteen months, devoted nearly 50% of administration costs to advertising in 1948. Philip Morris spent about 4% of sales for advertising (predominantly in radio). Its ratio of advertising to profits was about 50%.

The highest advertising proportion was in the case of R. B. Semler, Inc., which last year spent twice as much for advertising as for all administration costs. Advertising also represented nearly 50% of sales. The only fly in the Kren, however, was the fact that, despite a three-media expenditure of $920,455 (nearly all in radio), Semler had a net loss of $61,594.

On the other extreme, all of the 20 companies which had a below-average ratio of advertising to administration costs (except California Packing, Heinz, Johnson & Johnson, and RKO Radio) had a ratio of advertising to sales volume of less than 1%. Most of them also had a smaller ratio of advertising to net profits.

Du Pont, Eastman Kodak, and International Harvester are so dominant in their industries that they may feel they don't have to advertise, competitively. But, even so, they do advertise, to some extent, to introduce new products and to extend the use of established ones. Eastman has never used radio, but might use television. Despite the long-standing "Cavalcade" program on NBC, du Pont still spends more money in magazines and farm papers. Harvester, in recent year, has become a consistent network radio advertiser, but it also spends the bulk of its money in magazines.

Among the companies whose expenditures in the three media were 2% or more of sales were Bendix Home Appliances, Chesebrough, Eversharp, General Foods, General Mills, Glenmore Distillers, Hunt Foods, International Cellucotton, Johnson & Johnson, Kellogg, Libby, Minnesota Valley Canning, National Distillers, Park & Tilford, Parker Pen, Philco, Pillsbury, Quaker Oats, Ronson Lighters, Schenley, Sheaffer Pen.

Four of these 21 are primarily distillers, and nearly all radio and TV stations won't accept liquor. International Cellucotton can't get on the air
Advertising costs are often computed on a basis of cost per thousand potential listeners (or readers). Sales demonstration costs usually are not. Most firms whose products are home-demonstrated spend at least $2.00 per individual demonstration to make their products known.

Today every advertiser may demonstrate his product simultaneously in thousands of homes for less than one twentieth of a cent per demonstration...through SPOT TELEVISION. A full 60-second demonstration on all eight major television stations represented by NBC Spot Sales totals only $730. Your potential audience is nearly six million people in 1,620,000 homes.

Your demonstration salesman on television is a welcome guest in these homes. Your product is demonstrated to the entire family purchasing board. No more favorable circumstances can surround the presentation of your product than home-demonstration by SPOT TELEVISION.

for the same reason. Of the remaining 16, however, eight were listed as spending the most money in network radio time: Chesbrough, Eversharp, General Foods, General Mills, Libbey, Quaker Oats, Ronson, and Sheaffer.

Bendix, Kellogg, Philco, and Pillsbury were reported as using newspapers primarily, and Hunt Foods, Johnson & Johnson, Minnesota Valley, and Parker Pens spent chiefly in magazines.

But if time costs were added (they average about 57%). Philco also would be in the radio column. Thus more than half of this group of more vigorous advertisers find radio their best medium. Although not included in these data, soap’s Big Three—Colgate, Lever, and P&G—collectively invest much more in radio (network and selective) than in any other medium.

P&G, largest advertiser of all, last year used about $18,000,000 in network radio time, out of a three-media total of $31,600,000.

Other leading advertisers are not covered because they spend the bulk of their money in selective radio, for which dollar estimates aren’t available. Among these are Benrus and Bulova.

It is interesting to note that among the 50 largest advertisers in the combined P&I Media Records lists for 1948, all but four distillers and Heinz and Johnson & Johnson used network radio. These last two, however, employed selective radio, and Heinz has just returned to network.

The point is that, whatever the media employed, most large advertisers don’t appear to advertise enough. The creative force of advertising has been shackled by the weight of administration and selling costs.

In these days of tough selling, some companies might try increasing advertising, say, 25%, instead of trying to increase sales forces or number of retail outlets. Mass advertising can call on prospects for one cent or less. It can get the prospect’s eye and ear in a favorable mood. It does not have to stick its foot in the door.

If the nation’s 5,000,000 salesmen were paid an average of only $60 a week or $3,000 a year—and most of them get more than that—their combined costs in earnings alone would be $15 billion, or three times the amount now spent for all advertising. To this must be added billions for travel and other expenses.

Doesn’t advertising, for pre-selling, look cheap at the price?

NBC Research Dept. Estimates—September, 1949

10 OCTOBER 1949
If he should answer 4 or 5, the interviewer asks what he dislikes about the commercial. Most common reasons for “dislike” or “object to” in the first report are “Been on too long—tired of seeing it”—“Commercial itself is too long” and words meaning “boring, tiresome, monotonous, etc.” Men volunteer quite bitter complaints about commercials on sports events that run over into or obscure the action of the game. These and other incidental items were collected by the interviewers as they gathered their information for the main report on how many remembered seeing a commercial, how they liked it, and what their brand preferences were. Radio research units at Young & Rubicam, BBDO, McCann-Erickson (all New York) and others have studied the role of believability in getting response to a commercial.

Since the Starch reports on TV commercials do not try to check credibility of the ads, the reports must be judged on the utility of what they do attempt. They are at present the only continuing reports on the audio-video sales pitch.

One of the numerous contradictions (or what seem to be contradictions) that make this first report both a puzzle and a teaser for future issues is brand acceptance for Simmons mattresses. Viewers preferred it 71% to 51% for non-viewers. Yet it had a rather low memory score for both men and women, compared to other products in the group. Women liked and remembered it only a little better than men. Could it be this ad had high believability for those interested, and that this showed up in the brand acceptance column?

Ajax Cleanser, with a very high memory-liking score, also showed up considerably stronger with viewers than non-viewers for brand acceptance. Yet Admiral Refrigerators with twice the score for memory (both men and women) and 20 points less for liking than Ajax, had a very low brand acceptance score. Viewer preference out-pulled non-viewer by only one point, 13% to 12%.

In the automotive category the amazing similarity of men and women’s reactions to Auto-Lite Spark Plugs stands out. This is especially interesting in

TV COMMERCIALS
(Continued from page 42)

view of the fact that researcher A. S. Bennett, in his study last year for True magazine, carefully demonstrated what was generally acknowledged, that women decide on the brands for only a minute fraction of such automotive items as spark plugs, tires, batteries, etc. There's no reason, of course, that what is pleasing to a man won't be pleasing in a commercial to a woman also. Were either, or both, convinced? Viewers favored Auto-Lite over non-viewers 26% to 15%. In fact, the viewers strongly favored all the TV advertised brands in this category.

Memory for cigarette commercials was about the same for both men and women except for Cigarettes, which men remembered better 78% to 61% (both of these figures are high scores. Lower scores are down in the thirties and less). Women were slightly more entertained by the cigarette commercials than the men were. Not Camel, but Chesterfield had the best brand acceptance figure with 36% to 23% in favor of the viewers. Camel and Lucky Strike had exactly the same figure each for viewers and non-viewers (11%-11% and 14%-14% respectively).

Heaviest dislike scores for any category were garnered by drug and toilet goods commercials. Both memory and attitude scores were considerably higher for women than for men, but on the whole lowest of any other group.

Among the commercials rating tips top for memory and credibility in the initial report, in addition to Bulova, B.V.D., and Ajax Cleanser already mentioned, are Peter Pan Peanut Butter, Lucky Strike, and Kool. Peter Pan and Ajax are network, Lucky Strike both network and spot, the rest spots. It's interesting to note these high-raters represent five different classes of products.

At the bottom of the memory-liking scale were an almost equally wide spread of products including Bisodol, Sal Hepatica, Velveeta, Kellogg's Corn Soya, Mounds, and Kolynos Tooth Paste. Mounds was the only spot in the group named. In fact there were only eight spots in the total of 36 commercials monitored during August. As a whole, they ranked high compared with network commercials for the same

TV COMMERCIALS

(Continued from page 44)

period. Men and women agreed generally in rating product commercials named above either at top or bottom of the memory-liking ladder.

In all categories (five plus "miscellaneous," which included only Bulova and B.V.D.) the slight spread between reactions of men and women is notable. One might expect women to display definitely more interest in the food and beverage commercials. Actually there was little difference in either memory or attitude (men were a little more "indifferent"). Exceptions were Peter Pan Peanut Butter which women remembered better by 47% to 30%, and Velveeta, 56% to 43%.

Should food commercials impress women more than men?

Peter Pan's brand acceptance among viewers was 30% to 12% for non-viewers. This appears to be an exceptional case of strong correlation between brand acceptance and the memory-liking factor. There was along with the verbal copy, it is interesting to note, a convincing "demonstration" of the product, including spreading it on a slice of bread. It is impossible to tell from the Starch interview anything about the relative influence of the visual and spoken part of the commercial on memory and liking. The trend, however, plotted from month to month and studied with other data (available from the Starch organization) cross-tabulated on IBM cards, can suggest useful lines for individual testing.

Attitudes of men and women showed up about the same for commercials in the household equipment and supplies group. Men remembered TV set ads better than women, but this didn't seem to affect their liking enough to raise the score above that of women viewers who saw the commercial.

Starch investigators report a trick of viewers to beat commercials they don't like, especially those of the irritate-and-sell school. They simply switch the sound off, keep half an eye on the visual until commercial is over, then turn sound back on.

If Dr. Starch can provide valid clues to what makes a TV commercial click — or miss fire — viewers will say "thank you." Not to Dr. Starch, but to his clients, who will sell them more TV advertised products.

CENTRAL OHIO LISTENERS DEPEND UPON WBNS FOR SPORTS COVERAGE—

Columbus and Central Ohio are "Sports Crazy."... And for sports, like so many other events, they tune in WBNS. No station in Central Ohio can come near equaling this coverage. The Fall schedule includes the Ohio State University Football Games, High School Huddle, Cleveland Browns Pro Football, Leahy of Notre Dame, Red Barber's Clubhouse, Wes Feller Talks Football, Paul Brown on Football, Bill McKinnon's Shell Digest and others. A sports fare served hot off the griddle to appease the appetites of the rabid fans in this community. Sports is only one of the many reasons why Central Ohio's favorite in radio is WBNS.

1949 OHIO STATE FAIR, A BIG EVENT, WITH WBNS PLAYING A PROMINENT PART—

This year the Ohio State Fair at Columbus was the greatest in history... And WBNS was there with its talent and inimitable showmanship. Folks from all parts of Ohio and the nation packed the WBNS outdoor playhouse to see and hear their favorite radio personalities. It was a superb public relations feature that helped build audience and good will for the station and its advertisers.

RUBENS CLOTHIERS—ANOTHER WBNS "EARLY WORM" SUCCESS STORY—

Irwin Johnson, the WBNS "Early Worm" has a way with him that has kept Central Ohio folks tuned to his program for ten years... In that ten years Rubens Clothiers have been one of the many consistent "Early Worm" sponsors... And, they have cashed-in too... From a small store they have expanded until today they rate as one of Columbus' leading men's clothiers. Rubens success has been duplicated many times by WBNS advertisers.

distributed. Each program is scheduled to do a specific job with a specific group of people.

Fort Pitt hasn't ignored the television audience. Wrestling and boxing from Rainbow Arena in Chicago are sponsored over WDTV (Pittsburgh), WEWS (Cleveland), and WAGL (Lancaster, Pa.). WICU (Erie) receives only the boxing and WTBN (Columbus) has Fort Pitt sponsor the wrestling. Latter started 5 October. Fort Pitt presents a daily, except Sunday, five-minute telecast of news over WICU.

The company isn't hidebound about any of its advertising. It knows that Tap Time sells its brands and brews. It knows that sports reach an audience that may not be music-minded. It knows that TV is a good suds seller.

Broadcast advertising has taught President Berardino a number of things. Among them is the fact that when advertising can do a public-service job at the same time that it's doing a sales job, the latter is bound to be better than without it.

Recently Fort Pitt took to the air with a blimp. The airship, The Fort Pitt, carries on one side a stationary sign that flashes the words Fort Pitt other side it carries a moving sign Beer. That's the commercial. On the width letters 18 feet high. It's this sign that has the public-service slant. Civic organizations, charitable groups, community services, and any non-profit effort can have their messages on it.

Fort Pitt is as aggressive, if not more so, than most business today. It's spending over $3,000,000 in a 1949 expansion program at Sharpsburg and Jeannette, Pennsylvania. As its plant facilities grow, its advertising is expanded. President Berardino has a credo, developed during the past 11 years, that guides his advertising policies. He constantly reminds his agency and staff that:

1: No one form of advertising will do as good a job as an intelligent utilization of all media:

2: A radio musical variety program is one of the most effective vehicles for selling brewery products;

3: When buying radio talent, buy the best, because if you don't your competitors will.

4: A top-flight product is worthy of top-flight promotion.

SOME radio stations—and their advertisers—get thrown for a loss because they don't really know their audiences!

Thanks to 24 years of work and study, KWKH does know its particular Southern audience, and the Mar.-Apr. '49 Shreveport Hoopers prove it:

KWKH ranks first, Mornings, Afternoons and Evenings, in Share of Audience.

KWKH has a 34.3% greater Share of Audience than Second Ranking Station, for Total Rated Periods.

But Shreveport itself is only the smallest part of KWKH's coverage in this big four-state area. Both mail-pull and BMB figures prove that KWKH gets high listenership throughout its prosperous rural areas, as well.

Let us send you any facts you need — today!

The Braham Company, Representatives
Henry Clay, General Manager
NEGRO MARKET
(Continued from page 25)

im particularly at the colored market there are plenty of pitfalls, but it can pay off (and has, at the local-station level, as Part II of this series on this series will point out in the 24 October issue), if the advertiser can negotiate the tight rope from which the slightest slip will breed offense and militate against his product.

Many Negro performers get a mixed reception from Negroes themselves—particularly those who appear in menial or subservient positions to white people. Negro tastes vary, just as white do; some stars are popular with one group of their own race, yet unpopular with another. Others show a steady and sustained popularity among their own kind, as they do with whites.

Hattie McDaniel, as Beulah on the CBS Monday-through-Friday Drift (Procter & Gamble) program of the same name, showed a steady rise in her Hooperating last year, moving from 5.3 to 9.0, but it was impossible to determine how much of this was due to Negro listening. "Rochester," on the Jack Benny show, Anos 'n' Andy (whites masquerading as Negroes) are as well liked by Negroes as they are by whites, yet there still is criticism in some quarters.

The Negro criticism of Miss McDaniel, "Rochester," etc., usually stems from the fact that they are domestics in the home, subject to the orders, whims, and wishes of white people.

Negroes, more perhaps than most minority groups, are considerably touchy about the elements relating to the Negro race in advertising copy directed to them particularly. Whereas a picture of Joe DiMaggio endorsing Chesterfield cigarettes on the back cover of a Life or Look will cause no resentment among whites who know that the Yankee Clipper doesn't smoke, the same endorsement on Our World's or Ebony's (both class Negro publications) back cover by the Dodgers' Jackie Robinson will annoy a number of Negroes who see it. They know Robinson doesn't smoke, either, and they feel that the use of his name and photo is too obvious.

It is significant of this "touchiness" among the colored regarding advertising copy that on programs aimed directly at Negro audiences by local stations there is virtually no advertising of hair-straightening or skin-blanching products, despite the tremen-
shop in neighborhood stores, many of which don't carry recognized, established brand products. Radio could create a demand among colored people for known brands to the point where their neighborhood markets would find it necessary to stock the brands called for. There is also the further angle of the amount of food-buying done by Negro domestics for many white homes. A direct pitch to Negroes by leading food advertisers would, in those instances, sell both whites and Negroes.

There are many questions that must be answered intelligently by a national advertiser wanting to tap Negro incomes. He has to know how Negroes live in the particular locality he wants to reach. He has to know whether the Negro is interested in price, whether there are individual and peculiar elements in advertising copy relating to the Negro race that influence the Negro consumer—and what those elements are, and how to use them. He has to know what talent of their own color will appeal most to Negroes.

The answers to these and other questions important to the most effective development of the Negro market for national advertisers are slowly but steadily being learned on the local level, as more and more local stations begin to program specifically for their colored listeners. Negro disk jockeys are appearing in increasing numbers on stations throughout the country; the 20-odd of a year ago have now multiplied to more than 100. Radio cooking schools, luncheon services, home-maker programs conducted by Negroes for Negro listeners—one of the most effective means of dramatizing the colored market—are making their debuts on many local stations. The market is finally being recognized—but so far only on the local-retail level. As mentioned previously, sponsor will report on Negro programming at that level in its next issue.

But in the overall network and national selective picture the Negro and his important buying power are still very much in the background. That reaching the expansive Negro market presents problems and difficulties of a different and individual nature is undeniable. But the problems are soluble, if the effort is made to solve them. It would seem that getting his share of a ten-billion-dollar market might interest a national advertiser enough to make that effort.

The Case of the Fast Moving Houses

* A Salt Lake City realtor with a new development 12 miles outside the city wanted fast action. He came to us.

We short-waved a colorful on-the-spot description of the houses. With KDYL'S big audience, this promotion did the job: 12 houses ranging in price from $7800 to $8750 were sold that afternoon!

KDYL and KDYL TV get the same kind of quick results for all lines of merchandise. Local advertisers found that out long ago.

For one thing, the talent on the syndicated e.t. show is usually willing to work for less money, particularly when the talent either owns all or part of the show package itself. Besides, a series of custom-made commercials for several advertisers, something which can be done in a few hard days of work in a recording studio, add up to a goodly amount dollarwise for talent.

The most important money-saving factor is the question of local AFRA rates. The advertiser who uses an e.t. show in a good-sized list of major markets quickly finds that to get the quality of announcers he feels will do the right kind of job for his product he will have to audition a great many local announcers unless he wants to take the "staff announcer on duty" who may be selling the competition's product an hour or so later.

Some idea of the amount of identification possible with a typical 15-minute e.t. show with custom commercials can be found in the commercial structure of such a show. Generally, there is a ten-second opening, a one-minute opening commercial, a 30-40 second middle commercial, a one-minute closing commercial, and a 15-second closing spot. At least five times in a 15-minute show the tie-in between advertiser and star is made.

This can pay off in sales, all the way from a big regional or national advertiser down to a local-retail level. One local advertiser, the Lang Brothers Druggists of Paducah, Kentucky, had a set of commercials custom-made on the above basis by the late Singin' Sam and Transcription Sales, Inc.

R. L. Lang, one of the brothers, sat down and wrote TSI recently to report on the progress of the show. Said Lang: "Since I have been airing Kemi-niscin' With Singin' Sam my business has shown a big increase. Prescription business has more than doubled and all departments in my store are doing better than ever before. For the past several weeks, I've had to make arrangements for my clerks to work longer hours on Saturday and keep the store open later. Best of all, Sam has been responsible for a lot of my old customers returning to my store.

At the other end of the scale, custom e.t.'s are doing a real sales job for national advertisers. With sales increasingly harder to come by in the auto field, Chrysler recently had its agency, McCann-Erickson, put together what is currently the biggest deal in

(Continued from page 23)

used as the basis of the project. A set of custom-made commercials (jingles, trick effects, name announcers, etc.) is then cut, usually in the same studio in which the original show was made (to get the correct balance), and are then used with the syndicated show. This field is wide open. Name talent from the show can be used to cut the commercials, to do special "signature and leader" themes.

In the case of an advertiser who has only a half-dozen or fewer markets to cover with an e.t. show on this basis, low-cost acetate e.t.'s will suffice for the commercial. The advertiser with a few more dollars to spend can get a bit fancier, and can have his commercials cut with name talent and pressed from the same type of masters that were used on the syndicated show.

The closest thing to a completely custom show that can be found outside of the genuine article is the re-recorded syndicated show. In this type of operation, the commercials to fill the open-ended portion of the library show are cut, new themes are made with the original talent, and special sign-offs are prepared. Then, the commercials and show are re-recorded under the best of engineering conditions onto a new master, pressings are made, and the result is a one-platter show.

The main drawback to the use of syndicated shows with custom-made commercials is not the factor of costs. For that matter, Harry S. Goodman offers name talent (who usually own a piece of the show, and thus avoid the AFRA union scale as strictly "performers") to do custom spots at what is actually double the AFRA scale per spot, which, when measured against the caliber of the talent, is not very much.

Transcription Sales, one of the pioneers in this field, offers a custom service to advertisers whereby they can have 16 one-minute spots cut for as little as $200, giving the advertiser two double-sided 16-inch pressings. The only big hitch that is likely to occur is in the matter of available markets. Most well-known, high-rated e.t. shows that are sold by transcription firms on a syndicated basis are well-spotted around the country on a sponsored basis. An agency which tries to clear, say, Ziv's Boston Blackie in 100 leading markets will find that only 30 or 50 of those markets can be cleared.

Mr. Keith Byerly
Sales Manager
WBTV
Charlotte, N. C.

Dear Mr. Byerly:

We are sure you will be happy to learn that after their first two months of advertising in an entirely new medium, all clients for whom we have scheduled television advertising are pleased with results, and we want to congratulate you on the fine impression WBTV is making in its opening weeks.

Specifically, Mr. Bernard Mark, president of the Hostess Venetian Blind Company of this city, has advised me that as a direct result of his television advertising, exclusive of newspaper and radio promotion, his firm has received $16,000 in immediate orders. An additional $41,000 may be forthcoming in contract business in the near future, which is also directly attributable to television advertising.

What seems somewhat unusual is that the schedule which brought about such fine, prompt results is a 60-second film run one time a week on Tuesday nights, costing our client $27.90 per week. The Hostess film, you will remember, plays up the extreme abuses that Hostess venetian blinds will withstand.

As a result of the sound response our clients have received, we will continue to place new business with WBTV as quickly as our schedules permit.

With kind regards.

Cordially,

Walter J. Klein

SENSATIONAL SALES RESULTS now complete the television picture in the Carolinas! WBTV brings to 57 counties in North and South Carolina (with over 3,000,000 population) not only a brilliant new medium of entertainment — not only a powerful stimulant for Carolina business — but a new and enormously successful way of selling.

custom e.t.'s. This vehicle is the Sammy Kaye Showroom, a 15-minute, three-weekly musical show on the lines of the Chesterfield Supper Club. Top talent is used throughout, and the show is of network caliber. The cost of sponsoring it on 275 stations is split between Chrysler, which pays most of the production costs, and the Chrysler-Plymouth dealers.

The show is a completely custom job from start to finish.

While almost any major recording company (Gordon M. Day, Harry S. Goodman, George Heid, Gasper-Gordon, Charles Stark, TSI, Ziv, etc.) will make a completely custom show for an advertiser, the firm that is currently leading the field in this activity is the Custom Recording Service of NBC Radio-Recording. Since the library e.t.'s and the Thesaurus moved over to become a sales function of RCA, NBC has been pushing this service more.

NBC's shows are not all on the scale of an operation like Sammy Kaye Showroom. NBC's estimated costs on a low-cost, custom-made soap opera, for instance, including a cast of four or five actors, script, studio rental, etc., and the finished record, are between $500-$600 per show. Masters are about $50 each, and each pressing (if the advertiser is using more than 50 markets) costs $1.55. This sounds high, but it depends entirely on the job being done. Syndicated shows can be placed on stations at costs as low as $5 (plus time charges and announcer's fee), but in major markets the show rental cost is often $75-$100 and up as high, in some cases, as $500-$1000.

Again, an advertiser, provided the job to be done is big enough to warrant the expenditure, can wind up saving money on a completely custom-made show. The commercials, of course, are on a custom basis, too. The show's announcer can do them at little or no extra charge, and production commercials, such as singing jingles, can be done at a lower cost than paying the going AFRA scale for straight local announcing. The completely custom show has been done by NBC for as few as one or two markets on a profitable basis, but its best application is for the sponsor who must have a given number of major markets on his station list, and who can't clear an existing syndicated show on all of them.

CONSUMER MARKETS
1949-1950 Edition

The most complete, reliable and up-to-date compilation of consumer market data available in one place.

The new SRDS CONSUMER MARKETS gives easy access to the latest government and other authoritative state, county, and city market facts...1948 estimates along with 1940 Census data for trend comparisons...per family and per capita relationships...radio homes...population density...retail sales...incomes...farm and industrial activity and all other important indices regularly used by market and media men.

Standard formats make use easy. States appear alphabetically. First, under each state, a special map shows counties, cities, county seats, radio and newspaper locations, then the state data. Then the county data. Then the city data. Counties and cities are cross-referenced to the map.

You can extract any specific index, or you can get a complete picture of the economic makeup of any market in the U. S., the U. S. Territories and Possessions, Canada, the Philippines, etc.
AMM-I-DENT
(Continued from page 21)

ments, better than 85% were minute spots; the rest chain breaks. Breaks were not considered except where they could command extraordinary listenership at a time not adequately covered by a minute spot. This, of course, was because not as much could be told about the new product in a chain break as was felt desirable.

To give some of the technical background of the Amm-i-dent story, backed up with case histories, would have taken something more like a 15-minute documentary than a one-minute spot, and Cecil & Presbrey didn't try it. The typical spot announced that tooth decay could be reduced with a new tooth powder (or paste) discovery. It mentioned the two exclusive ingredients and linked the formula with the dentist-inventor who tried it on his own patients. It described regular brushing as the simple way to use the powder and gave a testimonial (commended by Parent's Magazine, etc.). These points simply emphasized, together with the price and information that Amm-i-dent could be purchased at drugstores, comprised the commercial.

In order to avoid wearying listeners out with the same talk throughout the month, these same points were woven into various dramatic bits with housewife, druggist, and announcer; three announcers; one announcer reading the copy straight; announcer reading in March of Time style.

About seven out of ten spots were transcribed. The live copy was handled by personalities, usually men's of women's participating programs. In fact, as many spots as possible were bought on personality programs with proven followings. The company believes strongly in the sales value of the personal touch of a commentator with a loyal following. Personalities like Margery Mills (New England Regional Network), Agnes Clark (WJR, Detroit's Mrs. Page), Margaret Arlen (WGBS, New York), and Mary Margaret McBride (WNBC, New York) helped get listeners excited about the new way to reduce tooth decay.

Some announcers had to do a little practicing before they could pronounce "reduce tooth decay" easily, but the company feels that tests amply demonstrated superiority of the phrase.

Block ad-manager George Abrams is known as a bug on testing. Cecil & Presbrey's Sam Dalsimer agrees with him a hundred percent. Melvin Block (Block Drug president), together with Dalsimer and agency timebuyer Ted Kelly, decided to take the road and personally buy the time for these important tests. Block Drug has used thousands of radio hours in building acceptance and sales for its products. But this time everybody concerned wanted a personal hand in shaping these tests to see how the spoken commercial would fare in getting across the "new model" dentifrice.

They went over schedules with a fine-tooth comb. Here a popular newscaster felt he could yield one of his 15 minutes to strengthen a period Abrams felt was a little weak; there a manager said frankly, "My healthiest spots are in the afternoon. You'll do better on WXXX in the mornings." One manager couldn't find the little black book in which his secretary kept his availabilities. But Abrams stuck around stubbornly until the secretary returned from lunch and produced the book.

In matched test cities in which no radio was used, approximately the
same amount spent for the month's radio campaign was poured into newspaper spreads in an overnight effort to make the population Annim-i-dent-conscious. These spreads with the detailed copy, case histories, pictures, drawings, etc., succeeded in putting the initial story over, all in one "package." At the end of the test month, the simpler radio copy, often repeated, had snow-balled its effect in the radio-only cities so the sales curve was approximately the same.

Block already knew radio could sell cosmetics. But none of the other Block products with their successful radio history had characteristics that departed as did Annim-i-dent so startlingly from "regular" items in their field. The tests helped satisfy both agency and client that the spoken word could do a major share of the selling for their entry into the $80,000,000 dentifrice market.

Annim-i-dent paste was introduced last July with tests similar to those used for the powder, and with similar results. Abrams is careful to point out that the difference between the time it took radio (about a month) to match the sales curve achieved by pouring the same amount of money all at once into full-page newspaper announcements isn't due alone to the concentration of impact. Such a concentration was feasible because of the variety of detailed material presented. The company claims undisputed leadership of the field for Annim-i-dent powder and a close fourth for the paste—not just among ammoniated products but in the entire field including the "regulars."

Currently the lion's share of the budget (one third) devoted to printed media will go to magazines and the remaining portion to newspaper supplements. The magazines will feature movie-star testimonials that tie in with the radio slogan, "Are you reducing tooth decay with Annim-i-dent ammoniated tooth paste?" The newspaper copy will continue to feature case histories.

Block Drug Co., a veteran in selling cosmetics and toiletries via the spoken word, was quietly confident in turning over the primary selling job to a prestige network show (Burns & Allen returned to the air for Annim-i-dent over CBS stations 21 September, 10:00 p.m.). It's not a secret they expect radio to help them topple the reigning giants in the dentifrice field.

---

**SUPERIORITY COMPLEX**

My husband, advertising manager of the Ding-Bat Company, used to be a nice fellow with just enough of an inferiority complex to make him easy to live with. Since he picked KXOK, sales have gone up so fast my husband thinks he’s the smartest advertising manager in town. Now he has a superiority complex and he's positively obnoxious.

Unhappy Wife

Dear Unhappy Wife:

Maybe KXOK should have the superiority complex instead of your husband. During March, 1949, KXOK was within share of audience striking distance of first place in St. Louis. Briefly, this means KXOK delivers more Hooper audience per dollar than any other St. Louis network station. No wonder Ding-Bat products are going to town. When your husband checks KXOK's low-cost-per-Hooper point, KXOK’s wide coverage, and KXOK’s low-in-St. Louis rates, he’ll be even cockier!

**KXOK, St. Louis**

10 OCTOBER 1949
Don't Be Color Blind

Color TV will come—but probably not for years. And people who postpone buying sets and advertisers who delay getting into television until color arrives, will be losing, respectively, a lot of entertainment and sales.

As an art, a science, and a business, broadcasting never stands still. In AM and FM radio and in television, the engineers have made continuous improvements since the crystal-set days. So have the sponsors and the broadcasters and everyone else concerned. They will keep on making improvements.

Crystal sets did a sales job in their day. So will color TV, when it comes.

If advertisers had waited until broadcasting was "improved" or perfect before getting into it, they would not now be investing $500,000,000 a year in broadcast media.

Thousands of them didn't wait—and they're glad they didn't. They grew with radio, and learned as they grew. Quite a few of them are learning and growing with TV now.

The current FCC hearings on color have confused some advertisers and the public, as well as broadcasters. Is color imminent? And when it comes, will it obsolete present methods and equipment?

The answer, in both cases, is no.

NAB President Justin Miller said recently that color TV, as a general service, is at least five years away. In this period, he added, present receivers will not be made obsolete by color.

The hearings, and then the tests, will take years.

Meanwhile, advertisers will find plenty of scope for their efforts in radio and in black-and-white TV.

With millions of good prospects ripe for their sales messages, they can hardly afford to wait five years to tackle them.

Decline of giveaways

The giveaways seem to be slipping.

By the time the courts have decided whether the FCC has the power to ban them, they may not have enough audience to make the ruling mean much.

C. E. Hooper's mid-September audience report listed nothing that could be called a giveaway among the first 15 evening or top 10 daytime shows.

Not included, for example, is Stop the Music. Just a year ago (remember?) this giveaway had pushed up to rating leadership. In fact, it was practically showing Fred Allen and Edgar Bergen off the air. Being an ABC show, it was bringing pious pronouncements about the ethics of giveaways from executives of other networks.

The other day, an executive of Old Gold cigarettes, which has been a Stop the Music sponsor from the start, said that his company was glad to have Amateur Hour as an ace in the hole. While Stop the Music ratings were declining, Amateur Hour's were gaining.

About that time George Gallup got around to finding what people thought of giveaways.

Twenty-two percent of Americans, he said, listen "often" to giveaway shows; 29% listen to them "once in a while," and 32% listen "very seldom." The remaining 17% "never listen" to them.

But if you add the nevers and the very seldom, you find that 49% of listeners don't really hear giveaways at all. Then add the "once in a while" group (and that could mean they hear only one in 10 broadcasts of a program), and you get 76% who aren't exactly giveaway fans.

Both the Gallup and the Hooper surveys were made at a time when giveaways had been given a publicity shot-in-the-arm by the current FCC ruling. Some people who didn't usually listen to giveaways were listening then out of curiosity.

If the FCC wants to end giveaways, it might just stop talking about them.

Applause

To the ANA and Four A's

The Association of National Advertisers and American Association of Advertising Agencies have done much in the last few years to make their meetings more worth while to the rank and file of their membership.

Among other things, they have recognized the growing importance of broadcasting in the advertising scheme.

The ANA will hold its annual meeting in New York 10-12 October. Subjects for reports and analysis include radio and television.

The Four A's this month is holding regional conferences. The eastern conference at New York last week featured nine departmental meetings. At the top of the list was, "Where do radio and television go from here?" Participants included Arthur Pryor of BBDO; Charles Underhill of CBS; Spiros P. Skouras, president of 20th Century-Fox; John Crosby, radio and TV critic, New York Herald Tribune; Donald W. Stewart of the Texas Company, and Lou Cowan, producer.

In addition, the question, "What will television do to media values?" occupied the agencies' overall media session. Pat Weaver of NBC and Bill Güttinger of CBS represented TV. Other speakers were Harold S. Barnes for newspapers; Frank Braucher for magazines, and Kerwin S. Fulton for outdoor.

Although still receiving only about one-tenth of the national dollar volume in all media, broadcasting is getting a much larger share of advertiser and agency thinking and planning.

Benton & Bowles and SSC&B

Why do agencies (and advertisers) buy multiple copies of a trade magazine that sells at 50¢ a copy, $8 a year? The answer is use-value. And that's the only value in which SPONSOR is interested. SPONSOR is 100% devoted to the interests of buyers of broadcast advertising. It's the straight-line medium to them, the only one of its kind. Because SPONSOR is dedicated to use-value, it's an especially useful market place if you have an advertising message for national advertisers or their advertising agencies.

"SPONSOR has been on my list of home must reading for a long time. I find it interesting as well as informative." GEORGE KERN, Head timebuyer

"For up-to-date complete information we consider SPONSOR a must on our reading list of radio publications," FRANK MINEHAN, Vice President & Media Director
