ABC Information and Entertainment Networks

This manual is intended to provide your station with a complete guide to how the network service operates.

We have included information on commercial scheduling, explanations of abbreviations used in the weekly commercial schedules, program descriptions and schedules, standard operating procedures, visuals on our expanded news facilities—and blank pages in the back of the manual for your own use.

We have purposely designed this manual as a looseleaf in order that you yourself can keep it up-to-date as changes occur.

CONTENTS:

- 1. PROGRAM SCHEDULE
- 2. PROGRAM INFORMATION & DESCRIPTIONS
- 3. NETWORK NEWS AND OTHER FORMATS
- 4. COMMERCIAL SCHEDULE
- 5. AS BROADCAST SCHEDULE
- 6. BULLETIN PROCEDURE INFORMATION
- 7. NEWS & PRODUCTION FACILITIES
- 8. CONTACT LIST

How The Network Feed Operates

The ABC Radio Network services its affiliated stations from 16,000 miles of lines leased from AT&T.

Programs originating at the Network broadcast centers in New York, Chicago, Washington and Los Angeles are fed over this single set of lines to all stations, regardless of individual Network affiliation. Therefore, it is most important that you and your staff carefully review the information contained in this manual, particularly the program schedule which indicates the exact time a program is broadcast in your area.

During all times, the Network line is "hot". When no programming is being broadcast, a "music fill" is heard. The purpose of this "fill" is to let our affiliates know that the Network line is actually in operation. Approximately 20 seconds before a program is scheduled to go on the air, this "fill" will be faded out. Ten seconds prior to air time, a thousand cycle tone is put on the line to help your announcer coordinate a smooth integration of network and local programming.

Other aspects of the Network operation are covered in detail in the following pages of this manual. We strongly urge that you and your production and engineering staffs become familiar with this material.

Effective May 5, 1969

"WORLD OF BUSINESS" with Bob Wilson

Wrap up of the day's closing stock prices and averages, and late business news items.

"SPORTS WORLD" with Keith Jackson

Full 5 minute sports commentary.

Pre-feed available for daytime stations.

"FRANK REYNOLDS" (PA)

Peabody award winning commentator Frank Reynolds gives his views on national and international developments. Pre-feed available for daytime stations.

"SPORTS WORLD" with Bob Fouts

Veteran sportscaster Bob Fouts hosts the "Sports World" programs. He reports and analyzes current aspects of the sports world and offers human interest features of seasonal significance, plus the latest scores and on-scene actualities. All programs are fed straight thru live. See program schedule for pre-feeds at :36.

ABC RADIO NETWORK RELIGIOUS PROGRAMS

"MESSAGE OF ISRAEL"

Produced in cooperation with the United Jewish Layman's Committee and the Union of American Hebrew Congregations.

"Message of Israel" features a discourse or discussion by eminent rabbis, authors and thinkers from across the nation, music, and commentary by Rabbi David J. Seligson of Central Synagogue, New York City.

Sat. 141/2 min.

E 9:10 AM M 7:10 AM C 8:10 AM P 6:10 AM

"CHRISTIAN IN ACTION"

Produced in cooperation with the National Catholic Office of Radio and Television, the program features three easy listening records chosen from top popular hits.

"Christian in Action" is directed toward the young, including young adults and married couples with the purpose being to realize a message in the music for the listener and a lesson in the lyrics.

The program is hosted by Rev. Edmund Nadolny, Director of the Office of Communications, the Archdiocese of Hartford, Connecticut.

Fri. 14½ min.

E 9:35:30 AM M 9:35:30 AM C 8:35:30 AM P 8:35:30 AM

"PENDULUM"

Produced in cooperation with the Southern Baptist Convention.

"Pendulum" features interviews from all over the world to transport listeners into the lives of people - exciting and different people . . . some of them celebrities in show business, politics and religion. Others are less well known, engaged in fascinating hobbies or occupations.

A variety of light semi-classical, popular, or sacred music keeps the program flowing smoothly from one segment to another.

The program also contains a brief inspirational comment by Dr. J. P. Allen, providing insight into life and its problems in our day.

Sat. 14½ min.

E 5:35:30 PM C 4:35:30 PM M 3:35:30 PM P 2:35:30 PM

Revised 6/24/68

"NEWSCALL"

Information Network Newscall will include actualities, overseas reports, and news materials exclusive for the Information Network. The materials will be fed Monday through Saturday.

Monday through Friday only,
Information Network stations
will receive stock market
closing reports from the
New York and the American
Stock Exchanges.

These reports will be fed in the Closed Circuit period below:

4:20:30 PM E 2:20:30 PM M 3:20:30 PM C 1:20:30 PM P

"GENERAL NEWSCALL"

This "General Newscall" will supplement the earlier "Newscall" material which is intended for use in your locally produced news programs.

FRIDAY

10:35:30-10:50:00 PM E 9:35:30- 9:50:00 PM C 8:35:30- 8:50:00 PM M 7:35:30- 7:50:00 PM P - "WORLD OF SPACE AND SCIENCE" (I)

With Information Correspondent Don Allen, this 14½ minute, once-a-week program reports on significant developments in the world of space and science.

** ** **

SATURDAY

1:24:30-1:29:30 PM E 12:24:30-12:29:30 PM C 11:24:30-11:29:30 AM M 10:24:30-10:29:30 AM P - "FBI WASHINGTON" (PA)

Produced by the Information Network in cooperation with the Federal Bureau of Investigation, it is a program dedicated to keeping the public informed about the functions of the FBI, the qualifications required to become a special agent, and inside facts of famous cases that they have solved. It features the Assistant Director of the FBI, Mr. C.D. DeLoach.

** ** **

SUNDAY

9:05:30- 9:29:30 AM E 8:05:30- 8:29:30 AM G 10:35:30-10:59:30 AM M 9:35:30- 9:59:30 AM P

"VOICES IN THE HEADLINES" (PA)

A 24-minute once-a-week report with the voices and events which made the week's news. Using actualities and highlights of the week's happenings, Information Radio News presents this fast-moving review which makes these events live again in the mind of the listener.

Please note that the program is fed on Saturday to East and Central Stations, and on Sunday to the Mountain and Pacific Stations.

* ** **

SUNDAY

8:05:30-8:29:30 AM E 7:05:30-7:29:30 AM C 9:35:30-9:59:30 AM M 8:35:30-8:59:30 AM P

"SPEAKING OF MUSIC" (I-ED)

Produced in cooperation with Brigham Young University, Provo, Utah, the program features the performing organizations of the Brigham Young Music Department. These include the A Cappella Choir, the Women's Chorus, the Male Chorus, the Oratorio Choir, the Symphony Orchestra, the Symphonic Band, and the Concert Band. One of the groups will be featured on each program with another group supporting. The balance of the program is used in discussing the music and providing interesting commentary. Although the program is religious and educational in nature, it is nevertheless designed for general public taste. The commentary is geared to a musically unsophisticated audience. Much of the music selected is designed for an appeal to lighter musical tastes.

** ** **

SUNDAY

9:35:30-9:59:30 PM E 8:35:30-8:59:30 PM C 9:35:30-9:59:30 PM M 8:35:30-8:59:30 PM P

"ISSUES AND ANSWERS" (PA)

A 24-minute weekly radio version, especially edited for Information Radio, of the news interview broadcast the same day on ABC Television. During the election of 1968, the program will frequently involve appearances by candidates, and others associated with the political arena.

** ** **

"COMMERCIAL SCHEDULE"

Mailed to stations each week about 10 days in advance of performance, the commercial schedule shows the length of network commercials, promotional and public service fills in accordance with the program format. The schedule starts on Sunday and ends on Saturday.

"N" is the Network position which is reserved for Network commercial.

"L" is the Station's Local Availability.

Note that adjacent to each "N" (Network Commercial Position) there is a three digit number. The last number represents the day of the week, i.e. Sunday, being the first day of the week, is represented by the three digit number ending in "1." This pattern continues through Saturday the seventh day of the week, which is represented by the three digit number ending in "7."

When changes to the "Commercial Schedule" are given on Closed Circuit, the three digit number is given, preceded by the date of the week in question. The program, day of week or time is not given.

In reporting impairments, pre-emption of a commercial or permanent cancellation of a program, please use the three digit number and direct your reports to:

Station Clearance Manager Radio Network American Broadcasting Company 1330 Avenue of the Americas New York, New York 10019

In addition to the "Commercial Schedule" an "As Broadcast" schedule is issued about two weeks after performance. This confirms the additional programming, commercial changes, etc., given on Closed Circuit. It is suggested that you keep the "As Broadcast" schedule on file to assist you in making up the "Composite Week" for the FCC at license renewal time.

** ** **

RELIGIOUS PROGRAM INFORMATION

(CONFIRMING JUNE 25, 1968 CLOSED CIRCUIT ANNOUNCEMENT)

This Bulletin outlines changes in the feed pattern of religious programs, updating and superseding schedule issued on January 30, 1968.

As indicated in our announcement in the January 30, 1968 Conference Call, the final broadcast of the religious program "THE WITNESS" will be the program fed on Friday, June 28th.

Effective Saturday, July 6, 1968, the American FM Radio Network will receive its religious feed simultaneously with the American Entertainment Network. Feed time on Saturdays will be 10:35:30-10:50:00 AM Eastern Time (see schedule page three).

The American FM Radio Network will receive a different program each month, in rotation, in pattern with the American Entertainment Network.

The three programs (described next page) in rotation will be MESSAGE OF ISRAEL, CHRISTIAN IN ACTION and PENDULUM.

Affiliates of the American Contemporary, Information and Entertainment Networks will continue to receive their religious feeds at the same time, but should note the REVISED PROGRAM LISTINGS (attached) for the future months.

* * * * * * *

Below you will find descriptions of each of the rotating religious programs:

"MESSAGE OF ISRAEL"

Produced in cooperation with the Union of American Hebrew Congregations, the program will feature a discourse or discussion by eminent Rabbis from across the nation; music and commentary by Rabbi David J. Seligson of Central Synagogue, New York City.

* * * * * *

"CHRISTIAN IN ACTION"

Produced in cooperation with the National Council of Catholic Men, the program will present capsule reports of events of the week from a Catholic viewpoint; a guest editorial; a one-minute "quote of the week" by some well-known religious writer; and a four- or five-minute meditation by well-known Jesuit retreat master, Fr. Charles F.X. Dolan. Ronald Beck is narrator.

* * * * * *

"PENDULUM"

Produced in cooperation with the Southern Baptist Convention, the program will feature interviews from all over the world to transport listeners into the lives of people--exciting and different people. Some celebrities in show business, politics and religion; others are less well-known, engaged in some fascinating hobby or occupation. There will be a variety of light semi-classical, popular, or sacred music to keep the program flowing smoothly from one segment to another. The program also contains a brief inspirational comment by Dr. J.P. Allen, providing insight into life and its problems in our day.

* * * * * *

Below is the REVISED monthly rotation plan for the next 12 months for the religious programs. In parenthesis you will find the first feed date for each month.

CONTEMPORARY NETWORK	INFORMATION NETWORK	ENTERTAINMENT/FM NETWORKS
July 1968 "Christian In Action" (7/6)	<u>July 1968</u> "Pendulum" (7/6)	July 1968 "Message of Israel" (7/6)
August "Pendulum" (8/3)	August "Message of Israel" (8/3)	August "Christian In Action" (8/3)
September "Message of Israel" (8/31)	September "Christian In Action" (8/31)	September "Pendulum" (8/31)

INFORMATION RADIO NEWS FORMAT

NETWORK:

News starts at 00:00 on the clock*, with newscaster giving following copy over signature music:

NEWS OF THE HOUR....ON THE HOUR....FROM INFORMATION

RADIO. THIS IS FROM

(name)

(city)

AND AT THIS HOUR.

Newscaster gives news ending at approximately 00:45 with cue for 60 second network commercial:

CUE:

THAT STORY.....COMING UP.

COMMERCIAL: POSITION #1

60 second network commercial.

NETWORK:

Gives balance of news, which concludes approximately 4:20 into program with cutaway cue:

CUE:

THIS IS INFORMATION RADIO NEWS

COMMERCIAL: POSITION #2

30 second** for <u>local commercial</u>. Network fills with 30 seconds of news.

NETWORK:

Stations not carrying next five minutes ... use pre-fed sign off here. Stations carrying next five minutes... rejoin network on time basis, 30 seconds after start of newsfill. Then network gives approx. 2 minutes of news, ending at approx. 6:40 into program with cutaway cue:

CUE:

THAT'S THE LATEST ON AT THIS HOUR.

COMMERCIAL POSITION #3

60 seconds for <u>local commercial</u>. Network fills with News.

NETWORK:

Stations rejoin on time basis, 60 seconds after start of newsfill. After fill, network resumes with news until approximately 9:15 into program, then this cutaway cue:

CUE:

THIS INFORMATION RADIO NEWS

POMMERCIAL:
OSITION #4

**30 seconds for <u>local commercial</u>.

NETWORK:

Stations rejoin on time basis, 30 seconds after start of news items. Network ends with following copy over signature music.

CLOSE:

I'M (name) (city) HEAR NEWS OF THE

INFORMATION RADIO.***(Approximately 9:50 into program)

(Stations carrying INFORMATION FEATURE LIVE at scheduled feed time may stay with network, which continues as follows:)

NOW...STAND BY FOR INFORMATION REPORTS WITH

Juanic	Z,

NOTES:

***If Feature is World of Sports Segue would be as follows;

...HEAR NEWS <u>OF</u> THE HOUR...<u>ON</u> THE HOUR THROUGHOUT THE DAY...FROM INFORMATION RADIO...

(Music out...pause...then) A SERVICE OF ABC NEWS...

NOW STAND BY FOR WORLD OF SPORTS WITH LOU BODA.

^{*10} second prior to start of news, network feeds a burst of warning tone. Station may insure tight production by monitoring for this tone, since experience shows that various types of clocks in common use throughout the country are not synchronized.

^{**}Station inserting 60 second commercial in position #2 may do so and use pre-taped sign off.

Explanation of Abbreviations used in

the Commercial Schedules:

The explanations which follow pertain to the weekly commercial schedules for the Contemporary, Entertainment, Information and FM Radio Networks.

Program Name - Start Time - AM PM

The three digit number (e.g. 011) in each program box of the schedule is a code for the network commercial aired in that time period. The first two digits refer to the particular commercial; the last digit refers to the day of the week, beginning Sunday (1) and ending Saturday (7).

Time Zone

E - Eastern Time Zone

C - Central Time Zone

M - Mountain Time Zone

P - Pacific Time Zone

Network/Local — Length — Name

N60 - Network 60 second commercial

L30 - Local 30 second commercial

When a commercial availability is unsold, a public service announcement (e.g. Easter Seals) or promotion fills the position.

Comp. Credit - Compensation earned by a station for airing a network commercial; amount determined by the station's rate.

Dear News Director:

The ABC Radio Networks are fully departmentalized to handle your every need and inquiry with speed and efficiency. If you have a question or need assistance on a news matter — or aren't sure who to contact on some other matter — do be sure to give me a call, or drop a note. If I cannot resolve the situation myself, I'll be in a position to direct the matter to the proper person for prompt action.

Cordially,

MANAGER OF NEWS

AMERICAN ENTERTAINMENT RADIO NETWORK

HOW TO OFFER NEWS MATERIAL TO THE NETWORK:

When one of your newsmen has actuality or report material of a definite national nature, the newsman should call us on one of our recording phone lines:

212 – SU 7-5122 SU 7-5047 SU 7-5043

If there is some doubt as to whether the network will want the material, call the network news manager or the network news desk. The news desk extension on our switchboard (212 LT 1-7777) is 7515. Ask for the assignment editor. Network news manager's extensions are:

INFORMATION — 8317 ENTERTAINMENT — 7826 CONTEMPORARY — 8848 FM — 6484

We accept telephone feeds of original tape material, gathered on-the-scene or in studio by affiliate newsmen. We will not accept telephone feeds of beeper interviews done by affiliates, unless the material is of importance and cannot be duplicated by our staff.

NEWSCALL:

Every Monday through Friday, 8 times a day, ABC Radio News feeds a round-up of up-to-theminute actualities and correspondent reports for inclusion in locally originated newscasts. A rundown of feed content is given at the beginning of each NEWSCALL, and complete descriptions are given before each cut.

On Saturday, there are 4 NEWSCALL feeds.

MONDAY THROUGH FRIDAY (ALL TIMES N.Y.T.)

No. 1 – 6:35:30 am No. 2 – 7:35:30 am No. 3 – 9:20:30 am No. 4 – 3:20:30 pm No. 5 – 3:35:30 pm

No. 6 - 4:35:30 pm (stock market reports)

No. 7 - 7:20:30 pm No. 8 -11:05:30 pm

SATURDAY: (ALL TIMES N.Y.T.)

No. 1 - 6:30:00 am No. 2 - 7:35:30 am No. 3 - 3:20:30 pm No. 4 - 3:35:30 pm

NEWSWATCH: DAILY; 1:05 a.m. - 5:59 a.m. N.Y.T.

NEWSWATCH is your "around the clock" news protection from ABC Radio News. Our New York newsroom is manned 24 hours a day. After regular newscast schedule concludes (1:05:00 a.m. N.Y.T.) music
is fed on the network line, interrupted on the hour and half-hour by recorded, closed-circuit announcements which give the New York time, and a news situationer. If there have been no important news
developments, the recorded announcement will reflect that fact. When important news breaks, the newsman on duty will order a NEWSWATCH ALERT. A closed-circuit alerting tone will be sent, to trigger
your alarm systems or alert the station personnel monitoring the network line. The ABC newsman will
then give a CLOSED CIRCUIT ADVISORY — with details of the development, so that your local station
personnel may report the event during local programming. A NEWSWATCH ALERT might take place at
any time. The hour and half-hour closed-circuit advisories then are updated to contain the information.
When actualities and correspondent reports on the important news development become available, they
would be fed closed-circuit for recording and local use.

BULLETIN AND EMERGENCY BROADCAST SYSTEM PROCEDURE INFORMATION

Revised February 12, 1971

The following outlines revised BULLETIN PROCEDURE to be followed by ABC Radio.

BULLETINS

Procedure outlined on next page will be used if bulletin news develops during a period when the network is not feeding a hard news program. (Bulletin matter which breaks during a newscast will be handled as part of that particular newscast.)

Please note that ABC Radio will go into a bulletin procedure only for the most important type of bulletin... one which in the judgement of ABC News should be fed on a general basis to all stations connected to ABC Radio's lines... a bulletin that would be in the public interest for affiliates of all four radio networks, and which should not be held up for the next upcoming newscast.

The alerting tone of 2930 Hertz will be used in triggering the system. This is the same alerting system which existed on the former ABC Radio Network, so that stations having the special alert tone receivers (which activate lights or audible signals) may continue to use them until further notice. Information on the tone receiver system is available by writing to Mr. Harry Curtis at the ABC Radio Operations Department in New York City. Automation pulses will also be transmitted as described in the procedures, for automated stations.

Your alerting device can also be set-up to start a tape recorder. You may prefer to use this type of set-up to record the bulletin for playback locally, rather than carry the bulletin live.

To help your engineers to see if your system is working properly, a test of the News Alert System is given Monday through Fridays at the beginning of our regular Closed Circuit Conference Call.

Also attached you will find the procedure to be used in the event ABC Radio receives instructions from the Federal Government that the EMERGENCY BROADCAST SYSTEM is to be activated on orders of the President, in case of National emergency.

Attached you will find outlines of the Bulletin Procedure and the Emergency Broadcast System activation.

EBS CLOSED CIRCUIT TESTS

Closed Circuit tests of the Nationwide Program Origination and Distribution Channels of the Emergency Broadcast System will be conducted as per FCC Rules and Regulations at random times, not more than once a month and not less than once every three months.

Stations would receive "FIRST METHOD" notification via the AP or UPI Radio Wire message (Green Card) with Test Authenticator (from EBS-2 Test Series list).

Following release of the test message, ABC Radio will:

- 1. Transmit 2930 kHz tone. ("EBS Pulse" will <u>not</u> be transmitted for tests.)
- 2. Feed the following advisory:

"THIS IS CLOSED CIRCUIT . . . NOT FOR BROADCAST.

PLEASE STAND BY. WE ARE DISCONTINUING REGULAR

NETWORK OPERATIONS FOR A RANDOM CLOSED CIRCUIT

TEST OF THE EMERGENCY BROADCAST SYSTEM. REGU
LAR NETWORK OPERATIONS WILL RESUME AFTER THE

TEST OF THE EMERGENCY BROADCAST SYSTEM HAS CON
CLUDED. THIS TEST WILL BE CLOSED CIRCUIT, NOT FOR

BROADCAST. PLEASE STAND BY."

- 3. Test talk-up and test program will follow, concluding with:

 "THIS CONCLUDES THIS TEST OF THE EMERGENCY

 BROADCAST SYSTEM."
- 4. Resume normal operations.

Stations will be asked by the FCC to file reports on receipt of the test notification and the test program.

EMERGENCY BROADCAST SYSTEM PROCEDURE — ABC RADIO

Following the release of an Emergency Action Notification, ABC Radio affiliates will receive "Second Method" Notification as outlined below.

This procedure will be used in the event ABC Radio receives instructions from the Federal Government that the Emergency Broadcast System (EBS) is to be activated on orders of the President, in case of National emergency. This is in accordance with BASIC EMERGENCY BROADCAST SYSTEM PLAN of the FCC. (page 41)

NETWORK TRANSMITS TONE BURST OF 2930 Hertz and "EBS PULSE". This tone will activate devices of stations so equipped.

Following the tone the network newscaster or program announcer will say:

"WE INTERRUPT THIS PROGRAM AT THE REQUEST OF THE UNITED STATES GOVERNMENT. THIS NETWORK WILL NOW DISCONTINUE ITS REGULAR OPERATIONS SO THAT ITS FACILITIES MAY BE USED AS A PART OF THE NATIONWIDE EMERGENCY BROADCAST SYSTEM. FOR FURTHER INFORMATION, KEEP LISTENING TO YOUR RADIO."

Network would then discontinue programming in progress, and ABC's facilities would then become part of the nationwide distribution facilities for EBS Presidential Messaged, National Programming and News.

(See FCC's Basic Emergency Broadcast System Plan.)

BULLETIN PROCEDURE - ABC RADIO

This procedure will be used if bulletin news develops during a period when the network is not feeding a hard news program:

NETWORK TRANSMITS TONE BURST OF 2930 Hertz. This tone will activate alerting devices of stations so equipped.

This tone will be followed by a closed circuit advisory that a bulletin is upcoming.

The advisory will include a <u>count-down</u> of not less than 30 seconds — such as:

"ALL STATIONS PLEASE STAND BY — WE HAVE A SPECIAL NEWS BULLETIN COMING UP IN FORTY SECONDS

STAND BY FOR A BULLETIN COMING UP IN THIRTY SECONDS....

ETC., ETC., until

STAND BY TO JOIN THE NETWORK FOR A BULLETIN COMING UP IN FIVE SECONDS FROM . . . NOW."

Note — this pause — of not less than five seconds will contain newsroom background noise. Stations should join during the pause.

Network newsman will start bulletin as follows:

"HERE IS A SPECIAL BULLETIN FROM ABC RADIO NEWS, NEW YORK."

(Bulletin will then be read, followed by additional details and reports, if any, concluding with:)

"THIS HAS BEEN A SPECIAL NEWS BULLETIN FROM ABC RADIO NEWS, NEW YORK."

Normal operations then resume.

AMERICAN BROADCASTING COMPANY BROADCAST ENGINEERING & OPERATIONS DEPARTMENT

ENGINEERING BULLETIN - NEWS ALERT SYSTEM

The ABC Radio Engineering Department has a signal system for transmission of messages to affiliated stations concerning news items, EBS transmissions, closed circuit information and news call.

Each affiliate desiring to participate may construct a NEWS ALERT signal detector unit from information provided herein. The signal detector unit will enable stations to be alerted both during network out-of-service periods and during network programs which they may not be carrying.

ALERT RECEIVER

B.O.& E. Equipment Planning

May 5, 197

INTRODUCTION

The ABC News Alert Receiver was designed to detect the presence of a sustained 2930 Hz tone transmitted on the network lines and to latch an internal relay which has a set of double pole double throw contacts. One set is used for illuminating a lamp when the tone is present (and also to latch the relay) and the second set is a spare to be used as desired.

The receiver, drawing A-8763, shows two frequency selective filters that can be used. The performance of the receiver using filter 1 or filter 2 is identical. Filter 1, however, will cost approximately six to eight dollars more than filter 2. Filter 2 does require ± 1% tolerance components if it is desired to be used without any frequency adjustments whereas filter 1 does require frequency adjustment.

The center frequency of the filter should be adjusted to 2930 Hz \pm 15 Hz to ensure that the receiver will not activate on any combination of program material.

PAGE 2

SET-UP INSTRUCTION

After the unit has been constructed in accordance with the schematic and layout drawing, it is ready to be set into operation.

- If filter one has been used, attach an audio oscillator to the input terminals and set the oscillator frequency to 2930Hz and the oscillator output to 0.25 volt. With the input level control preset at mid-range adjust L1 for maximum output at TPA (nominal 1.5 Vac).
- If filter two is used there are usually no adjustments required if
 + 1% resistors and + 1% capacitors are used.
- 3. Bridge the 2930 receiver across a terminated network feed. Adjust the input sensitivity pot to that setting at which the received 2930Hz network tone reliably energized the Kl relay. If the sensitivity pot is set properly the relay will not activate on any program material other than the 2930Hz tone.
- * If capacitors which have a wider tolerance range than \pm 2% are used the filter frequency may have to be trimmed by slight adjustment of R1 and R2. For the case where R₁=R₂=2R₃ and C₁=C₂= $\frac{1}{2}$ C₃, the center frequency of filter 2 is given by $f_{(Hz)} = \frac{0.159}{R_1 C_1}$. Also if a capacitance bridge is on hand, one might select the correct value of capacitance from a batch of capacitors that are available which have a wider tolerance range.

CIRCUIT DESCRIPTION:

The RCA CA 3035 is an IC consisting of three separate amplifiers in a TO-5 case.

Since amplifier 1* has a typical voltage gain of 40dB as well as a high input resistance, it was the circuit around which a narrow ban selective amplifier was built. The frequency selective network of filter 2 consists of Cl, C2, C3, R1, R2 and R3. (See Dwg. B 8763) The stage is AC coupled to amplifier 3, the output which drives a voltage doubler circuit. The DC signal is then fed to a transistor amplifier which in turn drives the relay K1. The relay has a latching property which can be disabled by depressing the momentary push-button switch.

An alternate tuned circuit using an LC type of band pass filter (filter 1) is noted for those wanting a means of varying the center frequency.

A separate set of contacts provided by the relay is used for control of a cue alarm system.

The receiver will perform satisfactorily at level of -25dBm across a 150 ohm terminated line, and in the temperature range of between $+35^{\circ}F$ to $100^{\circ}F$.

At one half and twice the center frequency, the filter response is down 35dB.

Relay closure will occur at a voltage, as measured at the junction of the cathode of D2 and the 4.7K resistor (TPA), between 1.5 VAC and 2.0 VAC depending upon the filter that is used.

NETWORK TECHNICAL QUALITY

The ABC Radio Networks utilize Schedule "A" facilities of the telephone company, (In a few instances where "A" fax are not available or a bonus station has specified "C" lines this will not be the case.)

To protect our quality nationwide we have to depend upon our affiliates engineering departments being aware of the "A" specifications for which, we pay and assuring themselves, by spot checks, that they are receiving the specified service. "A" service requires that response be flat within 4 DB from 100 @ hertz to 5000 hertz and that noise and distortion be acceptable.

At ABC we transmit tone news daily on a Monday thru Friday basis at the following times:

Monday	10:06 to 10:14:30 AM
Tuesday	10:06 to 10:14:30 AM
	1:20:15 to 1:25 PM
Wednesday	10:06 to 10:14:30 AM
Thursday	10:06 to 10:14:30 AM
Friday	10:06 to 10:14:30 AM

All times are New York time.

The tones for these runs are not identified at transmission time but are sent consistently in the following sequence:

1 KH for level adjustment and then 100, 200, 500, I KH, 2 KH and 4 KH.

Should your response exceed the 4 DB spread or noise and/or distortion are at unacceptable levels you should notify your local AT & T test board. Should you not receive acceptable service in what you consider a reasonable time, please call Bill Gilmore, Director of Engineering & Program Operations at ABC, New York for assistance.

A Look At ABC Radio's Expanded News and Production Facilities

A huge \$3,000,000 expansion program at ABC Radio News' New York headquarters and in the Washington and Los Angeles bureaus was geared to provide separate news and special programming facilities, tailored to the individual formats of ABC's four radio networks. This news operation, designed exclusively for radio, is a first in the industry.

The new ABC Radio News world-wide headquarters is located on Broadway across from Lincoln Center. In the new headquarters, all of ABC's news-gathering and broadcasting personnel, equipment and studios are housed on one floor, thereby increasing the overall efficiency of the ABC Radio News operation. New staff members have been added to what is now the largest news force in network radio broadcasting.

Included in the new facilities are eight self-contained studios — twice the number than at the former headquarters. Each studio is standardized and capable of providing complete news broadcasts to stations anywhere in the country.

There are four edit-record technical areas and a central control system. Each of the four radio networks — Contemporary, FM, Information and Entertainment — has its own facilities and personnel.

The new facilities house the most modern communications equipment available, including 11 specially designed consoles using solid state plug-in modules, 40 reel-to reel tape machines, 54 cartridge playback units, 20 turntables and three special consoles, providing direct communication between correspondents stationed overseas and ABC Radio News' headquarters in New York.

The equipment is computerized to the point that if you push two buttons you will get 49 feeds in at the same time from practically anywhere in the world. The special consoles are designed so that we can call in correspondents around the world in a matter of moments and get their voices on the air.

In the central control area, the switching room will have more than 10,000 relay cross points giving ABC Radio News a new and unrivaled capability and versatility.

Additing to the increased efficiency is the headquarters' new clock system which corrects itself every minute on the half-minute, via a direct link with the Naval Observatory in Washington.

On the floor below the news headquarters, a special area is set aside as a command post for special major events such as election coverage, with complete broadcasting facilities and immediate access to the main news area.

Additional modern facilities and equipment have been installed in Los Angeles and in Washington, giving these two areas the same capabilities as ABC Radio News' headquarters in New York.

In the opinion of Tom O'Brien, Vice President and Director of Radio News for ABC,
"... ten years from now this equipment will be as modern and efficient as it is today."

The following pictures of the ABC Radio News facilities illustrate better than words the forward-thinking planning that went into a radio operation that is second to none.

DESCRIPTION OF NEWS NETWORK

ABC Radio News split four ways on January 1, 1968. And in the spring of 1968 all of ABC Radio News moved out of ancient quarters into a world of new facilities designed for handling news for the four new networks.

The big move came in New York, to 1926 Broadway across from Lincoln Center. The layout on Broadway had been designed for radio . . . exclusively! Additional facilities and improvements were made in the Radio Bureaus in Washington and Los Angeles.

The total cost: \$3,000,000!

In New York the new plant was designed to put news correspondents, editors and newsmen at the hub of the most modern communications equipment available. More than 150 people work in and around this hub 24 hours a day.

Proof that the design was sensible and the equipment practical, is that in three years there have been only the slightest modifications in the equipment and layout. As a matter of fact when the new facilities were still being installed, Tom O'Brien, Vice President and Director of Radio News for ABC said, "...ten years from now this equipment will be as modern and efficient as it is today." That was three years ago. The plant is still living up to O'Brien's prediction.

Each of the new studios has equipment that is repeated in the others. Each studio is capable of sending a newscast to our affiliates anywhere in the United States . . . or anywhere in the world for that matter.

There are four edit-record technical areas and a central control system. Each of the Four Networks has its own facilities and personnel.

This broadcast equipment that has seen almost three years of steady use includes 11 specially designed consoles using solid state plug-in modules. There are 40 reel-to-reel tape machines, 54 Cartridge playback units, 20 turntables and five special consoles, and 20 mounted cassette playback and record units.

The five special consoles are designed in such a way that a newsman may communicate with overseas or domestic correspondents without leaving his desk.

These special consoles are called OCU's...Overseas Communication Units...and they feature the same specially designed unit that appears on all consoles, tape decks, and other equipment throughout the New York Newsroom. This standard unit called a "remote line switcher" can give you any of some half a hundred feed possibilities...by merely pushing two buttons. The combinations can range from a circuit with an ABC Correspondent in New Delhi to a gala event crosstown at the Waldorf Astoria. Pushing these buttons activates relays in the switching room of the central control area. There are more than 10,000 relay cross points. This switching system gives ABC Radio News an unrivaled capability and versatility.

An important item of efficiency is the clock system. ABC engineers designed and built it. The central clock control keeps every clock in the house in step with the correct time.

And, just below the main news headquarters in New York is a special area that's set aside for special major events such as election coverage. This area too, has the modern facilities of the main news area upstairs.

It's interesting to note that, unlike the other two major radio networks, our ABC News' facilities are exclusively radio.

Additional Operating Instructions & Clearance

IMPORTANT OPERATING POLICY

ABC Radio Network affiliates should be aware of the importance of operating each of the four network services of ABC consecutively and non-simultaneously.

That is to say, no program from ABC may be aired that provides any overlap in time, with any other ABC program on another ABC affiliated station, in your community.

The FCC has left us with absolutely no latitude, ordering us to eliminate even minor infractions of the rule. Because we must operate with no room for error, we again remind you of the delayed broadcast provision in your affiliation agreement: specifically, Paragraph D on page 3 of your station's contract.

Any program which ABC feeds and which you wish to delay must be approved by the network in advance of delaying the program. We cannot stress enough, the importance of the network's prior approval before a delay of one of our programs.

In view of the emphasis placed by the Commission on its rule against simultaneous dual network operation, and our own specific representations in this regard, we must consider even the smallest infraction by your station as most serious.

If you have any questions relating to the delay of programs, please do not hesitate to call me or any of the other Station Relations or Clearance staff.

Your continued cooperation and strict adherence to this matter is absolutely necessary and will be greatly appreciated.

Cordially,

Stephen T. Lindberg

Director, Station Relations

STATION RELATIONS/CLEARANCE

Forms:

1) Permanent Declaration of Clearance Form

This form is used by all affiliates and is a "pledge" by stations of the commercial programs offered by ABC that the stations agree to carry. A copy of this form should be kept by the traffic manager.

2) Monthly Affidavit of Clearance Discrepancies

Every station carrying one or more programs and/or commercials from the ABC Radio Network is required by contract to send in each month a Monthly Affidavit of Clearance Discrepancies. The Affidavit should be sent in on the Monday following the close of the Broadcast Month. On the back of each form is a schedule of the closing dates of the Broadcast Month. Those stations that receive compensation from the network are scheduled to be paid approximately five weeks after the close of the month. In order to be paid on time, the monthly affidavit must be returned. Late affidavits delay payment.

RADIO NETWORK COMMERCIAL SCHEDULE

The Radio Network Commercial Schedule is mailed to all stations each Wednesday afternoon for the week following. The schedule starts on Tuesday and ends on Monday. It shows the name and length of network commercials, promotions, public service announcements, or news fills and where and when they are scheduled.

Times are indicated in the terms of local time by time zone. Zone names are abbreviated as follows: E = Eastern, C = Central, M = Mountain, P = Pacific. Where the designation "local time" appears, it refers to the local time in the affiliate's market.

Other abbreviations and terms used on the commercial worksheet:

- (1) "N" Network position reserved for ABC commercials.
- (2) "L" Local position reserved for optional use as affiliates' local sales availabilities. (The network fills all "L" positions with PSA, promo material, or news fills).
- (3) "Extra" refers to programs not commercially ordered for the time zone(s) indicated.

 Any network commercials that may appear may be deleted.
- (4) All "N" commercial positions are available for local sale when unsold by the network. Unsold "N" positions are filled with PSA, promo material, or news fills. Unsold "N" positions are subject to network recapture via notice on the daily Closed Circuit.

Program Unit Codes:

Note that adjacent to the "N", there is a four character "program unit code," consisting of a prefix letter and three digits. These codes are used to identify network programs on the affidavit forms returned to ABC. They are also used to identify commercial changes on the daily Closed Circuit broadcast. The prefix letter represents the network: C = Contemporary, I = Information, E = Entertainment and F = FM. It is absolutely necessary to use the prefix letter and three digit code on the affidavit form so that the proper network and program unit code may be identified.

Commercial Changes and Additional Programs form

This form is sent to stations following the close of each broadcast week and serves, to correct and update the Commercial Schedule.

Presented in detail is an accounting of special unscheduled program feeds and news bulletins and a listing of additions and deletions of commercials made after the printing of the commercial schedule. The Commercial Changes and Additional Programming form should be attached or used to correct the commercial schedule and both should then be stored with station program logs for future reference and FCC Analysis.

CLOSED CIRCUIT

"Closed Circuit" is the daily internal program fed to all ABC affiliates at the following times, Monday through Friday:

220:30 PM E 120:30 PM C 1220:30 PM M 1120:30 AM P

This is the network's chief means of quickly communicating important operational and promotional data to stations. Daily Closed Circuit also includes — virtually every day — additions and deletions to the commercial schedule that are made following its printing each week.

We strongly urge all stations to tape record Closed Circuit so it can be made available to the traffic manager, program director, station manager or any other interested staff member.

As an additional enticement to listen regularly . . . we played Closed Circuit Cash Call every day. The daily prize is five dollars with five dollars added every day there's no winner. Hundreds of dollars have been given away on Closed Circuit — proving again: it pays to listen to ABC!

A NOTE ON NETWORK MAIL

Every week each of the four ABC Radio Network services sends out a mail packet addressed to the "Network Coordinator." This envelope always contains the Radio Network Commercial Schedule for the upcoming week and other important communications from the network directed to various station executives and staff members. As ABC mails this each Wednesday afternoon it should arrive at most stations by Friday, or Monday at the latest. The individual chiefly responsible for network operations at each affiliate — the "Network Coordinator" — should be on the lookout for this network mail packet once a week and be sure that its contents are distributed to those concerned.

Stations are advised that the business return envelopes provided for return of the monthly affidavits should not be used to mail other data to specific individuals at the network. These envelopes are handled in bulk and are channelled directly to the department that processes the affidavits. If you have material other than the regular network report to submit we suggest you use your own station envelope addressed to the proper person as listed in the contact list.

MAY	5-27-72	5-26-73	5-25-74	5-24-75	5-29-76
JUNE	7-01-72	6-30-73	6-29-74	6-28-75	7-03-76
JULY	7-29-72	7-28-73	7-27-74	7-26-75	7-31-76
AUGUST	8-26-72	8-25-73	8-24-74	8-23-75	8-28-76
SEPTEMBER	9-30-72	9-29-73	9-28-74	9-27-75	10-02-76
OCTOBER	10-28-72	10-27-73	10-26-74	10-25-75	10-30-76
NOVEMBER	11-25-72	11-24-73	11-23-74	11-29-75	11-27-76
DECEMBER	12-30-72	12-29-73	12-28-74	1-03-76	1-01-77

PROCEDURE:

- 1. Do not report on this Affidavit permanent changes to your current Clearance Declaration.
- 2. Report on this Affidavit all one time only deviations from your current Clearance Declaration.
- 3. Enter in the spaces provided your station's Call Letters, Band, City and State, and the Broadcast Month and Year covered by the Affidavit.
- 4. If all programs and commercials were run in accordance with your current Clearance Declaration: Check the "NO DISCREPANCIES" Box, sign and forward immediately.
- 5. For each deviation the following information is required:

a. PROGRAM UNIT CODE	Enter the four digit Program Unit Code assigned to the program and/or commercial affected.
b. COMMERCIAL	Leave blank if the same deviation applies to all commercials in a program unit code. Otherwise use a separate line for each commercial for which you are reporting a deviation and enter the commercial number.
c. LIVE FEED DATE	Enter the Month, Day and Year the program material was fed.
d. TYPE	Enter the appropriate Code that describes the deviation. The Codes are located in the lower left corner of the form.
e. CAUSE	Enter the appropriate Code that best explains the deviation. The Codes are located in the lower center of the form.
f. MAKE GOOD TIME	Enter only if the Type Code is a C or D. Enter the Hour, Minute and A/P of the make good.
g. MAKE GOOD DATE	Enter only if the Type Code is a C or D. Enter the Month, Day and Year of the

make good. Leave this entry blank if the make good was on the Live Feed Date.

Please sign and forward in the pre-addressed envelopes provided. If you are out of these envelopes, the address is:

Radio Station Clearance American Broadcasting Company 1330 Avenue of the Americas New York, New York 10019

DIRECTIONS FOR DECLARATION OF PROGRAMS CARRIED FORM

The Declaration of Programs Carried includes four sections:

REGULAR COMMERCIAL PROGRAMS (Page 2) PAUL HARVEY PROGRAMS (Page 3) ADDITIONAL PROGRAMS FROM OTHER ABC NETWORKS (Page 3) SUSTAINING PROGRAMS (Page 4)

Please be sure to complete all sections in accordance with the following instructions:

- 1. Fill in call letters, city and state, and time zone.
- 2. Indicate your clearance for each program and/or commercial in the appropriate blocks using the following codes. Remember all blocks must be filled in.
 - A. If the program is carried "live" (at the time printed for your time zone), put an "X" in the box.
 - B. If a program is carried at a time other than "live", put DB-P in the block with the actual broadcast time next to it, eg. DB-P 9:15 AM. DB-P means delayed broadcast of programs.
 - C. If you cannot carry the entire program but can tape the commercial and play it back, then put DB-C in the block with the approximate time within a 15 minute segment that you will carry the commercial eg. DB-C 9:15. DB-C stands for delay broadcast of commercial. If it is at all possible, the first quarter hour after the live time is preferable for the delay broadcast of the commercial.
 - D. If a <u>program or commercial</u> cannot be carried put a "U" in the block. Please remember that all programs or commercials should be carried.

After completing all forms, please return one copy in the enclosed self-addressed stamped envelope. The remaining copy should be kept in your files for reference when completing your affidavits.

Name of Person at Station Responsible for all Network Forms Authorized signature below signifies affiliate's understanding and agreement that this "Declaration of Programs Carried" form is a "pledge" to carry network commercials and/or programs as indicated and that station is contractually bound to verify clearances as indicated by providing the network with the "Monthly Affidavit of Commercial Discrepancies" form. If station wishes to add, delete or change the time of any program(s), station must obtain clearance from the network at least thirty days in advance of any anticipated change.

Paul Harvey Programs

If your contract does not offer the Paul Harvey Programs to you, please check here:	
---	--

If you are authorized to carry Paul Harvey from the Entertainment Network, please indicate your clearance for his three programs listed below:

Please note that the Monday-Saturday midday program has four one-minute commercial positions. On Monday thru Friday, the first and second positions are reserved for network sale; the third and fourth positions are for local sale. All four positions are reserved for Network Sale on Saturday.

	Monday-Friday	1	Monday-Friday Midday	Saturday
