JONES SATELLITE NETWORKS™

Jones Satellite Networks

JSN is America's fastest growing radio network because of our commitment to serving our affiliates with the very best service and competitive programming, so you can generate audience and bottom line profits.

We will provide you with all the tools you'll need to be as successful as possible, from major market air talent to engineering help and promotion ideas to promote your radio station.

While our experience is varied, we all share one common value: We LOVE radio! You'll find this out the very first time you talk with one of our Regional Managers, Program Directors or Engineers.

This is not just good satellite radio, but good radio!

For instance, utilizing the resources of Paragon Research, we carefully screen all titles for acceptance on a national level.

Knowing what to play, when to play it and what to say is now more important than ever. No longer is it true that just because the market is small it's not competitive. In choosing Jones Satellite Networks, you're tapping hundreds of years of collective experience in markets of all sizes. All for a fraction of the cost of doing it locally.

We look forward to working with you!
