Radio Impact in the Twin City Market

A sociological study approved by the University of Minnesota

A recently completed survey designed to measure the impact and impression which each radio station and its personalities makes on the Twin Cities population has now been compiled for use by advertisers and advertising agencies.

Under the direction of Dr. Roy Francis, Professor of Sociology, University of Minnesota, this survey meets the highest possible standards of design, procedure, sampling and evaluation that modern research can provide.

Among the results which we (for obvious reasons) find particularly interesting are the following:

Favorite disc-jockey among 15 listed—Don Doty
Favorite radio sports announcer—Dick Nesbitt
Favorite radio newscaster—Bob Ryan

Impact is also measured by age, income and educational levels.

Your nearest Edward Petry office or a KSTP representative will be happy to give you further details on obtaining a copy of the survey. Or, you may write Byron E. Anderson, Sales Manager, KSTP Radio, 3415 University Avenue, Minneapolis, Minnesota.

valuable
new minutes
in radio

Now, these and all other KBIG minutes are new... and more valuable. The big reason? Southern California's positive reaction to 3 talented personalities: Joe Niagara (6-10 a.m.), Jim O'Leary (10 a.m.-2 p.m.), and Bob Gage (2-6 p.m.). This dynamic threesome adds new freshness, new vitality to radio selling.

Result: Better sound for listeners... more profitable climate for advertisers.

Get the facts! New file-folder now available from your KBIG or Weed rep.
Radio’s Barometer

Spot: Estimated national spot radio time sales for the first six months of this year, according to the Station Representatives Association, were $85,909 million. This compares with an estimate of $85,923 million in national spot sales for the same period in 1959. The SRA points out that these estimated figures do not reflect the adjustments which will be made when the Federal Communications Commission releases the official sales figures for last year.

Network: NBC Radio is in a profit-making position for the first quarter of 1961 as a result of net sales of over $1.25 million during a three-week period last month, according to William K. McDaniel, vice president in charge of the network. “At the three-quarter mark of 1960,” Mr. McDaniel said, “we are already in the black for the first full year since the early fifties.” The Pepsi-Cola Co. continued to hold its number one position among network advertisers in terms of total home broadcasts delivered, according to the A. C. Nielsen Co.’s monthly index for the period ending August 7. Second and third places went to Chevrolet-General Motors and Liggett & Myers Tobacco. The network leader in total commercial minutes delivered, the Nielsen report indicates, was Chevrolet with 103,615,000. In second place was Pepsi-Cola with 101,929,000, followed by Westinghouse Electric with 101,836,000 commercial minutes delivered.

Local: A new KNX Hollywood sales record was recently established by the station, according to Gordon Mason, sales manager. He reports sales totaling $108,000 for one day. The previous single day record, Mr. Mason points out, was $100,000, set last April. Sales made to General Motors, R. J. Reynolds, Universal-International and General Foods helped establish the new sales peak.

Stations: The number of AM and FM stations on the air at the end of August totaled 4,254, an increase of 17 (11 AM and 6 FM) over the previous month.

Sets: Showing the effects of the traditional vacation period, total radio production in July was 890,359, including 328,000 auto receivers, according to the Electronic Industries Association. Total radio production for the first seven months of the year came to 8,414,879, including 3,631,101 auto sets. Production figures for the same period last year were 7,936,621. Total radio sales, excluding car radios, was 665,298; seven month total was 5,038,899. Sales total for the same period in 1959 was 4,583,210. Number of FM sets produced in July was 49,707. The seven month cumulative total was 192,242.
VICTUALS & VIANDS

Here's food for thought: in three short years food and grocery advertising has increased 334% on WPAT! There's no doubt about it, we're the very broth of a radio station . . . the favorite of butchers, bakers, grocers and gourmets in 31 counties throughout New York, New Jersey, Pennsylvania and Connecticut . . . an area where more than 17,000,000 people live, work and buy in more than 5,000,000 radio homes. The proof is in the pudding, but WPAT's power to move products off counters and into cupboards is best illustrated by this list of the people who make and market America's leading victuals and viands: A&P, Arnold Bakers, The Borden Company, Breyer's Ice Cream, California Asparagus Growers Association, Campbell Soup Company, Chock Full O' Nuts, Continental Baking Company, Country Club Ice Cream, Dannon Yogurt, Doram Foods, Inc., Eskimo Pie Corporation, Foremost Dairies, Good Humor Corporation, A. Goodman & Sons, Gordon Baking Company, Grand Union, Gravymaster Company, Louis Sherry Company, N. B. C. Bread Company, Nestle Company, River Brand Rice Mills, Romanoff Caviar Company, Safeway Stores, Sara Lee Products, Schrafft's (Frank G. Shattuck Company), Standard Brands, Inc., Tea Council of the U. S. A., Tetley Tea Company, Wheaten Company, White Rose Tea. During the first six months of 1960, all of them advertised on WPAT, the station where radio gourmets gather . . . the station with the taste of success.

www.americanradiohistory.com
Following a tradition of 38 years of broadcasting in the public interest, WSB-Radio joined other broadcasters during the July 4 holidays to wage an unprecedented safety campaign to save lives on the highways.

The station utilized a three-pronged approach, featuring 1100 announcements, during a three-day period, with reports from the station helicopter, the mobile news units, and prominent state and city officials.

This promotion was judged best by the Georgia Association of Broadcasters among stations serving a market of more than 75,000 population. It is this type of programming in the public interest that has served to make WSB-Radio synonymous with public service in the minds of listeners, and has won for the station a tremendous audience loyalty.
Heavy Radio Load Prompts Pulse To Postpone Orders for "Specials"

Faced with one of its busiest fall seasons in radio, The Pulse Inc. is not accepting new orders for special studies until November 15. The current workload in radio has been running at the rate of 40 or 50 studies a month, including both special and regular reports, according to George Sternberg, Pulse service director. The major reason for this action is to allow adequate time for the studies currently being produced.

Adam Young Appraises Market Data in Top 100 Areas

"Spot Markets 1960-100-Market Appraisal" is being released this month by Adam Young Inc. The 92-page booklet is intended to serve as a marketing guide to the use of radio in the top 100 markets. It will define the areas of maximum advertiser interest for each market, providing population, effective buying income and households both for the metro area and the advertiser area. Frank Boehm, vice president, research-promotion, states the advertiser areas for this study have been arrived at by using the Rand-McNally trading area maps and drawing a 50-mile radius from the center of each city. Exceptions to these are advertiser areas that have been determined by an agency panel in previous listening studies. Source of the marketing data is Sales Management's Survey of Buying Power.

Do Stations See Need To Simplify Rate Cards?

The "most constructive" step a station can take is to make its national rate card easier to interpret, Radio Advertising Bureau finds in a survey of its 1,200 member stations. The study shows that nearly half—48.7 percent—of the stations consider simplification of rate cards the important need today. Many stations, especially those in large markets, have made changes in this direction over the past year. The survey finds that 58 percent of large-market stations have made efforts to streamline their cards in the last 12 months. On the other hand, RAB states, in small markets where rate structures frequently are less complex, 16 percent report efforts towards simplification.

Radio Offers Book Publisher New Promotion Opportunities

A reminder that there are always important new fields to conquer is the fact that Grosset & Dunlap Inc. is reportedly the only representative of the $600-million-a-year book publishing industry making use of local and national radio to generate sales on the retail book level. G&D had its first exposure to the sound medium last year, and is coming back with a bigger "edition" for the 1960 pre-holiday selling season. (See G&D Discovers Radio, p. 28.)

Another New York Station Denies It's Up for Sale

Amid all the interest surrounding the sale of WINS New York for the all-time price high of $10 million, some New York properties have been put in a position of denying they are up for sale. One such station is WMGM. Laurence Tisch, chairman of the board and chief executive officer of Loew's Theatres Inc., states, "WMGM is an extremely important asset to our company. Every year, for a number of years, the station's income and profit have substantially exceeded the previous year. . . . We have no intention of disposing of WMGM at any price. As a matter of fact Loew's Theatres Inc., will make every effort to enlarge its activities in the field of radio and tv station ownership."
KYW is way up in Cleveland!

...with the most extensive international, national and local news coverage in town. More people dial KYW for News than any other radio station in Cleveland. KYW is your No. 1 radio buy in Ohio's No. 1 market.

Represented by AM Radio Sales Co. Westinghouse Broadcasting Co., Inc.

American Motors Co.
Agency: Grey, Morey, Madden & Ballard Inc., New York
Product: 1961 RAMBLER

Announcing a record campaign to introduce the new Rambler, American Motors is buying an extra 45 spots per weekend for a three-week period on NBC stations carrying its Monitor spots. The Monitor schedule will continue for 32 weeks, totaling 22 announcements each week.

Beech-Nut Life Savers Inc.
Agency: Charles W. Hoyt Inc.
Product: BEECH-NUT COFFEE

With an all-radio budget, Beech-Nut started a 10-week spot campaign in mid-September. Markets number between 30 and 40, including Detroit, northern Virginia and cities in the Northeast. Total spots per week will reach 200 in some markets. Time-buyer is Doug Hunim.

Bulova Watch Co.
Product: WATCHES

Bulova's fall schedule begins October 1 with 10-second time signals slated to ring in 25 markets. The schedule calls for frequencies of 25 per week for each station. Phil Stumbo is the timebuyer.

Cerebelli & Co.
Agency: Ellington & Co., New York
Product: BROSCHI TABLETS

The second flight of spots for this anti-acid tablet will begin mid-November in 16 markets, including the Northeast and Chicago. This flight will run five weeks, using 30-second ET's. Dan Kane, media director, is handling the buying.

South Bend's Your Best Bet

Put the odds in your favor — pick the South Bend market. With a Metro Area household income of $7553 South Bend whips the state average of $6127 by many, many lengths. And this is only one part of the South Bend market. Project this basic area to the 36 Indiana and Michigan counties covered by WSBT, and it parleys into an area with over $3.5 billion buying power.

WSBT is the area's favorite...dominates every 15 minute segment of every broadcast day from South Bend. The leading station in one of the midwest's richest markets. So put your products in the winner's circle; pick the South Bend market and its dominate station...WSBT. Call your Raymer man for complete details. He'll sort right over.

Cities Service Co.
Agency: Ellington & Co.
Product: GASOLINE

A flight of minutes and ID’s just started in 60 markets. Schedule is running for four weeks in eastern markets, five in the mid-west. Wednesday, Thursday and Friday are the favored days for minutes, weekends are reserved for ID’s. Media director Dan Kane handles the buys.

d-Con Co.
Product: MOUSE PRUFE

Going into 80 markets, this product will be advertised through the end of the year on stations with “area coverage.” Idea is to reach suburban house-holders bothered with mice. The schedule will run through December, using an average of three spots per week. Bob Hall is the timebuyer.

d-Con Co.
Product: RODENTICIDE

Back on farm radio after a summer break, the rat-killer spots are running in 125 markets. Frequencies vary from three to 12 spots per week, depending on the market. On some stations, five and 15-minute farm programs carry the message. Timebuyer is Bob Hall.

E. I. duPont de Nemours & Co.
Agency: BBDO Inc. New York
Product: (FABRILITE)

Spots for this product, a plastic-like fabric used in upholstery covering, started this month in 25 markets. Fabrilite, sold in venetian blind stores and similar outlets, is being advertised in this campaign to appeal to the “do it yourself” homemaker. The station list was the re-

[Cont’d on p. 10]

sult of client recommendation, and holds to the top-rated station in each market, Macon, Ga., and Jackson, Miss., are typical of the market size. A scattering of 10 extra markets includes Chicago as the largest one. Running for four weeks, frequencies in the campaign are six spots a week during driving time. Bob Swees is the timebuyer.

Eastern Air Lines Inc.
Agency: Fletcher, Richards, Calkins & Holdent Inc., New York
Product: AIR TRAVEL

Another 13-week flight kicks off in 25 major markets next month. Minimum number of five spots a week will run in some markets, with larger schedules in others. Package plans are being bought on some stations. Jim Kelly is timebuyer.

Ford Motor Co.
Mercury and Lincoln Div.
Agency: Kenyon & Eckhardt Inc., New York
Product: 1961 MERCURY

A heavy announcement campaign started October 5, will run six weeks on 210 stations in 71 markets. Frequency for the minute spots ranges from 20 to 70 per week. Scheduled in traffic times, the messages are in the 6 a.m. to 10 a.m. and 1 to 6 p.m. slots. Mercury dealer associations (there are 23) are running regional campaigns to supplement national spot. Timebuyer is Ed Kobza.

Gasoline Tax Education Commission
Agency: Sullivan, Stauffer, Colwell and Bylles Inc., New York

A 47-state spot radio campaign started October 11, in an effort to make the public aware of the amount of tax the consumer pays per gallon of gasoline. The campaign using 30s, 20s and 10s is on the air in a total of 150 markets. Frequencies vary from light to heavy with an average of 20 spots per week. Copy varies in each state to accommodate the tax variance across state borders. Timebuyer is Bob Ridge.

General Motors Corp.
Buick Division
Agency: McCann-Erickson Inc., Detroit
Product: AUTOMOBILES

Introducing the new Buicks with spot radio in 90 to 100 markets, M-E’s first flight began September 26 for three weeks. After a two-week interim, spots will be on for another three weeks. Frequencies run as high as 25 spots per day in some markets, with a low of 10 or 12 in others. Minutes and 20’s carry the message, and the total campaign involves some 275 stations. On network, Buick is sponsoring 12 five-minute Bob Hope shows per weekend on NBC’s Monitor. The network schedule is 10 weeks long, heard in 195 markets. Timebuyer is Judy Anderson.

Knomark Inc.
Agency: Mogul, Williams and Saylor Inc., New York
Product: ESQUIRE BOOT POLISH

A substantial budget increase shines bright for radio in a fall push in the top 15 markets. Announcing that the “odor is out,” the commercials feature a new 10-second radio jingle. The six-week campaign began the last week of September, with schedules of 80 announcements per week.

V. La Rosa & Sons Inc.
Agency: Hicks & Greist Inc., New York
Product: MACARONI PRODUCTS

An early fall drive for this account will start about October 18 and run a total of 13 weeks. Complete line of LaRosa products will be advertised in 80 markets, mostly in the east and mid-west. Schedule calls for 61 spots per week, Monday...
time buys

through Friday. Some spots are live, others ET. Len Soglio is timebuyer.

Nestle Co.
Agency: Wm. Esty Co., New York
Product: INSTANT NESCAFE

Stations are still being added to the 12-week Nescafe buy that started in September. Between 80 and 90 markets are included in the campaign to date. Announcements are minutes and 20's, all ET's. Jack Nugent is timebuyer.

Parker Bros. Inc.
Agency: Badger, Browning & Parcher Inc., Boston
Product: GAMES

Seeking out the housewife who is buying for Christmas, Parker Brothers will start a campaign in early November in 40 to 50 markets. A five-week campaign begins November 4 in some markets, a six-week drive on November 7 in others. Spots will fall mostly between 9 a.m. and 4 p.m., although some will run during morning driving hours. At least 25 percent of the budget is going into spot radio.

Pierce's Proprietaries Inc.
Product: DR. PIERCE'S GOLDEN MEDICAL DISCOVERY

The first of two 16-week flights starts October 17 in 30 markets. Minutes will run in the morning times. After a Christmas hiatus, the second flight will begin about January, 1961. Dorothy Glasser is the timebuyer.

Remington Arms Co.
Agency: BBDO Inc., New York
Product: REMINGTON CHAIN SAW

After several years of a "no-advertising" policy for this product, the company expects to highlight its chain saws in a spot radio campaign tentatively planned to kick-off some time in November. If advertising plans progress along the current route, radio will get the bulk of the budget.

Standard Brands Inc.
Product: BLUE BONNET MARGARINE

About 10 markets will be added this month to the current schedule. Flights run from four to eight weeks. The total campaign involves some 50 markets, and 50 to 100 spots per week. Timebuyer is Bob Decker.

Universal-International Pictures Corp.
Product: MIDNIGHT LACE

Promoting this film's introduction, Universal is using radio heavily, particularly in light of the radio popularity of its singing star, Doris Day. The film opens October 13 in New York, and will be introduced in about 40 major markets through November 30. Radio budgets for each city may run from $750 to $1,500. Once Midnight Lace is unveiled in the top markets, it will move to smaller ones with proportionate radio budgets.

Warner Bros. Co.
Agency: Blaine-Thompson Co., New York
Product: "SUNRISE AT CAMPO-BELLO"

A heavy saturation campaign on fm stations is the prospect for this film as it opens next month in a number of cities. Agency feels it can best reach a discriminating audience with fm utilizing a modified hardsell. The commercials will outline the reserved seat plan which gives people a chance to buy tickets in advance. Some am stations may be used, but fm will be the number one air medium. Timebuyer Lee Frankel.

ARThUR GODFREY

A legend in his own time. A personality without peer. Philosopher, story teller, news maker, catalyst, he brings to each listener an immediate sense of personal participation. As if that weren't enough, he just happens to be the greatest salesman in broadcasting history. In all radio, Godfrey is the kind of company you keep...

1960 CENSUS

U.S. RADIO • October 1960

www.americanradiohistory.com
Veteran broadcaster Charles M. Stone, has been named to newly-created post of full-time director of the Radio Code of the National Association of Broadcasters. The code administrator will report to John F. Meagher, NAB vice president for radio. The duties of the code director include assisting in the preparation of a monitoring program to insure code compliance by subscribers, Mr. Meagher said. At the same time, the Radio Code Board, which is headed by Cliff Gill, president and general manager of KEZY Anaheim, Calif., also mapped out a campaign to step up subscription to the code. Attempts will be made to explain the benefits of the code through State Broadcasters Association meetings, through sales efforts of the NAB station relations staff and through a complete presentation at the eight NAB fall conferences. According to Mr. Meagher, subscription to the code is now "well past the 600 mark."

Broadcasters will soon be seeing the results of a recent meeting of the Editorializing Committee of the NAB. The group approved four projects to assist and encourage broadcasters to editorialize. Included among these projects are: (1) Compilation of a file of specific instances showing what individual stations accomplish when they editorialize. (2) Updating and revision of the NAB publication, Editorializing on the Air, to reflect latest developments, and to contain examples of techniques as well as a check list for stations planning to editorialize. (3) Frequent mailing of selected case histories on editorializing to member stations of NAB. (4) Compilation and dissemination of a list of problems which may have been encountered since radio station editorializing became more prevalent.

NAB will put the new format it has developed for its annual series of fall conferences for broadcasters into practice at the first session being held in Atlanta, Ga., this month. The new approach, it was explained, calls for a "study in depth of people and politics, problems and profits." Everett R. Revercomb, NAB acting administrator and secretary-treasurer, said the Atlanta conference, and those to follow, would explore "the many pressing problems confronting broadcasters in a time of crisis and decision. Chief among these is politics—the science of government, the mechanics of government and their relationship to the broadcast industry. This is the most important problem facing broadcasters today," Mr. Revercomb says, "and will be the subject of a study in depth in all its phases."

Clair R. McCollough, chairman of the Policy Committee of the NAB, and president and general manager of the Steinman Stations, Lancaster, Pa., recently issued a statement dealing with new amendments to the Communications Act signed into law last month. Mr. McCollough said, "The broadcasting industry has no patience with payola and the rigging of quiz shows and, as industry spokesmen testified before Congress, is satisfied to have such practices spelled out as criminal offenses. NAB is happy that Congress removed from the legislation a proposal to permit the Federal Communications Commission to suspend station licenses. This would have placed an intolerable burden on individual broad-

(Cont'd on p. 14)
casters. While NAB believes that fines are unnecessary, it is pleased that the legislation enacted contains provisions for appeal to the courts and other safeguards.”

Guidance Furnished on Sponsor Identification Requirements

Member radio stations of NAB have received a guide for use in complying with sponsor identification requirements of the newly-enacted amendments to the Communications Act. The four-page sheet mailed by Douglas A. Anello, NAB chief counsel, contains 27 examples which were outlined in the Congressional report adopting the legislation. One example points out that no announcement of sponsorship is required where records are supplied to disc jockeys or stations unless the record distributor “furnished more copies of a particular record than are needed for broadcast purposes.” Another example shows that sponsor identification would be required if an announcer should receive an automobile for his own use in return for an on-the-air mention of the auto manufacturer’s products.

Aviation Agency’s Views on Radio Towers Opposed by NAB

The NAB is taking the position that “the final authority in determining whether construction of a radio or television tower would constitute a hazard to air navigation rests with the Federal Communications Commission.” This position was taken in comments filed with the FCC in answer to a statement by the Federal Aviation Agency seeking final approval by the aviation agency before such a tower could be built.

The NAB answer said the intent of Congress to place final jurisdiction in the FCC was “clearly manifested” in the Communications Act of 1934, and has been “sustained in clear and unequivocal terms by the courts.” Furthermore, it said, an examination of the Federal Aviation Act setting up the aviation agency discloses “no authority, expressed or implied, to exercise final jurisdiction over broadcast transmission towers is vested in the FAA.”

HERE'S PROOF—
WLW radio again lengthens

according to
April / May
Nielsen 1960

WLW Radio now commands almost 6 times the total daytime audience as its nearest competitor... and 40% of the metropolitan Cincinnati daytime audience!

WLW Radio has increased its total daytime audience 12% in 3 months... 52% in one year! And has increased its metropolitan daytime audience 14% in 3 months... 29% in one year!

These WLW spectacular audience ratings are due to two important factors:
1. The WLW World's-Highest-Fidelity AM Transmission—developed exclusively by Crosley Broadcasting engineers.

2. The WLW programming—a concept of programming with broad audience appeal, especially in music, news and information.

So when buying Radio time, take one look at these audience charts here... and you'll see why you should call your WLW Representative!

WHILE

Under the leadership of Arthur Hull Hayes, president of CBS Radio, one of the most significant CBS affiliate conventions was held late last month to provide final approval to modifications in the Program Consolidation Plan.

The original PCP, which was instituted in January 1959, has been responsible for CBS Radio's return to the positive side of the ledger for the final quarter of 1959 and the first six months of this year. And Mr. Hayes is confident this happy experience will continue.

The new modifications place greater emphasis on news and public affairs—"the one kind of programming that a national network has always been able to do best," Mr. Hayes states.

"PCP has proved a great success for the network and its affiliates. From our standpoint, costs were reduced and station clearance problems were eliminated. The stations, on their part, welcomed the freeing of program time while the all-important network sound is retained. That 'sound' will remain, of course, in the identifiable quality of the news, Arthur Godfrey, Garry Moore, Art Linkletter, Bing Crosby and Rosemary Clooney."

Mr. Hayes, who became president of CBS Radio in April 1955, has spent his entire business career on both sides of the advertising fence—agency and media. He was graduated from the University of Detroit in 1926.

After two years in the national advertising department of the Detroit News, he joined the media department of Campbell-Ewald Inc. He became assistant to the vice president in charge of media and in the early 1930's, with the onrush of broadcasting, Mr. Hayes organized a radio department for the agency.

He started his CBS career in January 1931 as an account executive for CBS Radio Spot Sales and was appointed eastern sales manager a year later.

In 1938, Mr. Hayes was named sales manager of WCRS New York and became general manager of the station in 1940. In February 1949, he headed west to become vice president in charge of the network's San Francisco office, following the acquisition of KCBS (then under the call KQW). He remained there until assuming the post of president...
New 93-county Pulse confirms historic fact of WHO's impact in farm homes!

WHO Radio coverage area is America's 14th largest radio market!

Each year since 1938 the "Iowa Radio Audience Survey" has proved 50,000-Watt WHO Radio to be the great favorite of Iowa farm radio families. Listenership of our Farm News programs has always topped those of the next two, three or four stations combined!

1960 is no exception! Proof is in the new 93-County Area* Pulse Survey which covered an area served by more than 85 radio stations.

WHO Radio farm ratings are phenomenal during the periods when farm families listen most to radio (6 a.m.-8:30 a.m., Noon-1:30 p.m., 5:30 p.m.-7:00 p.m.—Monday through Saturday). For example, WHO Radio's share of farm homes using radio exceeds that of the next three stations combined in 70% of all quarter hours surveyed. It exceeds that of the next two stations combined in all quarter hours.

But the farm radio audience accounts for only 28.4% of all homes reached by 50,000-Watt WHO Radio in this tremendous 93-county area. WHO Radio's showing among urban radio families is equally spectacular.

Ask your PGW Colonel about all the up-to-date facts on WHO Radio—serving America's 14th largest radio market!

*This area includes 68% (93 of 137) of the counties in which WHO Radio has 10% or more NCS No. 2 penetration.

POP!

We’ve got the moxie, make no mistake! And that’s why soft drink advertising has increased a smashing 121% in three short years on WPAT. There’s nothing like the sparkling effervescence of our programming for refreshing soft drink sales throughout 31 counties in New York, New Jersey, Pennsylvania and Connecticut... an area where more than 17,000,000 people live, work and get thirsty in more than 5,000,000 radio homes. Ask the purveyors of America’s leading potables. Ask Canada Dry, Coca-Cola, Hoffman, Nehi, Pepsi-Cola, Seven-Up, White Rock or anybody else who, in the last three years, has advertised on WPAT. Popularity moves products and you get popularity in the big, big bottle on WPAT... the station with the sound of success.

Radio Measures Up

A three-part story detailing moves afoot to increase measurably radio's national volume

FAST START

From a radio point of view, the start of the new advertising season is off to a fast start. The adjacent lead story explains some of the important things that are happening as radio appears to be gearing for one of the most forceful selling years in recent memory.

Coincident with the start of the new advertising year is the fact that U. S. RADIO begins its fourth year of publishing with this issue.

Looking back for a moment, it is easy to observe the growth of the radio industry during these few years.

The number of stations on the air has grown from 3,113 am and 332 fm recorded in the October 1957 issue of U. S. RADIO to 3,502 am and 752 fm stations currently operating.

Radio's great out-of-home story was just getting started that year. Sales of portable sets in 1957 came to 3,846,000 compared with the most recent sales figures for 1959 of 7,687,000.

Total radio set sales in 1957 came to 14,777,000 compared with 18,167,000 in 1959.

Those who have been following the developments in radio know that the real growth years are ahead. U. S. RADIO is proud to be a part of this story.

One of the most aggressive selling seasons in the history of radio is in the making. Nationally and locally, concerted efforts are being made to enlarge the national sales horizon of radio.

Leading the way are new research studies confirming the efficiency of radio buying. In addition, representatives are urging stations to get behind the bandwagon and push if they want to see a measurable increase in national volume.

As for research, Radio Advertising Bureau has published a new study that confirms radio's adult dominance during the daytime hours.

William C. Dekker, vice president, media director, McCann-Erickson Inc., New York, says of the RAB study: "The comparison of radio's adult audience reach during daytime in 1960 versus 1958 contained in this 27-market RAB study documents once again the growth of daytime radio during the past two years."

In another research study, Peters, Griffin, Woodward Inc. and A. C. Nielsen have teamed up to show the reach and efficiency of spot radio. There's a special spotlight cast on the power of weekend radio.

In addition, many representatives are pressing their stations to cooperate locally in creating a national demand for radio use. An example of what can be done is explained by Morris S. Kellner, vice president radio, The Katz Agency Inc., in a point-by-point analysis of how stations can "cultivate" the local broker or distributor to increase the use of radio nationally.
The consciousness of radio's sales story and reasons for its advertising effectiveness are explored in new RAB research. The project provides the same answer to two questions. The questions: 

(1) What segment of the family does the buying?

(2) What segment of the family listens to radio more than TV during the entire daytime hours?

Answer for both: Adults (18 years of age and older).

One of the most important blasts at the "traffic times" craze in radio has resulted from the study on radio's penetration co-developed by Peters, Griffin, Woodward Inc. and the A. C. Nielsen Co.

The purpose of the overall study was to provide a media planning guide to the penetration and cost efficiency of national spot radio in the top 100 markets. The study accomplishes this and more.

A major facet of the project shows that in reach and frequency as well as in audience composition, weekend radio compares very favorably with the crowded weekday driving times. Here are comparisons of two schedules in the top five markets in the PGW-Nielsen study.

The Monday-through-Friday schedule (6 to 9 a.m. and 3 to 6 p.m.) utilizes 37 spots at a weekly cost of $18,900 (minutes at 13-week rate).

The weekend schedule consists of 45 spots at a weekly cost of $10,300 (minutes at 13-week rate).

Here are the results:

Driving times has an unduplicated reach of 28.9 percent of the homes compared with 28.3 percent for the weekend; frequency is 2.3 for weekday and 3.0 for weekend. In audience composition, the weekend schedule shows an edge in males of 33 percent compared with 26 percent.

What can stations do to help themselves and their representatives increase the flow of national money into radio? Plenty, judging by a list of specific recommendations prepared by the Katz Agency Inc.

Particularly, Morris S. Kellner, vice president in charge of radio, urges stations to "cultivate" the local contact of the national client.

The following evaluation of what can be done is presented by Mr. Kellner in response to a plea for such advice from Kenneth Church, vice president, Taft Broadcasting Co.

"Frankly, too many of us in radio have been too casual in our efforts to cultivate local contacts of national advertisers. Newspapers, for instance, have long recognized that 'all national advertising is local' and have worked hard and consistently to cultivate the local district manager, broker or wholesaler. Radio stations must realize that such cultivation requires a purposeful program, carried out diligently month in and month out. It cannot be simply a spur-of-the-moment call when the news breaks about an upcoming campaign.

"Nor is it enough for just any available man to attend the Chamber of Commerce luncheon or the local food manufacturers representatives' association meeting. Cultivating the individuals who can influence the expenditure of national appropriations, the key man in the field who can stimulate national spot radio

A similar study was conducted in the same markets two years before in winter 1958. While that study, RAB (Cont'd on p. 49)

for the weekday. It should be observed here that one of the big reasons for driving times popularity is the male audience. In female composition, the weekday schedule reaches 52 percent compared with 44 percent for the weekend.

The PGW-Nielsen project is meeting with positive agency reaction on high levels. Seymour Banks, vice president and manager of media, Leo Burnett Co., analyzed the study for his agency and signed off with this comment:

"Let me conclude by pointing out that these studies make significant contributions to our knowledge of spot radio's capabilities."

The object of the study, as explained by Jack Thompson, vice president-radio sales, and Lud Richards, director of sales development, is to correct what PGW calls a "false image" of radio held by "nonradio advertisers." The false image, states PGW, is that radio is a "low reach medium" and that it is "too expensive."

Robert Teter, vice president in charge of PGW's radio division, believes the study is important because "media can now estimate both cost and penetration of a spot radio campaign in much the same manner that it has been able to do for TV and print."

The study shows, for example, that in the top five markets an advertiser in one week can build the unduplicated reach of a schedule from 21.4 percent to 56.6 percent, depending on the number of stations (one to four) and the number of spots (34 to 303).

On a four-week basis, this schedule will jump in unduplicated reach from 34.38 percent for the smaller schedule to 73.79 percent for the larger campaign.

The PGW-Nielsen study was conducted in markets where Nielsen Station Index reports are available. It is felt that since the results apply (Cont'd on p. 49)

money in specific markets, is an important task that should require personal attention of an assigned executive—perhaps the commercial manager—and it should be one of his most important basic activities.

". . . Many of us in radio need to get this whole area of local contacts into better perspective. Too often we go with hat in hand, asking for something. It can be the other way around! If we believe our medium can do the selling job we claim for it, then we should not be approaching local business men to help us, but to point out how we can be of help to them.

"When we call on a district sales manager to ask for a recommendation, for a local station, we're asking for something and not giving anything. And when we do it several times, we wear out our welcome. So let's give something. Let the radio man get together material which will show what his station has done to help the local man. Prove to him how radio personalities are recognized local celebrities with loyal followings; that these celebrities have become effective personal salesmen on the air for the products they talk about.

"In short, to cultivate effectively local contacts, stations should have a well-thought-out strategy, worked by the same individual on a week-after-week, month-after-month, year-after-year basis. The station should: 
- "Impress local business people — distributors, brokers—with the strength and influence of the station and demonstrate just how it will work with a manufacturer and the distributing organization to make an advertising campaign successful, to make it move merchandise.
- "Aggressively sell the idea that radio is a forceful, effective advertising medium . . . .
- "Develop local contacts so well in advance that when it becomes necessary to ask for recommendations, the contact will be pre-sold, convinced that the request for a recommendation—or a switch—is in his interest and is important to (Cont'd on p. 59)
Advertising and media people who enjoy doing mental push-ups might find the following an interesting warm-up exercise: Name an established $600-million-a-year industry, producing a product sold in thousands of outlets throughout the country, and which, until one year ago, had never made use of radio on a national basis?

The answer to this puzzler is book publishing. And the firm credited with making the break with tradition and putting radio to use to sell its line of juvenile publications in stores, is Grosset & Dunlap, Inc. Last year, the firm bought an eight-week schedule on Don McNell's Breakfast Club on the ABC network. In addition, book dealers purchased local spot announcements to tie in with the radio campaign.

Increased Air Time

"As a result of our first experience with radio," says Nils A. Shapiro, advertising director of Grosset & Dunlap, "we are starting a new schedule this month, and have increased our..."
network air time by 25 percent. Also, last year dealers in 160 markets participated on the local level. We have every reason to expect that this local participation will be even greater this year."

New Promotion Appeal

The recommendation to use radio came from Lee Friend, president of Friend-Reiss Advertising Inc., agency for the publishers. "We were presented by the client with the problem of finding a sales-impelling replacement for the customary promotion efforts used in the book field," Mr. Friend explains. Traditionally, publishers supplied retailers with imprinted mailers to be distributed to the public. In return, the dealers were expected to place orders and provide display space for in-store materials.

"In finding the solution to this problem," he continues, "the Grosset & Dunlap management gave us a set of ground rules which we had to follow. There could be no giveaways; no cut prices; there had to be full children's and juvenile line promotion; continuity; originality; retail interest and participation, and, of course, sales."

The primary target of the mail brochures and other promotional efforts by the firm, according to Mr. Friend, was the mother, with the father as a secondary objective. Since it is generally agreed in the children's book field that women constitute the backbone of the market, any new campaign had to focus on this group.

"The problem, then, was to determine how to reach most effectively this group, and still remain within the confines of the ground rules set down by the client," Mr. Friend points out.

Media Analysis

"Mail was ruled out since this was what was already being used. Newspapers were found to be pretty hackneyed, and followed the usual pattern. Television was discarded," Mr. Friend says, "because it is very costly if purchased at the times when you can most effectively reach mother.

The one medium which stood up against all the requirements on our check list, including the important one of cost, was radio."

Reach New Audience

Working closely with the client, the decision was made to develop a major ad campaign built around participation on the Don McNeill Breakfast Club. Manuel Siwek, executive vice president of Grosset & Dunlap, says "We made the commitment knowing that to sell more books we must reach far beyond the area customarily serviced by the conventional book advertising media. Also, we have long felt that small town as well as big city booksellers need more promotional support from the book publisher."

Channeling the bulk of its promotion budget into network and cooperative local radio participations, Grosset & Dunlap developed a complete program built around the sound medium. Window material, counter material and newspaper ads were all geared to localize the nation-
al impact of the network show, and to take advantage of the strong audience appeal of Don McNeill, Mr. Shapiro states.

"After the campaign was set," Mr. Shapiro continues, "it became the task of our 40-man sales force to sell the 10,000 to 15,000 retail accounts handling the Grosset & Dunlap line on the merits of this brand new approach to book promotion. In addition, our salesmen had to convince and educate these retailers on the use of local radio efforts so that they could get the greatest benefit from the network participation."

In order to achieve this aim, each salesman was furnished with a portable record player on which he played a special recording by Don McNeill explaining the various aspects of the program. Special forms were prepared by Grosset & Dunlap, Mr. Shapiro says, which made it a simple matter for a book dealer, with no previous experience in buying local radio, to contract for a local schedule.

Local Tie-Ins

Included in the material supplied to the book dealer were open-end transcriptions of a sales message delivered by Don McNeil. Mr. Shapiro says that as a result of this campaign, hundreds of booksellers had their first contact with radio advertising. An indication of the effectiveness of the new radio-oriented approach is seen in a letter which a station owner in upstate New York wrote. He said, "I have yet to see a better, more effective follow-through than that done by G. & D. Grosset & Dunlap's tie-in was a pre-sold job, and in our case, the book department of our biggest department store contacted us because they wanted the complete package. The same was true of other G & D dealers in our area."

The 1960 network and local radio effort for Grosset & Dunlap will be launched October 20, Mr. Friend says. In addition to the increase in the amount of air time purchased, a few other changes have been planned. One of the highlights of the campaign will be a college scholarship contest. Mr. Friend states that the sound medium will be given the major job of promoting the contest. This emphasis on radio can be seen in a mailing piece sent to Grosset & Dunlap dealers explaining the aims and mechanics of the contest. Part of the copy reads: "Grosset & Dunlap will make no national consumer mailing of entry blanks. In order to enter the contest, parents must pick up the entry blanks at your store. Don McNeill's network radio show brings the customers into your store. Your own local spot announcements brings them into your store. . . ."

"Each salesman," Mr. Friend explains, "has been supplied with the necessary material to conduct special sales breakfasts for dealers outlining the contest. Included in this material are recordings by Don McNeill; Tom Maher, sales manager of Grosset & Dunlap; Mr. Siwek and myself. Each retailer participating in the promotion will get a large table-top display which tells about the contest and holds a pad of entry blanks. A large picture of Don McNeill is the dominant illustration on the display."

Another basic change to the publisher's radio plans for this year is the method in which the commercials will be delivered. Last year, all the sales messages were given by Don McNeill, both on the network and the local spots with open-end ETs. For this pre-holiday sales effort, the announcements will have lead-ins by Mr. McNeill, but the actual selling message will be delivered by a Grosset & Dunlap salesman, Mr. Friend points out.

Copy Approach

Here is how a typical network announcement will be handled:

McNEILL: Say, Mom, do you know that your child can win a college education absolutely free? That's right. Our friends at Grosset & Dunlap, who publish those wonderful books for boys and girls, are offering scholarships to college as prizes in an exciting contest. And the 50 runners up will receive 30-volume libraries of Grosset & Dunlap books. Here's Mr. —— from Grosset & Dunlap to tell you more about it.

SALESMAN: Thanks, Don. My name is —— and I represent Grosset & Dunlap, publishers of fine books for children for half a century. Because an educated America is a strong America, we are giving fully paid-up scholarship policies to ensure the college education of the boy and the girl who win our contest. It's easy to enter, and you don't have to buy anything. Just see your favorite bookseller for a contest entry blank. And while you're there, be sure to see the display of brand new

G & D book dealers will receive this table-top display giving the details of the 1960 college scholarship contest which is being promoted on radio. The network campaign will be supported by local dealer radio efforts throughout the country.

U. S. RADIO - October 1960
Grosset & Dunlap books for children of all ages—especially the one called—(book title inserted here with price)

The publisher will be featuring nine different book titles during this year's promotion, and the messages will be rotated regularly. Book dealers will be furnished with scripts for one-minute spot announcements. Here again, Mr. Friend says, the copy emphasis will be on the scholarship contest. "Both the client and the agency are convinced that radio will be the most effective medium to put this promotion across."

An informal approach is used in the local scripts, as can be observed in the following excerpt:

ANNCR.: Say, mothers, have you entered your children in the college scholarship contest at (store name)? There's nothing to buy and entry blanks are free. The lucky boy and girl who win this contest will have their college education paid for by Grosset & Dunlap, the famous publishers of children's books. We don't have to tell you mothers that a college education is more important than ever today. That's why (store name) is proud to give the boys and girls of (town) a chance to win the fully paid-up college education policies that Grosset & Dunlap is offering as prizes.

Be sure to pick up a free entry blank at (store name) today. And while you're there, look over (store name's) exciting Grosset & Dunlap Christmas books for children. For instance, (book title inserted here with prices).

Reasons for Optimism

On the eve of its second campaign on radio, Mr. Shapiro expresses confidence that the medium will surpass the job that it did last year. "One of the reasons for this optimism," the G & D advertising director says, "is the fact that we expect to have less dealer resistance both to the idea of network radio and to their own local spot efforts. You must remember, asfar as we can determine we were the first publishing house to use radio on a national basis to sell books in book stores. Although most of the dealers were aware that radio was helping other retailers down the street sell bread, toasters, cars, among others, they had to adjust their thinking to making use of radio to bring customers into their stores."

"The best way to convince any businessman of the value of a new approach to promotion," Mr. Shapiro continues, "is to show him that it brings in added business. Book dealers all over the country know that the Grosset & Dunlap line of juvenile and children's books sold better than ever during and after last year's initial radio promotion. From the number of dealers who have already contacted us in order to participate in this year's radio project, we believe that they agree with Grosset & Dunlap that the medium can and does do a very effective job of selling."
As cold weather snaps down around the ears of car-owners this fall, more than 500 stations in 150 markets are beaming a new word in the anti-freeze vocabulary to listeners.

The new word is "Telar," the name of a new "all-purpose, permanent" anti-freeze developed by E. L.
Du Pont doubles radio budget to find “people wherever they are” in major effort to establish new anti-freeze

Du Pont de Nemours & Co. And du Pont is engaged in one of its most extensive campaigns in years to make the introduction of Telar a success.

With its entry into the anti-freeze market, du Pont’s Telar is bringing over $400,000 in business to spot radio. This figure is just about double the amount du Pont spent in spot radio in 1959, when du Pont allocated spot money to Telar’s sister products, Zerone and Zerex.

To put new Telar in the running with competitive anti-freeze products, du Pont’s advertising manager for anti-freeze, William W. Carty, reports, “Our advertising for Telar is running ‘across the board’ in all areas where it is distributed.”

With the $400,000 radio budget set up exclusively for Telar, du Pont is reaching into 150 radio markets. In each market, the company is buying the maximum number of stations. The range is from three to six stations per market, sometimes more. Mr. Carty considers an esti-
mate of 500 stations in the total campaign a bit "conservative."

In scheduling the campaign, he explains that du Pont found radio's flexibility an extra "plus" for Telar. Depending on the whims of freezing weather's entry in various markets, the Telar schedule had to have staggered starting dates.

Spots, which are all minute ET's, broke as early as September 15 on northern stations. On the other end of the weather vane are stations in the south. Some will start the Telar campaign as late as next month. Others will wait until early December, Mr. Carty explains.

Use Weather Experts

"In order to break the campaign in a market at the right time, we need to know when the area will get its first freeze. Calculations are made in advance by a team of researchers, working with weather service firms," he says.

"We know, for instance, that in Wilmington, Delaware, the first freeze is likely to be around November 11. Accordingly, our radio campaign there is scheduled to begin around that date."

Whether a campaign starts early or late in the fall, he says, it is scheduled to run through December. Thus, the peak of the Telar push on radio will be reached in all the 150 markets by the middle of November.

Heavy Frequency

"Du Pont will take 30 spots a week per station," reports Bob Syers, du Pont timebuyer at BBDO Inc., New York, the company's agency. With all the 500 or more stations carrying the spots during November and December, the total coverage per week runs to 15,000 spots.

"The availability specified early morning, late afternoon and traffic times," Mr. Syers adds. Some stations report that Telar spots are preceded by a brief temperature forecast.

Reach the People

"We want to reach people when they wake up, while they drive to work, while they drive home. With radio we can be close to people wherever they may be," says Mr. Carty.

And when they reach these people, here are some points that du Pont is making clear about Telar:

Telar is a new anti-freeze that you never have to drain . . . the first anti-freeze to have such a property. It prevents freeze-up in winter . . . and is a summer coolant. It also prevents rust-clogging.

If trouble develops in a car's cooling system, Telar may have to come out. In any case, the car-owner can tell if there is trouble by checking
the color—Telar changes from red to yellow if it has to be drained.

Following is one of the radio commercials prepared for Telar by BBDO.

(LEAD IN MUSIC TO JINGLE)

HAROLD: Sylvia, here comes that commercial you always forget.

SYLVIA: Oh turn it up, Harold.

JINGLE (FROM RADIO):
You'll never, never, never, never, never again Drain anti-freeze from your car again,
Never, never, never, never, never again, With Du Pont "Telar" in your car.

(MUSIC UNDER FOR HAROLD)

HAROLD: Now how can you forget that, Sylvia? It's the most important thing that ever happened to anti-freeze.

SYLVIA: Yeah?

HAROLD: "Telar" is the first never-drain anti-freeze. It's a summer coolant, too... prevents rust-clogging. You may add it, but as long as your cooling system's OK— you never drain it. If trouble develops Color Check warns

FLAIR: RADIO WITH A DIFFERENCE— FROM ABC

Bright people and bright talk make a show with a bright future. It's ABC's FLAIR, a new kind of radio variety and home service program. FLAIR'S daily 55 minutes is under the egregious aegis of Dick Van Dyke, our choice as Young Adult Of The Year. Dick's regulars are (despite appearances) all experts in their fields. They make up a long list* of famous types: up-beat, off-beat, down-beat, on-beat. (And all definitely un-beat.) FLAIR is strictly for the Supermarket Set... the millions of young adult women with large families... the gals with the packaged goods habit. FLAIR takes to the air on October 3. Get with it. FLAIR is even fun to buy. Let your ABC Radio Salesman tell you all about it.

FLAIR ON THE ABC RADIO NETWORK

FLAIR ON THE ABC RADIO NETWORK

U.S. RADIO - October 1960
you—changes "Telar" from red to yellow.
SYLVIA: It is important...
HAROLD: I just can't see how you can forget it.
SYLVIA: Oh, sing the tune for me, Harold.
HAROLD: OK.
HAROLD (SINGING): You'll never, never, never, never again,
Drain anti-freeze from your car again,
Never, never, never, never, never again,
With Du Pont something in your car ...
SYLVIA: Du Pont "Telar," Harold. That's important!
ANNCR: Only $5.00 a gallon at servicing dealers.
"Telar" goes in for keeps.
The jingle is written to the tune of an old popular favorite, "I'll
Never Say Never, Again, Again." The same jingle is used in the Telar
TV commercials.
Although Telar is sold in service stations and auto supply stores, du
Pont does not attempt dealer tie-in promotion for Telar, Mr. Carty
points out.

Offer Transcriptions
"However," says the Telar ad manager. "Transcriptions of our ra-
dio commercials are made available to our anti-freeze distributors at no
cost to them. Many of our distributors sponsor local radio shows, and
are able to use our commercials during their regular broadcasts. The
distributor pays for the time. Du
Pont does not have a cooperative ad-
vertising program for any of its
products."
"But," he adds, "we offer tie-in
material to radio stations which
often adds effectiveness to the spots
themselves. Stations are informed
that the services of our anti-freeze
field representatives are always avail-
able to them. Their contributions
may be helpful, for instance, in ar-
ranging programs on the proper
care of a car."

Campaign Target
With its budget enlarged over last
year's for the annual anti-freeze cam-
paign, du Pont is aiming to make a
high brand impression on the con-
sumer. In light of the heavy line-up
of advertising for competitive brands,
the bid for brand impression is a
strong one.
Du Pont's radio campaign, with
high traffic time frequencies, is aimed
where it will hit the target closest to
home—when the consumer is driving
his car. • • •

Du Pont Thoroughly Tests 'Telar' Before Marketing

Before going on the market, Telar was given road tests in
over 300 cars. Technicians make periodic checks of test-
car cooling systems. So far, only one needed draining—
because of bad head gasket. Warning comes when solution
turns from red to yellow.

Radio commercials empha-
size Telar's longevity, call it
the "first never-drain anti-
freeze." Commercials also call
attention to "Color Check."
Programming promotion survey by National Association of Broadcasters shows emphasis stations are placing on news, editorializing and sports and proves...

The accent is on local service for stations displaying new shield.

It's Local Service That Counts

Very often the sun shines brightest following a storm. The reporting and up-to-the-minute information supplied by radio as Hurricane Donna lashed the East Coast last month focused national attention on the kind of job radio performs day in and day out.

But often it takes an event of disaster proportions to recognize something that is taken for granted.

"Radio...demonstrated its sustained usefulness during the anxious hours attendant to Hurricane Donna."

"In particular, many local stations catering to their own immediate areas did a superlative job of keeping listeners informed of the storm's course and reporting on conditions in the set-owner's home area; local radio is a national boon in an emergency."

Serving the community's needs is radio's bread and butter in fair or stormy weather.

**Questionnaire Survey**

Indications of this and other trends in radio programming can be found in replies to a questionnaire survey of member stations by the National Association of Broadcasters.

The survey, conducted by NAB's Public Relations Service, was designed to learn what specific types of programming stations want promoted in special NAB announcement kits. Replies to the questionnaire will be used to guide NAB in its "Build Radio With Radio" campaign, an effort to help member stations promote through on-the-air announcements the many and varied services they offer to the listening audience.

According to NAB, popular choices for subjects for the new spot announcements indicate the community service nature of radio today. Among the main selections were these:

- Broadcast editorials on a wide range of matters of prime importance to local communities.
- Special broadcasts tailored for suburbanites and commuters.
- Daytime variety programs designed specifically for the housewife.
- On-the-spot news broadcasts by...
mobile units and news reports direct from area, capital and world correspondents.

- Sports results and live pick-ups of sports contests.
- Popular music.

As for length, the replies show that spot announcements of 10, 20 and 30 seconds duration are most popular. But many stations also express a preference for 15-second spots and announcements ranging from 30 seconds to one minute in length.

38 Percent Reply

Questionnaires were sent to 1,713 NAB member stations. Replies were received from 663 stations, or a little over 38 percent of those surveyed.

John F. Meagher, NAB vice president for radio, says results of the survey will be invaluable in preparing and packaging future on-the-air spots in the continuing “Build Radio With Radio” campaign.

“Because such a wide variety of radio programming is represented within the NAB membership,” states Mr. Meagher, “no single package of spots in the new series will be useful to all stations. For this reason, we plan to send each package only to those stations requesting it.”

All radio members, he declares, will be sent a memo each month on new spots available, along with an order form to obtain copies free.

John M. Couric, NAB’s manager of public relations, says the association’s Public Relations Service will provide the packages of spots in order of interest reflected in the replies.

Since the on-the-air promotion campaign was undertaken in August 1959, the NAB public relations staff has prepared and distributed among radio members separate spots of varying length—covering general areas, including radio advertising as a service, weather and news reports, weather and radio’s role in tornados, hurricanes and similar disasters.

The promos were dispatched to NAB’s radio members in 13 separate mailings through last August. At that time, the series was halted temporarily and radio members were given an opportunity to order free reprints of any or all of the kits. A total of 106 stations ordered 2,732 additional sets of the individual packages.

Because of their general nature, previous kits were mailed without specific request by NAB members. The more specialized spots to be prepared on the basis of the NAB survey will be furnished only to those members who request them. (All “Build Radio With Radio” material is furnished to NAB members without charge.)

Answers to the questionnaire study reflect the greater emphasis radio broadcasters are placing on local and national news in its many forms.

On-the-air editorials are the choice of 31.3 percent of the stations as the subject for a new promotion package. Spots on news analysis and commentaries, a closely related subject, are favored in 30.3 percent of the replies.

Special announcements on news broadcasts by mobile units on the scene are requested by 60.4 percent of the participating stations. Another 21.5 percent vote for spot announcements featuring direct news reports from area correspondents; 20 percent favor spots on news from national and foreign correspondents, and 19.5 percent want spots for broadcasts by capital correspondents and Washington bureaus.

Still another 26.6 percent cast their votes for promotion of news interviews and panel programs.

Sports Rate High

Sports, naturally, is high on the priority list. Special spots on sports results get the votes of 68.5 percent of the replies to rank behind popular music as the second most popular choice in the survey. Another 51 percent bid for spot announce-

ments on live pick-ups of football and baseball games and other sports contests.

In sheer numbers, popular music is the overwhelming choice for on-the-air promotions, drawing 90.9 percent support.

Classical music gets the nod for promos from 32.1 percent of the radio stations participating, while country music spots are favored by 26.2 percent.

Home Service

The right-around-home approach in broadcasting shows up in many priority selections. Spots promoting daytime variety programs for housewives are requested by 53.1 percent of the replies. Spots featuring programs tailored for suburbanites and commuters are favored by 21.8 percent.

Announcements on regional programming would be useful to 26.8 percent of the responding stations. Spots on network programming are requested by 27.7 percent.

Other types of programming mentioned, some with high votes, are: Farm, 50.7 percent; variety entertainment, 26.2 percent, and “through-the-night” programming, 13.2 percent.

Spots of 30 seconds are preferred by 71.7 percent; 20 seconds by 62.6 percent, and 10 seconds by 60.5 percent.

Spots of 15 seconds are mentioned by 38.7 percent of the replying stations; spots of 40 seconds by 12.7 percent; 15 seconds by 11.5 percent; 50 seconds by 15 percent, and 55 seconds by 12.9 percent.

One-minute spots are being used by 47 percent of the radio stations.

Of the 13 spot packages already distributed, 12 went to all radio members of the NAB. The other, promoting the “fine listening” of fm radio, was sent to fm members only.

The 12, each patterned to a particular phase of broadcasting and distributed initially during the most appropriate season, were:
Radio's service in time of disaster.
Radio's service to youth and schools.
Radio's support of philanthropic causes and community service.
The wonderful variety of music on radio.
The splendid holiday programs available on radio (and "why not give a radio to someone for Christmas?")

How radio advertising helps keep America prosperous.
Radio news and public affairs.
Radio provides fast, reliable weather information.
The American system of broadcasting.
"Radio... the Heart Beat of Main Street."
Portable radio listening during the summer months.
Radio's coverage of major sports.

The Radio Code Board of NAB on November 1 will have a fulltime director, Charles M. Stone, who will administer the code under the supervision of John F. Meagher, vice president for radio.

In authorizing the employment of a full-time director, the code board made known that among the director's duties will be to assist in preparing a monitoring program to insure code compliance among members.

Subscription to the code, which is open to non-member stations, too, is now well past the 600 mark. The new Radio Code has been open to the entire industry since plans were begun to enforce provisions of the document which had been under the honor system.

Annual subscription fee for the code is 10 times a station's highest one-minute rate with a ceiling of $360 a year. Active members of NAB receive a 40 percent discount.

New portable audio amplifier—only 19½ lbs!

Completely transistorized—not a tube in the circuit.

The first time you lift it you'll be thankful for transistors—because it is 100% transistorization that makes this lightweight reliable design possible.

General Electric's new Type BA-26-A has built-in studio quality. Designed for AM-FM-TV and recording use, this portable amplifier provides console quality for remote broadcasts such as sports events, concerts and spot news. Besides the customary microphone inputs, this portable amplifier features a high-level input for tape or transcription.

Here is the first portable audio amplifier containing its own regulated self-contained power supply with a range of 95 to 135 volts a-c. Provision for battery operation is also included. A laminated plastic front panel preserves permanent markings and allows space for other information to be added and erased without damaging the surface.

Carrying handle functions as base to position unit for most convenient operating angle.

For complete specifications on the latest in General Electric's new line of Transistorized Audio equipment, write Technical Products Operation, Communication Products Department, Section 56100, General Electric Company, Lynchburg, Virginia.

GENERAL ELECTRIC
THE QUESTION:
How Does an Agency Buy for an Automobile Account During the New Model Introduction?

Mr. Walsh is chief timebuyer at D. P. Brother & Co., Detroit, agency for Oldsmobile. He feels that the constant changes in broadcasting makes it necessary for "Buyers of radio time to streamline their operational techniques and surround themselves with ample tools to do the job creditably."

JACK WALSH ANSWERS:

We are using radio in a threefold manner for the introduction of the 1961 Oldsmobiles.

(1) The "Lowell Thomas and the News" program, in its second year of Oldsmobile sponsorship on the CBS Radio Network, will provide coverage for most of Oldsmobile's 3,800 dealers. This program is carried by 195 CBS affiliates, Monday through Friday.

(2) In small markets, where dealer performance is good, radio schedules are maintained on a long term basis. These schedules run in 200 to 300 markets throughout the year, and are usually augmented by the dealers at their expense. The schedules are allocated entirely on the basis of periodic analysis of dealer performance.

(3) A flexible medium such as spot radio is purchased in major markets at strategic times of the year, in addition to the regular media mix of magazine, newspaper and network television. The most important buys are the pre-announcement and announcement campaigns in late September and the month of October.

In purchasing radio spots for the 1961 Oldsmobile campaign, we anticipated the following problems:

Problem One—Getting suitable time periods when all of the competitors would be seeking time for their regular models and compacts, plus the expected influx of political advertising and the usual volume of food, medical and cigarette advertising.

Solution—The presentation was made to the client and approval was secured at an early date. With this early approval, representatives were able to give us good availabilities. We were able to put together an excellent announcement schedule as well as an fm schedule in top markets.

Problem Two—What type of stations should we select for copy which alternately features the new economy Oldsmobile "F-85," the medium-priced Oldsmobile "88," and the high-priced Oldsmobile "98?"

Solution—We selected a combination, in each market, of well-established "network-type" stations and properly-programmed "independents." We felt we could rely upon this combination to capture and hold the attention of adult audiences for Oldsmobile's message.

In setting up our schedules for Oldsmobile, we employed various techniques. Some are standard; others were pioneered by D. P. Brother's media department.

The rating services were consulted to make sure the stations considered delivered a respectable-sized audience. Mass audience stations were not necessarily selected. In many cases the stations with the largest area coverage were selected in order to give small-town dealers in outlying areas some additional coverage.

Audience composition reports, whenever available, were studied carefully to further assure adult audiences and eliminate the teenagers' favorites.

In order to concentrate on markets individually, we asked all stations for tapes of their own programming and that of competitive stations over which they claimed superiority. In this way we were able to go beyond the ratings and select stations with a "sound" compatible to quality commercials.

With new stations coming on the air, fm coming into its own, old stations applying for better facilities, ownerships changing hands and all stations varying their programming in the quest for a rating niche in their respective markets, it behooves the buyers of radio time to streamline their operational techniques and surround themselves with ample tools to do the job creditably.
LITTLE LEAGUERS from Levittown, Pa., on their way to meet Gov. David Lawrence after winning world championship. Chaperones are (L.) William F. Waterbury, general manager, and Stan Martyn, WBCB Levittown. WBCB broadcast play-off games which batted in victory, ended in governor’s request to meet international champions.

HARD, COLD CASH totaling $1 million brings together three WKY Oklahoma City announcers, (L. to r.) Danny Williams, Chuck Dunaway and Howard Clark. Winning listener got the cash—deposited in bank for one day—and collected six percent interest—$166.66 and title "Millionaire for a Day." Also in the bargain for 24 hours—a baby-sitter, 1960 Cadillac and luxury hotel suite, courtesy of the station.

BOYSVILLE citizens of San Antonio, Tex., enjoy hot dogs and miniature train rides at party given by KAPE San Antonio. Charles D. Lutz, station manager, starts the boys off on the first train.
CHILDREN AND nurse at Sunair Home and Hospital for Asthmatic Children, Tujunga, Calif., talk with Maurice Hart during interview for KABC Los Angeles. Hospital is KABC special project of month.

MOBILE GOLF cart from KLIF Dallas was brainchild of pro golfer Don January (c.). Telephone patched through station's mobile news unit gave on-the-ball coverage of $25,000 Pro Open last month.

TEEN-AGE GIRLS swarm Kaufman's of Kentucky, Louisville department store that chose WINN Louisville to help in promotion. WINN programs "good music." thinks turnout of teenagers helps prove they like it too. Girls went to store to audition for "Big K D I" title, win prizes for talent by reading spots.

TALLEST FISH STORY nets William Rothenberg tackle box, rod and reel from model Lee Wicker (r.). Sandy Wicker (l.) checks his entry in WRVA Richmond contest, making sure he followed rules.

SILVER DOLLARS fill 3,000 pound bottle of sculptured ice in KNBC Chicago contest for Mint Calso promotion. Over 4,000 people sampled Mint Calso.

WHO GOES FIRST? Congressman John Foley's (Dem.-Md.) opponent Charles Mathis won the toss, appeared first on WWDC Washington program of free time to candidates. Ben Strouse (c.), WWDC pres., tossed coin.
Mutual gives you the advantage of network facilities and still lets you do your own local programming.

That's the successful secret of a Mutual affiliation. You get network facilities—on-the-spot news reported by authoritative newscasters, plus a wide range of music, sports and special events. At the same time you are free to do your own local programming—local personalities, local features and immediate area coverage.

With a combination like this, small wonder that so many stations are happy with the Mutual Radio Network.

Mutual Stations are making money—can you think of a better reason for considering a Mutual Radio Network affiliation?

MUTUAL RADIO NETWORK

A Service to Independent Stations
The Westinghouse Approach To Radio

An examination of one group's views on how to fulfill radio's role as a multi-purpose medium

One of radio's strongest assets as an advertising medium is the literally countless ways in which it can be used. Almost every advertiser is able to "hand tailor" a radio combination to fit his special marketing requirements. A major contributing factor behind the flexibility of the medium is the wide variety of basic approaches to radio taken by the individuals and groups operating radio stations. The radio operations of the Westinghouse Broadcasting Co., for example, illustrate how one group of independent stations is going about discharging its duties as a medium of advertising, entertainment and service.

"All of our thinking and planning," Donald H. McGannon, president of Westinghouse explains, "is influenced and modified by what I describe as radio's face. And this consists of five major points. (1)
Personal. Radio is a personal medium, and the average listener today tunes in to a particular station rather than to a particular program. (2) Companion. Radio is a companion medium that the listener hears the moment he awakens, has with his morning coffee, travels with him to and from work and helps put him to bed at night. (3) Portable. Radio accompanies the listener everywhere he goes, in a car, boat, on a picnic or the back porch. (4) Multiple Attention. People listen to radio while they are washing the dishes, shaving or painting the garage. Radio is not as demanding on the listener's attention as television, but it is not as submissive as background music. (5) Service Medium. Radio today has its greatest opportunity and responsibility to serve its community. Our feeling is that a station must find out what the community wants, and then meet those wants."

These five elements, Mr. McGannon says, act as guidesposts when the general policies that identify a Westinghouse radio operation are being formulated. "For example," he states, "our approach to the music played on our stations, and the deejays who preside over these shows has been shaped by our basic attitude as to radio's function. The records are selected to appeal to a mass audience, but not on a rigid formula basis. We prefer the personality type of deejay who can develop and hold a loyal audience, and we insist that these personalities identify with the community, both on and off the air."

Editorializing

A subject which appears to be very close to Mr. McGannon is editorializing by radio stations. He feels that radio is the ideal medium to bring an editorial viewpoint to millions of people who rarely, if ever, see the editors in their newspapers. In order to produce editorials that are meaningful to the community, each Westinghouse station has on its staff a research-writer with the responsibility of developing and preparing the station's editorials. Mr. McGannon also says that these editorials are delivered by the general manager of the station to leave no doubt that the opinions expressed are those of the management.

Although each station operates autonomously, it is also serviced by the WBC Washington news bureau, under James Snyder, which custom tailors news in a way designed to arouse maximum interest in the community being served. In addition, the station gets reports from the Westinghouse European news bureau, headed by Rod MacLeish, and roving correspondents.

"The public's interest in news and public affairs at the present time," Mr. McGannon, says, "is unprecedented. And we are convinced that radio can best satisfy this interest."

An examination of the European news operation throws some light on how the Westinghouse organization operates. WBC launched its European news bureau 18 months ago.

* It's Great to be Single! 

Yes, we think it's great to be a single-rate radio station, with one rate for all, and no "special" deals. And, remember, please, when you buy WEJL-Radio . . .

- You buy from an accurate coverage map.
- Your live copy will be "sold" by air salesmen. We have no per-toned deejays to unhappily mouth your sales messages.
- You'll be in mighty good company on WEJL-Radio because no per inquiry nor mail order business is accepted.
- You'll get a mighty low cost per thousand and you'll reach the adult, "buying-decision" audience.

Serving Eight Pennsylvania Counties

And WEJL-Radio subscribes and adheres to the NAB Radio Code of Good Practices.

[Radio Station Logo]

500 WATTS . 630 KC
Scranton, Pennsylvania

Represented by THE MEEKER COMPANY

www.americanradiohistory.com
As bureau chief, Mr. MacLeish correlates information, turns it into news analysis and feature material, which he usually voices personally on the broadcasts. Coverage is supplied by a staff of 26 commentators in 18 countries.

A recent WBC development, vertical news, the concept of treating a complex major story in depth, is also pursued in Mr. MacLeish’s radio styling. Reports are sent either by direct line or wire in from five to eight installments throughout a given day. Each about two minutes long, the reports are generally aired by the stations once an hour, during musical programs rather than news periods.

The particular overseas story is told from various viewpoints, with additional facts incorporated as they are uncovered. The whole subject is tied together in a wrap-up phone call, tape or wire, which is then used on “Program PM,” the magazine format scheduled nightly on all WBC stations. There is no commitment to a specific number of “vertical news” projects per week, it is explained; Mr. MacLeish is guided, as are the stations, by the news itself.

**Direct Line Feeds**

Whenever possible, WBC attempts to provide its stations with direct line feeds of major events. During 1960, Westinghouse provided direct coverage of such events as the two political conventions, the Summit Meeting press conferences from Paris and the Olympic Games.

One very important measure of how any commercial enterprise is reaching its goals is its sales story.

Part of this story can be told in terms of the firm’s general attitude towards radio and advertising as expressed by A. W. (Bink) Dannenbaum Jr., WBC’s sales vice president, “We believe in our standard of living and the vital part good advertising plays in it. We believe that electronic media is the most useful and most effective form of advertising, and that radio advertising is the most economical way to reach the most people most often with a sales message. And, we have great pride in being in our industry and our company.”

Mr. Dannenbaum provides some figures to support his enthusiasm and optimism about radio advertising in general, and WBC’s sales story in particular. “At no year save one, 1954, and then only 5.1 percent,” he says, “did our industry lose ground since 1938. Certainly individual stations, including ours, reeled under blows, but the fact remains that more dollars were spent in radio every year save one since 1938.

“And what did Westinghouse Broadcasting do in the period 1955 through 1959? We increased our radio billings by 76.6 percent. And today our sales are at an all-time high, surpassing any period in the history of our radio stations.”

“We had definite goals in mind when we started out in 1956,” Mr. McGannon states. “And we feel that we have proved that we have developed an accepted product. Of course, we are always in the process of refining this product, but we feel confident that WBC is a going concern.”

**Listeners who BUY tune to WGY**

**WGY “Personality Programming” Matches Message To Audience Resulting In Greater Sales For You**

Class or mass—your message gets to the audience you want because of WGY’s personality programming. Joe Roulier, for instance, with his blend of show tunes, standards, informal patter and news briefs, serves a most listenable menu to his daytime audiences. Then with Leon Kelly, you have the dinner-time companion to thousands. His tightly woven web of semi-classical and standard tunes, off-beat stories and poems has captured and keeps the mature, able-to-buy listener tuned to WGY. In between, WGY staff specialists in news, sports, weather, home and farm fare make your message known and acted upon by mass or special audiences in this area. Contact Henry I. Christal Co. or WGY, Schenectady, N.Y. 521-161.

Divided Opinion on Relationship
Of Jingle Producer and Agency

What is the proper relationship that should exist between the advertising agency and the outside organization providing the music for radio commercials? There appears to be some divided opinion among jingle producers as to the answer to this question. Some producers feel that, in order to function most efficiently, they must be brought in at the earliest possible stage of planning a campaign and play a major role in the creation of the original idea. There are others who believe that it is their function to support and more fully develop with music the idea which is presented to them by the agency. A firm which has successfully subscribed to the second approach is Music Makers, Inc.

"In the creation of any successful announcement using music, two elements must always be present," says Herman Edel, executive vice president of the firm. "The idea is the first element. And it is our feeling that this must come from the agency. We base this on the simple fact that the agency knows the product involved and the objectives of the advertiser to an extent which would be impossible for us to be able to match. As a matter of fact," Mr. Edel continues, "although we can and do prepare lyrics as well as the music, we will often encourage the agency to copy people to prepare the lyrics. Here again, our reasoning is that the agency is in by far the best position to deliver the advertising message.

"The second element, of course, is the music. If properly used, music will enhance a good idea. It can never, however, repair or substitute for any basic faults or flaws in that idea."

Mitch Leigh, the young president of Music Makers, and the man directly involved in creating the music, points out that the musical idiom used in a commercial must be honest and accurate. "Today, you can't get by with music that either looks up to or down on the listener. For example, if the jingle is being directed to youngsters and rock and roll is being employed, it must be genuine and up-to-date. The rock and roll being heard now is different than it was two or three years ago. And if your jingle doesn't reflect the change, the youngsters spot it immediately. When this happens not only does the music do nothing to help sell the product, it might even create a negative effect that could be detrimental," Mr. Leigh says.

An Emotional Image

"In the 20 to 60 seconds in which a spot announcement has to get across its message," Mr. Leigh explains, "there is usually only enough time to create an emotional image of the product. If the music is performing its proper function, it will be able to help produce a favorable climate of emotional involvement with the listener."

The musical jingle, through the efforts of organizations like Music Makers, has developed from its early form of a combination of simple and easy to remember music and lyrics to efforts that require the use of 35-piece orchestras. The musical forms used today, Mr. Leigh points out, vary from advanced progressive jazz to country and western rhythms to lush mood music to symphonic. "Because a tune is simple and easy to remember," he says, "it does not guarantee that it will help create a response that will aid it in doing the one thing which a jingle is supposed to do—help sell the product."

New Department

In addition to the growing number of advertisers who are using music in their campaigns, many radio stations are also turning to this lively art to assist in creating and maintaining their individual images. As a result of this increasing activity, Mr. Edel states, his firm has just established a special division to work with radio stations. "Each campaign will be custom-made for the station," he says, "and we will apply the same principle of creating a distinctive sound for each individual product, in this case a radio station."

It is very possible for a musical commercial to contain all the proper ingredients, in the proper amounts, and still not produce as it should, Mr. Edel says, if the final transcription does not have the quality to bring out everything which was played at the recording session. He mentions that commercials are often played between commercial records of the highest quality. If the music on the spot announcement is not on a par with the rest of the music heard on the program, the entire message is in danger of being diluted in its effectiveness.

Indications of how far jingle producers have progressed in recent years are the expanding physical facilities of Music Makers, and the steadily climbing revenue. In 1957, Mr. Edel says, the firm grossed $100,000. Last year, the firm grossed $600,000, with every expectation that this year's figures will continue the upward trend.
1. Daytime Power (Cont’d from p. 27)

says, confirmed the adult edge radio has over tv during the daytime, the latest research shows the difference has widened.

According to the RAB-Pulse research, “radio has further increased its substantial edge over tv by an additional 6.5 percent in the average hour between 6 a.m. and 6 p.m.”

And the proportion of adults in radio’s audience in 1960 has held steady or gained since 1958, while in tv it has decreased, RAB states.

A weighted average for the 27 markets shows that 87 percent of the radio audience was adult in 1958 compared with 88 percent in 1960; in tv, the study says, adults in 1958 represented 60 percent of the audience, compared with 56 percent in 1960.

What do agencies think of the latest RAB analysis?

William C. Dekker, vice president, media director, McCann-Erickson Inc., New York, tells U.S. RADIO:

“Our media planning process will make much use of these data. RAB, in the updating of its 1958 adult daytime radio audience research, has made an important contribution to the media-marketing aspects of radio.

“It is always important to us in the developing of media strategies to keep abreast of trends in media circulation, shifts in listening, viewing or readership patterns. The comparison of radio’s adult audience reach during daytime in 1960 versus 1958 contained in this 27-market RAB study documents once again the growth of daytime radio during the past two years.”

As part of the RAB project, the bureau draws from published market research studies to demonstrate that adults are the purchasing agents of any family.

The marketing facts cited are these:

- 98.2 percent of food and grocery buyers are adults.
- 85 percent of all department store traffic is adult.
- 95 percent of all drug and toiletry purchases are made by adults.

The importance of daytime as "buy-time" is borne out by these facts:

- 76.1 percent of supermarket customers buy before 6 p.m.
- 65.8 percent of all drug store purchases are made before 6 p.m.

- Most department stores are open only one night weekly.

The RAB-Pulse audience comparisons are based on average quarter-hour, Monday through Friday, set in use, including both in-and-out-of-home listening.

The markets are: Boston, Buffalo, New York, Philadelphia, Pittsburgh, Atlanta, Baltimore, Birmingham, Houston, Memphis, New Orleans, Richmond, Washington (D.C.), Chicago, Cincinnati, Cleveland, Columbus (O.), Detroit, Kansas City, Milwaukee, Minneapolis-St. Paul, St. Louis, Los Angeles, Portland (Ore.), San Diego, San Francisco and Seattle.

2. Reach and Frequency (Cont’d from p. 27)

to the top 100 markets, the same yardsticks can be utilized for the entire nation.

For the purposes of the study, stations with the highest average ratings were selected in each market, both for the weekday and weekend schedules.

A variety of spot campaigns were hypothetically placed on a predetermined basis to utilize all day parts, Sunday through Saturday. These schedules were then tabulated in order to determine net unduplicated homes reached and the average number of times heard. Costs were based on published minute rates, less applicable discounts for fixed positions.

PGW feels that the results of this study, as significant as they are, are "minimal expectations" of what spot radio can do. The reasons: There is no out-of-home listening included; there is no rotation of spots, and only average ratings were utilized.

The first round of agency calls on the research study are being made at the media director or media research director levels. The second time around PGW will show the presentation to the account level at the agency and executives on the client side.

In New York, the agencies that have either seen it or will see it shortly are J. Walter Thompson; McCann-Erickson; BBDO; Ogilvy, Benson & Mather; Foote, Cone & Belding; Benton & Bowles; Comp-ton; Dancer, Fitzgerald & Sample; William Esty; Sullivan, Stauffer, Colwell & Bayles; Kenyon & Eckhardt, and Gumbinner.

The calls being made on the media director or media research director include the research study only. However, when PGW shows it to the client, it will be considerably embellished. The representative firm intends to bring the research to the attention of major non-radio national advertisers and at the same time, offer them a specific proposal for radio use.

That proposal will include a suggested radio budget for the year and will specify time periods, frequency and expected reach.

PGW expects to have the entire data for this study completed by next month. At that time, the firm intends to make the findings available to all other representatives, agencies and advertisers interested in spot radio.

For charts on efficiency of weekend radio, see p. 59.
News:
Stations everywhere appear to be giving increased attention to coverage of local elections this year.

Following the move by the networks to broadcast face-to-face political debates between the presidential candidates, WWDC Washington, D.C., offered free time to congressional candidates in neighboring Maryland and Virginia election districts. Each candidate was invited to participate in two 30-minute debates without charge.

WMAQ Chicago is broadcasting weekly a one-hour pre-election program called "Ballot Box 60." A panel of political writers from Chicago newspapers interview candidates in Illinois' gubernatorial, senate and state's attorney races. An election eve rundown will dominate the final program in the series.

A series of editorials on station KVI Seattle has resulted in efforts...
by officials to crack down on the misuse of drugs. The station prepared the editorials after learning that amphetamines and cough syrups containing codeine were sold indiscriminately. In a letter to the station, Seattle's chief of police stated that "cough syrups containing codeine must now require a prescription, and legislation is being prepared to regulate the use of amphetamines."

A monthly subscription service for radio station promotions is now available from Broadcast Promotions, New York. Ten different promotional ideas, with details of their execution, are distributed each month, exclusive to one station, in each market. The firm also offers special consultants to stations for development of promotion campaigns.

► Programming:
A concept known as "integrated element programming" began last month on WERE Cleveland. Richard M. Klaus, general manager, explains that the new format will require air personalities to work from "idea scripts" prepared by a staff of writers. Writers meet in daily conference with each personality and members of the production department to work on scripts.

"The new format will resemble WERE's personality-block-programming in that individual personalities will still be accentuated. However, the complete pre-planning and theme will carry over from program to program, and will result in a new kind of continuity," according to Ed Stevens, vice president for programming and promotion.

One-minute lessons in charm, beauty and femininity are the basis for a new feature, Peaking Through the Looking Glass, on WGLI Babylon, N. Y. Scheduled in high homemaker listening periods, the program will be written and broadcast by Miss Helen Peikin, director of Slendercenter Inc., in Valley Stream, N.Y. Listeners are encouraged to write to the program on any problem they want discussed.

► Public Service:
KABC Los Angeles has launched a series of major public service projects that will each receive a month's attention from the station.

Known as "public service project of the month," the series began last month with programs acquainting the public with the Sunair Home for Asthmatic Children. The station broadcast interviews with doctors, social workers and patients who explained the work of the hospital and the nature of the disease.

Special classes in practical politics were presented by WRCV Philadelphia recently in an effort to encourage public participation in political affairs.

The course covered various political topics, including "Why Get Into Politics," "The Political Party System from Division Committeeman to the National Committee," "How Party Workers Can Be Effective" and "The Importance of Being Well Informed on Political Issues."

Extensive on-air promotion urged citizens to attend the classes and participate in politics with the party of their choice. • • •

Miami Stations Help Downtown Business Boom

Four Miami radio stations recently came to the aid of the city’s Downtown Business Council, cooperating in a 12-hour Sale-a-Thon that featured a shopping mall experiment, opening the streets to pedestrians only.

Management men from WAME, WQAM, and WGBS* formed a committee to work out details for the promotion, headed by Murry Woroner, station manager of WAME.

The advertising budget for the one-day Sale-a-Thon was allocated 100 percent to radio. All three stations carried heavy spot schedules, with a fourth, the Spanish language station WMIE, airing a lighter schedule. The spots started six days before the Sale-a-Thon, reaching a saturation peak the day before and extending through 6 p.m. the day of the sale.

The city agreed to convert four blocks of Miami’s main street into a pedestrian mall from 9 a.m. to 9 p.m. Officials closely watched reaction to the mall plan, considering it a test for a permanent mall.

Over 200,000 people jammed the downtown area for the sale, says Mr. Woroner, who was later awarded a citation by the council for his services.

Sidewalk auction sales were run by top disc jockeys, featuring merchandise on sale inside the stores. Refreshments were set up, selling drinks at half price. One booth reported that it sold 4,900 soft drinks.

Two orchestras filled the main thoroughfare with music in the evening, followed by shoppers’ participation in four dances run simultaneously in each block. The dances featured four kinds of music—rock ‘n’ roll, popular, Latin and square dance.

Each of the 54 merchants participating was enthusiastic about results, it was reported. Sales increases ranging from 20 to 50 percent were noted. One businessman went so far as to compare the day’s business with sales of the Christmas season.

The council moved to action because of a two percent drop in department store sales for the year, said that “the Sale-a-Thon far exceeded all previous promotions.”

BPA Named Consultant For Junior Achievement

Junior Achievement, national youth organization, has appointed the Broadcasters’ Promotion Association its official consultant on radio and television promotion.

Public service announcements for JA have been circulated by the BPA education and professional standards committee to all local Junior Achievement franchises. The spots were prepared by committee members James Mullen of WGBS* New York and Ray Johnson of NBC.

Deejay Broadcasts Atop Flagpole to Raise Funds

Ronnie Cash, WJET Erie, Pa., didn’t feel a bit isolated during his recent stunt atop a 50-foot flagpole in the West Erie Plaza parking lot.

Many listeners to his record show turned out to watch the spectacle of the one-man campaign to raise funds for construction of a swimming pool for Camp Lend-a-Hand, where disabled youngsters get special therapy.

The disc jockey stayed up in the air with his turntable until listeners sent in enough contributions for the pool.

River-Barge Concerts Draw Crowds for Fourth Year

The barge-tour of the 57-member American Wind Symphony, co-sponsored by KDKA* Pittsburgh, took music to 16 river communities this year and played to about 170,000 people.

Along with the musicians went KDKA personalities including Regge Cordic, who narrated, and Josie Carey, who presented a special musical puppet show at one of the concerts.

KDKA has co-sponsored the concert since the American Wind Symphony was founded in 1957. In addition to on-the-air promotion, the station handles all publicity and promotion for the orchestra’s tour, according to Les Rawlins, general manager.

radio registers

GeneraL supply

Sales jumped 100 percent for Hastings Co-op Supply, Hastings, Nebraska, reports store manager Charles Buss, after starting a spot schedule on KMMJ Grand Island. Using KMMJ almost exclusively, he says, the store sold 27 major appliances in 60 days. During same period last year, he reports the sale of only one major appliance. Advertising placed on KMMJ by the company for a one-day paint sale resulted in $500 in paint sold, as well as six major appliances, according to Mr. Buss.

SAVINGS & LOAN

Officials of First Federal Savings and Loan Association, Denver, recently signed a contract with KOA Denver renewing its sponsorship of 22 news broadcasts per week. After seven years and 7,176 news programs sponsored by First Federal on KOA, Malcolm Collier, company president, reports assets have grown from $9 million to $33 million. First Federal spends the majority of its advertising budget on KOA, he says.

Home Service

The Home Service Club of Dallas, which provides home building, repair and maintenance services, ran a campaign to solicit inquiries on the HSC operation. Radio and other media were used, with 10 spots a week on KIXL Dallas. Responses from KIXL spots ran 11 to one over other forms of advertising, according to James L. Townsend, HSC president. He says the KIXL now gets the majority of the HSC advertising budget.

Food broker

Kretchmer Wheat Germ, advertised for several years on WOR New York through B. Meir & Son, New York food broker, has increased its sales 90 percent. Fred Barnet, sales manager of B. Meir, says the company has advertised the product on the Carlton Fredericks Show for several years, and radio has been the prime medium. Now buying three spots per week, Mr. Barnet says the radio advertising has aided materially both in chain store and independent grocer distribution.

U. S. Radio  October 1960

Don't be detoured. If you want to move in Metropolitan New York, you need WPAT... the station that moves millions throughout 31 counties in New York, New Jersey, Pennsylvania and Connecticut. Follow the lead of the world's leading lines. They're in transports over the effectiveness of WPAT... where transportation and travel advertising has climbed to a stratospheric 2090% increase in three short years. There's no doubt about it, commercials get there faster on WPAT. And for advertisers, getting there is all the fun. Here are only a few of the world travelers who've found out how much faster and how much more fun it can be to get there on WPAT: Arosa Steamship Lines, Braniff, BOAC, Capital, The French Line, Irish Airlines, KLM, National, Northeast, Northwest, Sabena, SAS, TWA and United. In the past three years, all of them have advertised on WPAT... the station with the air of success.

WPAT & WPAT-FM
report from RAB

Department Store Campaign Serves a Two-Fold Purpose

A major campaign designed to zero in on the $100 million-plus the nation's department stores spend annually on advertising is being launched this month by Radio Advertising Bureau member stations across the nation.

The campaign, according to RAB, actually has a two-fold purpose:

1. To help convince department stores—which still invest the bulk of their budgets in newspapers—that radio can do an effective selling job for them.

2. To act as a "buildup" to the first release of results from RAB's "$61,000 Challenge"—the year-long study of radio advertising for department stores being conducted by the bureau in cooperation with The Higbee Co. in Cleveland. (Higbee's is part of the nationwide chain of Associated Merchandising Corp., stores and grosses more than $50 million annually.)

This big "buildup" campaign has already started in many markets—and currently is based on an eight-part direct mail campaign designed to put the case for radio in the hands of leading department store executives. Utilizing RAB presentations, research and case histories, the campaign documents dramatically how radio can work both to increase sales and attract more customers for department stores.

Among the data will be comparative results of radio vs. newspaper advertising on literally hundreds of different department store items—ranging from ready-to-wear to toys and appliances.

(The detailed study is the culmination of a challenge Mr. Sweener made to the department store industry in 1958. He offered partial financial backing from RAB to conduct, in cooperation with a major department store, a comprehensive, 12-month study of radio's effectiveness for item-selling. A proviso of the offer was that RAB would play a major role in the campaign in such areas as selection of the items to be advertised, the copy approaches to be used and the selection of stations and broadcast times.)

Among the ammunition included in the direct mail "buildup" campaign is a 21-page presentation titled "Which Way Will Your Store Rule the Retail Revolution—Up or Down?" The presentation outlines eight major reasons why department stores should diversify their advertising media approach.

Also included: Case histories of outstanding radio results for some 11 department stores throughout the nation. Among them: Cain-Sloane, Allied Stores outlet in Nashville, Tenn., grossing some $30 million annually.

Another brochure in the eight-part campaign is titled "They All Listen to Radio." It outlines for store executives the radio listening patterns of eight important consumer groups—such as housewives, middle-income men, and single working women. All of the groups studied are of vital importance to department stores and the RAB brochure pinpoints the extent of their radio listening.

NATIONAL SALES TREND OF THE MONTH

Over the past nine months, major auto makers have been targeted in a special series of presentations from RAB tailored to the individual marketing and advertising problems each faces. The basic thinking behind each presentation: Radio should be used consistently—52 weeks a year—rather than on a flight basis.

Now, one of the major makers appears as the first breakthrough, will buy radio in its most important markets for 52 consecutive weeks starting with the introduction of the '61 line. A number of other auto manufacturers have also expressed considerable interest in this approach.
Station Questionnaire Gets Results in Gathering Data

With every medium exerting a maximum effort to get its maximum share of the advertising dollar, the need for greater and more detailed data about media has increased. This is certainly true of radio stations. In order to fulfill this need, many representative organizations have been acting as central clearing houses for information about the stations they represent. An example of this activity is the detailed questionnaire which Radio TV Representatives, Inc., New York, has requested its stations to fill out.

"The questions we included were those that are most frequently asked of our salesmen by time buyers and other agency people," explains Peggy Stone, president of the firm. "We have found that in addition to market research and surveys, time buyers are also looking for such basic information as the exact sign-on and sign-off times of various stations.

"The information gathered from the questionnaire serves a dual purpose," she explains. "In addition to making readily available to agencies the information they need for scheduling campaigns, we are also able to inform the stations of new ideas used by broadcasters in other markets."

Questionnaires are sent to the stations at frequent intervals to keep the data as fresh and up-to-date as possible. Questions cover programming, station operation and market statistics.

'Shift Time' Radio

With station schedules already loaded down with sponsors during "driving" times, and more advertisers clamoring for announcements in the same periods, Edward C. Petry & Co. has come up with a presentation that asks—and answers—"What about the other 18 hours of the day?"

While not disclaiming the importance of "drive" time higher sets in use, Petry's "Shift Time Radio" study points out that millions of Americans, notably blue-collar men, are going on and from work during all hours of the day.

The company made a study of the working shifts in 24 cities. The presentation cites Nielsen figures that show automobile listening represents a higher share of the total audience at night and in some midday periods than during the so-called "drive" times.

The company made a study of the various work-day shifts in 24 cities. Following are some results of the research.

"Detroit—World leader in the manufacture of automobiles and parts. Detroit also holds leadership in the making of scores of other products. Well over one million persons are engaged in non-agriculture employment.

"Actually, less than two-thirds of the industrial workers travel to or from work during the traditional 'drive' hours. Some 27.7 percent begin work from 3:30 p.m., another 10.8 percent start from 11 p.m. to midnight. At the same time, the 27.7 percent are coming off the job.

"Houston—The biggest 'shift' of the day among industrial workers occurs between the single hour from 2:30 to 3:30 p.m. At this time, 30 percent are coming on the job, 60 percent are going off. Another big 'shift' takes place from 10:30 p.m. to 11:30 p.m., when 10 percent start work and 30 percent end.

"Little Rock—Some 25 percent of all industrial workers are 'shifting' at midnight, 15 percent coming off the job, while 70 percent are going on. The remaining 75 percent of workers on the daytime 'shift' start leaving for home at 3:30 p.m."

Figures were compiled by Petry's marketing department from information supplied by radio stations. In most cases, the local chamber of commerce is original source...
New AAAA Report on Spot Radio Outlines Path to Growth, Harmony

Taking a long look at the relations between radio stations and advertising agencies, the American Association of Advertising Agencies has come up with some suggestions it thinks may improve national spot buying procedures.

Radio, sometimes criticized by agencies for its lack of standardization with respect to media buying, is given some pointers in the AAAA's new booklet, "Suggestions for the Advancement of National Spot Radio." The booklet states its objective to "increase the volume of radio advertising by making it more productive and easier to handle."

"Advertising agencies work in operating patterns partly created by agencies, partly by media," the booklet says. "Any gain in operating efficiency helps to foster the conditions under which national advertising grows. The better broadcasters and agencies can understand each other's operating needs, the more smoothly and efficiently they can work together."

Covering such areas of station-to-agency information as market data, coverage, audience data, research and rate cards, the booklet suggests improvements stations can make individually and collectively.

The AAAA urges that:

- The industry develop standardized coverage measurements needed for the most effective station selection under today's marketing conditions.
- Market information on the station's service area should be made available in standardized format. The data should be supplied to any reputable enterprise that compiles market data for the guidance of agencies and advertisers.
- The industry should work toward and adopt industry-approved audience reporting services covering all stations in the market on a comparable basis.

- Any coverage or audience research should rely on impartial, objective methods. Results should be accredited in a way that makes them acceptable to agencies and advertisers.

Referring to the standard form of rate card issued by the AAAA in May, the booklet asks radio stations to adopt the form, citing these reasons: 1) similar standard forms are used by other media, and agencies are familiar with the arrangement scheme; 2) standard size cards are easily handled and filed; 3) use of the standard form assures that all information needed by a timebuyer will be provided; 4) the rate card is the buyer's authoritative source for rate and other information.

Calling for a central reporting service for station commercial schedules, the AAAA explains that it could be developed as either a private enterprise or an industry-wide project.

A service of this kind would, it is pointed out, facilitate requests of individual agencies of each station for a record of commercial schedules. The schedules report product classification and advertiser, and serve as guides to the degree competitive products are promoted.

Because agencies feel that the effectiveness of commercials is limited by multiple spotting, the AAAA booklet urges stations to limit announcements, regardless of length, to a certain number within each program. It further asks that stations state their policy on multiple spotting in rate cards and listings.

The booklet also explores improvement of station and agency billing procedures, and explains in detail the value of offering a cash discount to advertisers.

The booklet was prepared by the committee on broadcast media, and is being distributed to broadcasters and station representatives.
Mohawk Business Machines Corp.
944 Halsey Street
Brooklyn 33, New York

Gentlemen:

Being a "Doubting Thomas" is so much a part of me that when I come across something that not only lives up to, but exceeds, my expectations and advertising claims, well, I find it difficult to contain myself.

I always thought my Mohawk Model 100 was a great value, and I still do; after all, it did me yeoman service. However, my new Mohawk "Professional 500" is without peer -- it's just the greatest!

I simply cannot get over the superior playback quality. Altho, in our studios we have magnificent recording equipment worth many thousands of dollars, I feel that, in comparison as to quality and dollar-value, my new Mohawk "Professional 500" leaves little, if anything, to be desired.

All my "on-the-spot" work will be done with my Mohawk "Professional 500".

Sincerely,

LONG JOHN NEBEL

November 25th, 1958

Fm Appeals to Switzerland Cheese Association to Build Image, Sales

For complete details see the October issue of U. S. Radio

As national advertisers take a longer and more serious look at fm, many are finding the medium just the vehicle they have been seeking for their products.

One such advertiser is the Switzerland Cheese Association, which has been using fm since last April. At that time, the association bought a trial run on one station for four weeks. The schedule later expanded to 13 weeks. At present, the contract calls for a year's sponsorship of two shows. And the association's advertising agency, Williams & London, Newark, N., is contemplating contracts for fm time in five additional markets some time in January.

How did the association happen to choose fm? It all started when John Keeshan, a salesman for WR FM New York, talked on the idea of using the medium to Heinz Hofer, manager of the Switzerland Cheese Association in New York.

"We weren't really interested in fm," Mr. Hofer frankly recalls, "but we were interested in reaching people whom we felt had an appreciation for the kind of story we wanted to tell. We don't like hard sell. We want to talk to people about Switzerland, its history and geography and its many fine industries, especially the cheese business.

"Following the initial trial, we considered the program to be successful. People were interested in what we had to say; they liked it and were talking about it."

An hour-long program called the Hi-Fi Showcase was the first program by the Swiss group. Heard on Sundays from 1 to p.m., it featured semi-classical music, film scores and show tunes.

Four one-minute commercials and two 30-second messages were broadcast during the program.

After considering the initial results, an attempt was made to incorporate Swiss flavor in the content of the program. This was done to associate the content more directly with the commercials, which dealt with many aspects of Switzerland.

It was decided to use Swiss classical music as well as other classical music performed by Swiss artists. The association then decided to sponsor two programs, and contracted for them to run a year, beginning in August. The Sunday program remains the same, with the exception that it plays Swiss classical music exclusively. But the second program is a Monday-through-Friday show that runs 15 minutes. Light music is played, using Swiss and other classical music performed by Swiss orchestras.

The association's plans for expanding their fm advertising calls for taping these two programs and airing them on fm stations in Washington, Baltimore, Philadelphia, San Francisco, and Los Angeles.

Mr. Hofer estimates that about $25,000 will be budgeted for fm to cover this initial trial.

The fm commercials are designed as basically institutional messages. The association brought in Robert Allen of Allen Associates, Inc., New York, public relations and advertising, to do the commercials.

"The association was looking for a soft-sell approach, one that would avoid repetition," Mr. Allen explains. Although the main thought of each commercial is tied to the quality of Swiss cheese, other national products such as watches or Swissair service are sometimes mentioned briefly.

"For a product of this type, which retails for twice the price of domestic cheese, fm is ideal," Mr. Allen believes. "We are sure fm will become a regular part of the Switzerland Cheese Association's advertising program."
2. Reach and Frequency (Cont’d from p. 49)

WEEKEND VERSUS DRIVING TIMES

The following results are extracted from the PGW-Nielsen study. The weekly cost in all cases is based on the 13-week rate for minutes. The numbers in parenthesis are the reach and frequency for four weeks. Driving times are 6 to 9 a.m. and 3 to 6 p.m., Mon.-Fri. Weekend is defined as 9 a.m. to 6 p.m., Sat. and Sun.

3. Local Broker (Cont’d from p. 27)

keep the sales of the product in which he is interested moving off the shelves.

“Here are some of the tactics which I think some stations’ commercial managers should pursue:

1. “Prepare a complete list of national advertisers with products distributed in the market.
2. “List the names of the nearest local contact. It might be a broker, district sales manager, manager of a branch plant, manufacturer’s salesman who travels the area. If not located in the home city, he may be located nearby. List his address. If there is no one in the above categories available, list the wholesaler.
3. “Each individual on the list should be seen, preferably in his office, at least four times a year—some more frequently. Naturally, you will see many of these individuals at social and business gatherings, but to call on them in their offices in addition indicates that you are there on business and that type of contact is a great deal more important.
4. “Each month everyone on the list should receive something from your station. The material will attempt to impress the man with the power and the influence of the station and its ability to get action. A wide range of items can be used. Local sales stories, details of news scoops, devotion of the station working in a public emergency, on-air contributions to the success of the Red Feather Drive, etc.
5. “Personal calls will often be more or less neighborly and casual. But the discussion should center around radio in general and your station in particular. On most calls, there should be no direct effort to ask for recommendations; you will be telling him what the station has done—for him and for others. But on each call, you’ll have something definite to say and preferably material to leave. The material left might be a report on merchandising or of something that has been done for the man you’re visiting. On other calls, you might talk about something the station has done for competitive products or totally unrelated products. But you’ll be talking radio—your radio station, about the station’s interest in selling goods and all the effort expended in making radio campaigns really successful.

“Now it is my contention that with this type of planned and continuous effort a radio station will (1) develop more national radio business for its market and (2) be able to acquire a larger piece of the national spot radio budget coming into its market.”
report from
networks

ABC:

Over 80 percent clearance by ABC affiliates was reported by the network for its new segmented-feature program Flair, which went on the air October 3. Among some of the personalities for the program, announced when the show went on, are: Jonathan Winters, Orson Bean, Johnny Desmond, Theodore Bikle, Martha Rountree, Peggy Cass, Phyllis Kirk, Audrey Meadows, Arthur Treacher, Arlene Francis and Hermione Gingold. Oliver J. Dragon (ol Kukla, Fran & Ollie fame) was signed to give household hints to listeners.

Some affiliates, says ABC, are producing their own local Flair to complement the network feature.

New business at ABC lists: The Mennen Co. sponsoring Howard Cosell's Speaking of Sports, for 65 weeks; Curtis Circulation Co., Vitamin Corporation of America and Lyon Van and Storage buying news; General Foods Corp. signing for Don McNeill's Breakfast Club.

New ABC affiliates are: KRAM Las Vegas, KFMJ Tulsa; KWBA Houseum, WWHG Hornell.

CBS:

Station management representatives approved the network's proposals for modifying Program Consolidation Plan at the annual affiliates' meeting late last month.

Arthur Hull Hayes, president of CBS Radio, outlined the changes in PCP before the Seventh Annual Convention of the CBS Radio Affiliates Association.

A question and answer session between station representatives and network officials marked the second day of the two-day affair. Dr. Frank Stanton, CBS president, addressed the group during the luncheon fol-

lowing the discussion period. Following Dr. Stanton's talk, Gold Mike Awards were presented to affiliates who have completed 30 years of continuous association with the network.

Church of the Atr, CBS religious radio program, this fall marks its 50th year of continuous broadcasts on the network.

MBS:

Mutual has eliminated its last remaining option time clause in its contracts with affiliated stations, MBS President Robert F. Hurleigh announced recently.

The clause called for six-and-one-half hours of option time on Sundays, which, Mr. Hurleigh pointed out, simplified the scheduling of national religious programs. It was the last remaining vestige of option time on Mutual since the network converted to a time-for-time-for-services basis of operations in 1957.
"JUSTICE SHINES

BY HER OWN LIGHT"—Cicero.
But amplification of her aims helps, too. That’s why Philadelphia’s WRCV presented the series, “Law in Action.” “For contributing to the public understanding of justice...” WRCV received the American Bar Association’s 1960 Gavel Award, thus becoming one of two radio stations in the United States ever to have been so honored. "Law in Action" is only one of WRCV’s distinguished community affairs programs. It is representative of the quality programming for adult audiences which continues to be the prime objective of this station.

report from Canada

CBC Moves North with Radio; May Soon Reach All in Canada

Two recent moves by the Canadian Broadcasting Corporation have expanded radio service in the Canadian North. The actions bring closer to fulfillment the efforts of broadcasters to reach all of Canada's 17 million people.

In the first of these moves, the CBC announced an expansion of its shortwave radio service to residents of the Northern Territories.

The second development is that CHAK Inuvik, whose studios were recently completed and whose transmitter is now being installed by the CBC, is expected to be on the air by next month. The 1,000 watt station, located at the mouth of the Mackenzie River, is the first to be operated by the CBC inside the Arctic Circle.

Roughly 35,000 people live in the areas served by the corporation's northern stations, according to CBC President Alphonse Oumies. Another 35,000 live in scattered settlements throughout the north, and are still beyond the range of Canadian radio. Shortwave is the only means by which the CBC can reach these listeners.

Through expansion of the shortwave service, residents of northern Canada can now receive seven hours of broadcasts daily. The broadcasts are beamed northward through CBC's international service at Sackville, N. B.

Although much of the programming relayed is taped from CBC shows, daily sports, news and weather reports are specially prepared for the shortwave broadcasts.

The programs originate from CBC's trans-Canada Network, and tapes are played at staggered intervals to accommodate Canada's six time zones. In this way, radio programs reach listeners across the entire north for most of the evening hours.

A second new shortwave service reaches listeners in northern Quebec, Labrador and Baffin Island. The broadcast is a 45-minute bilingual transmission of news, commentary and sports. These listeners can also receive the other six hours of broadcasts.

Arctic Station

The CBC's northern service was established in 1958 to provide coverage for the last major region of Canada without radio service.

CHAK will be the eighth standard band radio station in this service when it goes on the air next month.

According to the CBC, CHAK sets a number of "firsts" in Canadian broadcasting. Among them:

It is the northernmost broadcasting station in North America.

It marks the first time that the CBC has operated inside the Arctic Circle.

It is the first Canadian radio station to broadcast regularly in the Eskimo language.

The new station will have a staff consisting of manager, technician, secretary and four announcers. Although the manager and technician will be veteran employees of CBC, the remaining staff will be recruited locally. At least one announcer will be an Eskimo.

CHAK will be on the air 170 hours a week.

Pulse Survey Studies Country-Western Music Families

Fans of country-western music, in relation to their listening and buying habits as a part of the radio audience, are the subjects of a recent survey by The Pulse Inc. for the Charles Bernard Co., radio-television representatives.

The report shows that 18.2 percent of the families interviewed listened to country-western music in preference to other music.

In an effort to study these listeners, Pulse interviewed 11,000 families in the following markets: Atlanta, Augusta (Ga.), Baltimore, Charlotte (N.C.), Denver, Dallas, Fort Worth, Houston, Kansas City (Mo.), Los Angeles, Memphis, Miami, Nashville, Orlando (Fla.), Phoenix, San Bernardino (Calif.), Salt Lake City, Tucson and Utica-Rome-Rensselaer, N.Y.

From the total homes interviewed, the Pulse report reflects the tastes and preferences of 2,000 families that qualified as country-western music homes.

To determine a country-western music listening home, the interviewer used a questionnaire listing 12 types of music—from show tunes to hymns. The listener was asked to select the types he listened to most.

The same technique was followed in asking the listener his preference of singers, showing a list of 14.

In the list of music programs, the report indicates that five were significant in defining a country-western household. They are country music, gospel music, western music, folk music and hymns.

In the list of singers, seven were considered significant: Jim Reeves, Red Foley, Eddie Arnold, Tennessee Ernie Ford, Gene Autry, Jimmie Rodgers and Roy Rogers.

The report shows that 2,000, or 18.2 percent of families interviewed, indicated a preference for at least three of the above program types and three of the singers. Of this group, only 33.8 percent indicated a preference for three each of the non-country-western programs and singers. The report throws the conclusion that the country-western home possesses a uniqueness in this respect and does not listen readily and frequently to other types of music.

The report shows a number of markets where the penetration figures for country-western homes are rather high. Among them: Augusta (Ga.), 30.7 percent; Charlotte (N.C.), 21.3 percent; Denver (Colo.), 22 percent; Memphis, 20 percent; and Nashville, 55.8 percent.

When asked their total family income per year, 31.2 percent of the families reported figures between $5,000 and $7,499.

Favored Brands

In a brand preference study, Pulse discovered that 65.4 percent of the families reported that members of their families smoked tobaccos. The number smoking non-filter cigarettes is tabulated at 932—filter, 1,015. Among non-filter smokers, 23.3 percent reported a preference for Pall Mall, followed by Camel, 22.6 percent, Lucky Strike, 12.3 percent, and Chesterfield, 9.4 percent. Most popular of the filter cigarettes, the report says, is Winston with a 41 percent lead. The second brand is Salem, chosen by 13.6 percent, and third is L&M, 8.8 percent.

Although the report gives a figure of 27 percent for families that serve beer or ale in their homes, it is pointed out that a large proportion of the group drank these beverages outside the home.

When asked what brand of beer or ale was served last, 15.4 percent replied Schlitz, 9.6 percent Budweiser and 9.5 percent Coors.

Homes serving regular coffee number 71 percent, with the brand leader Maxwell House, 30.2 percent, followed by Folger's, 16.0 percent.

Maxwell House is first choice for instant coffee drinkers, also. Of the 55 percent reporting use of instant, 45.5 percent preferred Maxwell House, 9.9 picked Folger's and 8.7 percent used Instant Sanka.

A SILVER SPOON IS NOT ENOUGH

She may be born with "advantages" and raised with love—but there still can be plenty lacking. That is if the school she goes to isn't good enough. Crowded classrooms, unqualified teachers, outdated equipment, inadequate curriculum—any one of these can shortchange your child a education and her future. Look into the quality of the schools she'll attend—work through your local committees or your School Board for their improvement. Doesn't she deserve the best?

FREE BOOKLET! Measure the quality of education offered in your child's school. Find out how it compares with the best in the country...how you can make it better. For your copy—and fee guidance on many school problems—write: Better Schools, 9 East 40th Street, New York 16, New York.

EDITORIAL

... radio measures up

AGGRESSIVE SALESMAINSHP

From all indications at this time, the start of the new advertising season is shaping up as one of the most aggressive selling periods in many years. (See Radio Measures Up, p. 25.)

Sparkplugging these efforts are new research studies and concentrated selling drives.

There are at least two recent research studies on radio that deserve special comment.

The first is the comparison of the adult daytime audience of radio and tv conducted for Radio Advertising Bureau by The Pulse Inc. It confirms a trend that was evident in winter 1938, the last time Pulse conducted a similar study.

ADULT CONCLUSION

The 27-market study shows, according to RAB, that radio has further increased its substantial edge over tv in adults reached by an additional 6.5 percent in the average hour between 6 a.m. and 6 p.m.

The RAB-Pulse study asserts that in such hours as 4 to 5 p.m., radio has an adult dominance of 7,691,100 to 4,575,180 for tv in those major national markets where tv competition is keenest.

A second study released last month is one conducted by A. C. Nielsen Co. for Peters, Griffin, Woodward Inc. It shows in unmistakable numerical language the react and efficiency of national spot radio.

The study covered the top 100 markets with sample schedules to determine unduplicated reach. Conservative ground rules were established to reveal the minimal expectations of a radio schedule. The vast out-of-home radio audience was not counted, there was no rotation of spots and only average ratings were used.

According to the PGW-Nielsen project, an expenditure of $15,350 weekly in five markets, for example, will reach 38.4 percent of the homes in one week, with messages heard 2.4 times in each home. If this schedule were run for four weeks, it would reach 50 to 57 percent of unduplicated homes, with the messages heard 6.4 times each home.

Agencies have asked radio for research to help them in their planning and buying decisions. Radio is responding with important, necessary and costly research studies. What Pulse and Nielsen have demonstrated above is the penetration, efficiency and, in some cases, the superiority of radio. We expect that agencies will not take these studies lightly, but will use them to compare the effectiveness of radio with that of other media for upcoming campaigns.

START OF THE FOURTH YEAR

With this issue, u. s. radio begins its fourth year of publishing. The past three years have been filled with growth for the radio industry as well as for the magazine. When u. s. radio started in October 1957, there were 3,113 am and 532 fm stations on the air. Today, there are 3,502 am and 759 fm stations operating. And most of these are doing well financially, according to official figures.

As u. s. radio celebrates its third anniversary, it looks ahead confidently to even greater growth and influence for the radio broadcast industry.
With the farm issue up for grabs in the coming election, and with both the Democrats and the Republicans going all out for the all-important farm vote, millions of listeners all over Hometown and Rural America will be tuned in with new intensity to Keystone stations.

Never before has this vast radio audience been such a prime market for Keystone advertisers ... and never before has this audience had such a powerful purchasing potential.

And here's your tip: No matter who wins the election—you can win in Keystone markets. Call Keystone right now and jump on the band-wagon! This is THE TIME to sell YOUR campaign to all or part of Hometown and Rural America. They'll be listening!
