The Thematic Guide to Popular Music

By Jeff Green

FOREWORD BY ROBERT K. OERMANN

# Join the thousands who've discovered *The Green Book* . . . the unique, indispensable subject guide to popular music!

**"Revolutionary! One of the most fascinating reference books ever published. Stunning research and plain old fun!"** —Robert K. Oermann

researched over 21,000 popular songs of the 20th Century, as performed by over 7000 artists, and categorized them by their essential themes.

*The Green Book* covers all genres of music, including popular standards, contemporary hits, oldies, rock, country, R&B, jazz, alternative music, Broadway, folk, blues, Cajun, reggae, rap, television themes, marching compositions, instrumentals, children's songs and novelty songs — you name it, it's in here!

If you've ever needed to find a song about a particular subject, *The Green Book Of Songs By Subject* is the reference book you've been looking for. Author Jeff Green has painstakingly

Jeff Green serves as Senior Director of Strategic Marketing for the Country Music Association in Nashville. He has 16 years' experience in a variety of entertainment industry fields, including editorial management posts at trade publications *Radio & Records* in Los Angeles and *Music & Media* in Amsterdam. Green's background also includes work in radio, records and television marketing.

**Perfect for:** Radio, TV, ad agency, motion picture and other entertainment industry professionals, educators, record collectors, sociologists, researchers and anyone who loves music!

**Over 21,000 songs:** from over 7000 artists, covering all styles and eras of 20th Century American popular music.

**Over 800 categories and cross-references:** Easy-to-use layout and complete index makes it simple to find songs to fit any theme.

**Comprehensive discographies:** Each song listing includes artists, album titles and record labels to help locate specific recordings.

### Praise for *The Green Book Of Songs By Subject* . . .

"Inestimable value in tracking down music information!"

— Adam White, *Billboard*

"Recommended . . . the only drawback is that it is hard to put down."

— ALA *Booklist/Reference Books Bulletin*

"Indispensable! *The Green Book* has contributed to several major motion pictures." — Margaret Ross & Marilyn Schanzer, **Universal City Studios**

"Among my most valuable reference books."

— Ron Rodrigues, *Radio & Records*

"A must for any serious radio programmer!"

— Machgiel Bakker, *Music & Media, Amsterdam*

## FOREWORD

by Robert K. Oermann

Welcome to one of the most fascinating reference books ever published.

Well, that is if you're (1) a music lover, (2) a trivia buff, (3) a record collector or (4) an inveterate list maker. I am all of those things; and my spirit rejoices when I find a kindred spirit like Jeff Green.

In many ways, guys like Jeff are the backbone of popular culture research. Before any of us collect music, analyze it, write about it and make sense of it, we have to have lists. Lists map out the territory we explore. They guide us to the source material. They direct our steps.

Sometimes they take the form of discographies—who recorded what and when. Sometimes they are compendiums of radio favorites or sales champions—the charts. Sometimes they chronicle important award winners. They've been organized by artist, by era, by music style, by city/country, by value (price guides), by critics' ranking, by record company, by songwriter or even by music videos.

This list is different.

You hold in your hands the first major effort to organize the popular music of this century by topics. I cannot overstate how important and revolutionary I think *The Green Book* is. Just as the Joel Whitburn *Billboard* chart compilations, the Grammy-winners books, our various pop encyclopedias and the RIAA Gold and Platinum tallies have become part of every good working popular-music library, so *The Green Book* will take its place as an indispensable tome.

Sociologists will pore over these pages, for every song is a little window into everyday citizens' views—whether it's war, gambling, poverty, divorce, work, or crime.

Newsrooms will never be the same. Now, every carnival story has a soundtrack. So do TV and radio broadcasts about doctors, basketball, cars, nuclear energy, presidents, snow, cigarettes, dogs, guns, airplanes, food, the environment, sex, and UFO's.

---

Movie makers will love it. Documentary producers will mine this volume for years to come. And can you imagine what marching-band directors are going to be doing with football halftime shows once they get a load of song topics like winning, gold, fighting, party, freedom, and magic?

But best of all will be the reactions from the record collectors, the trivia nuts, the music lovers, and the list makers. All of you are in for a treat.

This is Jeff's fourth edition of *The Green Book*, and his best effort yet to corral an enormous amount of information. Perusing these pages will set your mind dancing and your memory working overtime. At one turn, you'll recall a half-forgotten oldie. At another, you'll squeal, "Ooh, he forgot my favorite moon song!"

I cherished the third edition. I am awestruck by the scope of the fourth. And this work-in-progress will increase in importance, size, and usefulness as we move from edition to edition.

But in the meantime, celebrate with me. I don't know what makes people collectors and list makers. I only know that they're marvelous obsessives and devoted chroniclers. They compile without paychecks, royalties, or advances, for their work springs from love and passion and belief.

Along with television, popular music is the most powerful artform of the late 20th century. Yet its study has developed largely outside of universities. It is knit together by amateur archivists, media workers and a loose federation of record collectors. The list makers are the bricklayers of this whole field of scholarship. I think what they do is so significant. I think they're the salt of the earth.

And I surely delight in anyone who thinks lists of songs about fire, weddings, jukeboxes, women's names, schools, summertime and roads are as nutty, fascinating, and and delightful as I do.

For stunning research and plain old fun, here's a tip of the hat from one list maker to another: Congratulations, Jeff; you've done it again.

A whole list of people are going to reap the benefits of your unique vision and herculean work. But what's more important is that work, itself. You're making a contribution. You're making a difference.

I'm awfully proud to know you.

— Robert K. Oermann  
Nashville, 1994

# INTRODUCTION

## What Is The Green Book?

*The Green Book Of Songs By Subject, 4th Edition* represents 16 years of music research undertaken to identify and classify over 21,000 popular songs by over 800 subjects and subcategories. With the invaluable support of leading music industry authorities, these works were culled from the recordings themselves, sheet music, trade charts, individual collections, reference books and music specialists.

*The Green Book* covers all genres and generations of music over the entire 20th Century, including popular standards, contemporary hits, oldies, rock, country, R&B, jazz of all styles and eras, alternative music, Broadway, folk, blues, Cajun, reggae, television themes, marching compositions, instrumentals, children's songs, novelty records—you name it, it's in here!

## How To Use The Green Book

Much time and effort has been put into making the 4th Edition of *The Green Book* easy to use. With over 73,000 total individual listings, the book is divided into three sections:

**The main body** of the book is organized alphabetically by subject category. At the top of each page you'll find guide words to make browsing easier. At the beginning of each subject grouping is a boldface listing of the main category in CAPITAL letters, followed by subcategories, if any, in upper/lower case. All songs relating to the subcategories are grouped together with the songs relating to the main category. Notice that sometimes the subcategory is the opposite to the main category listing. This is because songwriters commonly deal with both a theme and its opposite simultaneously.

Below the category/subcategory listing you may find a *See Also:* cross—reference to other related main categories; turn to those categories for additional related songs.

Each discography consists of a boldface **Song Title**, one or more artists, each accompanied by one or more album (or single, EP, etc.) listing and a record label code.

---

**The second section is the record label codes listing**, which can be easily located by the grey bar printed in the margin. It contains each record label code used in *The Green Book*, followed by the label name.

**The third section is the Subject Index**, a tool for browsing the subject categories and subcategories. It also can be located by a grey bar printed in the margin. Each main category is listed with the page where it appears. Each subcategory is listed with a cross-reference (*See*), followed by the name of the corresponding main category and page number. *See Also* cross—references are listed for convenience under any main category to which they are associated.

## **How The Categories Were Selected**

*The Green Book* concentrates on popular subjects and includes over 200 new themes and subcategories compared to the previous edition. There are many new categories being researched for future editions. Categories have been chosen to provide a useful mixture of general and specific, abstract and concrete subjects. It should be noted, however, that there are a few categories which I've chosen not to include due to their overly general nature.

For example, the numerous romantic themes of falling in love, commitment and togetherness, breaking up and the ensuing states of sadness, loneliness and feeling “blue” are, of course, common in songwriting. To compile comprehensive lists of songs reflecting one or more of these conditions of love could fill several volumes alone.

Please bear in mind that alphabetical listings for songs about different countries may also include songs about particular territories, such as Puerto Rico or Hong Kong. While there are many songs about certain countries or states, songs about a city in a specific country or state can be found under the “Cities” categories.

## **How Songs And Recordings Were Selected**

*The Green Book* listings emphasize singles and album tracks released and still available from American record companies, and seeks to encompass the entire spectrum of music from 1900 to the present, including over 5,000 artists. Selections are chosen on the basis of popularity, production value, artist recognition, unique character and balance within each category.

---

Since this book has been created especially for those who work with audio production and programming, the vast majority of songs included are vocal selections. Instrumental recordings appearing in this book have been selected based on their popularity, familiar association with a particular category or to add depth to a subject of limited coverage.

*The Green Book* documents as many original versions as possible, although some are no longer in print. I've also endeavored to recognize recordings performed by the songwriters, even if they are not the most widely known versions of the songs they've written.

Regarding popular standards and oldies which have been widely recorded by dozens of artists, I've tried to accommodate a cross-section of the many releases available.

## **How the Lyrics And Songs Have Been Interpreted**

Because music is such a subjective experience, varying degrees of personal interpretation must be involved to classify songs. Songwriters frequently employ metaphorical references, and as author I cannot possibly claim to determine every song's actual lyric intent by its composer, especially with certain themes such as "Baby" and "Mama" songs, for example.

Since every lyric is a potential metaphor, with the true meanings often known only by the songwriters themselves, I've aimed to highlight each song's major themes as I believe the composers apparently intended them. It should be kept in mind, however, that the lyrics of some songs bear little, if any, actual relationship to the title. As a result, many songs can be found under classifications other than the key words in the titles. Therefore, determining the usefulness of some songs will require a certain amount of individual interpretation by the reader.

Considering that my lyrical interpretations of certain songs included in this book may be inaccurate, and that the status of labels and album releases is always changing, there are bound to be errors and omissions. I regret any such misinterpretations or mistakes and appreciate learning of any distortion or falseness which can be corrected in future *Green Book* materials.

---

## Availability of Songs And Configurations

The availability of any given recording is constantly changing. As CDs and cassettes have rapidly replaced vinyl 33-1/3 and 45 RPM formats, many titles and entire catalogs of certain artists are being repackaged, renamed, discontinued and perhaps later reissued by the original record companies or different manufacturers. The goal of *The Green Book* is to include albums that are available in as many formats as possible, with cassettes being the most common configuration followed by CD and vinyl.

Wherever possible, *The Green Book* attempts to include the original albums and labels unless the songs currently exist only within different albums and/or released by different companies. Titles thought to have gone out of print within recent years will carry their most recently known record company imprint.

Where it has been recognized that such songs and the albums on which they appeared have remained out of print for several years, they will be identified with the "OOP" label code.

A large number of out-of-print songs are featured in *The Green Book*, including many vintage standards that were popular before modern recording techniques were established. These also will be identified with the "OOP" code.

Although few 45s are still being issued, some are included with their original or last-known imprint when no album containing that title has been located by the author.

There are many record labels identified with songs in this book which are no longer in business, but they are included to help users track down the recordings through specialist dealers, collectors and music libraries.

---

## AUTHOR'S NOTES

Although a very serious amount of work and time was involved in the preparation of *The Green Book*, it is meant to be enjoyable as well as useful to the reader. While this book contains many landmark recordings about political strife, peace, war and other aspects of humanity, there are also categories such as insults and nonsense words (with thanks to radio and records veteran Bonnie Simmons for that idea).

What's particularly interesting is to see the sociological shifts in songwriting over the decades—specifically, the blunt frankness of lyrics in modern compositions. We've come a long way from popular standards such as "Let Me Call You Sweetheart" to George Michael's "I Want Your Sex." The focus of straightforward lyric-writing seems to be drawing to an increasingly sharper point, as the primal angst and rage commonly heard during the late '70s punk era has been more than matched by the political and emotional sensitivities brought forth in some of today's rap and alternative music.

The same attitudinal and imaging changes can be seen in names of groups. Innocent monikers such as the Mom & Dads, the Coasters and Gerry & The Pacemakers have evolved to the Trash Can Sinatras, Icepick Trotsky and Dead Youth.

These colorful transitions in the music and artists being recorded today are what make *The Green Book* a musical panorama, encompassing every possible artistic expression.

Of great significance is that there is an increasing amount of provocative material being written and recorded about contemporary issues—everything from racial prejudice, feminist issues, and homelessness to family problems such as child custody, domestic violence and alcoholism.

This new edition and forthcoming *Green Books* will continue to establish new categories along these lines whenever enough songs can be traced to create a meaningful list. Users of *The Green Book* are welcome and encouraged to submit songs, categories, interpretations and suggestions for future *Green Book* research.

---

## LEGEND

- / = "and the" or "and his/her"  
# = number, edition or volume in a set or series  
S = single on cassette, 12" vinyl or CD  
same = the album is the same name as the artist  
(used in some cases)  
ST = soundtrack recording to a motion picture  
TT = title track: the album and song have the same name  
(used in some cases)

Note: Where artist performances as duets are listed, unless the entire album is a collaboration between two or more artists, the first name given is the one associated with the particular album discography listed.
