Electronic Transformers and Cabinetry

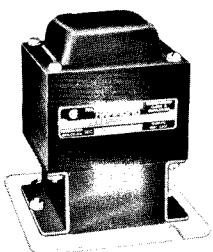

a trusted name... **HAMMOND**

ELECTRICAL TRANSFORMERS CUSTOM PRODUCTION FACILITIES

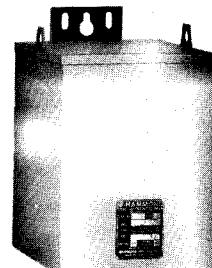

HAMMOND

CONTROL, POTENTIAL, CURRENT AND DISTRIBUTION TRANSFORMERS

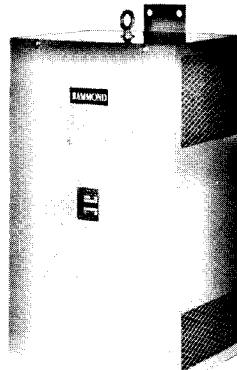

Type D — Control Trans.
25 to 100 VA

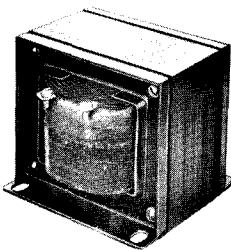

In addition to the industrial electronic group of transformers listed in this Catalogue, HAMMOND produces a popular companion line of electrical transformers which are displayed in the electrical catalogue. Ask for Catalogue Series 70 and Engineering Bulletins. These two standard lines, available from stocking distributors coast to coast, and stocked in depth at the factory are designed to satisfy a majority of applications confronting design and construction people. Where a standard product cannot be used, our custom facilities, which are described below, are at your service.

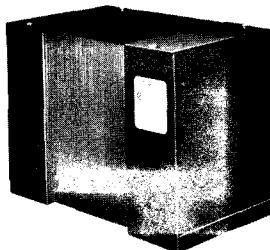

Type Q — Single Phase
0.5 KVA to 25.0 KVA
Outdoor Dry Type
Control & Distribution
600 & 480 V Tapped Primaries
120/240 Volt Secondaries

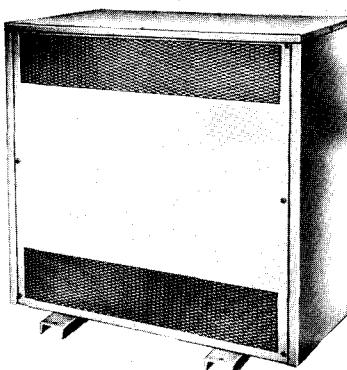

Type F — Single Phase 3 to 75 KVA
Indoor Dry Type Distribution Transformer
Class B & H insulation.

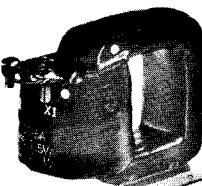

Type H — Open Indoor Dry Type
Control Trans. 25 to 5,000 VA

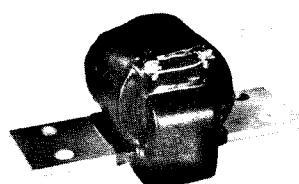

Type E — Enclosed Indoor Dry Type
Control Trans. 50 to 5000 VA
Autotransformers
240/120 Volts 150 to 3000 VA
208/230 Volts 0.50 to 10 KVA

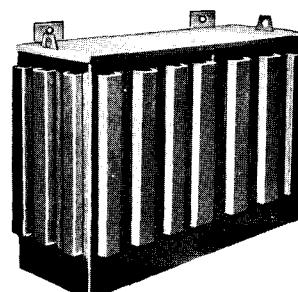

Type K — 2 to 225 KVA
Indoor Dry Type Distribution Transformer
240 or 120/208 Secondaries
Class B, F & H Insulation

Type CW — Current Trans.
with Rectangular Window
100:5 to 1200:5 AMP.

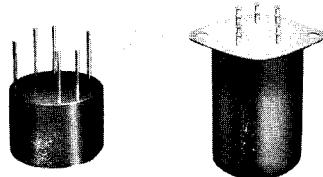

Type CP — Current Transformer
with Primary Bus. 200:5 to 1200:5 AMP.

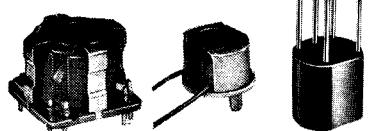

Type QT — 3 Phase 9, 15, 30, & 45 KVA
Outdoor Dry Type Distribution Transformer
208/120 Volt Secondaries

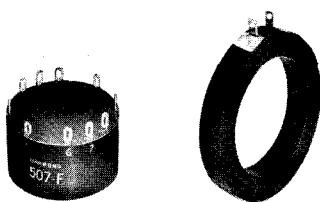

CUSTOM TRANSFORMER FACILITIES

Military — Aerospace High Reliability for
severe environments.
Hermetically Sealed, Encapsulated
or epoxy vacuum cast.
In Plant QA. to MIL-T-27

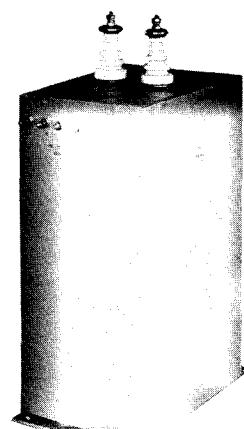

Pot Cores & Ferrites.
For high frequency use.
Compact open, encapsulated
or cast with p.c. pins.

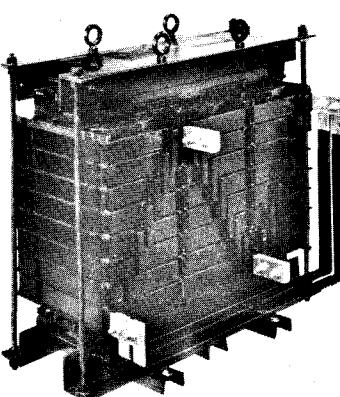

Toroidal Products.
From 0.4" O.D. up to 17" O.D.
Open or encapsulated.

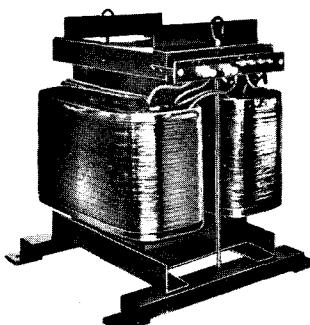

For OEM's and industrial customers, the HAMMOND factory produces many custom designed transformers for use in electronic circuitry. Engineering experience acquired while producing over 100,000 different types enables us to provide fast design and production service on your particular requirements. Our product range extends from small pulse units up to heavy single and three phase rectifier transformers. Our factory staff is highly skilled and specially selected to insure emphasis on quality. The devices displayed here are typical. We welcome your enquiries during the initial design stages. Send your specifications for a prompt quotation. (See page 29 for required data.)

High Voltage Trans.
Testing, Isolation, X-Ray, Filament
Open Dry Type to 20 KV rms.
Oil Filled up to 100 KV rms.
Bulletins 5110 and 5309.

Heavy Rectifier and Plate Trans.
Open core & coil designs.
Single Phase up to 150 KVA
Bulletin 5277.
Three Phase up to 500 KVA
Bulletin 4650.

Saturable Reactors — Open or Enclosed
Single Phase to 150 KVA
Three Phase to 300 KVA
Open Type — Bulletins 5245, 5264, 5274
Enclosed Type — Bulletins 5020, 5275
For regulated power supplies, electric
heat control. Technical Bulletin 5245
describes principles.
Magnetic Amplifiers also available
Bulletin #5185.

TRANSFORMER MOUNTINGS

HAMMOND

The following two pages describe popular mounting systems which are used in HAMMOND transformers and developed during 44 years experience in production of transformers and reactors for industry. They are used when producing special devices to your specifications. (Many others are also available.)

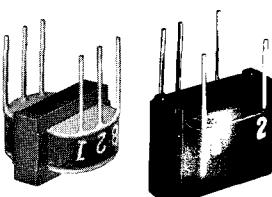

HORIZONTAL

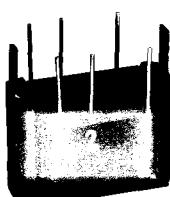

VERTICAL

ENCAPSULATED

PIN MOUNT

LUG MOUNT

OPEN HORIZONTAL and VERTICAL BRACKET

- Used for small audio and filament transformers and reactors where shielding is not important.
- Economical open core and coil construction.
- Formed bright zinc finished steel bracket with two-hole mounting.
- Flexible leads or lugs for connections.
- Horizontal, vertical or miniature versions used depending on space available.
- May be encapsulated or supplied less mounting feet on special order.
- Bulletins 5043 and 5044 give dimension data of available sizes.

OPEN PRINTED CIRCUIT

- A miniature EI or EE lamination mounting for printed circuits.
- Economical open core and coil construction.
- Solid tinned copper leads $\frac{1}{2}$ " long on 0.1" grid.
- Seven core sizes available with p.c. leads.
- $\frac{1}{4}$ " lamination and over are mounted by means of two clinching lugs.
- Encapsulated versions available on special order.
- Bulletin 5272 gives dimension data of available sizes.

VACUUM EPOXY RESIN CAST

- Vacuum epoxy-cast construction produces a completely sealed transformer, withstanding severe environmental conditions.
- Epoxy materials improve heat dissipation and allow more compact sizes.
- Pin terminals $\frac{1}{2}$ " long on standard 0.1" grid for printed circuit construction or subminiature devices.
- Available on special order to meet MIL-T-27.
- Bulletins 5361 and 5372 give dimension data of available sizes.

MUMETAL CASE

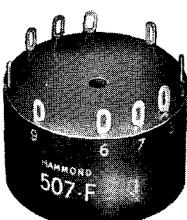

- Heavy drawn Mumetal case for maximum shielding of low level audio input or bridging transformers.
- Hermetically sealed for consistent characteristics and long life.
- Smooth grey enamel finish.
- Two convenient 6-32 mounting studs 0.38" long on 0.94 centres, 1.41" O.D., 1.94" high.
- Modern, turret head, solder terminals 0.22" long.

800 & 850 SERIES

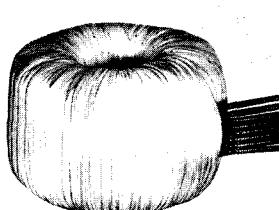

- Hermetically sealed for consistent characteristics and protection of broadcast quality transformers.
- Modern, rigid deep drawn steel case with smooth grey enamel finish, 1.75" wide, 1.25" deep and 1.65 or 2.56" high.
- Two convenient 6-32 mounting studs on 1.31" mounting centres.
- Multi-terminal header for convenient solder connections — 0.22" long.

TOROIDAL DEVICES

- For transistor power supplies, current transformers, and high Q filter inductors up to 200 KHz.
- Available in open varnish impregnated designs with flexible leads, p.c. pins or epoxy cast styles with solder lugs.
- May be conveniently mounted with a single bolt.
- Standard powdered or strip wound core materials are used.
- Toroid minimum inside diameter is 0.10", maximum outside diameter 17.0" maximum coil height 7.0".
- Bulletins 5364 and 5365 give dimension data on standard sizes.

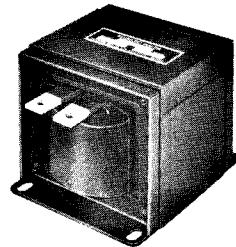

EPOXY CAST

VARNISH IMPREGNATED

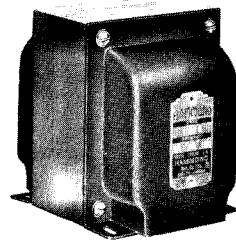

OPEN TYPE H

- Heavy current choke, reactor, filament, control or power transformer mounting.
- For OEM or replacement use inside other housings — occupying minimum space.
- Economical 4 slot mounting, open core and coil construction.
- Rigid, steel end frames with 4 through bolts.
- Dull black enamel finish.
- Lugs or flexible leads.
- Bulletin 4651 gives dimensions of standard sizes. Vertical mounting 4652 using less panel or chassis space, available on special order.

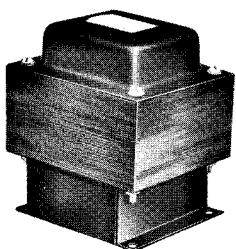

TYPE X CASE

- Used for medium sized power, filament, line and output transformers, chokes, and reactors built on 1" to 2" EI cores.
- Drawn and formed steel end covers with black, baked, smooth semi-gloss enamel finish.
- May be produced with knockouts for surface mounting applications.
- Convenient four slot above chassis mounting — laminations vertical.
- Flexible leads only supplied.
- Bulletin 4654 gives dimensions of available sizes.

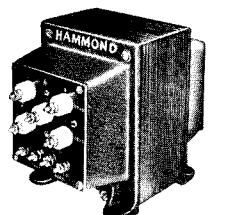

TYPE Z CASE

- For medium sized power transformer built on 1" to 2" EI cores.
- Drawn and formed steel case with black, baked, semi-gloss enamel.
- Convenient four hole above or through chassis mounting.
- Allows an alternate leakage flux orientation compared to "X" mounting, laminations horizontal.
- Flexible leads only supplied.
- Bulletin 4653 gives dimensions of available sizes.

TYPE R CASE

- For larger designs of plate transformers and reactors.
- Rugged cast end frames used with 2" to 3" EI laminations.
- Bakelite end panel with bolt and nut terminals and ceramic HV bushings.
- Baked enamel finish.
- Bulletin 4649 gives dimensions of available sizes.

DEFINITION - INSERTION LOSS

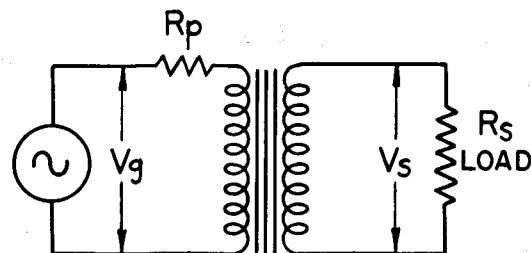

When measured at mid-band, insertion loss is a method of expressing the efficiency of a device. When measured at other frequencies, it includes the droop of the frequency response characteristic. It is the logarithmic ratio of power input to power output and is expressed in dB.

$$\text{Insertion loss dB} = 10 \log \frac{P_i}{P_o}$$

For measurement purposes in correctly terminated circuitry this becomes:

$$\text{Insertion loss dB} = 10 \log \frac{V_g^2 R_s}{4V_s^2 R_p}$$

Where R_p and R_s are the mid-band impedances of the pri. and sec., V_g is the generator voltage and V_s is the sec. voltage.

DEFINITION - TURNS RATIO - REFLECTED IMPEDANCE

In a transformer the ratio of secondary turns (N_s) to primary turns (N_p) is called the turns ratio (n) i.e. $n = \frac{N_s}{N_p}$

If n is greater than 1, we have a step up transformer or if less than 1, a step down transformer, or

$$\frac{V_s}{V_p} = n \quad \text{and} \quad \frac{I_p}{I_s} = n$$

Combining these relations, the turns ratio $n = \sqrt{\frac{Z_s}{Z_p}}$. Also, $Z_p = \frac{Z_s}{n^2}$ or, the impedance we see reflected at the primary terminals, when the secondary is terminated with Z_s , is the secondary impedance divided by the square of the turns ratio.

Refer to the table on Page 29 for the data required when ordering or specifying special Transformers.

AUDIO TRANSFORMERS OUTPUT & MATCHING

HAMMOND

- Economical open bracket mounting (see p. 4 details).
- For general replacement service or OEM use.
- Primary and secondary leads 5 to 6" long.

Cat. No.	† Primary Impedance	Max. Pri. ma dc	Max. Watts	Core Size	A	Dimensions B	C	D	Wt. Lb.

PUSH-PULL or SINGLE PLATE UNIVERSAL OUTPUT TRANSFORMERS. 5 to 10 watts

- Only 3 sizes yield primary impedances from 1,200 to 27,000 ohms, and secondary impedances from 1.5 to 15 ohms.
- Primary leads 5 to 6" long, secondary solder lugs.
- Convenient complete application tables listing 90 precalculated ratios with each transformer.

125 B	1200 to 25000	45	5	1/2 x 1/2	2 3/8	1 1/4	1 3/8	2	.3

120 G	0-3.2-8-16 ohms	40	1 x 1	Horiz. Brkt.	3 1/16	2.3
◆120 H	0-3.2-8-16 ohms	60	1 x 1 1/2	Horiz. Brkt.	3 1/16	2.8
◆120 J	0-3.2-8-16 ohms	100	1 1/4 x 1 1/4	Type X	2 1/2 x 2 1/4	4.5

† When operating at impedances below nominal, power capability and the frequency spectrum are proportionately lower; conversely, at higher impedances power capability and frequency spectrum will be proportionately higher.

◆ New Product.

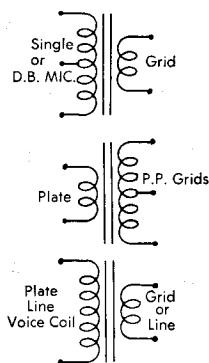

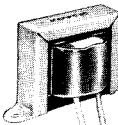

Special designs of these series produced quickly to your specifications.

Typical
120 & 125 Series

INPUT AND INTERSTAGE REPLACEMENT AND GENERAL PURPOSE

- Economical open horizontal bracket mounting (see p. 4 details).
- For general replacement or OEM use.
- Primary and secondary leads 5 to 6" long.

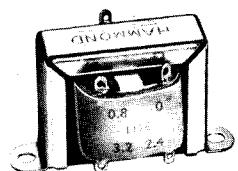

Cat. No.	Application	Nominal Impedance Primary	Nominal Impedance Secondary	Overall Turns Ratio Pri. to Sec.	Max. Pri. mA DC	Core Size	Mfg. Cts.	Wt. Lb.
111	Plate to Single Grid	10000	90000	1:3	10	3/4 x 3/4	2 13/16	1.0
112	Plate to P.P. Grids	10000	120000 ct	1:3 1/2	10	3/4 x 3/4	2 3/8	1.0

SOUND DISTRIBUTION

- Couples 3.2, 8 or 16 ohm speakers to the 25 or 70 volt outputs of modern amplifiers at different power levels without the use of artificial attenuation devices (pots or pads).
- 8 power output levels available with each transformer.
- Low insertion loss over the 100 to 9000 Hz frequency range.
- Liberally designed for long life and trouble free service.
- Economical open horizontal bracket mounting (see p. 4 details) solder lug terminals.
- May be used to couple speakers to 500 ohm or other lines providing peak voltages do not exceed approximately 200V.
- Complete, convenient application tables included with each transformer.
- Autotransformers or two winding transformers available.

119 Y SERIES

8 or 16 OHM - OUTPUT TO 70V OR 25V LINE

- Autotransformers for use with 1650 series high power output transformers on P.16 to provide a 25V or 70V line and also suitable for reverse operation at speaker location.
- Available with 8 or 16 ohm taps at maximum wattage output.
- Frequency response 50 Hz to 10 K Hz.

MINIATURE TRANSISTOR

HAMMOND

101 SERIES

Height 0.29"
Pin Dia. 0.02"
Pin Length 0.50"
Net Wt. 0.1 oz.

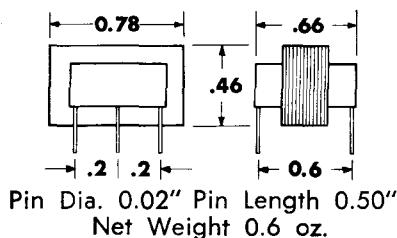

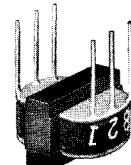

- For use in miniature transistor circuitry.
- Pin type printed circuit mounting.
- Rugged black epoxy cast construction produces a completely sealed unit withstanding severe environmental conditions. (See p. 4 details.)
- Available on special order to MIL-T-27. (Grade 5, Class S).
- Bifilar winding technique used on centre tapped units for balanced resistive and capacitive characteristics.
- For open printed circuit mounting types, refer to the factory.

AUDIO TRANSFORMERS EPOXY CAST — PRINTED CIRCUIT

102 104 106 SERIES

- For use in miniature (solid state) circuitry.
- Pin type printed circuit mounting. • Insulation test 250 V rms.
- Bifilar winding technique used on centre tapped units for balanced resistive and capacitive characteristics.
- Rugged black epoxy cast construction produces a completely sealed unit withstand- ing severe environmental conditions including those of MIL-T-27. (See p. 4 details.)
- For open printed circuit mounting types, refer to 148 or 149 Series p. 10.
- For smaller cast units refer to 101 Series p. 8.

106 Y	Output	4000 ct	3.2	3.5	220	0.3	1500	170

† Insertion Loss is 1 db approx.

NOTES

□ Approximate frequency in hertz at which the output, at rated load and D.C. unbalance, is 1 db below the 1000 hertz rating. The High Frequency roll-off point exceeds 20 KHz (Above 35 KHz in most types).

* Resistance tolerance $\pm 15\%$.

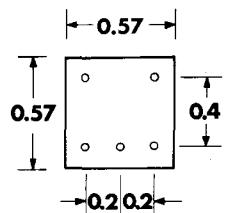

/ Where primary is centre-tapped, this figure is the maximum unbalance.

— Overall dimensions are maximum; pin spacings are $\pm .010"$.

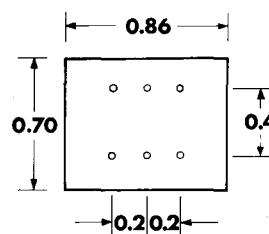

† When operating at impedances below nominal, power capability and the frequency spectrum are proportionately lower; conversely, at higher impedances power capability and frequency spectrum will be proportionately higher.

Special designs of this series produced quickly to your specifications.

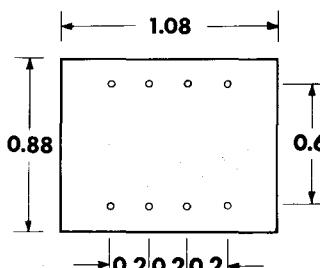

102 SERIES

104 SERIES

106 SERIES

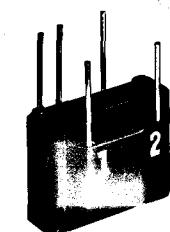

AUDIO TRANSFORMERS OPEN PRINTED CIRCUIT

HAMMOND

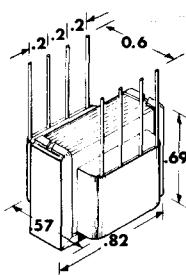

TRANSISTOR TRANSFORMERS

- Designed for printed circuit mounting by means of pins (148 series) or by clinching lugs (149 series).
- Economical, light weight, horizontal bracket designs. (See p. 4 details.)
- Solid tinned copper leads .032 dia., 0.5" long on 0.2" grid.
- Bifilar wound centre tapped and split wound units for balanced capacitive and resistance characteristics.
- Frequency response 200 to 15,000 Hz (-1 db reference 1000 Hz).
- Insertion loss less than 1½ db. • Insulation test 250 V rms.
- Total distortion approximately 2% for drivers and 1% for outputs at 200 Hz decreasing at higher frequencies.
- For rugged epoxy cast type of printed circuit mounting refer to 102, 104 or 106 Series p. 9.
- Approx. Weight — 148 series 0.6 oz. — 149 series 1.0 oz.

HIGHER POWER TRANSISTOR AUDIO TRANSFORMERS

- Economical open bracket, enclosed "type X", or open "type H" mounting. (p. 4 & 5 details).
- Insulated flexible leads, 6 to 8" long, or solder lugs.
- For OEM, experimental or replacement use in larger amplifiers and transmitters.

• Silicon steel cores.

400 SERIES — 1×1 Core mounting Centres $3\frac{5}{16} \pm \frac{1}{16}$ Weight 2.9 lb. Length 3 1/8" Height 3 1/4" Width 3 3/8".

481 Multiple Line to Voice Coil Pri. Imp. 50/125/200/250/500 Sec. Imp. 1 1/2, 3 3/4, 6, 7 1/2, 10, 15 ohms 15 watts
The 481 transformer is one with many uses in matching line to voice coil. 49 different impedance combinations possible. Complete details enclosed with each transformer.

482 Line to Voice Coil Pri. Imp. 500/1000 Sec. Imp. 4, 8, 15 ohms 15 watts

900 SERIES Dim. $2\frac{5}{16} \times 2\frac{13}{16} \times 3\frac{1}{2}$ " High; Mounting Centres $1\frac{11}{16} \times 2\frac{1}{16}$; Weight 1 3/4 lb.

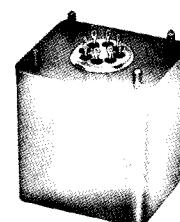

903 Isolating and Matching M-Line/M-Line + 20 dbm Max. Pri. D.C. 125 mA

M-Line matches 50, 125, 200, 250, 333, 500 ohm lines.

Exact balance on 125, 200 and 500 ohm taps.

Max. level for 50-15000 Hz $\pm \frac{1}{2}$ db.

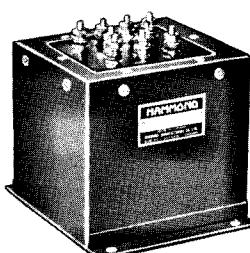

Electrostatic shield between primary and secondary.

1700 SERIES — LINE TO SPEAKER

- Frequency response 40-12,000 Hz.
- Sturdy flange mounted steel case with black semi-gloss enamel finish.
- Solderless terminals (8-32 studs).

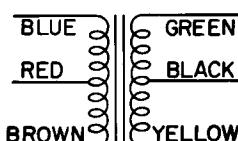

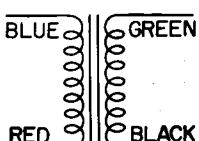

Cat. No.	Watt Rating	Primary Impedance Taps	Secondary Impedance Taps	Core Size	Mtg. Cts.	Wt. Lb.
1782	30	500, 1000, 1500	4, 8, 15, 30 ohms	1 1/4 x 1 1/4	3 5/16 x 4 3/16	8
1786	60	500, 1000, 1500	4, 8, 15, 30 ohms	1 1/2 x 2	3 11/16 x 4 13/16	16

LINE-TO-DISTRIBUTION SYSTEM MATCHING AUTOTRANSFORMER

1789 — To match 500 ohm output of 30, 60, 100 or 120 watt amplifier to 70 volt distribution system.
Compound-filled case. Wt. 11 lb.

AUDIO TRANSFORMER LEAD COLOR CODE

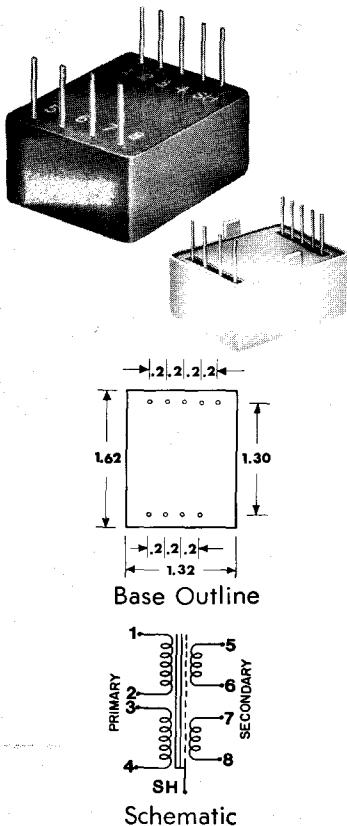

NOTE — These lead colors are used on HAMMOND Audio Transformers although other colors may be added or substituted when necessary.

BROADCAST SERIES TRANSFORMERS

HAMMOND

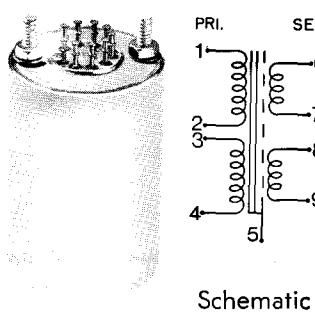

LOW PROFILE AUDIOS — 560 SERIES

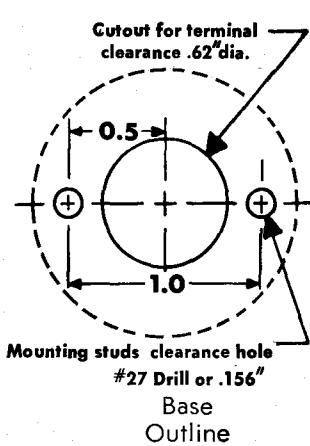

- Epoxy cast broadcast quality for P.C. Boards.
- Frequency response at 0 dBm 30 Hz to 30 KHz (over 50 KHz in low impedance units, 600 ohm or less).
- Electrostatic shield between pri. and sec. connected to core and pin "SH".
- Humbucking construction.
- Balanced split windings on primary and secondary for circuit versatility — primary and secondaries can be reversed for impedance matching.
- Overall dimensions 1.62" x 1.32" x .76" high.
- Nine P.C. pins .04" diameter by 0.5" long.
- Magnetic shielding: optional mumetal slip-on case available as **560-Z** which mounts with two tinned .12" x .18" tabs. Overall dimensions of shield assembly 1.68" long x 1.46" wide x 0.82" high.
- Shipping weight 4 oz.; Shield assembly 1.5 oz.

Cat. No.	Application	Nominal Impedance	
		Primary	Secondary
◆560 C	Emitter or mic to Line	12/48	150/600
◆560 E	Emitter or mic to Line	50/200	150/600
◆560 G	Isolating or Hybrid	150/600	150/600
◆560 J	Collector to Line or Line to Base	150/600	1200/4800
◆560 L	Collector to Line, or Matching	150/600	5k/20k
◆560 N	Collector to Line	150/600	10k/40k
◆560 Q	Matching or Bridging	10k/40k	10k/40k
◆560 Z	Shield Assembly — dimensions	1.68" W x 1.46" D x .82 high	

INPUT TRANSFORMERS — MUMETAL-SHIELDED — 585 SERIES

- Heavy drawn mumetal case for maximum shielding—grey enamel finish. (See p. 4 details.)
- Hermetically sealed for long life and stable characteristics.
- Humbucking construction with electrostatic shield between pri. and sec. connected to core and terminal provides excellent noise and hum attenuation.
- For radio and TV broadcast applications — transistor and tube circuits.
- Two convenient 6-32 x .38" mounting studs.
- Modern, turret head, solder terminals .22" long.
- Frequency response 50 to 15,000 Hz (-1 db reference 1 KHz).
- Level + 5 dBm.
- Overall dimensions (max.) 2.38" high x 1.41" dia.; case height 1.94".
- Each transformer carton contains instruction bulletin #585 which provides a drilling template and terminal connection data.

Cat. No.	Application	Nominal Impedance		Overall Ratio
		Primary	Secondary	
585 D	MIC to Grids	37.5/150	25K/100K	1:25.4
585 E	MIC to Base	37.5/150	600/2400	1:8
585 F	Line to Grids	150/600	25K/100K	1:12.7
585 G	Line to Base	150/600	600/2400	1:2
585 H	Bridging	5K/20K	20K/80K	1:2
585 J	Bridging	5K/20K	600/2400	2.9:1

◆ New Product

When operating at impedances below nominal, power capability and the frequency spectrum are proportionately lower; conversely, at higher impedances power capability and frequency spectrum will be proportionately higher.

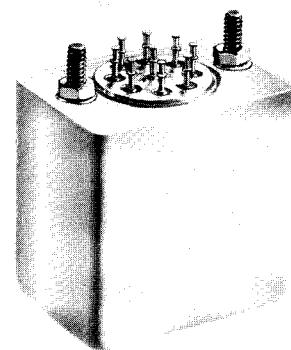

Special designs of these series produced quickly to your specifications.

HAMMOND

BROADCAST SERIES TRANSFORMERS

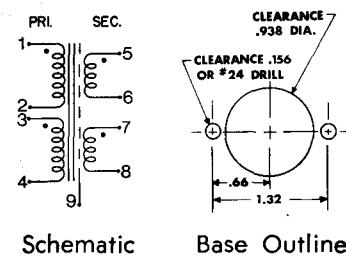

AUDIO TRANSFORMERS — 850 SERIES

- New broadcast quality designs have extended frequency range. Frequency response is within 0.5 dB from 20 Hz to 20 KHz, units over 5Kohms impedance may be 1 dB down at 20 KHz.
- Capable of higher power levels: up to + 15 dBm with the specified characteristics, or higher levels with reduced low frequency performance.
- Insertion loss is approximately 1 dB.
- Distortion is approximately 1.5% at 20 Hz under full power.
- Lower profile than the 800 series, only 1.7" x 1.2" x 1.65" high.
- Hermetically sealed for stable characteristics and long life. Header has nine 0.22" long solder terminals.
- Deep-drawn steel case with pleasing smooth semi-gloss grey enamel finish and two convenient 6-32 mounting studs with hardware.
- Humbucking construction and electrostatic shield between primary and secondary provides excellent noise attenuation.
- Split balanced windings on primary and secondary for circuit versatility. Primary may be used as a secondary and vice versa for impedance matching.

RDC is full winding D.C. resistance in ohms \pm 20%
Shipping Wt. 0.4 lb.

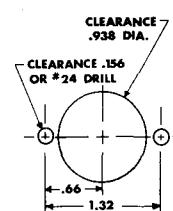

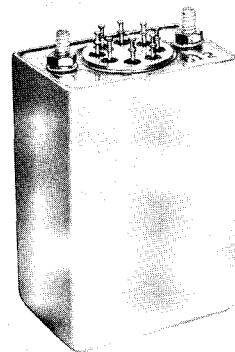

Cat. No.	Application	Primary Nominal Imp.	RDC	Secondary Nominal Imp.	RDC
◆850 C	Emitter or mic to line	12/48	6	150/600	70

AUDIO TRANSFORMERS — 800 SERIES

- Compact efficient units for broadcast applications.
- Balanced core and coil construction with effective low hum pickup.
- Split primary and secondary windings for versatility.
- Hermetically sealed for long life and consistent characteristics.
- Frequency response 50 - 15 KHz at 15 dBm except 841, 2, 3, & 4, which are 20 dBm (-1/2 dB reference 1 KHz) Max. level for 50-15000 Hz \pm 1/2 dB.
- Modern rigid drawn steel case with smooth grey enamel finish and two convenient 6-32 mounting studs. (See p. 4 details.)
- Multi terminal header with $\frac{7}{32}$ " long solder pins.
- Each transformer carton contains instruction bulletin #800 which provides a drilling template and terminal connection data.
- 1.75" Wide, 1.25" Deep, 2.56" High • 1.3" Mtg. Cts. • Two 6-32 studs. • Net Wt. 0.5 lb.

Base Outline

Schematic

* Electrostatic shield between primary and secondary. † Single plate requires parallel feed. When operating at impedances below nominal, power capability is lower and the frequency spectrum is shifted downward; conversely, at higher impedances power capability and frequency spectrum will be shifted upward.

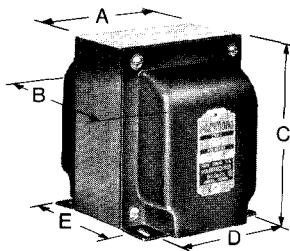

Special designs of these series produced quickly to your specifications.

◆ New Product

AUDIO OUTPUT TRANSFORMERS

HAMMOND

1600 SERIES — 10 Watt to 75 Watt

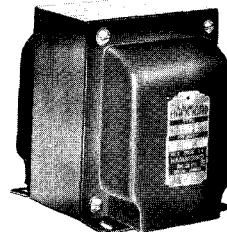

- Designed for Hi-Fi, Stereo or P.A. system applications (Tube circuits).
- Sturdy, convenient, 4 hole above chassis "X Mtg." (See p. 5 details) in semi-gloss black enamel.
- Screen taps on 1620 (21% of pri. turns) and 1626 (41% of pri. turns); for ultra-linear operation if required.
- Frequency response 50 to 15 kHz (-1 dB ref 1000 Hz minimum) Type 1626 is from 30 to 30 kHz.
- Insulated flexible leads 10-12" long.

1650 SERIES — 25 to 280 watts

- Designed for push-pull tube output circuits.
- Suitable for Hi-Fi, Stereo, Guitar amplifiers and P.A. applications.
- Sturdy, 4-hole above chassis type "X" mounting finished in semi-gloss black enamel (See p. 5).
- Insulated flexible leads 10-12" long.
- Frequency response 30 to 30 kHz (-1 db max. ref. 1000 Hz minimum).
- For added versatility, the 119 Y series on Page 7 may be used to feed 25V or 70V lines.

NOTE — † Primary winding has screen taps for ultra-linear operation of output stage of models indicated if required.

— Available on special order in through chassis mounting — type Z or top plate models (see page 5 for details). e.g. Order as "1650 N except Z case".

1700 SERIES — 20 watts

- Sturdy, steel cases with black semi-gloss baked enamel.
- Primary has 40.5% screen taps for ultra-linear operation of output stage.
- Frequency response 20 to 50,000 Hz.
- Negligible wave form distortion.
- Low leakage reactance.

INACTIVE TRANSFORMERS

The transformers listed below are types that have been made for several years. With the present demand showing a downward trend, we list them separately and when necessary can still be ordered. Further details on each series will be found on other pages of this catalogue, or previous catalogues in the "80" Series.

FILAMENT - L.V. RECTIFIER TRANSFORMERS

HAMMOND

165 SERIES — Open horizontal frames

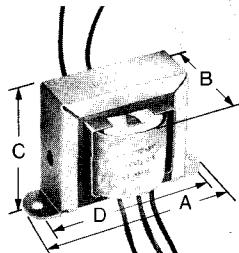

- Dual purpose — filament or LV rectifier, continuous service.
- Convenient, economical, 4 slot, open horizontal frame mounting. (See p. 5 details.)
- Conservative designs; are CSA approved "LR 3902".
- Insulated flexible leads — 8-10" long or tabs with holes.
- Primary 115 volts, 60 Hz.
- Secondary 3 to 14 volts, 4 to 50 amps, R.M.S.
- Insulation Test 2000 volts.
- Mounting slots .22" x .44" except 165 V12 which has .28" x .56" slots.

166 SERIES — Channel bracket mounting

- Dual purpose—filament or LV rectifier, continuous service.
- Convenient, economical, open 2 hole horizontal and vertical bracket mounting.
- Conservative designs; are CSA approved "LR 3902".
- Insulated flexible leads 6"-7" long.
- Insulation test 2000 volts.
- Primary 115 volts, 60 Hz
- Secondary 2.5 to 100 volts, 0.025 to 4 amps. R.M.S.

♦ New Product.

Special designs of these series produced quickly to your specifications.

- Dual purpose—filament or LV rectifier, continuous service.
- Convenient, economical enclosed 4 hole "Type X" mounting, (See p. 5 details)
- Conservative designs are CSA approved "LR 3902".
- Insulated flexible leads—6"-8" long.
- Primary 115 volts 60 Hz
- Secondary 5 to 100 volts 0.5 to 30 amps R.M.S.
- Insulation Test 2500 V

"X" Mounting

400 HERTZ TRANSFORMERS

220 Series

222 Series

- For experimental & OEM applications in 380 to 1000 Hz circuits.
- May be used in rectifier, signal reference and filament heating circuits, etc.
- 220 series supplied in open horizontal bracket mounting (See p. 4 details) with 6" leads.
- 222 series supplied in open "C-core" mountings with solder lugs.
- Rated from 1 to 45 VA, higher VA ratings available up to approx. 15 KVA.

ON SPECIAL ORDER

- May be supplied in printed circuit mounting, epoxy encapsulated or to MIL-T-27 specifications on special order.

Cat. No.	VA Rating	Pri. Volts	Sec. Volts	Sec. Amps	Overall Dimensions	Mfg. Cts.	Wt. Lb.
220 C	1	115	26	.038	1 1/16 x 5/8 x 11/16 H	1 1/16	0.03

			12.6 ct	1.79			

* Tapped at 57.5 & 99.7 V. May be used for a Scott 3 phase to 2 phase connection.

♦ New Product

Special designs of these series produced quickly to your specifications.

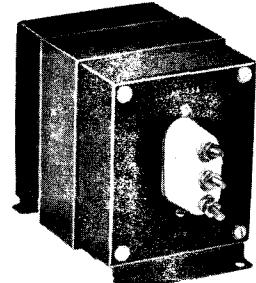

HAMMOND

FILAMENT AND RECTIFIER TRANSFORMERS

H. V. RECTIFIER — Filament Transformers

- For 866 A, 872 A and similar tubes.
- Insulated for high voltage OEM broadcast and amateur applications in transmitters, induction heating equipment, etc.
- Convenient "X or T Mtg." available. (See p. 5 for details.)
- Conservative, rugged designs are CSA approved "LR 3902" for operation on 115 V, 60 Hz.
- Special units to operate at up to 50,000 volt levels supplied to specifications.
- Special 230 V primaries are available, e.g., order similar to Cat. 1166 X except primary 230 V.

Cat. No.	Secondary Volts	Secondary Amps.	Sec. rms. Ins. Test	Maximum DC Volts	Core Size	Overall Dimensions	Mounting Centres	Wt. Lb.

"X" Mounting

*NOTE — This transformer is "X Mtd." and suitable for sealed beam lights, boat lighting, etc. Secondary windings in parallel 6.3 v. 20 amps. or secondary windings in series 12.6 v. 10 amps.

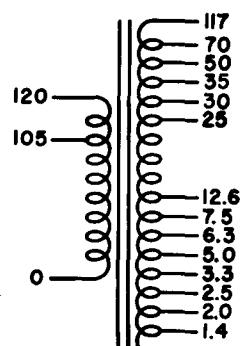

MULTI-TAP SECONDARY

- Economical open bracket mounting (see p. 4 details).
- For laboratory supplies, test equipment, or experimental power supplies.
- Primary tapped at 105 and 120 V, 60 Hz.
- Leads 8" long.

Cat. No. 163 B Core 1 x 1 Mtg. Cts. 3 1/16 Weight 2.5 lb.

- Secondary tapped at 1.4, 2.0, 2.5, 3.3, 5.0, 6.3, 7.5, 12.6 volts at 2.0 amps., and 25, 30, 35, 50, 70, 117 volts at 0.25 amps.

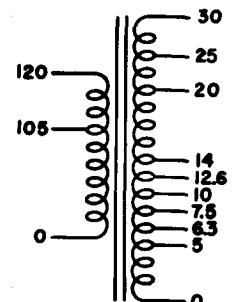

◆Cat. No. 163 D Core 1 x 1 Mtg. Cts. 3 1/16 Weight 2.5 lb.

- Secondary tapped at 5, 6.3, 7.5, 10, 12.6, and 14 volts at 2.0 amps., and 20, 25 and 30 volts at 1.0 amps.

Note — For intermittent service — 2 min. on, 6 min. off, increase above ratings 100%.

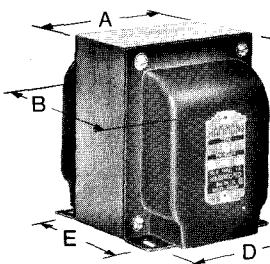

◆ New Product

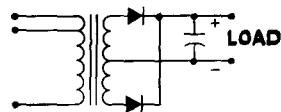

L.V. RECTIFIER TRANSFORMERS

HAMMOND

RECTIFIER TRANSFORMERS — LOW VOLTAGE — 60 Hertz.

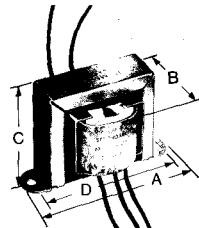

- Designed for use with selenium, silicon, germanium or copper oxide rectifiers in capacitor or choke input circuits.
- Ideal for OEM or replacement applications in battery chargers, low voltage high current power supplies, etc.
- May be used in single phase, full wave centre tapped or bridge circuits.
- Primary or secondary tapped for output voltage adjustment.
- Convenient 4 hole "type X" mounting with knockout (p. 5 details).

POWER TRANSFORMERS — LOW VOLTAGE — Primary 115 V — 60 Hertz

- Designed for use with selenium, silicon, germanium, or copper oxide rectifiers in capacitor or choke input circuits.
- For OEM or replacement applications in small power or bias supplies, test equipment, preamps, etc.
- Suitable for single phase half wave, full wave centre tapped (261 series only), full wave bridge or voltage doubler circuits.
- Economical "bracket" or "Type X" mounting. (See p. 4 and 5 details.)
- Convenient 6.3 or 12.6 volt filament/auxiliary winding.

* For replacement of power transformers in European radios. (Supersedes previous number 89662).

✓ Current measured at output of full wave bridge circuit (half wave and full wave doubler rectifier circuits yield only half this secondary current).

LOW PROFILE POWER TRANSFORMERS

LOW PROFILE EPOXY CAST POWER TRANSFORMERS

- Low profile and light weight for printed circuit mounting with minimum card spacing.
- Primaries designed for 115 volt operation.
- Epoxy cast to withstand shock and severe environments.
- 226 & 227 pin mounted on 0.1 standard grid, 228 is insert mounted with p.c. pins, also on 0.1 grid.
- Laminations in the horizontal plane parallel to p.c. board.
- Low magnetic radiation.

ON SPECIAL ORDER

- Other voltage combinations or physical configurations available.
- Open versions with leads or pins.

HAMMOND

"X MOUNTED" SERIES — 115 Volt, 60 Hertz operation

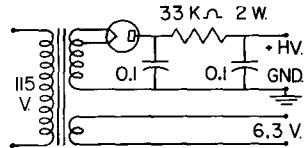

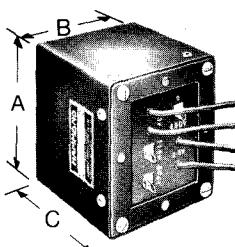

- Convenient 4 hole, above chassis "X Mtg." (See p. 5 details.)
- Conservative designs are C.S.A. approved. "LR 3902"
- Flexible leads 6" to 8" long. • Variety of adaptable ratings.
- Alternate Z mounting available — see next page.
- Dimension tolerance $\pm \frac{1}{16}$ ".
- Other voltage & current combinations on special order.

† D.C. mA measured with capacitor input filter.

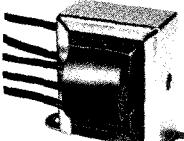

H. V. OSCILLOSCOPE TRANSFORMERS — 115 v. 60 Hertz operation

- H.V. secondary supplies up to 10 ma D.C. after rectifier.
- 2.5 V filament and separate 6.3 volt CRT filament windings.
- High voltage and filament end of secondary and 6.3 V winding have insulated leads or porcelain insulated terminal.
- Primary, ground end of H.V. secondary have solder lug terminals.

POWER TRANSFORMERS

"Z MOUNTED" SERIES — 115 Volt, 60 Hertz operation

- Convenient 4 hole above chassis Z Mtg., see p. 5 for details.
- Conservative designs are CSA approved "LR 3902".
- Flexible leads 8 to 10 inches long.
- Drawn and formed steel case — baked black semi-gloss finish.

◆ New Product. These new heavy duty type R.F. chokes are suitable for use in linear amplifiers or other transmitter applications. Wound on 1" dia. ceramic forms with stand-off insulators and 1/4-20 mounting bolt.

PLATE TRANSFORMERS

HAMMOND

PLATE TRANSFORMERS — Primary 115 Volts, 50/60 Hz

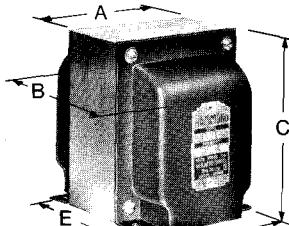

Fig. A

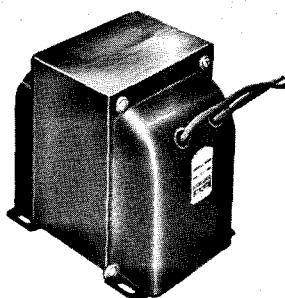

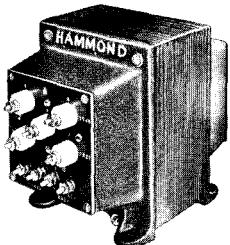

Fig. B

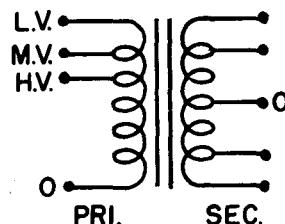

- For OEM or Amateur power supply applications.
- Type X 4-hole mounting, black semi-gloss baked enamel, mtg. A (See p. 5 details).
- Above 1000 v, secondary leads through rubber bushings, mtg. B.
- Conservative designs are CSA approved "LR 3902".

PLATE TRANSFORMERS

- Rugged 4 hole, "Type R" mounting — ceramic HV Terminals (See p. 5 details).
- Conservative CSA approved designs "LR 3902".
- OEM or Amateur application.
- Each secondary tapped at 70% and with the tapped primary, 6 output voltages are possible.
- Two pie construction for close voltage, resistance and capacity balance (except 768).

Open Bracket Mounting

- CORE SIZES
153 Series—1/4 x 1/4
154 Series—3/8 x 3/8
155 Series—1/2 x 1/2
156 Series—5/8 x 5/8
157 Series—3/4 x 3/4
158 Series—3/4 x 1
159 Series—1 x 1
- Economical "open bracket" or "Type X" mounting. (See p. 4 & 5 details.)
- Coils are vacuum varnish impregnated for long life.
- Leads 4" to 10" long.
- Tolerance ± 15% on inductance and resistance.
- Units will exhibit less inductance at slightly higher currents or more at lower currents.
- Inductances are measured with rated DC current flowing.
- Series 153, 154 and 155 available with pin leads for printed circuit mounting, refer to the factory.
- All dimensions in inches ± 1/16", except "B" which is maximum.

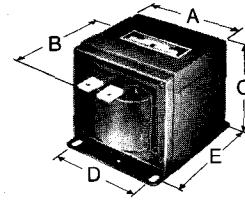

Type X Mounting

FILTER CHOKES REACTORS

HAMMOND

REACTORS — HEAVY CURRENT — 0.5 to 100 Millihenry — 5 to 100 Amps.

- For OEM or replacement use in D.C. power supplies, battery chargers, etc.
- Economical open core & coil, 4 slot mounting, for inside other enclosures (see p. 5 details).
- Connections made to leads or copper tabs with holes.
- See bracket mounted high current chokes p. 27.
- Test voltage 2500 V.

+B dimension is approximate maximum over coil or copper tabs.

CHOKES — HIGH VOLTAGE FILTER AND SWINGING

- Sturdy formed steel case with black semi-gloss enamel finish.
- Four convenient 1/4 x 20 mounting screws top and bottom on B, C, H, T & V; 5/16 x 18 mounting screws on D, F, G, J, W & Y.
- Terminals are 1" diameter, 1½" high porcelain insulators on 1½" centres.
- Tolerances are ± 15% on inductance and ± 10% on resistance measured at 23° C.

CONVERTER-INVERTER TRANSFORMERS

HAMMOND

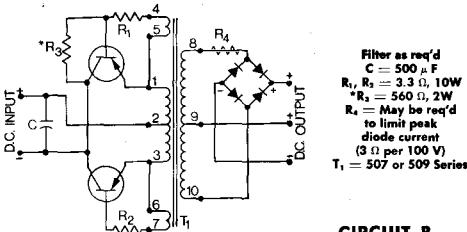

Vacuum
Epoxy
Cast
Toroid

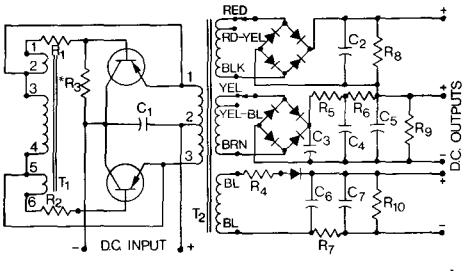

Typical Circuits

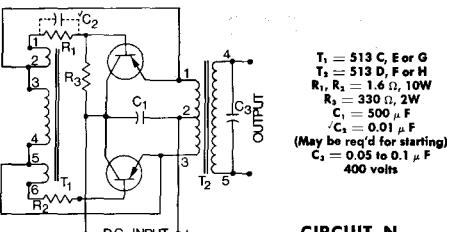

CIRCUIT A

CIRCUIT B

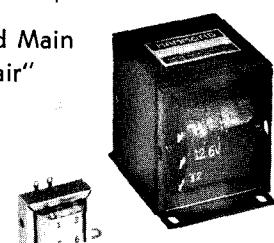

CIRCUIT H

CIRCUIT N

*Value of resistor may vary between 200 and 560 ohms for reliable starting under inductive load or low temperature. Choose transistors with VCE minimum of twice DC input voltage $\pm 10\%$ and IC sufficient for input current.

Switching and Main
"Power Pair"

DC TO DC CONVERTER — TOROIDAL TRANSFORMERS

- Epoxy cast toroidal transformer (See p. 5 details).
- One hole mounting.
- Square loop alloy cores with bifilar windings deliver clean square wave output.
- Produce highly efficient DC to DC converter units.
- The outputs of similar power supplies may be series or parallel connected.
- Typical Circuits A & B.

Cat. No.	DC Input Volts	DC Input Amps	DC Output [‡] Volts mA	Approx. Oper. Freq. Hz	Dia.	Ht.	Wt. Lb.
507 F	12.6	7.0	250/125 210	1500	2 1/16	1 3/8	0.4
507 K	12.6	7.0	300/150 170	1500	2 1/16	1 3/8	0.4
507 M	12.6	7.0	350/175 150	1500	2 1/16	1 3/8	0.4
509 F	12.6	11.0	250/125 400	850	2 1/16	1 15/16	1.0
509 K	12.6	11.0	300/150 335	850	2 1/16	1 15/16	1.0
509 N	12.6	11.0	375/187 270	850	2 1/16	1 15/16	1.0
509 P	12.6	11.0	450/225 220	850	2 1/16	1 15/16	1.0
509 R	12.6	11.0	500/250 200	850	2 1/16	1 15/16	1.0
509 T	12.6	11.0	600/300 165	850	2 1/16	1 15/16	1.0

NOTES — Special units designed for 25.2 or 28V are available, order similar to 509 P except for a D.C. input of 28 volts.

[‡] This is the total mA output from a typical power supply.

DC TO DC CONVERTER — SWITCHING AND MAIN TRANSFORMERS

- For efficient, quiet, high power DC to DC conversion.
- Epoxy cast toroid switching transformer (See p. 5 details).
- Square loop alloy core — bifilar wound — delivers clean square wave switching signal, at approximately 200 Hz.
- Main transformer is open vertical mounting (See p. 5 details).
- Typical Circuit H.

511 E "Switching" Toroid 12.6 V. D.C. Dia. 2 1/16", Ht. 1 3/8", used with 511 F, Wt. 0.4 lb.

511 F "Main" Trans 380 VA., Dim. 3 3/4 x 4 3/4 x 4 1/2" H, Wt. 10.5 lb.

Bias Wdg. 100 V @ 50 mA.

Power Wdg. #1 280 V Tapped at 250 V @ 400 mA D.C.

Power Wdg. #2 425 V Tapped at 375 V @ 400 mA D.C.

Wdgs. #1 & #2 in series will deliver 625, 655, 675, or 705 V @ 400 mA.

◆ 511 G "Switching" Toroid 12.6 V. D.C., Dia. 2 1/16", Ht. 1 3/8" used with 511 H, Wt. 0.4 lb.

◆ 511 H "Main" Trans. 275 VA. Dim. 3 3/4 x 4 3/4 x 4 1/2" H, Wt. 10.5 lb.

Bias Wdg. 100 V @ 60 mA.

Power Wdg. #1 300 V Tapped at 250 V @ 500 mA D.C.

Power Wdg. #2 475 V Tapped at 450 V @ 300 mA D.C.

Wdgs. #1 & #2 in series will deliver 700, 725, 750 or 775 V @ 300 mA D.C. and will simultaneously supply 300 or 250 volts at 200 mA D.C.

DC TO AC INVERTER — SWITCHING AND MAIN — POWER PAIRS

- For inverter power supplies with 12 V DC input and 115 V 60 hertz AC square wave output. Regulation approx. 10%.
- Compact open vertical bracket (See p. 4 details) for the switching transformer, and vertical H mounting (See p. 5 details) for the "Main" transformer.
- Typical Circuit N.

Cat. No.	Function	Input DC Amps	Output VA	Overall Dimensions	Mfg. Cts.	Wt. Lb.
513 C	Switching	—	—	2 1/16 x 1 1/4 x 1 3/16 H	1 3/4	0.25
513 D	Main	6.5	60	2 1/2 x 3 x 3 H	2 x 2 1/2	3.5
513 E	Switching	—	—	2 1/16 x 1 1/4 x 1 3/16 H	1 3/4	0.25
513 F	Main	11.0	100	3 1/8 x 3 1/2 x 3 3/4 H	2 1/4 x 2 3/4	6.0
513 G	Switching	—	—	2 3/8 x 1 3/8 x 1 3/8 H	2	0.30
513 H	Main	20.0	200	2 3/4 x 5 x 4 1/2 H	2 3/4 x 4	13.0

NOTE — Tolerance on output voltage and frequency $\pm 7\%$ at rated input voltage and load.

To minimize switching harmonic radiation, a suitable hash filter should be used between the D.C. source and the converter or inverter (See transistor manufacturer's manual).

Ask for bulletin 507.

HAMMOND

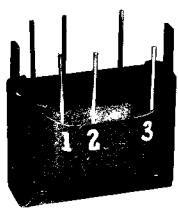

PULSE & TRIGGER TRANSFORMERS

PULSE TRANSFORMERS

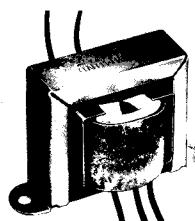

- Available in 3 different mounting types.
- Rise times and insulation suitable for use in SCR firing circuits.
- Special types up to 100KV and high powers available on special order.

610 SERIES

611 SERIES

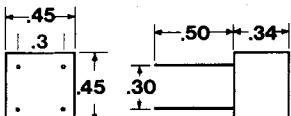

612 SERIES

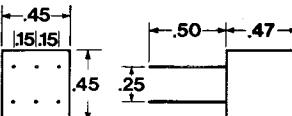

610 SERIES — Epoxy cast with printed circuit pins.

- These may be produced to MIL-T-27 on request.

Cat No.	Ratio	Circuit Volts (max.)	L_p	D.C. Res. (Ω)			Insulation test (rms volts)	Wt. oz.
				R_p	R_{s1}	R_{s2}		
◆610 A	1:1	250	5.2 mH	3.4	3.9	—	1000	0.5
◆610 B	1:1:1	250	4.8 mH	2.1	1.85	2.3	1000	0.5

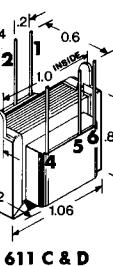

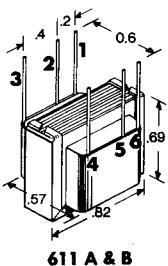

610 A

610 B

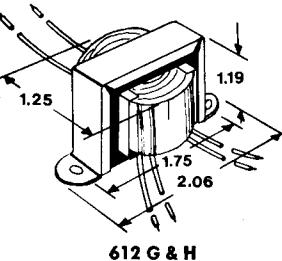

611 SERIES — Open bracket frame with printed circuit pins on 0.1 grid.

Cat. No.	Ratio	Circuit Volts (max.)	L_p	D.C. Res. (Ω)			Insulation test (rms volts)	Wt. oz.
				R_p	R_{s1}	R_{s2}		
◆611 A	1:1	125	8.6	0.45	0.55	—	1000	0.7
◆611 B	1:1:1	125	17.2	1.26	1.0	1.53	1000	0.7
◆611 C	1:1	250	56	3.31	4.46	—	1500	1.2
◆611 D	1:1:1	250	17	1.73	1.31	2.12	1500	1.2

612 SERIES — Open horizontal bracket mounting with 4" flexible leads.

Cat. No.	Ratio	Circuit Volts (max.)	L_p	D.C. Res. (Ω)			Insulation test (rms volts)	Wt. oz.
				R_p	R_{s1}	R_{s2}		
◆612 G	1:1	600	6.6	0.87	0.87	—	4000	8.0
◆612 H	1:1:1	600	1.5	0.45	0.42	0.49	4000	8.0

TRIGGER TRANSFORMERS

- Open cylindrical construction with bare leads.
- Requires switching circuit to trigger primary.
- Used to trigger a capacitive discharge in an electronic photo flash or strobe tube.
- For further application details, ask for Bulletin 616.
- Weighs only 1.0 oz.

Cat No.	Output Kv	Step Up Turns Ratio	Typical Pri. Capacitor μF	Min. D.C. Charge Voltage	Input Energy to Coil Millijoules
◆616 B	4	1:35	0.5	120	3.2
◆616 E	10	1:50	1.0	200	20.0
◆616 G	15	1:60	1.0	250	30.0

SPECIAL PULSE TRANSFORMERS — how to specify *

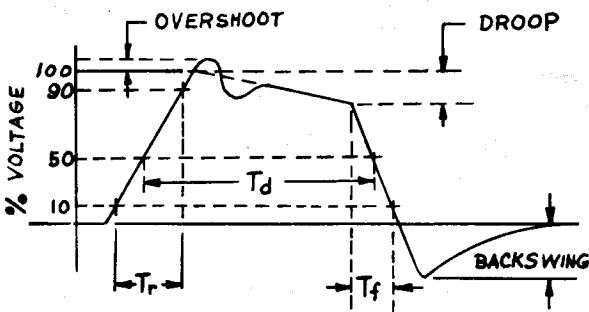

1. Primary voltage (peak) and source impedance (if known).
2. Secondary voltage (peak) and load impedance.
3. Duration of pulse and allowable droop percentage.
4. Rise time, if important (when the ratio of duration to rise time specified exceeds approx. 10:1 cost may increase.)
5. Repetition rate.
6. Type of mounting — epoxy cast with P.C. pins, open with P.C. pins, leads or terminals.

T_d = pulse duration

T_r = rise time

T_f = fall time

* Blocking oscillator transformer characteristics depend greatly on circuitry, and it may be necessary to test a prototype unit in the actual circuit before a final design can be obtained.

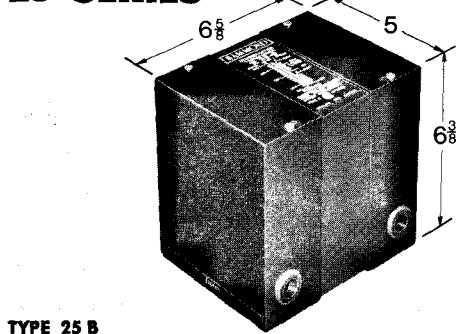

Pulse transformer dynamic parameters

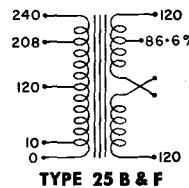

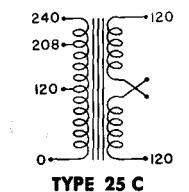

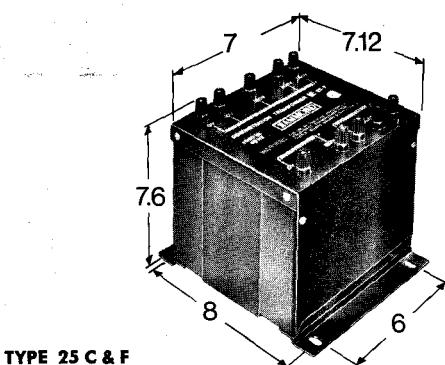

EDUCATION-DEMONSTRATION TRANSFORMERS

HAMMOND

25 SERIES

- For electrical experiments in Technical High Schools.
- Conservative 300 and 1000VA, 240 volt, 60 hertz designs with split secondary.
- Schematic diagram displayed on top of transformer.
- Type 25 C and 25 F are open core and coil models with protective top terminal panels and convenient plastic binding posts for fast experimental connections.
- Type 25 B is supplied in a Type E metal enclosure in which access to screw terminals is through a primary and secondary side cover. Leads may be brought out through side knock-outs.
- Students may demonstrate series, parallel or autotransformer (buck-boost) connections.
- By using two or three units, classes may experiment with three phase combinations including star, delta, open delta and scott-T connections.

Cat. No.	Primary Volts	Secondary Volts	Taps	Ship. Wt. Lb.
◆25 B	240	10, 120, 208	120/240	86.6% 20
25 C	240	120, 208	120/240	nil 50
25 F	240	10, 120, 208	120/240	86.6% 50

NOTE — The 86.6% tap is 86.6% of the two 120V secondary windings in series (208V) or 88 volts of one 120V winding.

RESEARCH AND EDUCATIONAL APPARATUS

HAMMOND supplies various types of transformers for educational demonstration and experimentation in trade and high schools. Both multiple tap devices as illustrated or transformers that can be completely dismantled can be supplied. Special coils and transformers for research projects are also produced to university specifications. Specific inquiries are invited.

26 SERIES

- Compact designs of core and coils may be assembled in classes by students to demonstrate transformer principles.
- Various coil combinations are possible—may be quickly changed in class.
- Primary coil may be placed inside any of the secondary coils and then on opposite leg of core to demonstrate leakage inductance, phase angle, etc.
- Clamping of core with thumb screws allows variations in core gap hence exciting current.
- Rugged 8-32 screw terminals on all coils.
- Each coil is plainly marked for turns, voltage and current.

Cat. No.	Description	Turns	Voltage	Current	Ship Wt. Lb.
◆26 B	Core Assembly	—	—	—	3.5
◆26 D	Secondary	1200T	240V	0.5A	1.5
◆26 F	Primary	600T	120V	1.0A	1.5
◆26 G	Secondary	300T	60V	2.0A	1.5
◆26 K	Secondary	150T	30V	4.0A	1.5
◆26 M	Secondary	75T	15V	8.0A	1.5

WHAT IS A TRANSFORMER?

Fundamental principles of transformers — how they work — how they're made — how they're used — are explained in an eight page introductory brochure entitled "WHAT IS A TRANSFORMER?". It is available free from your HAMMOND distributor or the HAMMOND factory.

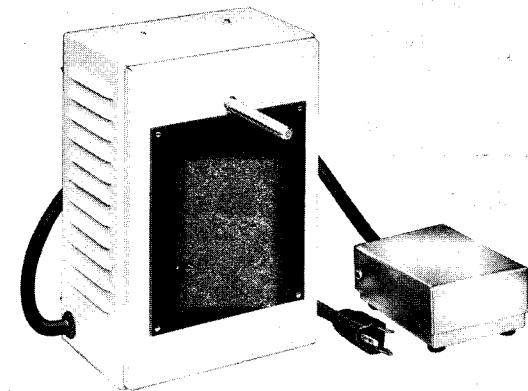

♦ New Product

HAMMOND

TAPE ERASERS, MICROSCOPE & AUTOTRANSFORMERS

UNIVERSAL TAPE ERASER & TOOL DEMAGNETIZER — 115 volt, 60 Hertz

- Magnetic eraser for clearing up to 10½" diameter audio, video and data recording tapes; also suitable for bulk erasing cassette or cartridge tapes.
- For use with plastic, aluminum, or other non-magnetic reels with ½" diameter holes (for larger inside diameters see adaptors listed below).
- High flux density assures minimum signal residue and unusually simple operation. Complete operating instructions on the back.
- May be used to demagnetize tools or components having some residual magnetism.
- Cat. 21 B has on-off toggle switch on the side; Cat. 21 F is supplied with foot switch.
- Capable of erasing tape widths up to ¾" or 1½" by turning tape over for a second pass.
- Heavy 'U ground' plug and 6 foot cord.
- Sturdy formed steel case with durable leather-like greytex finish.
- Non slip rubber feet on bottom and rear surface.
- Ask for Bulletin 5269.
- CSA approved.

Cat. No.	Reel Diameter	Operating Voltage	Current Required	Overall Dimensions L	D	H	Ship. Wt. Lb.
21 B	3, 4, or 5"	115	6 Amps	6 ¼	5 ¾	6 ¼	8
21 F	3, 4, 5, 7, or 10½"	115	14 Amps	6 ¼	5 ¾	9	25

21 W Adapter for EIA Standard Type "A" Hub. Nominal 3" dia. for 10" reels

21 X Adapter Bushing for ¾" inside diameter Reels.

MICROSCOPE TRANSFORMERS

— 115 volt, 60 Hertz, CSA approved

- Safe, foolproof, 2 prong outlet receptacle complete with 6' adapter cord & plug for illuminator (other outlet types available on special order).
- On-Off switch and pilot light on all models.
- Supplied with 6 foot 115 volt line cord & U-ground plug.
- Smooth variable voltage control.
- Black semi-gloss finish on formed steel case.
- Model 20 K includes A.C. ammeter for accurate adjustment & recording of lamp current.

- Clearly marked control scale for recording experiment results.
- Economical to operate — Model 20 D draws 30 VA and Model H & K draws 55 VA at rated load.

Cat. No.	Dimensions H	W	D	Output Volts	Output Amp.	Ship. Wt. Lb.
20 D	3 5/8	3 3/8	4 1/4	3 to 7	3	3.5
20 H	4 5/8	3 5/8	4 1/2	3.5 to 7.5	5.5	5
20 K	6 1/4	3 3/8	4 1/2	3.5 to 7.5	5.5	8

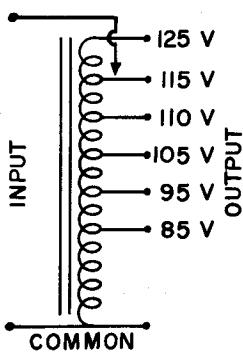

Model 20 D

Model 20 H

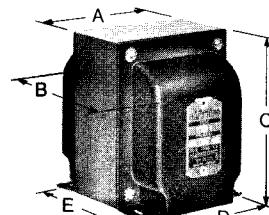

Model 20 K

LINE ADJUSTING AUTOTRANSFORMERS — 200 VA to 2000 VA — 50 OR 60 Hertz operation.

- Input 115 V • Output taps at 85-95-105-110-115-125 V.
- Good regulation from a single correctly proportioned winding.
- Ideal for line voltage adjustment for electronic equipment or small appliance operation (manually adjusted).
- Supplied with 9" to 12" flexible leads. • C.S.A. approved.

Cat. No.	Volt-Amp. Capacity	Core Size	A	B	Dimensions C	D	E	Wt. Lb.
168 B	200	1 ¼ x 1	3 ⅛	3 ¾	3 ¾	2 ½	2	4 ¼
168 C	350	1 ¼ x 1 ¾	3 ⅛	4 ¼	3 ¾	2 ½	2 ¾	6 ½
168 D	500	1 ½ x 1 ½	3 ¾	4 ¼	4 ½	3	2 ½	8
168 E	750	1 ½ x 2 ¼	3 ¾	5	4 ½	3	3 ¼	11
168 F	1000	2 x 1 ¾	5	5 ¼	6 ½	4 ¼	3 ¼	18
168 H	1500	2 x 2 ¼	5	5 ¾	6 ½	4 ¼	3 ¾	23
168 J	2000	2 x 3	5	6 ½	6 ½	4 ¼	4 ½	31

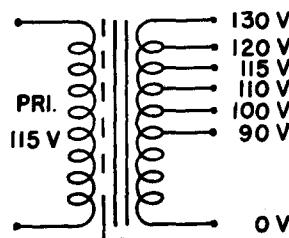

Special designs of these series produced quickly to your specifications.

ISOLATING AND AUTOTRANSFORMERS

HAMMOND

LINE ISOLATING AND ADJUSTING TRANSFORMERS—100 VA to 750 VA — 60 Hz.

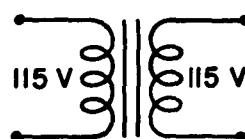

- Primary 115 V • Secondary taps at 90-100-110-115-120-130 V.
- Type X mounting (p. 5 details) with knockouts.
- Electrostatic shield between pri. and sec. for true circuit isolation and minimum leakage.
- Flexible leads 9"-12" long.

Cat. No.	Volt-Amp. Capacity	Core Size	A	B	Dimensions C	D	E	Wt. Lb.
169 C	100	1 1/4 x 1 3/4	3 1/8	4 1/8	3 3/4	2 1/2	2 3/4	6
169 E	250	1 1/2 x 3	3 3/4	5 3/4	4 1/2	3	4	12
169 G	500	2 x 2	5	5 1/2	6 1/2	4 1/16	3 1/2	22
◆169 J	750	2 x 3 1/2	5	7	6 1/2	4 1/16	5 1/16	28

LINE ISOLATION TRANSFORMERS — 15 VA to 200 VA — 60 Hz operation.

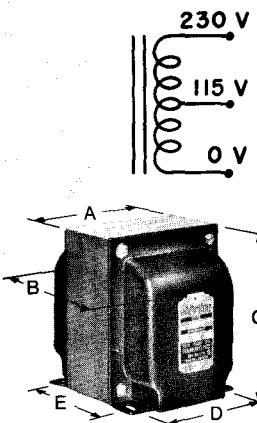

- Type X mounting (see p. 5 details) with knockouts.
- Primary 115 V.
- Secondary 115 V.
- Flexible leads 9" to 12" long.
- Circuit isolation or bias power supply.

Cat. No.	Volt-Amp. Capacity	Secondary Volts	mA	Core Size	A	B	Dimensions C	D	E	Wt. Lb.

LINE AUTOTRANSFORMERS — 50 VA to 2000 VA — 50 OR 60 Hz operation.

- Type X mounting (see p. 5 details) with knockouts.
- 230 V to 115 V step down or 115 V to 230 V step up.
- Operation of European electronic equipment in America or American equipment in Europe.
- Flexible leads 9" to 12" long.

LINE ADJUSTING AND ISOLATING TRANSFORMERS

LINE ISOLATING TRANSFORMERS — CSA Approved "LR 3902"

100 VA to 900 VA — 50/60 Hz.

- 115 V Primary • Secondary 115 V • Circuit isolation.
- Electrostatic shield between primary and secondary.
- 5 foot "U ground" cord and plug • Single outlet receptacle up to 300 VA; 500 & 900 VA have duplex receptacle.

Cat. No.	Input Voltage	Output Voltage	Volt-Amp. Capacity	Core Size	Dimensions					Wt. Lb.
					A	B	C	D	E

LINE VOLTAGE ADJUSTERS - MANUAL OPERATION

173 SERIES — 300 VA & 500 VA — 60 Hz operation — CSA Approved "LR 28732"

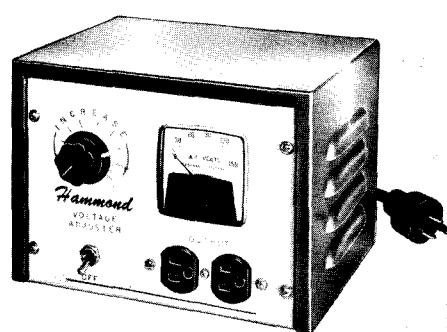

- Two-tone (grey and blue Hammerlin) sturdy steel case.
- Efficient autotransformers allow output to be held at 115 volts with an input voltage varying from 88 to 124 volts.
- Ten point tap switch for accurate voltage adjustment.
- 0-150 V voltmeter for monitoring output voltage.
- 6 foot "U Ground" cord, plug and duplex outlet receptacle.
- Front operated ON-OFF switch. • Dimensions 7½" W x 6¼" D x 5¾" H.

Cat. No.	Max. Output VA	Wt. Lb.
173 C	300	9.5
◆173 D	500	12

174 SERIES — 1000 VA & 1500 VA — 60 Hz. — CSA Approved "LR 28732"

- Sturdy formed steel case with attractive two-tone baked enamel finish (light blue base and dark blue hammerlin cover).
- Efficient autotransformers allow output to be held at 115 V with an input variation of 88 to 124 V.
- Heavy duty 10 point tap switch with silver contacts.
- Wide view 0-150 V voltmeter for monitoring output voltage.
- Six foot "U Ground" cord, plug and duplex outlet receptacle.
- Front operated ON-OFF switch.
- Overall dimensions 9½" W x 7" D x 7" H.

Cat. No.	Max. Output VA	Wt. Lb.
174 F	1000	22
174 H	1500	25

NOTE — Cat. No. 173 D replaces Cat. No. 174 D, Cat. No. 173 C replaces Cat. No. 173.

EQUIPMENT CARRIERS

HAMMOND

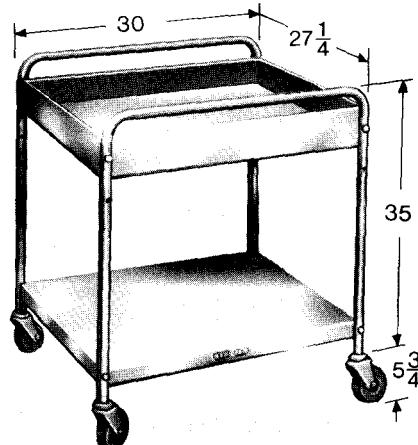

SCOPE DOLLY — 1470 C

- Designed to carry popular types of laboratory oscilloscopes.
- A 16 ga. top deck has a 20 degree slope with adjustable brackets for scope width and depth.
- One-inch chrome plated tubular steel frame.
- Bottom deck 28 x 18 1/2 x 2" complete with non slip rubber mat for carrying VTVM, signal generators, etc.
- Top section has a 3 1/2 x 15 7/8 x 14" deep felt lined 18 ga. probe drawer with 1427 H Handle (Page 58).
- Top hinged 14 ga. 15 7/8 x 10 5/8" front panel provides a convenient writing surface and access to an equipment storage compartment for scope pre-amplifiers, etc.
- Rear of top section has a 16 x 5" removable auxiliary mounting panel covering an opening of 4 1/8 x 15 1/8".
- Punching for a duplex receptacle each side of top section with a hole and 5/8" grommet at rear for a line cord.
- 5" rubber casters provide 300 lb. load capacity — two at rear are fixed — two at front are swivel casters with braking devices.
- Finished in standard ASA 61 grey baked enamel.

1470-C—Approximate overall dimensions 32 1/4 L x 18 1/2 W x 40 H. Ship. wt. 85 lb.

EQUIPMENT/PARTS CARRIER — 1470 P

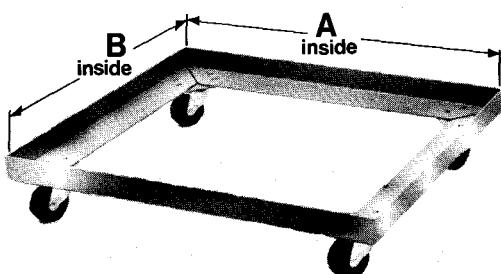

- Designed to carry auxiliary test equipment, components or lab materials.
- One-inch chrome plated tubular steel frame with two 14 ga. steel decks.
- Reversible top deck 30" x 24" x 6" adjustable 4" down on pre-drilled holes.
- Bottom deck 30" x 24" x 2" has punchings on both sides for duplex receptacles and a hole with 5/8" rubber grommet at rear for a line cord.
- Rubber 5" dia. casters — two at rear are fixed — two at front are swivel casters with braking devices.
- Finished in standard ASA 61 grey baked enamel.

1470 P—Approx. overall dimensions 31 1/2 L x 27 1/4 W x 40 3/4 H. Ship wt. 65 lb.

ON SPECIAL ORDER

- 4 swivel casters — special paint finishes.
- models with stainless steel decks — order as 1470 PS.

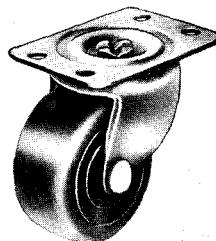

CABINET DOLLIES — 1424 SERIES

- Designed to give mobility to equipment housed in table or floor racks.
- Constructed of 1/8" steel angles. • Load capacity approx. 600 lb.
- Four stock ball bearing type swivel hard rubber casters (1425 A).
- Standard ASA 61 grey baked enamel finish.
- Model 1424 T has solid platform with suitable holes to mount relay racks.

Cat. No.	A	B	For Cabinet	Ship Wt. lb.
1424 B	21 1/2	16 3/4	1460, 1, 2	15
1424 G	22 3/4	17 3/4	1463-1, 1469-1	16
1424 J	22 3/4	24 1/4	1463-2, 1469-2	20
1424 K	27 3/4	24 1/4	1463-4, 1469-4	25
◆1424 T	28	21 1/2	1466, 1467	35

CASTERS — 1425 SERIES

- For use on stock consoles, cabinets or racks.
- Ball bearing swivel type hard rubber wheels.
- Supplied in sets of 4 with mounting hardware.

Cat. No.	Size of Wheel	Overall Height	Capacity Per Set (4)	Ship Wt. Lb. Per Set (4)
1425 A (sets of 4)	2"	2 1/2	600 lb.	4
1425 B (sets of 4)	3"	3 3/4	360 lb.	6
1425 C (sets of 4)	4"	5	640 lb.	6
1425 D (sets of 4)	4" (with brake)	5	800 lb.	15

Special designs of these series produced quickly to your specifications.

GENERAL FEATURES

- Sold completely assembled
- All models have 2-fixed and 2-swivel 4" wheels except 1470 E which has 4 swivel wheels, providing a total capacity of 640 lbs.
- Finished in ASA 61 grey baked enamel
- Welded steel construction uses 16 ga. frame and bottom with 18 ga. shelves, except the 1470 T

SCOPE DOLLY - ♦1470 E

- More economical than the 1470 C
- Suitable for most laboratory oscilloscopes
- Clearance of 11" between bottom and second shelf
- Top has 20° slope with back stop and width guides to strap scope in position
- Rear of dolly is punched for standard duplex receptacle
- Standard 1427 L Pull Handle installed on front
- Overall dim. 37" H x 18" W x 26½" L (less handle)
- Ship wt. 52 lb.

ECONOMICAL LAB EQUIPMENT DOLLY - ♦1470 Q

- Companion to the 1470 E Scope Dolly
- Flat top design suitable as mobile work surface
- Punched to accept standard duplex receptacle
- Overall dim. 33" H x 18" W x 28½" L
- Ship wt. 60 lb.

3-SHELF MOBILE TOOL STAND - ♦1470 R

- Useful in work shops, maintenance departments, tool rooms, stock rooms and service departments
- Clearance of 12" between middle and bottom shelves and 10½" between top and middle shelves
- Overall dim. 33" H x 18" W x 28½" L
- Ship wt. 42 lb.

4-SHELF MOBILE TOOL OR PROJECTOR STAND - ♦1470 S

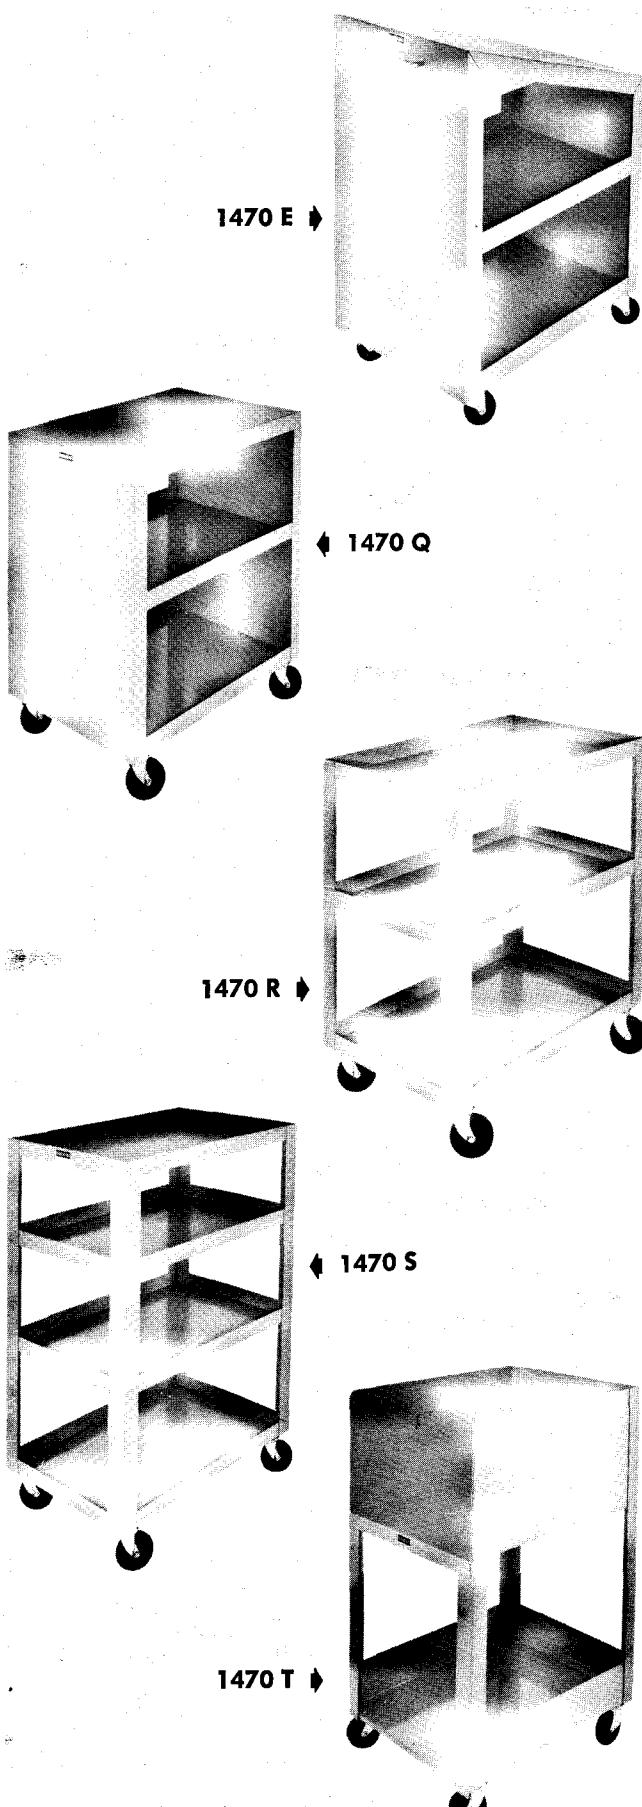

- Similar to 1470 R except height 42" with additional shelf
- Extra height makes it a useful projector dolly with ample space for film storage
- Clearance between shelves from top to bottom is 8", 10" and 12" respectively
- Overall dim. 42" H x 18" W x 28½" L
- Ship wt. 54 lb.

WAREHOUSE TOTE TRUCK - ♦1470 T

- Ideally suited for picking and placing orders in stock rooms and storage areas
- 18" clearance between top tray and formed sides of bottom tray with a 21½" clearance at front opening of bottom tray
- Top tray has 14" sides, open at front for easy loading
- Welded steel construction uses 12 gauge frame and 14 gauge top tray
- Overall dim. 42" H x 21¼" W x 26½" L
- Ship wt. 78 lb.

5034 B

5034 D

5034 F

GENERAL DESCRIPTION - 5000 SERIES

- For supervisory control and instrumentation systems — electrical, pneumatic, or hydraulic — in the communication, entertainment, automation, machine tool, and broadcast fields.
- Modern, versatile, flexible, basic consoles, tables and turrets can be readily designed into modern systems.
- Will stand the rugged environment of industry, research or education facilities.
- Many adaptations and combinations are possible using other accessories from this catalogue.
- Manufactured from cold rolled steel with particular attention to providing a high quality metal finish — standard baked ASA 61 grey enamel.
- Working surfaces are supplied with grey linoleum and attractive anodized aluminum trim mold.
- Units have four levelling feet.
- Ask for Bulletin 5060.

COMMON FEATURES - 5034 SERIES

Each pedestal on all consoles is equipped with the following

- Two standard 10½" steel panels (5-1050 p. 49).
- Removable, rear panel complete with a keyed lock (1427B p. 58).
- Two sets of panel rails, drilled and tapped for 10-32 screws on standard EIA/RETMA rack spacings of ½"- 1¼" facilitating the mounting of panel equipment both front and rear.
- Two vertical stainless steel dress trims to cover panel screws.
- One 4" high leg bolted to each pedestal except the 5034 B.

SMALL CONSOLE - 5034 B

- Top dimensions 26" x 30".
- Body dimensions 22½" W x 26" D x 30" H.
- Suitable for use with a single turret, Cat. No. 5036 B or 5036 L.
- Ship wt. 125 lb.

MEDIUM CONSOLE - 5034 D

- Top dimensions 53" x 30".
- Body dimensions 49" W x 26" D x 30" H.
- Adds knee hole comfort and larger work surface to the smaller 5034 console.
- Baffle (modesty) panel joins rear of pedestal to large support leg.
- Suitable for use with double turret 5036 D or 5036 N.
- Pedestal may be assembled on either left or right side by means of prepositioned weld nuts.
- Ship wt. 190 lb.

LARGE CONSOLE - 5034 F

- Top dimensions 70" x 30".
- Body dimensions 66" W x 26" D x 30" H.
- Provides larger work surface and additional panel space of two pedestals joined by a rear baffle (modesty) panel.
- Will accommodate a triple turret 5036 F or 5036 Q.
- Ship wt. 250 lb.

HAMMOND

LAB BENCHES TABLES AND TURRETS

LAB BENCH CABINET — 5034 Y

- Top Dim. 70 x 30; Body Dim. 66 x 26 x 37½ H.
- Provides both extra equipment storage facilities, and additional working surface for industrial, educational, or research laboratories.
- Top and body dimensions same as 5034 F except 37½" high.
- Unit sits on two 4" legs as do all 5034 consoles.
- Three right hand piano hinged doors 28½" high.
- Doors have flush lock (1427 B p. 58) providing access to a 19¼" deep full length interior shelf.

EQUIPMENT TABLES — 5035 SERIES

- Designed to support heavy equipment loads in research, educational or industrial laboratories, or for use wherever a rugged work table is required.
- Assembled from the same basic components as the consoles, except equipped with two support legs and reinforcing tie rail.
- Pedestals may be added by using pre-positioned weld nuts.
- Three convenient sizes match the 5034 console and 5036 turret series.

Cat. No.	Overall Height	TABLE TOP		Ship. Wt. Lb.
		Length	Width	
5035 B	30	26	30	80
5035 D	30	53	30	120
5035 F	30	70	30	150

NOTE: Baffle (modesty) panel between legs available on specified order.

TURRETS — 5036 SERIES

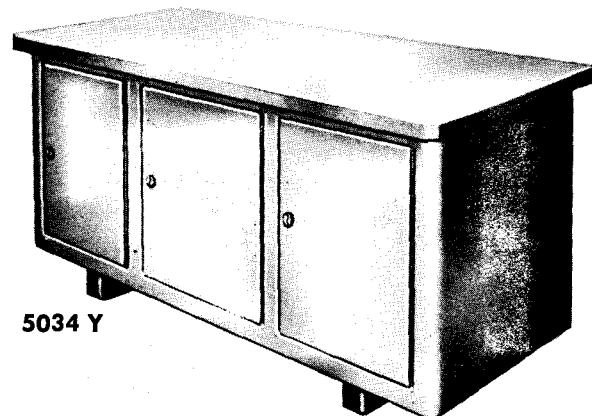

- For control systems designed with operator comfort and efficiency in mind.
- Two panel angles available — 30 and 10 degrees to the vertical — 10° units designed for housing panel supported chassis.
- Each turret supplied with removable ventilated rear panel with keyed lock (1427 B p. 58).
- Double and triple units have removable interior partitions.
- Flange below rear panel punched with knock outs for cable or conduit entrance.
- Each turret section is supplied with standard 19" steel panel.
- Stainless steel dress trim supplied to cover panel screws.
- Ask for bulletin 5036.

CABINET RACKS

HAMMOND

1463 SERIES

Front View with
Optional Solid Door

Front View

ON SPECIAL ORDER — Refer to the Factory

- Non standard sizes.
- Special paint or enamel finishes.
- Solid rear door, identify by adding R to solid front door part number, e.g. 1463 C1SR.
- Panels, side sheets or doors drilled to customer specifications.
- Special panel rails drilled and tapped to accept 10-24 or 12-24 screws.

FEATURES

- Flexible, versatile, modern cabinets for 19 or 24" panel mounting equipment, standard ASA 61 gray baked enamel finish.
- All-welded 16 ga. formed steel body on heavy 14 ga. steel base.
- All vertical edges rounded with $\frac{3}{4}$ " radius.
- One pair vertical 10 ga. panel rails, drilled and tapped for 10-32 screws, on standard EIA rack spacing of $\frac{1}{2}$ - $\frac{1}{4}$ " are fully adjustable front to back on 6 horizontal Amhal struts.
- Readily removable louvred rear door on steel pin hinges with flush type keyed lock. (1427 B see p. 58).
- Bottom $9\frac{1}{2}$ " \times $9\frac{1}{2}$ " cut out with removable cover plate for cable or conduit entrance.
- Two $1\frac{1}{2}$ " \times $\frac{3}{4}$ " conduit knock out provided in flange below rear door.
- One pair vertical 12 ga. Z rails for rear support of panel mounted equipment are fully adjustable front to back.
- Four cable clips welded at the rear on the right hand side.
- Stainless steel dress trim strips for top front of cabinet and to cover vertical panel rail screws. (See p. 58—1421 Q Series for replacements.)
- For complete details refer to Bulletin #1463.

OPTIONAL ACCESSORIES — SEE TABLE BELOW (order separately)

- For general accessories such as chassis, panels, brackets, etc., refer to the following pages of this catalogue.
- Louvred or solid front door with 1427 A automotive handle (cabinet door frame pre-drilled for hinges and door stops).
- Extra pairs of vertical panel rails or Z rails complete with mounting hardware.
- Three spring loaded nuts, washers and bolts for attaching devices to horizontal Amhal struts — order 1463 S.
- Convenience duplex receptacle box with mounting hardware for attaching to horizontal struts — order 1463 R.
- CSA approved 120 volt U-ground A.C. distribution strip with receptacle spacings of 6 inches available in 4 lengths, fully adjustable on horizontal Amhal struts.
- Copper ground bus strip $\frac{1}{8}$ " \times $\frac{5}{8}$ " drilled to suit standard Amhal struts complete with hardware.

HAMMOND

MODULAR RACKS

1469 SERIES

- Modular all welded 14 ga. formed steel frame with open sides.
- Removable louvered rear door, with square corners on concealed pin hinges with flush keyed lock (1427 B p. 58).
- Rack and dress panels have a modern angular appearance.
- May be joined to companion units with six conveniently supplied bolts to form sturdy equipment housings.
- One pair of vertical 10 ga. panel rails drilled and tapped for 10-32 screws on standard EIA rack spacing of $\frac{1}{2}$ - $\frac{1}{4}$ " are fully adjustable on horizontal Amhal struts.
- One pair adjustable 12 ga. Z rails mounted on Amhal struts.
- Two $\frac{1}{2}$ x $\frac{3}{4}$ " conduit knockouts provided in flange below rear door.
- Cut out in bottom $9\frac{1}{2}$ "x $9\frac{1}{2}$ " for cable or conduit entrance with bolted coverplate.
- Standard ASA 61 grey baked enamel finish.
- Two stainless steel vertical dress trims covering panel screws (replacement strips available, see p. 58).
- One set of 8 wiring clips — 4 each front and rear.
- For complete details refer to bulletin 1469.

1469 E4
(less accessories)

1469 E4 with optional formed dress panels, front door and extruded aluminum dress trim.

PRINTED CIRCUIT CARD RACK

HAMMOND

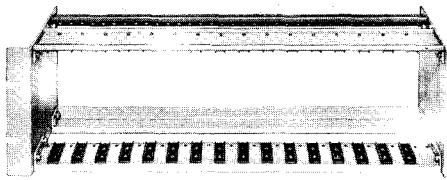

1499 SERIES

The 1499 system is designed for heavy duty p.c. card service in the industrial and communication field. When installed in companion racks or cabinets such as the 1428, 1459, 1460, 1463 or 1469 from other sections of this catalogue, p.c. designs emerge with a professional and neat appearance.

- From formed 16 & 14 ga. steel, ASA 61 grey baked enamel finish for industrial service in 19" racks to EIA/RETMA panel standards.
- Each model is assembled and ready to accept most popular p.c. connectors and cards with minimum of effort.
- Front guide accepts p.c. cards from $\frac{1}{2}$ to $\frac{3}{2}$ " without modification—32 supplied.
- Card spacing minimum of $\frac{1}{2}$ " — 32 usable positions.
- Attractive card and chassis panels with handles are available.
- Front p.c. card guides are easily snapped in place and provide some side grip for positive card insertion.
- Connector mounting and guide rails adjustable so that system can be totally enclosed.
- Front upper and lower guide plates form a base for card identification strips and panel stop.

CAGE (STEEL) — 19" RACK MOUNTING — 5 $\frac{1}{4}$ " panel space — two standard depths

HAMMOND

VENTILATING BLOWERS & PANELS

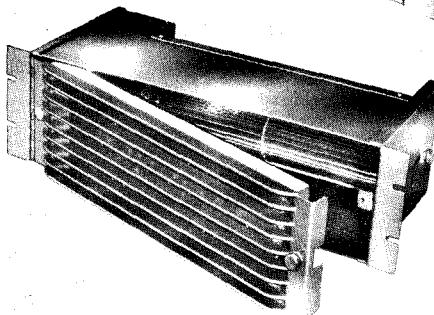

INTAKE AND EXHAUST BLOWERS — 1475 series

- Uses a tangential fan noted for its unusual low noise level and minimum vibration.
- Both motor and impeller bearings can withstand ambient temperature up to 100°C and are adequately oiled for up to 5000 hours.
- Under normal operating conditions, with regular maintenance, a motor and impeller bearing life in excess of 30,000 hours can be expected.
- The blower housing is constructed of 14 gauge steel sides and 18 gauge steel top and bottom.
- For standard EIA 19" rack mounting requiring 5 1/4" panel space.
- Steel bar grill with piano hinge to provide easy access to the filter and fan for regular maintenance.
- Finished in ASA 61 grey baked enamel.
- Appearance is compatible with 9-175 G and 9-350 G baffle panels.
- Operates on 120 volts AC, 60 Hertz at 0.63 amperes (free air).
- Three-wire line cord and SPST toggle switch supplied loose.
- Ask for bulletin 1475.

INTAKE BLOWER — ♦1475 C

- Supplied with a completely washable aluminum filter.
- May be adjusted to one of seven different positions by means of three thumb screws and repositioning the deflector plate.
- Provides up to 120 cfm.
- Ship Wt. 14.6 lb.

EXHAUST BLOWER — ♦1475 H

- No filter supplied.
- Motor and impeller mounted in one fixed position.
- Provides up to 190 cfm.
- Ship Wt. 14.0 lb.

FILTER — ♦1475 R

- Aluminum filter completely washable.
- Replacement filter for 1475 C blower only.

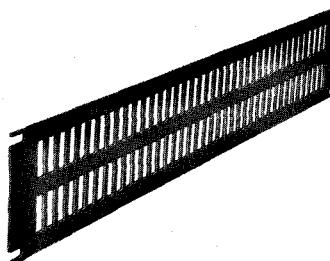

FILTER COAT — ♦1475 Q

- 1 pint, pressurized container.
- Provides an adhesive with grease-like consistency, which absorbs and traps dust particles.
- Shipping weight — 1.2 lb.

ECONOMICAL VENTILATING PANELS

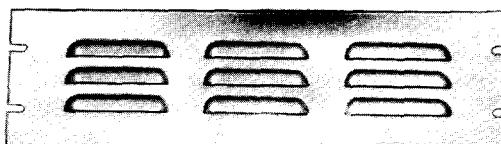

- 14 gauge 19" steel panel notched to EIA 1 1/2"-1 1/4" standard.
- Punched with 39 1 x 1/4" slots per row.
- Finished in standard ASA 61 grey baked enamel.

FUNCTIONAL VENTILATING PANELS

- An economical yet efficient method of ventilating equipment cabinets.
- Formed 16 gauge steel panels notched to standard EIA 1 1/2"-1 1/4" spacings to mount in any 19" Hammond cabinet.
- Punched with three rows of standard 4" louvers.
- Two models — with louvers punched inwards.
 - with louvers protruding outwards.
- Standard ASA 61 grey baked enamel finish.

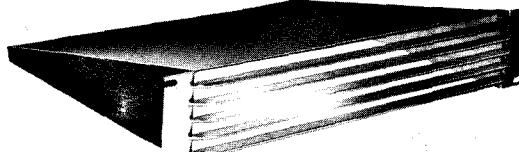

Cat. No. 5-525 VT For louvers inwards. Ship. Wt. 2 1/4 lb.

Cat. No. 5-525 VB For louvers outwards. Ship. Wt. 2 1/4 lb.

VENTILATED BAFFLE PANELS

- A modern distinctive method of ventilating equipment cabinets.
- Steel bar grills is finished in either bright chrome or ASA 61 grey baked enamel finish.
- Rear sloping aluminum baffle for directing air flow has a bright natural finish on bottom for reflecting heat and dull black on top for absorbing heat.
- Unit has an overall depth of 13 7/8" with flanges notched to standard EIA 1 1/2"-1 1/4" spacings.

Note — Paper covered panels are not painted.

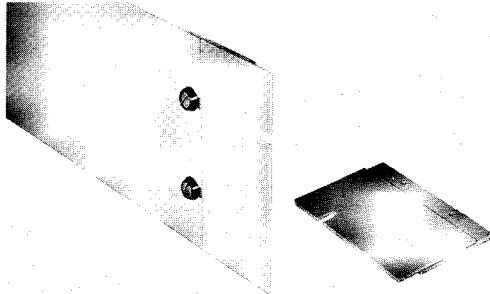

FORMED STEEL PANELS

ON SPECIAL ORDER

- Panels with alternate oval holes in place of slots.
- Formed panels available for 24" mounting rails — order with prefix 2 (e.g. 2-350 F).
- Panels modified with punching and brackets to accept tape recorders, meters and other recording instruments.
- Panels for 23" rack mounting available — specify by description.
- Grey hammerlin finish for matching purposes or special paint finishes to your specifications.

PANEL ADAPTORS

- Complements the series of flat panels by providing a line with $\frac{1}{2}$ " folded flange top and bottom edges for additional rigidity.

• Slotted to standard EIA $\frac{1}{2}$ - $1\frac{1}{4}$ spacing for 19" mounting rails.

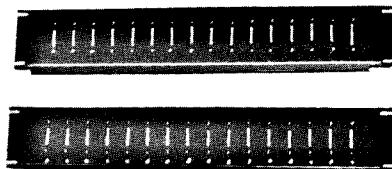

• Made of 16 gauge (.060) steel. • Standard ASA 61 grey baked enamel finish.

SPECIAL RACK & CHASSIS PANELS

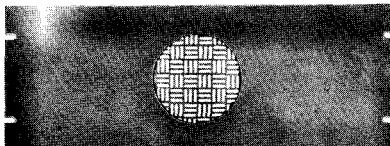

HAMMOND

ACCESS DOOR RACK PANEL

- Designed to allow immediate access to controls, tubes, transistors, relays, or to make minor adjustments, yet prevent unauthorized entry.
 - Supplied with sufficient space below door to mount a standard chassis to the panel.
 - Made from 14 gauge steel on standard 19" widths and 10½" high with standard EIA ½"-1¼" notchings.
 - Continuous hinged 15" x 6" door is spaced 3½" from bottom.
 - Supplied with flush keyed lock and two keys.
 - Standard ASA 61 grey baked enamel finish.
- Cat. No. **5-1050 DS** Ship. Wt. 5 Lb.

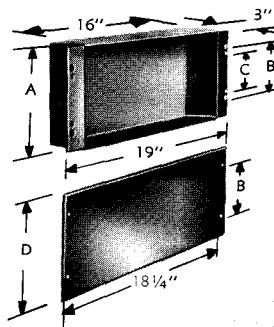

SPEAKER PANELS

- 14 gauge 19" steel panel notched to standard EIA ½"-1¼" spacings.
- Openings for 5" and 8" speakers covered with steel grille.
- Standard ASA 61 grey baked enamel finish.

Cat. No.	Height	Speaker Size	Ship. Wt. Lb.
5-700 S	7"	5"	2½
5-1050 S	10½"	8"	3½

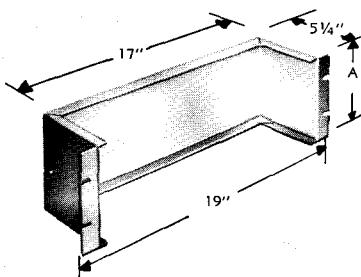

DEPRESSED CHASSIS PANELS

- Chassis unit and panel made from 14 gauge steel.
- A convenient method of mounting key equipment or rack mounted amplifiers, etc.
- Screws supplied for mounting chassis unit to panel rails.
- Standard ASA 61 grey baked enamel finish.

♦ New Product.

Special designs of these series produced quickly to your specifications.

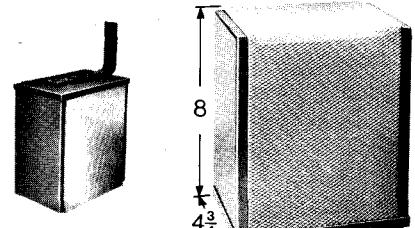

The following metal products are types that have been made for several years. (In many cases, new products may be substituted.) Since demand for these indicates a downward trend we list them separately and when necessary can still be ordered. Further details on each series will be found on other pages of this catalogue, or previous catalogues.

TWO-WAY SPEAKER ENCLOSURE — 1408 SERIES

- Two tone baked enamel finish.
- Four rubber feet supplied.
- Mounts to wall with wire concealing 'L' bracket supplied.
- Mounts direct to 4" junction box on walls or ceiling.
- Knockout for 1/2" conduit for pedestal mounting and cable entrance.
- Supplied with a 6", 3.2 ohm P.M. speaker mounted on a minimal steel baffle.

Cat. No. **1408 ET** — Blue hammerlin body and light grey grille. Ship. Wt. 4½ lb.

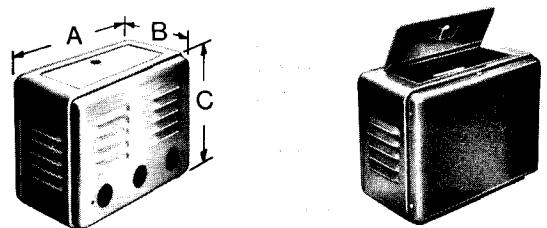

Cat. No. **1408 EG** — Beige body and ivory grille. Ship. Wt. 4½ lb.

MULTI-USE CABINETS — 1402 AND 1403 SERIES

- All purpose steel cabinet with smooth rounded corners.
- Front panel is removable for easy drilling and assembly.
- Ventilating louvers on sides and fixed rear panel.
- Rear openings provide cable or lead entrance.
- Hinged access lid supplied on 1403 models only.
- Equipped with four rubber feet.

CUSTOM METAL FABRICATION FACILITIES

For industrial customers and OEM's, the HAMMOND factory produces custom cabinets and cubicles for electronic, pneumatic and hydraulic controls. We handle metal fabrication projects of varying complexity in stainless, light structural steel and aluminum as well as sheet and plate materials up to $\frac{1}{4}$ " thick. The fully integrated factory puts 'in plant' shearing, N/C punching, folding, welding and high quality paint finishing at your disposal. Our Engineering group prepares functional, attractive and economical designs and our factory staff is highly trained and specially selected to insure emphasis on quality. We welcome your inquiries during the initial design stages. Send your sketches, drawings or specifications for a prompt quotation.

G U A R A N T E E

We guarantee Hammond products to be free from defects in workmanship or material, and will, without charge, replace or repair within one year from date of shipment from our factory any products that may be found defective upon inspection at our factory. This guarantee does not obligate us where products have been subjected to careless handling, improper application or faulty installation, and we expressly disclaim any obligation, guarantee or liability whatsoever except as above stated.

Head Office and Plant.

Hammond Manufacturing Company is devoted to the design and production of high quality iron core components and fabricated metal products for the electrical and electronic industries in North America. In the modern 185,122 square foot plant, emphasis is on quality, service, and flexibility.

Since 1927 this Company has continually earned and retained the respect and confidence of its customers. Hammond and its technical staff are proud to act as component headquarters for the demands of a changing industry.

Popular sizes of HAMMOND products are stocked in leading distributor warehouses.
