THORDARSON MEISSNER is pleased and proud to supply you with this new pocket replacement guide. More than 500,000 copies are already in circulation. As you know, these are updated frequently with new exact replacement recommendations.

THORDARSON, established in 1895, is the oldest electronic company in existence, and has continuously served the independent electronic parts distributors and dealer/technicians since the inception of the industry. Our engineers are internationally known and respected, having pioneered yoke and flyback development since 1940's, and designed and built the first flame-retardant flybacks in the 1960's. Today we design and build thousands of original equipment flybacks and yokes as well as replacement parts for O.E.M. distribution. These contacts with low cost original equipment components enable us to improve the design and quality of the exact replacement components sold through TM distributors. All THORDARSON color flybacks are flame-retardant, as an example, even though they almost always cost you less than the inferior original equipment part.

We appreciate your use of THORDARSON MEISSNER replacement parts, and your support of your independent electronic parts distributor.

When the first letter in the Admiral part number has no significance (A, B, C, D & E) it is replaced with a dash (-) or a parenthesis () to eliminate duplication. When letters such as L, M, N, K, Z appear the part is affected and they should be used.

SPECIAL APPLICATION FLYBACKS AND YOKES

THORDARSON has over 600 stock TV flybacks and over 250 stock yokes which could solve your high voltage transformer or deflection yoke requirements off-the-shelf. There are many advantages using a stock item in special circuit applications including low prototype cost and fast delivery. Also, future availability, even in small quantities, can be assured. Your **THORDARSON** distributor has a complete list of available items.

TV EXACT REPLACEMENTS

THORDARSON has the most complete line of TV exact replacement transformers in the industry. Color television flybacks, yokes, vertical output and power transformers are designed and manufactured as exact replacements for virtually all popular makes and models and many older black and white types are available too.

☆☆☆☆☆☆☆☆ *Notes* ☆☆☆☆☆☆☆☆

1. Mounting difference.
2. Peaking coils require use of original value resistor in parallel.
3. Terminal number differences.
4. Reverse yellow and black leads.
5. May require removal or addition of some ringing components.
6. Jumper terminals 1 and 3.
7. Connect windings in series and use as autoformer.
8. Lead difference exists. Connect as in original circuit.
9. Cut off plug and connect same as original.
10. Use original mounting bracket.
11. Splice leads if necessary.
12. Use original plug.
13. Lead colors not same as original.
14. Change lead connections to terminals or plug per original.
15. Remove or add jumper per original as required.
