INTEGRATED COLOR FLYBACKS

Thordarson produces state-of-the-art Flybacks with silicone or epoxy encapsulation. Available in our Standard line as well as custom designed units.

VOLTAGE MULTIPLIERS

Thordarson TECH-MATE™ Exact replacement multipliers provide virtually complete coverage and fit precisely.

SEMI CONDUCTORS

Bipolar Transistors
Field Effect Transistors, Diodes
Zener Diodes
Linear Circuits

THORDARSON-MEISSNER

TV REPLACEMENT Parts Guide

TVPG-15

THORDARSON MEISSNER presents you this new pocket replacement guide. More than 600,000 copies are already in circulation. As you know, these are updated frequently with new exact replacement recommendations.

THORDARSON, established in 1895, is the oldest electronic company in existence, and has continuously served the independent electronic parts distributors and dealer/technicians since the inception of the industry. Our engineers are internationally known and respected, having pioneered yoke and flyback development since 1940's, and designed and built the first flame-retardant flybacks in the 1960's. Today we design and build thousands of original equipment flybacks and yokes as well as replacement parts for O.E.M. distribution. These contacts with low cost original equipment components enable us to improve the design and quality of the exact replacement components sold through TM distributors. All THORDARSON color flybacks are flame-retardant, as an example, even though they almost always cost you less than the inferior original equipment part.

We appreciate your use of THORDARSON MEISSNER replacement parts, and your support of your independent electronic parts distributor.

MFR'S PART	REPLACEMENT	MFR'S PART	REPLACEMENT	MFR'S PART	REPLACEMENT	MFR'S PART	REPLACEMENT
When the first letter in the Admiral part number has no significance (A, B, C, D & E) it is replaced with a dash (-) or a parenthesis () to eliminate duplication. When letters such as L, M, N, K, Z appear the part is affected and they should be used.

SERVICE NOTES

1. Mounting difference.
2. Peaking coils require use of original value resistor in parallel.
3. Terminal number differences.
4. Reverse yellow and black leads.
5. May require removal or addition of some ringing components.
6. Jumper terminals 1 and 3.
7. Connect windings in series and use as autoformer.
8. Lead difference exists. Connect as in original circuit.
9. Cut off plug and connect same as original.
10. Use original mounting bracket.
11. Splice leads if necessary.
12. Use original plug.
13. Lead colors not same as original.
14. Change lead connections to terminals or plug per original.
15. Remove or add jumper per original as required.
16. Use original anode cap.
17. Cut "G" lead at surface of failed multiplier. Strip and connect to "G" terminal of replacement.
