EXPLANATION OF THE TABULATION.

MANUFACTURER'S NAME. The manufacturer's name is given in the first column, the principal name, or the name by which the manufacturer has been commonly known, being given first and thus determining the alphabetic position. Where a manufacturer might occur in two or more alphabetic positions, depending on how the name was read, references appear in the tabulation at the proper places.

Where a company used several different corporate names, the tabulation is given under the last name used by the company which manufactured the receivers, and references are given at the points corresponding to the other corporate names.

YEAR. The years given in the second column are the years in which the manufacturer was nationally advertising. They are calendar years, not radio seasons. In some cases, manufacturers were in business before they began to advertise nationally and in other cases, they continued in business after they had discontinued national advertising. Years before or after the period of national advertising are not shown in the tabulation.

MODEL NUMBER AND NAME. Wherever a model number was used and advertised, it appears at the left of the "Model Number and Name" column. Where the model had a name only, this is given. If there was both a number and a name, both are stated.

Trade Names, where they apply to only a part of the models, or to a single year, are given in the "Model Number and Name" column. Trade names that were used continuously are given in quotation marks under the name of the manufacturer in the first column.

PRICE. The prices given are the first advertised Eastern prices. No account is taken of subsequent reductions. Prices are given as stated in the advertising, but where two prices were given, one with tubes and one without, the price without tubes is listed.

In some cases, the price and technical information, although not appearing in the advertising, has been taken from previous published lists and summaries, where these were known to be authentic.

STYLE. This column gives the general style of the receiver, particularly with respect to cabinet or housing. The following abbreviations have been used:

ch	chassis only
B	Breadboard
T	Table Model
MT	Metal Table
C	Console
D	Desk Type Floor Cabinet
S	Spinet Type Desk Cabinet
P	Phonograph Panel
RP	Radio and Phonograph Combination
HB	High Boy
LB	Low Boy
KD	Knocked Down
Por	Portable
GE	Glass Enclosed
M	Midget or Mantel
CL	Consolette
CT	Console Table
CHB	Console High Boy

Over 50,000 facts, accumulated from hundreds of publications, are included in this tabulation. Every effort has been made to secure accuracy and completeness in the work of compilation, and every bit of information that could be found has been given. Nevertheless, there are many manufacturers for which the data is incomplete. Additional data, properly documented so that it may be verified, will be welcomed.

A	Automobile Set
CC	Clock Cabinet
Mldd	Moulded Case
B/P	Blue Prints only

DIALS (D). The column headed D gives the number of primary tuning controls. No account is taken of additional vernier or compensating controls in receivers using the "master control" system. The number of dials is stated only where it could be definitely determined, either from the advertising, a picture of the receiver, or an examination of a sample receiver. In general, all receivers of 1927 and later had single control.

TUBES (T). The column headed T gives the number of tubes. In the case of AC operated sets, the rectifier tube is included. Ballast tubes and voltage regulator tubes are not included.

POWER (P). The column headed P gives the type of power supply. The following abbreviations are used.

A	Alternating Current Supply
B	Dry Batteries
D	110-Volt Direct Current
E	Either Storage or Dry Batteries
S	Storage Battery for Filament Supply

No distinction is made between 25 and 60 cycle models.

CIRCUIT AND STAGES. The type of circuit is stated on the left hand side of the column. The following abbreviations are used;

C	Crystal Detector
D	Vacuum Tube Detector (only)
DA	Detector and 1 Audio Stage
DAA	Detector and 2 or more Audio Stages
RF	Untuned Radio Frequency Amplification
TRF	Tuned Radio Frequency
Neut.	Neutrodyne
SH	Superheterodyne
SG	Screen Grid Tuned Radio Frequency
RFX	Reflex (Tuned or Untuned)
Reg.	Regenerative
P.T.	Pretuner
RFL	Radio Frequency Laboratory Circuit

The number of stages is given at the right hand side of the column. Four kinds of stages are indicated, in the following order; untuned, tuned, intermediate (in Superheterodynes), and audio. A dash is used where there were no stages of that kind. For example, - 2 - 2 means a tuned radio frequency circuit having 2 tuned radio frequency stages, and 2 audio frequency stages. Another example, 1 2 2 2 means a superheterodyne receiver having an untuned input stage, 2 tuned radio frequency stages, 2 intermediate frequency stages and 2 audio stages.

A push-pull output stage is indicated by an asterisk (*). Where 4 tubes, or 6 tubes, are used in parallel push-pull in the output stage this is indicated by a number sign (#).

THE 1931-1932 CATALOGUE

INTRODUCTION. The catalogue for 1931 and 1932 is published separately in an effort to give far more complete information than was available for the earlier years, and because the last two years mark fundamental changes in the industry, including the swing to superheterodyne, the introduction of a large number of new tubes, and advent of the small models, and the rapid downward trend of prices. The tabulation is presented in a new form, and many new symbols have been used. The symbols used in the earlier listing have been retained, but are repeated below for convenience.

ARRANGEMENT. Manufacturers are listed alphabetically with a heading giving the manufacturers name, the trade name, the location of the factory, the number of chassis and models, and the range of prices and number of tubes, for the two year period. Column headings are given at the top of each page. A heavy vertical line divides chassis information, on the left, from model information, on the right. Models are listed below the chassis they employ. No ditto marks are used, the data on each line applying to subsequent lines, until otherwise shown. Single dashes indicate that no information was available. Double dashes indicate that the receiver does not have the particular tube or feature.

COLUMNS. The first three columns give type of power supply, number of tubes, and type of circuit. The next six columns, between the double rules, show the type and position of all tubes. Where tube positions are not known, the tube list is given in parenthesis. The next three columns give the tuning range, the control arrangements, and the indicators. Model information, to the right of the black line, includes number and name, first advertised Eastern list price, type of cabinet, type and number of loud speakers, and references to notes giving other features of each receiver, as listed below.

COLUMN HEADINGS - ABBREVIATIONS - SYMBOLS - NOTES

P - POWER; A-AC (60 cycles); B - Battery; C-DC
U - Universal, AC or DC;
Star means 25 cycle model is also available
T - Number of tubes, (excluding ballast tube)
C - CIRCUIT: N - Neutrodyne REG - Regenerative
SH - Superheterodyne
TRF - Tuned Radio Frequency

TUBES - Underlining means two tubes are used
RADIO - Number and type of RF amplifier tubes
D - Type of 1st Detector
O - Type of Oscillator (Star means function is performed by 1st Detector)
IF - Number and type of IF amplifier tubes
D - Type of 2nd Detector (W - Wunderlich)
1st - Type of 1st AF amplifier tube
OUT. - Number and type of AF Output Tubes
(In Push-Pull unless otherwise noted)
RECT. - Type of Rectifier tube
AVC - Type of tube used for AVC (Star means function if performed by 2nd Detector)
NS - Type of tube used for noise suppression

R - RANGE; B - Broadcast 200 - 550 m.
L - Long Wave 550 - 2000 m.
P - All Police & Television, 75 - 200 m.
p - One Police Band 150 - 200 m.
S - Short Wave 15 - 200 m.

CONT. - CONTROL
A - Automatic tone compensation
N - Automatic noise suppression
R - Remote Control, electrical or mechanical
T - Manual tone control
U - Automatic selectivity adjustment
V - Automatic Volume Control

TUNING: D - Vernier Drive Dial
G - Four dials in one.
M - Resonance Indicator
Q - Full Vision Dial
3 - Hair-line Shadow Dial
Suffix 3 or 4, 3 or 4 gang condenser

MODEL NUMBER AND NAME: Star preceding number means chassis is available in different cabinets.

PRICE: First advertised Eastern price with tubes. Star indicates price is without tubes.

CAB. - CABINET STYLE
A - Automobile Radio
BB - Book-Back Table Model
BC - Bookcase with Clock
BR - Bar and Radio
C - Console
ch - Chassis only
CL - Consolette
CM - Console or Midget
CN - Column
Cp - Compact
CT - Console Table
D - Desk-type Floor Cabinet
GC - Grandfather Clock
HB - Highboy
HT - Home Talkie
K - Kit
LB - Lowboy
LP - Portable Lowboy
M - Mantle or Midget
m - Metal
MC - Mantle or Midget with Clock
ML - Metal Locker
Mn - Miniature.
MP - Midget Radio Phonograph
MS - Midget or Chest
PA - Portable and Automobile
PN - Radio Piano
Pr - Portable
R - Rack
RP - Radio Phonograph Combination
SS - Smoking Stand
St - Chest
T - Table Model

SPKR. - TYPE AND NUMBER OF LOUD SPEAKERS
D - Dynamic
M - Magnetic
D-M Dynamic or Magnetic
PD - Permanent Magnetic Dynamic
Number indicates number of speakers
Star indicates speaker costs extra

NOTES.

a Price less batteries or power pack
b Phonograph optional at extra cost
d Class B amplification
e Early model
f Late model
g Phonograph Pick-up connection
h1 Also has one '24 type tube in RF amplifier
h2 " " " '27 " " " RF " "
h3 " " " '57 " " " AF " "
h4 " " " '24 " " " IF " "
h5 " " " '36 " " " IF " "
h6 " " " '56 " " " AVC
h7 " " additional '24 short-wave detector, '35 untuned RF and '27 oscillator.
h8 " " one '37 type tube in RF amplifier.
h9 " " a voltage regulator tube
1h " " one '80 type tube in rectifier
2h " " " '827 " " " AP amplifier
3h One RF amplifier stage is untuned
4h Also has one '58 type tube in oscillator, '58 in 1st AF, and '80 in rectifier.
5h " " one '27 type tube in oscillator
6h " " " '57 " " " as 1st Detector
7h " " " '58 " " " in 4th RF stage
8h " " " '56 " " " as voltage regulator.
9h " " " '58 " " " as phase changer
ha " " " '35 " " " in AVC
hb " " " '27 " " " as harmonic generator
hc " " " '56 " " " " "
hd Has four untuned RF stages
he Also has two '56 type tubes in AF Amplifier
hf Early models use two '45 tubes in AF output.
j Uses one or more Spray-Shield tubes
k AF output tubes are in parallel
l Interchangeable with "24" series at \$7.50 extra.
n Automatic Phonograph
pa Police-automotive
pl AF output tubes in parallel push-pull
ps Police station type
q Converter
q1 Adapter
r Local-Distance switch
s Single Band-Selector switch
tr Television Receiver
ts Television Scanner only
trs Television receiver and scanner
u For use with headphones
v Tuner only
