Breakthrough Efficiencies meet Solid State Technology.
The world has changed. For UHF TV stations, it’s time to meet tomorrow.

Our Mission: Develop a powerful, high performance, broadband, solid state UHF transmitter that allows for dependable, highest signal quality and savings in both energy and cost, while providing flexibility to suit every station, no matter how large or small.

Solution: We merged leading scientific advances with today’s demanding environmental issues to create PARALLAX™—an exciting, unique system of vertical “building block” modules with wideband amplifiers, high-efficiency Doherty Architecture, and a double-sided liquid cooling plate configuration that optimizes RF power density, is simple to install, and easy to maintain.

Meet PARALLAX™ for UHF: Because the New World has arrived.

All-Round Innovation.

SAM’s unique mix of experience and energy is complemented by a true belief in innovation. It is fundamental to everything we do, and helps us deliver solutions that really make a difference to our customers.

Cost Innovation
We understand the constant pressure media organizations face to reduce cost from their operations. That understanding is reflected in the development of solutions that maximize efficiency and productivity across the media production chain; including collaborative editing, color and finishing, extensive MAM, workflow automation and resource planning, uniquely intelligent Media Biometrics’ monitoring and control and comprehensive automated playout solutions.

IP Innovation
SAM is at the forefront of developments in IP, we offer products that work today in the SDI domain and allow expansion into the IP world without excessive risk or substantial upgrades. Our switchers, routers, infrastructure and playout systems are all available with IP interfaces supporting both uncompressed (SMPTE 2022-6 and VSF TR-03) and a range of compression formats, including VC-2. Familiar control interfaces provide hybrid SDI/IP operation.

Image Processing Innovation
Our image processing technology is renowned the world over. Offering a complete range of high quality format and framerate conversion that covers every need, from high-end drama to fast-action sports and corporate events. Developed and refined over many years, our patented conversion algorithms produce stunning results, even from the most challenging material.

4K/8K Innovation
For us, UHDTV is all about enabling you to create more compelling content and deliver more immersive viewing experiences for your audiences. So whether you are producing a live sporting event, posting a TV drama, or finishing a feature film for theatrical release, SAM can help you take advantage of all that UHDTV has to offer – without blowing your budget.

If you want to go IP immediately, next year or 5 years from now, we have products and systems you can invest in with confidence.

Bring the story to life with real-time, relevant videos from Canada’s trusted news leader

With a significant increase in the consumption of online news video and a growing number of people accessing news video weekly, more and more broadcasters are relying on real-time, bilingual multimedia storytelling from Canada’s most trusted news source.

To help you increase audience engagement and ad revenue, The Canadian Press complements its articles, audio, photos and graphics with fully produced HD news videos that can be used as-is, and edited or raw footage that can be used on-air or online in your own video stories.

CONTACT US TODAY FOR A FREE TRIAL to see first-hand how real-time news videos can help captivate your audience!

CANADA’S TRUSTED NEWS LEADER
At Sony, we’re committed to providing every level of production with the best possible creative tools. That’s why all these cameras deliver the phenomenal exposure latitude and color gamut of Sony’s proprietary image sensors. Plus the power of our image processors, the efficiency of our codecs, clever ergonomics and a choice of Sony’s lenses optimized for moving pictures. From the full-frame 4K of the a7S II to the 8K capability of the F65, we bring the science. You bring the art.
