GOOD NEWS . . .

RADIO NEWS, foremost American Radio magazine, can now be obtained direct by post from America ; the only sure way of receiving copies regularly.

RADIO NEWS unfolds, month by month, the complete story of radio research and development. Editorially and in presentation, printing and production, it maintains the highest American standards. Each issue contains from 136 to 160 pages of news, articles, pictures and advertisements, brilliantly written and illustrated.

Radio technicians, dealers, business and factory executives, radio specialists in the services, amateurs, "hams," officials, research specialists, constructors, all are fully catered for. The scope of RADIO NEWS, in all that matters, is complete.

For a subscription of £1 5s. 0d., inclusive of postage, payable in advance (equal to 2s. 1d. a copy), the postman will deliver a copy at the door every month for a year. For two years the rate is £2 5s. 0d. and for three years £3 0s. 0d.

Subscription orders may be placed through your Radio dealer or newsagent or, in case of difficulty, send your order (name and full address in BLOCK LETTERS, please) with remittance covering the period required, to us at the address below.

. . . . RADIO NEWS

POPULAR PHOTOGRAPHY, FLYING, PLASTICS.

From the same publishers come these three superb magazines, each completely fulfilling, in its own sphere, the same essential purpose as RADIO NEWS. Informative to the highly skilled operator or technician, yet understandable and interesting to the amateur : intensely practical, yet never dry or stodgy. Brilliantly written, copiously illustrated and beautifully produced, each magazine maintains the highest standards for which American magazines are famous.

Particulars of subscription rates and facilities on request.

NOTE.—C3 is a very small capacity coupling the oscillator and first input stages. Stray capacities are sometimes sufficient coupling, but a 5 mmfd. condenser might be used, or the two circuits mounted sufficiently close to give coupling and injection of oscillator voltage.

"TECHNI-GEN" CONSTRUCTORS' ENVELOPES

Correspondence with many thousands of purchasers of our well-known Radio books has revealed a considerable demand for Radio designs in sheet form, and has indicated the types of sets desired.

The new "TECHNI-GEN" series of Radio Constructors' Envelopes is based upon this information.

Each envelope has an attractive cover design in two colours and contains a broadsheet, size 22½ in. by 17½ in., giving a chassis blueprint, a picture of the set which, in each case, has been built and fully tested, circuit diagrams and explicit instructions.

Lewis George, the well-known Radio designer and author, is responsible for the production of the Series and British component manufacturers have co-operated in developing the designs.

No. 1. HOW TO MAKE A 3-VALVE PLUS RECTIFIER AC/DC TEF RECEIVER. For medium waves (200-557 M. only). This receiver is provided with a tone control and a method of using an energised loudspeaker is illustrated and described.

No. 2. HOW TO MAKE AN "ECONOMY" 4-VALVE PLUS RECTIFIER AC/DC SUPER-HET. RECEIVER. For medium waves (200-557 M. only). A.V.C. and Tone Control is incorporated.

No. 3. HOW TO MAKE "ALL-DRY" 4-VALVE BATTERY SUPER-HET. PORTABLE RECEIVER. For medium waves (200-557 M. only). A.V.C., Tone Control and a Frame Aerial are incorporated. Provision is also made for the use of an outside aerial.

No. 7. HOW TO MAKE A DE LUXE TUNING UNIT FOR THE 20-WATT "QUALITY" AMPLIFIER. Both straight and superhet circuits are incorporated allowing wide-band local station as well as all-wave reception. Continuously variable tone control circuits are included.

No. 4. HOW TO MAKE AN AC/DC "QUALITY" RECEIVER. For medium and long waves. This receiver is suitable for both local station reception and for the more powerful Continental stations. Approximately 8-watts push-pull output is provided.

No. 5. HOW TO MAKE A 20-WATT "QUALITY" AMPLIFIER. Separate treble and bass tone controls are incorporated and the output stage comprises two tetrodes in push-pull with negative feedback.

No. 6. HOW TO MAKE A PORTABLE AC/DC PUBLIC ADDRESS AMPLIFIER. 10-watts output with provision for mixing two microphone inputs and a gramophone pick-up. A suitable carrying case is illustrated.
