## The Season's Greetings

Derek G3TGE-Roy G3TLE  
Kerry G6IZF

The obvious thing you're going to need as an SWL is a decent HF receiver, so why not drop in to Photo Acoustics and listen to these, for a start...

The new high technology ICOM R70 at £499

The memorable new TRIO R2000 at £398.82

Trio's low budget high quality receiver The Trio R600 at only £257.60

To complete the range for you to hear, we have the top quality Yaesu FRG 7700 at £335 and the budget conscious Lowe SRX 30D at only £215.

### TRIO for OSCAR

Now that OSCAR 10 is working, it's time to start thinking about working the world on 2m and 70cm. From our QTHs in and around Newport Pagnell, we regularly work through this satellite and the equipment that we use may surprise you. Although we have access to most makes, we still prefer to use a Trio 9130 and a Trio 9500. These radios are beautifully made and have all the facilities that you could wish for. You've seen them advertised before, so we are not going to fill the page with a list of all their features. Instead we are more than willing to demonstrate them to you in our showroom. Why not call in and see us and also see just how easy it is to use OSCAR 10, described by Karl Meinzer, DJ4ZC, of the European Command Centre, as "...the most perfect amateur satellite yet put into earth orbit".

TR9130  
£433

TR5900  
£395

## THE PA EQUIPMENT DESK
