

# QRM KILLERS

## MODEL SRB2

is the definitive and long awaited answer to the Russian Woodpecker. Others claim to solve the problem of the distinctive RAT A - TAT TAT of the Russian radar system. **DATONG are the first to succeed with a fully automatic blanker.**

With the introduction of model SRB2 the Woodpecker is dead. Completely automatic in operation, SRB2 locks onto the Woodpecker within a second or so of its appearance and blanks it out completely. SRB2 adjusts automatically and continuously to changing pulse widths and phase changes that defeat the manual blankers. SRB2 can even deal with more than one Woodpecker at a time. User selectable between 10 and 16hz repetition rates, SRB2 connects in series with loudspeaker and antenna leads, and is equally effective on SSB, AM and CW. A power supply of 10 to 16 volts @ 150 ma is required.

Price: **£75.00 + VAT (£86.25 Total)**

## MODEL ANF

The value for money, stand alone automatic notch filter that doubles as a CW filter. Model ANF is small in size but neat in looks and big in performance. Simply connect model ANF in series with the loudspeaker lead of your receiver and from then on heterodynes, whistles and other steady tones that often make listening on the crowded amateur and short wave bands hard work will vanish automatically, as model ANF notches them out. A bargraph LED display shows you the frequency of the offending interference. At the push of a button model ANF becomes a good CW filter eliminating all but the signal you want to hear. Manual or automatic operation in notch and peak modes, plus automatic frequency control, makes model ANF extremely versatile and easy to use.

A power supply of 10 to 16 volts DC @ 100 ma is required. Model ANF is supplied with connecting leads, and is identical in size to model SRB 2

Price: **£59.00 + VAT (£67.85 Total)**

**DATONG ELECTRONICS LIMITED**
