Your Dial Readings

Medium Waves

The Stations

HOW TO USE IT

How to Dial Readings on your medium wave dial. The dial is divided into four quadrants, each labeled with a different color. The outer edges of the dial correspond to different frequency ranges.

1. Identify the desired frequency range.
2. Rotate the dial to align the pointer with the frequency range.
3. Read the station number from the dial.

NOTES:

- Frequency ranges are marked in the outer edges of the dial.
- Station numbers are marked within the quadrants.
- Always check the accuracy of the readings.
