EXOTIC CARMEN MIRANDA HERE

VAUGHAN WILLIAMS’ SIXTH SYMPHONY

Originality and Vitality

BY MALCOLM RAYMENT

The first performance of a new work by Vaughan Williams is inevitably an event of major importance in the world of music. His new symphony, the Sixth in E minor which was heard for the first time at the Royal Philharmonic Society’s Concert which took place on Wednesday, April 31, must, however, have exceeded the hopes of even his greatest admirers. We might well have expected Vaughan Williams at the age of seventy-two, to have continued along the paths that have proved so successful in the past, but the originality of his new work is only equalled by its vividity.

One is reminded of the youthful fire and dash that that great composer, Walton, infused into his early works. The first movement of the new symphony is replete with a degree of intensity and excitement that is quite unexpected in such a composer. The Second movement, aenade of a science fiction novel, is played with a verve and an intensity that is quite remarkable. The Third movement, a charivari, is played with a passion that is almost too much to bear. The Fourth movement, a rondo, is played with a joyous exuberance that is quite breathtaking.

PETER YORKE ORCHESTRA IN NEW SHOW

Peter York will take his first motion picture, "The Shepherds' Reunion," to be shown at the Embassy Theatre in London in June. The show, which has not yet been completely ready for release, will be performed in four parts: "The Shepherds," "The Shepherd's Lament," "The Shepherd's Triumph," and "The Shepherd's Song." The show will be performed in all parts of the United Kingdom, including London, Manchester, Liverpool, and Birmingham.

The Enigma Variations

THERE have been lots of reviews recently of Leonard Bernstein’s lullaby, ‘The Enigma Variations’ for the Royal National Orchestra of Scotland. They are all good. It is an excellent piece of work by Mr. Bernstein. The Royal National Orchestra, directed by Mr. Reiner, is highly praised. It is the work of a composer who is very familiar to us, and we can only applaud Mr. Bernstein for his efforts in this field.
