## INDEX

**VOLUME 61**

(April 1968–January 1969)

### A
- Aerial, Measurements on Goomhill 85 ft Diameter (Part I) ............................................. 171
- Aerial No. 1, Re-equipping Goomhill .......... 254
- Allan, A. F. G. Trunk and Junction Cable Pressurization: A Note on Progress .......................... 238
- Amplifier and Loudspeaker, No. 5, A Telephone Waiting- Line Amplifier ............................ 228
- Association Section Notes ......................................................... 72, 140, 213, 282
- Automatic Controls for Central Heating, An Introduction to ............................................. 154
- Axt, G. A., The Effects of the Earth's Magnetism on Submarine Cables ................................. 37

### B
- BXB 1121 Crossbar Equipment, Transit Switching Centres Using (Part 2) ......................... 20
- Baker, D. (Appointment as Controller) .......... 67
- Balcombe, J. (Appointment as Controller of Factories) ..................................................... 65
- Banks, A. Motor-Driven Cleaner for 2,000-Type and 4,000-Type Selectors ......................... 56
- Banner, J. A., and Priestley, W. D. Guarding of Road- works .................................................. 240
- Barker, H. (Appointment as Director) .............. 65
- Bennett, G. H., and Bolton, L. J. Design Features and Application of the British Post Office 24-Channel Pulse- Code Modulation System ................................ 95
- Best, F. L., and Martin, R. W. Ploughs for Laying Duct and Cable ..................................... 159
- Bideford "Long Bridge" Flood Damage to .......................................................... 71
- Bigg, R. W. The Quest for a Telegraph Relay of Greater Reliability ..................................... 46
- Bissell, D. R. Ladder Safety Devices .............. 340
- Blakey, H., and Green, B. A. A Motor-Driven Cleaner for 2,000-Type and 4,000-Type Selectors Banks 56
- Blanchard, D. T., and Ryan, W. A. Trunk Transit Network: Incoming Register-Transmitters for Director and Non-Director Areas .................................................. 176
- Bolton, L. J., and Bennett, G. H. Design Features and Application of the British Post Office 24-Channel Pulse- Code Modulation System ................................ 95
- Brearley Receiving Station, The New ................ 75
- Breary, D. (Appointment as Staff Engineer) ........ 133
- Bronsdon, E. G. The New Brearley Receiving Station ....................................................... 135
- Brownlow, P. E. (Appointment as Chief Motor Transport Officer) ...................................... 68

### C
- Cable, Drop-Wire, No. 4 .......................................................... 19
- Cable-Drum Trailers, Two New ......................... 222
- Cable-Pair Appropriation Records, Local-Line Plant: Rationalization of the ................. 28
- Cable, Ploughs for Laying Duct and Cable ........ 159
- Cable Pressurization: A Note on Progress, Trunk and Junction .......................................... 238
- Cable Ships, Development of Bow and Stern Whiskers for Cables, A Resin Encapsulated Termination for Coaxial-Pair .......... 90
- Cables, The Effects of the Earth's Magnetism on Submarine Cables .................................... 37
- Cardiff, Pipe Jacking at Roadworks in ............................................................................. 137
- Cartridge-Type Fixing Gun, A New .......... 163
- Central Heating, An Introduction to Automatic Controls for Channel Islands for the Independent Television Authority, Television Links to the ............................. 48
- Chapman, K. J., and Hughes, C. J. A Field Trial of an Experimental Pulse-Code Modulation Tandem Exchange ................................................................. 186
- Charlton, F. W. Two New Cable-Drum Trailers ................................................................. 222
- Cleaner for 2,000-Type and 4,000-Type Selector Banks, A Motor-Driven ......................... 56
- Clinch, C. E. E. (Appointment as Staff Engineer) ......................................................... 67
- Coaxial-Pair Cables, A Resin-Encapsulated Termination for ............................................ 53
- Coleman, W. L. A. (Appointment as Director) ................................................................. 67
- Communication-Satellite Earth-Station Planning and Operation, United Kingdom Seminar on 102
- Computerized Production of Exchange Performance Data ................................................. 279
- Computers, Multi-Access ................................................................. 215
- Contact Opening and Closing Phenomena and Quenching Techniques, Electrical Contacts in Telephone Exchanges (Part I) .............................................. 263
- Coombs, A. W. M. (Appointment as Senior Principal Scientific Officer) .......................... 133
- Coppin, J. P. (Appointment as Staff Engineer) ................................................................. 67
- Cover for Carkway Jointing Chambers, A Double-Triangular Type Frame and .............. 82
- Creighton, J. L., and Wase, A. E. F. The New Very-Low-Frequency Transmitter at Rugby Radio Station ................................................................. 232
- Crooks, K. R., and Holmes, A. C. Programmed Learning — A New Design for Training (Part 2) ................................. 15
- Crossdale, A. C. (Appointment as Staff Engineer) .......................................................... 135
- Crossbar Equipment, Transit Switching Centres Using BXB 1121 (Part 2) .................. 20
- Crouse, D. V., and Jones, D. C. A New Lamp Signalling Cord P.M.B.X.—Switchboard, P.M.B.X. No. 4/1A .............................................................................. 84
- Cumming, W. S., and Kearsley-Brown, R. H. G. Trunk Transit Network: Access from Controlling Register-Translators at Group Switching Centres ............................................. 120

### D
- Data Transmission Network for the Ministry of Social Security, A .................................. 224
- Davis, E. (Appointment as Controller) ............................................................................. 66
- Design Features and Application of the British Post Office 24-Channel Pulse-Code Modulation System ................................................................. 95
- Design, Telephone-Exchange Equipment Planning and .................................................... 148
- Development of Bow and Stern Whiskers for Cable Ships Dialling-in to P.A.B.X. Extensions, Direct ................................................................. 245
- Direct Dialling-in to P.A.B.X. Extensions ........................................................................ 245
- Director and Non-Director Areas, Trunk Transit Network: Incoming Register-Translators for ................................................................. 176
