

HEAR WHAT YOU'VE BEEN MISSING!

*Listen with an 801 Omnisonic Imager,TM
a quantum leap forward in sound reproduction!*

OMNISONIC IMAGERYTM IS HERE!

Our innovative state-of-the-art electronics restore the acoustical time-field characteristics and angular sonic positioning of the original recorded signal. The 801 analyzes the input signal and determines relative positions of instruments and vocals on the original source. They are then placed about the listening space creating the physiological sensation of three-dimensional sound - what we call omnisonic imageryTM - using only two speakers!^{*} Sound appears to come from many sources within the listening space. A common reaction is to look about for other speakers. *And you don't have to sit rigidly fixed at a focal point between the speakers to enjoy the 801!*

^{*}2 or more speakers!

LIFETIME WARRANTY!

You get a lifetime warranty on the active circuitry and one year on all other components (case and line cord excluded) provided your 801 is used as specified

SUGGESTED LIST. ONLY \$175.95

Now that you've read all about our 801 Omnisonic ImagerTM, don't you think it's time to hear one? If we have stimulated your interest in seeking the finest sound reproduction in the purest sense, please ask your dealer for a live demonstration. If you have any questions, or need to know the name of the dealer nearest you, call or write to:

NEW DIMENSIONS IN STEREO AND MONO!

Stereo with an 801 Omnisonic ImagerTM creates a vivid feeling of "being there". Depending upon the source, the system, and the listener, sound appears to surround you, emanating from well beyond the speakers, above and below, near and far. The music is so alive it envelops you. It is the sound of the future.

From mono, the 801 creates omnisonic dimensional sound.TM You can input an AM or TV source (from the earphone jack on your set) via the 801 and into your stereo system. The result is a "live" sound with depth and clarity, as well as separation. Television sound is vastly improved with the 801!

RETROFITS TO MOST STEREO SYSTEMS!

Any system with an internal tape loop can connect to the 801. Component systems can insert the 801 between pre-amp, other accessories, and the amplifier. There's a built-in tape monitor button on the 801, so you don't lose your existing tape monitor facility. The 801 works on any stereo or mono source - FM, tapes, records, AM, TV. You can record selections via the 801 and replay them on conventional home-use stereo equipment.
